

DSP HEALTHCARE FUND

An open ended equity scheme investing in healthcare and pharmaceutical sector

- » Invests in companies which would benefit from growing demand in healthcare driven by rising incomes, increasing awareness and ability to spend more on health, increased export opportunities and a positive regulatory environment
 - » Portfolio is currently mid and small cap oriented to capture disproportionate correction in mid/small cap stocks vs large cap health care stocks as these companies are poised to benefit from earnings growth and are more reasonably valued today than earlier.
 - » Access to international healthcare stocks upto 25%^ . Low correlation between Indian and US Healthcare may help reduce volatility and may deliver better return per unit of risk.
- ^The scheme may invest upto 25% of its net assets in foreign assets/securities. However, the scheme currently intends to largely invest in US Healthcare securities.
