Note 1- All such investments shall be made with the prior approval of the Board of AMC and the Board of trustees.

Note 2 - Investment in short-term deposits of scheduled commercial banks-

Pending deployment of funds of the Scheme shall be in terms of clause 12.16 of the SEBI Master Circular, the AMC may invest funds of the Scheme in short-term deposits of scheduled commercial banks, subject to the following conditions:

1. "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
2. Such short-term deposits shall be held in the name of the Scheme.
3. The Scheme shall not park more than 15% of their net assets in the short term deposit(s) of all the scheduled commercial banks put together. However, it may be raised to 20% with the prior approval of the Trustee. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
4. The Scheme shall not park more than 10% of their net assets in short term deposit(s) with any one scheduled commercial bank including its subsidiaries.
5. The Trustee shall ensure that the funds of the Scheme are not parked in the short term deposits of a bank which has invested in the Scheme.
6. AMC will not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.
7. The Trustee shall also ensure that the bank in which a scheme has short term deposits do not invest in the scheme until the scheme has short term deposits with such bank.

The above provisions do not apply to term deposits placed as margins for trading in cash and derivative market.

Prudential norms for liquidity risk management:

The Scheme shall duly comply with AMFI Best Practice Guideline Circular No. 117 of 2024-25 dated November 13, 2024 on prudential norms for liquidity risk management for open ended schemes debt schemes and such other clarifications and amendments issued from time to time in this regard.

Further, in terms of AMFI Best Practice Guideline Circular dated November 13, 2021, it was clarified that asset allocation limits base shall be considered as net assets excluding the extent of minimum stipulated eligible assets i.e. higher of 10% of net assets or LR-CRaR (Liquidity ratio based on 30-day Conditional Redemption at Risk).

Stock lending:

Subject to SEBI (MF) Regulations and the applicable guidelines issued by SEBI, the Mutual Fund may engage in stock lending. The AMC shall comply with all reporting requirements and the Trustee shall carry out periodic review as required by SEBI guidelines. Stock lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on expiry of the stipulated period.

The Investment Manager will apply the following limits, should it desire to engage in Stock Lending:

1. Not more than 20% of the net assets of a Scheme can generally be deployed in Stock Lending.
2. Not more than 5% of the net assets of a Scheme can generally be deployed in Stock Lending to any single counter party.

Investment in units of Corporate Debt Market Development Fund-

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with clause 16A of the SEBI Master Circular, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Pursuant to clause 16A of the SEBI Master Circular & any other circulars/ guidelines/ letters issued by SEBI / AMFI from time to time, the calculations of Potential Risk Class (PRC) Matrix, asset allocation limits, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF wherever applicable. Additionally, in terms of aforesaid circular, the investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes.

Cumulative gross exposure-

As per Clause 12.24 of the SEBI Master Circular, the cumulative gross exposure through debt, derivative positions, repo transactions and credit default swaps in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme. Cash and cash equivalents as per SEBI letter no. SEBI/HO/ IMD-II/DOF3/ OW/P/ 2021/ 31487 / 1 dated November 03, 2021 which includes T-bills, Government Securities, Repo on Government Securities and any other securities as may be allowed under the regulations prevailing from time to time subject to the regulatory approval, if any, having residual maturity of less than 91 Days, shall not be considered for the purpose of calculating gross exposure limit.

Rebalancing of deviation due to short term defensive consideration-

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term on defensive considerations as per Clause 1.14.1.2 of the SEBI Master Circular; the intention being at all times to protect the interests of the Unit Holders and the Scheme shall endeavor to rebalance the portfolio within 30 calendar days.

It may be noted that no prior intimation/indication will be given to investors when the composition/asset allocation pattern under the Scheme undergoes changes within the permitted band as indicated above.

Portfolio rebalancing in case of passive breach-

As per Clause 2.9 of the SEBI Master Circular and the clarifications/ guidelines issued by AMFI/ SEBI from time to time, in the event of deviation from mandated asset allocation mentioned, passive breaches (i.e. occurrence of instances not arising out of omission and commission of AMC), shall be rebalanced within 30 business days. Where the portfolio is not rebalanced within above mentioned period, justification in writing,

including details of efforts taken to rebalance the portfolio shall be placed before Investment Committee. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period.

In case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in para 2.9.3 and 2.9.4 of SEBI Master Circular.

B. WHERE WILL THE SCHEME INVEST?

The Scheme will invest in debt and money market securities, which include, but are not limited to:

- Debt obligations of the Government of India, state and local governments, government agencies, statutory bodies, public sector undertakings, scheduled commercial banks, non-banking finance companies, development financial institutions, corporate entities and trusts (securitised debt)
- Interest rate and credit derivatives as permitted by SEBI
- Money market securities include commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, Tri-party REPO repurchase agreement (repo), reverse repurchase agreement (rev-repo), Bills Rediscounting Scheme (BRDS) and any other like instruments as specified by the Reserve Bank of India from time to time
- Pass through, Pay through or other Participation Certificates, representing interest in a pool of assets including receivables
- The non-convertible part of convertible securities
- Securitized Debt
- Debt instruments with SO / CE rating
- Debt Instruments with special features (AT1 and AT2 Bonds)
- Tri-party repos
- Repo of corporate debt securities
- Debt derivative instruments
- Structured Notes
- Investment in ReITS and InVITS
- Units of Mutual funds as may be permitted by regulations
- Corporate Debt Market Development Fund ('CDMDF')

Any other instruments/securities as may be permitted by RBI/SEBI/such other Regulatory Authority from time to time.

From time to time, it is possible that the Investment Manager may decide to invest a higher proportion in debt and money market securities, depending on prevailing economic and market conditions and the need to adopt a defensive posture on the portfolio of the Scheme.

The securities mentioned in, "**Where will the Scheme(s) invest?**", could be listed, to be listed, unlisted, privately placed, secured, unsecured, rated or unrated (subject to the rating or equivalency requirements discussed above) and of any maturity. The securities may be acquired through secondary market operations, primary issues/offerings, other public offers, Private Placement and negotiated deals amongst other mechanisms.

For detailed definition/description of instruments and applicable regulations/guidelines for instruments please refer Section II.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The Investment Manager will invest in those debt securities that are rated investment grade by credit rating agencies or in unrated debt securities, which the Investment Manager believes to be of equivalent quality. In-house research by the Investment Manager will emphasize on credit analysis, in order to determine credit risk.

The investment process follows a top down approach taking into account aspects like interest rate view, term structure of interest rates, systemic liquidity, RBI's policy stance, inflationary expectations, Government borrowing program, fiscal deficit, global interest rates, currency movements, etc.

Investments in derivatives

SEBI has permitted all the mutual funds to participate in the derivatives trading subject to observance of guidelines issued by SEBI in this behalf. Pursuant to this, the mutual funds may use various derivative and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unit holders' interest.

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as interest rates, exchange rates, commodities, and equities.

The fixed Income derivative market has made considerable progress in last two years. Interest rate swaps have become an integral part of Risk Management practice for most banks. Corporate Treasury have issued Innovative instruments like floating rate debt and constant maturity swaps.

“Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies”.

“The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments”.

Fixed Income Derivatives:

Interest Rates Swap

- The primary reason for engaging in an interest rate swap is to hedge the interest rate exposure

Interest Rate Futures (IRF)

- IRFs can be used for hedging the underlying cash positions.

Forward Rate Agreement (FRA)

- An FRA is an off-balance sheet agreement to pay or receive on an agreed future date, the difference between an agreed interest rate and the interest rate actually prevailing on that future date, calculated on an agreed notional principal amount.
- FRAs are purchased to hedge the interest rate risk; an investor facing uncertainty of the interest rate movements can fix the interest costs by purchasing an FRA.

For detailed Derivative strategies, please refer SAI.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

AMFI Tier I benchmark/ Benchmark of the Scheme: CRISIL Credit Risk Debt B-II Index

Justification: SEBI vide its circular had provided guiding principles for bringing uniformity in benchmarks of mutual fund schemes & accordingly introduced a two-tiered structure for benchmarking of schemes for categories of mutual fund schemes. AMFI has published the first tier benchmarks to be used by the AMCs for all open ended debt schemes as per the PRC Matrix. Accordingly, the benchmark is selected from the benchmarks notified by AMFI for the category of scheme in line with the Scheme's PRC level/credit risk level/ Macaulay's duration (as available for the benchmark).

The Trustee may change the benchmark for any of the Schemes in future, if a benchmark better suited to the investment objective of that Scheme is available at such time and as per the guidelines and directives issued by SEBI from time to time.

vi. Investments of AMC in the Scheme:

In terms of sub-regulation 16(A) in Regulation 25 of SEBI (Mutual Funds) Regulations, 1996 read along with clause 6.9 of the SEBI Master Circular and AMFI Best Practice Guidelines Circular No.100 /2022-23 dated April 26, 2022 on 'Alignment of interest of AMCs with the Unitholders of the Mutual Fund schemes', the AMC shall invest such amounts in such schemes of the mutual fund, based on the risks associated with the schemes, as may be specified by the SEBI from time to time.

Pursuant to regulation 43A of SEBI (Mutual Funds) Regulations, 1996 and clause 16A of the SEBI Master Circular, AMC shall make a one-time contribution equivalent to 2 bps of the AUM of the specified debt oriented schemes as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days of request from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

In case of delay in contribution by the Scheme and AMC, the AMC shall be liable to pay interest at fifteen percent (15%) per annum for the period of delay.

For details of investments of AMC in the scheme refer link- <https://www.dspim.com/mandatory-disclosures/amcs-investments-in-schemes>

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

The NAV of the Units of a Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under each Scheme may be calculated by either of the following methods shown below:

$$\text{NAV Per Unit (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under the Scheme}}$$

The numerical illustration of the above method is provided below.

Market or Fair Value of Scheme's investments (Rs.) = 11,42,53,650.00

Current Assets (Rs.) = 10,00,000.00

Current Liabilities and Provisions (Rs.) = 5,00,000.00

No. of Units outstanding under the Scheme = 1,00,00,000

$$\text{NAV Per Unit (Rs.)} = \frac{11,42,53,650.00 + 10,00,000.00 - 5,00,000.00}{1,00,00,000} = 11.4754$$

N.B.: The aforesaid provisions pertaining to "Calculation of NAV" shall apply in respect of each individual Scheme and/or plan as the case may be. The NAV Per Unit above is rounded off to four decimals.

The NAV will be calculated as of the close of every Business Day.

NAVs will be rounded off to four decimal places. The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Note: In respect of Schemes having Growth and IDCW Options, there will be more than one NAV, one for each Option, after the declaration of the first IDCW by that Scheme.

While determining the price of the units, the mutual fund shall ensure that the repurchase price of Scheme is not be lower than 95% Net Asset Value as provided under SEBI (MF) Regulations. For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

- **Ongoing price for subscription (Purchase Price/switch-in from other schemes/ plans) by investors**

This is the price you need to pay for purchase/switch-in. The Purchase Price of the Units on an ongoing basis will be calculated as described below, which is based on the Applicable NAV

Purchase Price = Applicable NAV

Illustration:

Say, Applicable NAV = Rs. 12/-
Therefore, Purchase Price = Rs.12/-

- **Ongoing price for redemption (sale) /switch outs (to other Schemes/plans of the Mutual Fund)/ intra-Plan switching by investors (Redemption Price)**

This is the price you will receive for redemptions/switch outs. The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any.

In the case of Scheme which currently have no Exit Load, the Redemption Price will be the Applicable NAV. In the case of Scheme having an Exit Load or in which an Exit Load is introduced, the Redemption Price will be calculated as under: Redemption Price = Applicable NAV x (1 - Exit Load)

Illustration:

Say, Applicable NAV = Rs. 12.0000 and the Exit Load is 0.50%,
Redemption Price = $12 \times (1 - 0.005) = \text{Rs. } 11.9400$.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid, marketing and advertising, registrar expenses, printing and stationery, bank charges etc. All such expenses are borne by AMC.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that upto 2 % of the daily net assets of the scheme will be charged to the scheme as expenses. For the actual current expenses being charged, the investor should refer to the website of the mutual fund.

Operating & recurring expenses under regulation 52 (6) & 52 (6A):

The Scheme may charge expenses within overall limits as specified in the Regulations except those expenses which are specifically prohibited. The annual total of all charges and expenses of the Scheme shall be subject to the following limits, defined under Regulation 52 of SEBI MF regulations:

Table 1: Limit as prescribed under regulation 52 of SEBI MF regulations for Debt oriented scheme:

Slab Rates	As a % of daily net assets as per Regulation 52(6) (c)	Additional TER as Regulation (6A) (c) ^	Additional TER per 52	Additional TER as Regulation (6A) (b) ^	Additional TER per 52

On balance of the assets	0.80%	0.05%		0.30%	

Notes to Table 1:

^In addition to expenses as permissible under Regulation 52 (6) (c), the AMC may also charge the following to the Scheme of the Fund under Regulation 52 (6A):

- a. Brokerage and transaction costs which are incurred for the purpose of execution of trade up to 0.12 per cent of trade value in case of cash market transactions and 0.05 per cent of trade value in case of derivatives transactions.

It is clarified that the brokerage and transaction cost incurred for the purpose of execution of trade over and above the said 0.12 percent and 0.05 percent for cash market transactions and derivatives transactions respectively may be charged to the Scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

- b. Additional expenses up to 0.30 per cent of daily net assets of the concerned Schemes of the Fund if new inflows from such cities as may be specified by Regulations from time to time are at least:
 - a. 30 per cent of gross new inflows from retail investors* in the concerned Scheme, or;
 - b. 15 per cent of the average assets under management (year to date) of the concerned Scheme, whichever is higher.

Provided that if inflows from such cities is less than the higher of (i) or (ii) mentioned above, such expenses on daily net assets of the concerned Scheme shall be charged on proportionate basis.

* Inflows of amount upto Rs 2,00,000/- per transaction, by individual investors shall be considered as inflows from “retail investors”.

Pursuant to the directions received from SEBI vide its letter no. SEBI/HO/IMD-SEC-3/P/OW/2023/5823/1 dated February 24, 2023 read along with AMFI communication dated March 02, 2023, w.e.f March 01, 2023 no additional expense shall be charged on the new inflows received on or after March 01, 2023 from specified cities as per Regulation 52 (6A) (b) till any further guidance is received from SEBI in this regard.

The additional expenses charged shall be utilized for distribution expenses incurred for bringing inflows from such cities. The additional expense charged to the Scheme on account of inflows from such cities shall be credited back to the concerned Scheme in case such inflows are redeemed within a period of one year from the date of investment.

- c. *Additional expenses not exceeding 0.05 % of daily net assets of the scheme as per Regulation 52(6A)(c). Provided that such additional expenses shall not be charged to the schemes where the exit load is not levied or applicable*

GST on investment and advisory fees:

- a) AMC may charge GST on investment and advisory fees of the Scheme in addition to the maximum limit of TER as per the Regulation 52(6) and (6A).
- b) GST on expenses other than investment and advisory fees: AMC may charge GST on expenses other than investment and advisory fees of the Scheme, if any within the maximum limit of TER as per the Regulation under 52(6) and (6A).
- c) GST on brokerage & transaction cost: GST on brokerage and transaction costs which are incurred for the purpose of execution of trade, will be within the limit of expenses as per the Regulation 52(6) and (6A).

Others:

In accordance with clause 10.1.12 (a) of the SEBI Master Circular, all scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall be paid from the scheme only within the regulatory limits and not from the books of the AMC, or by the trustee or sponsors.

Provided that the expenses that are very small in value but high in volume (as provided by AMFI in consultation with SEBI) may be paid out of AMC's books. Such expenses can be paid out of AMC's books at actuals or not exceeding 2 bps of the Scheme AUM, whichever is lower.

Further with regards to the cost of borrowings in terms of Regulation 44(2), the same shall be adjusted against the portfolio yield of the Scheme and borrowing costs in excess of portfolio yield, if any, shall be borne by the AMC.

Disclosure relating to changes in TER:

In accordance with clause 10.1.8 of the SEBI Master Circular, the AMC shall prominently disclose TER on daily basis on the website www.dspim.com. Further, changes in the base TER (i.e. TER excluding additional expenses provided in Regulation 52(6A)(b), 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996 and Goods and Services Tax on investment and advisory fees) in comparison to previous base TER charged to any scheme/plan shall be communicated to investors of the scheme/plan through notice via email or SMS at least three working days prior to effecting such change.

The notices of change in base TER shall be updated on the website at least three working days prior to effecting such change Provided that any decrease in TER in a mutual fund scheme due to various regulatory requirements, would not require issuance of any prior notice to the investors.

The prior intimation/notice shall not be required for any increase or decrease in base TER due to change in AUM and any decrease in base TER due to various regulatory requirements.

Illustrative example for estimating expenses for a scheme with corpus of 100 crores:

The AMC in good faith has estimated and summarized in the below table for each Scheme, the expenses on a corpus size of Rs. 100 crores. The actual total expenses may be more or less than as specified in the table below. The below expenses are subject to inter-se change and may increase/decrease as per actuals, and/or any change in the Regulations.

Table 2: The estimated total expenses as a % of daily net assets of the Scheme are as follows:

Expense Head	% p.a. of daily Net Assets (Estimated)
--------------	--

	p.a.)
Investment Management & Advisory Fee	Upto 2.00%
Audit fees/fees and expenses of trustees*	
Custodial Fees	
Registrar & Transfer Agent Fees including cost of providing account statements / IDCW / redemption cheques/ warrants	
Marketing & Selling Expenses including Agents Commission and statutory advertisement	
Costs related to investor communications	
Costs of fund transfer from location to location	
Cost towards investor education & awareness (at least 0.02 percent)	
Brokerage & transaction cost pertaining to distribution of units	
Goods & Services Tax on expenses other than investment and advisory fees	
Goods & Services Tax on brokerage and transaction cost	
Brokerage & transaction cost over and above 0.12 percent and 0.05 percent for cash and derivative market trades, respectively	
Maximum Total expenses ratio (TER) permissible under Regulation 52 (6) (c)	
Additional expenses under regulation 52 (6A) (c)§	Upto 0.05%
Additional expenses for gross new inflows from specified cities	Up to 0.30%

*The Trusteeship fees as per the provisions of the Trust Deed are subject to a maximum of 0.02% of the average net Trust Funds per annum. It has been decided by the Trustee to charge the Trusteeship Fees in proportion to the net assets of each of the Scheme of the Mutual Fund. The Trustee reserves the right to change the method of allocation of Trusteeship fees for the Scheme, from time to time.

§ The nature of expenses can be any permissible expenses including management fees. Additional expenses not exceeding 0.05 % of daily net assets of the scheme as per Regulation 52(6A)(c) shall not be charged to the schemes where the exit load is not levied or applicable.

The goods and service tax on Investment Management and Advisory fees will depend on the total amount charged as Investment Management and Advisory fees. Currently it is chargeable at 18% on Investment Management and Advisory Fees.

Expense Structure for Direct Plan:

Direct Plan will have lower expense ratio than Regular Plan of the Scheme. The expenses under Direct Plan shall exclude the distribution and commission expenses and additional expenses for gross new flows from specified cities under regulation 52(6A)(b). All fees and expenses charged in a direct plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under such heads in a Regular Plan.

The above expense structures are indicative in nature. Actual expenses could be lower than mentioned above.

The purpose of the above table is to assist the investor in understanding the various costs & expenses that the investor in the Scheme will bear directly or indirectly.

For the actual current expenses being charged, the investor should refer to the website of the Mutual Fund.

Illustration of impact of expense ratio on scheme's returns:

Particulars	Regular Plan	Direct Plan
-------------	--------------	-------------

Amount invested at the beginning of the year	10,000	10,000
Annual income accrued to the scheme	1,000	1,000
Expenses other than Distribution expenses	75	75
Distribution expenses	25	
Returns after expenses at the end of the year	900	925
% Returns after expenses at the end of the year	9.00%	9.25%

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time. For the current applicable structure, please refer to the website of the AMC (www.dspim.com) or may call at (toll free no. 1800 208 4499 or 1800 200 4499) or your distributor.

Exit Load	Load chargeable (as % of NAV)
If the units redeemed or switched out are upto 10% of the units (the limit) purchased or switched-in within 12 months from the date of allotment	Nil
If units redeemed or switched out are in excess of the limit within 12 months from the date of allotment	1%
If units are redeemed or switched out on or after 12 months from the date of allotment	Nil

The Exit Load will be applicable for investments made through normal purchase and SIP/STP/SWP transactions.

Note on Exit load exemptions:

1. There will be no Exit Load on inter-option switching.
2. No load will be charged on issue of Units allotted on reinvestment of IDCW for existing as well as prospective investors.
3. No exit load shall be levied in case of switch of investments from Direct Plan to Regular Plan and vice versa

Exit load charged shall be credited to the Scheme. The goods and service tax on exit load shall be paid out of the exit load proceeds and exit load net of goods and service tax shall be credited to the scheme.

Investors may note that the Trustee has the right to impose/modify exit load subject to a maximum as prescribed under the SEBI (MF) Regulations. Any imposition or enhancement in the load shall be applicable on prospective investments only. At the time of changing the load structure, the AMC shall consider the following measures to avoid complaints from investors about investment in the scheme without knowing the loads:

- (i) Addendum detailing the changes will be attached to the SID and Key Information Memorandum (KIM). The addendum may be circulated to all the distributors/brokers so that the same can be attached to all SIDs and KIMs already in stock.
- (ii) Arrangements will be made to display the addendum to the SID in the form of a notice in all the ISCs/offices of the AMC/Registrar.
- (iii) The introduction of the Exit Load along with the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and will also be disclosed in the statement of accounts issued after the introduction of such load.

Investors are advised to contact any of the Investor Service Centers or the AMC to know the latest position on Exit Load structure prior to investing in the Scheme.

INTERPRETATION

For all purposes of this SID, except as otherwise expressly provided or unless the context otherwise requires:

- The terms defined in this SID include the plural as well as the singular.
- Pronouns having a masculine or feminine gender shall be deemed to include the other.
- All references to “US\$” refer to United States Dollars and “Rs.” refer to Indian Rupees. A “Crore” means “ten million” and a “Lakh” means a “hundred thousand”.
- References to times of day (i.e. a.m. or p.m.) are to Indian Standard Time (IST) and references to a day are to a calendar day including non-Business Day.

B. Risk factors

Scheme Specific Risk Factors

Risk Factors associated with investments in Debt Securities and Money Market Securities:

- i. **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. However, certain debt securities may be intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure. Duration risk refers to the movement in price of the invested debt instruments due to change in interest rates over different durations of maturity of instruments. Duration of portfolio is expressed in years and should be used as a measure of the sensitivity of the fixed income instrument to a change in interest rates. A longer portfolio duration is associated with greater price fluctuations. A rise in interest rates could normally lead to decrease in prices and generally negatively affects portfolios having longer duration vis-a-vis portfolios having shorter duration. A fall in interest rate generally benefits portfolio having longer duration. A longer duration portfolio is also generally associated with greater volatility vis-a-vis a shorter duration portfolio.

- ii. **Term Structure of Interest Rates (TSIR) Risk:** The Net Asset Value (NAV) of the Scheme(s), to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Scheme(s) is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates.
- iii. **Credit Risk:** Investments in Debt Securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. Different types of securities in which the Scheme would invest as given in the SID carry different levels of credit risk. Accordingly, the Scheme' risk may increase or decrease depending upon their investment patterns. E.g., corporate bonds carry a higher amount of risk than Government securities. Further, even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated. Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.
- iv. **Rating Migration Risk:** Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.
- v. **Liquidity or Marketability Risk:** This refers to the ease with which a security can be purchased or sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. The liquidity of investments made in the Scheme may be restricted by trading volumes besides operational issues like settlement periods and transfer procedures. Different segments of the Indian financial markets have different settlement processes & periods and such periods may be extended significantly by unforeseen circumstances. There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon. The inability of the Scheme to make intended securities purchases or sale could cause the Scheme to miss certain investment opportunities due to the absence of a well-developed and liquid secondary market for debt securities which would result at times, in potential underperformance in the Scheme.
- vi. **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. Investments in fixed income securities may carry reinvestment risk as the cash flows received may get invested at a lower rate of interest prevailing on the date of investment of cash flows viz. interest or redemptions received during the tenure of the scheme.
- vii. **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- viii. **Risk from zero coupon securities:** As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.
- ix. **Risk associated with floating rate securities:** To the extent the Scheme' investments are in floating rate debt instruments or fixed debt instruments swapped for floating rate return, they will be affected by:
 - a) Interest rate movement (Basis Risk) - Coupon rates on floating rate securities are reset periodically in line with the benchmark index movement. Normally, the interest rate risk

inherent in a floating rate instrument is limited compared to a fixed rate instrument. Changes in the prevailing level of interest rates will likely affect the value of the Scheme' holdings until the next reset date and thus the value of the Scheme' Units. The value of securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The Mutual Fund could be exposed to interest rate risk (i) to the extent of time gap in the resetting of the benchmark rates, and (ii) to the extent the benchmark index fails to capture interest rate changes appropriately;

- b) Spread Movement (Spread Risk) - Though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments;
- c) Settlement Risk (Counterparty Risk) - Specific floating rate assets may also be created by swapping a fixed return into a floating rate return. In such a swap, there is the risk that the counterparty (who will pay floating rate return and receive fixed rate return) may default;
- d) Liquidity Risk: The market for floating rate securities is still in its evolutionary stage and therefore may render the market illiquid from time to time, for such securities that the Scheme are invested in.

Risk factors associated with investments in debt instruments having Structured Obligations / Credit Enhancements:

The Scheme may invest in debt instruments having credit enhancement (backed by assets such as equity shares/real estate or backed by payment mechanisms such as guarantees/ escrows of identified revenue streams). Typically, in such instruments, the profile of the underlying issuer tends to be relatively weaker. The risks with such credit enhanced structures include inability to sell and realize the collateral due to sharp prices moves of the underlying collateral values, erosion in collateral values, and illiquidity of collateral. There is a possibility of the guarantor or underlying issuer going insolvent which also can impact the recovery value of exposure. These instruments are typically less liquid in the secondary market which is an additional risk factor. In case of complex payment mechanisms, these may be challenged in legal courts by the unsecured creditors in case of bankruptcy of the underlying obligors which may result in delays or defaults in payments.

Risk factors associated with investment in unrated securities:

The scheme may invest in unrated securities as permitted under regulation. Investment in unrated securities involve a risk of default or decline in market value higher than rated instruments due to adverse economic and issuer-specific developments. Such investments display increased price sensitivity to changing interest rates and to a deteriorating economic environment. The market values for unrated investments tends to be more volatile and such securities tend to be less liquid than rated debt securities.

Risk factors associated with Investment in special feature bonds:

The scheme may invest in special feature bonds as permissible by the SEBI & scheme offer documents, which may be subordinate to the equity and thus may carry high credit risk and risk of capital loss. Some Tier 2 bonds issued by the banks under the Basel III norms may have such special features.

Risk factors associated with investments in Perpetual Debt Instrument (PDI)

Perpetual Debt instruments are issued by Banks, NBFCs and corporates to improve their capital profile. Some of the PDIs issued by Banks which are governed by the RBI guidelines for Basel III Capital Regulations are referred to as Additional Tier I (AT1 bonds). While there are no regulatory guidelines for issuance of PDIs by corporate bodies, NBFCs issue these bonds as per guidelines issued by RBI. The instruments are treated as

perpetual in nature as there is no fixed maturity date. The key risks associated with these instruments are highlighted below:

- i. Risk on coupon servicing:
 - a. Banks: As per the terms of the instruments, Banks have discretion at all times to cancel distributions/ payment of coupons.
 - b. NBFCs: While NBFCs have discretion at all times to cancel payment of coupon, coupon can also be deferred (instead of being cancelled), in case paying the coupon leads to breach of capital ratios.
 - c. Corporates: Corporates usually have discretion to defer the payment of coupon. However, the coupon is usually cumulative and any deferred coupon shall accrue interest at the original coupon rate of the PDI.
- ii. Risk of write-down or conversion into equity:
 - a. Banks: As per current RBI guidelines, banks have to maintain a Common Equity Tier-1 (CET-1) ratio of minimum 5.5% of Risk Weighted Assets (RWAs), failing which the AT-1 bonds can get written down. Further, AT-1 Bonds are liable to be written down or converted to common equity, at the discretion of RBI, in the event of Point of Non Viability Trigger (PONV). PONV is a point, determined by RBI, when a bank is deemed to have become non-viable unless there is a write off/ conversion to equity of AT-1 Bonds or a public sector capital injection happens. The write off/conversion has to occur prior to public sector injection of capital. This risk is not applicable in case of NBFCs and Corporates
- iii. Risk of instrument not being called by the Issuer:
 - a. Banks: The issuing banks have an option to call back the instrument after minimum period of 5 years from the date of issuance and typically annually thereafter, subject to meeting the RBI guidelines. However, if the bank does not exercise the call on first call date, the Scheme may have to hold the instruments for a period beyond the first call exercise date.
 - b. NBFCs: The NBFC issuer has an option to call back the instrument after minimum period of 10 years from date of issuance and typically annually thereafter, subject to meeting the RBI guidelines. However, if the NBFC does not exercise the call option the Scheme may have to hold the instruments for a period beyond the first call exercise date.
 - c. Corporates There is no minimum period for call date. However, if the corporate does not exercise the call option, the Scheme may have to hold the instruments for a period beyond the call exercise date
- iv. Risk of rating downgrades: The Rating agencies, which rate the instruments, have a slightly different rating methodology for these Instruments compared to plain vanilla bonds. In the event of deterioration of the financial health of the Issuer or due to other reasons, the rating of the Perpetual Debt Instruments may be downgraded whilst the ratings of other bonds issued by the issuer may remain constant. In such a scenario, Perpetual Debt Instrument holders may incur losses on their investment
- v. Liquidity risk: There may be no active market for the Perpetual Debt Instruments on the platform of the Stock Exchanges. As a result, the liquidity and market prices of the Perpetual Debt Instruments may fail to develop and may accordingly be adversely affected. There is no assurance that a trading market for the Perpetual Debt Instruments will exist and no assurance as to the liquidity of any trading market. The liquidity and market prices of the Perpetual Debt Instruments can be expected to vary with changes in market and economic conditions, financial condition and prospects and other factors that generally influence market price of such instruments. Such fluctuations may significantly affect the liquidity and market price of these Instruments, which may trade at a discount to the price at which one purchases these instruments.

Risk factors associated with investment in Tri-Party Repo:

The mutual fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund

Risk associated with investments in repo of corporate debt securities:

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

- i. **Counterparty Risk:** This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. The Investment Manager will endeavor to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis or with entities regulated by SEBI/RBI/IRDA
- ii. **Collateral Risk:** In the event of default by the repo counterparty, the scheme have recourse to the corporate debt securities. Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

Risks associated with segregated portfolio:

- i. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- ii. Security comprises of segregated portfolio may not realise any or desired value.
- iii. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risks associated with investments in Securitized Assets:

A securitization transaction involves sale of receivables by the originator (a bank, non-banking finance company, housing finance company, or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by selling his loan receivables to an SPV, receives consideration from investors much before the maturity of the underlying loans. Investors are paid from the collections of the underlying loans from borrowers. Typically, the transaction is provided with a limited amount of credit enhancement (as stipulated by the rating agency for a target rating), which provides protection to investors against defaults by the underlying borrowers.

Some of the risk factors typically analyzed for any securitization transaction are as follows:

- Risks associated with asset class: Underlying assets in securitised debt may assume different forms and the general types of receivables include commercial vehicles, auto finance, credit cards, home loans or any such receipts. Credit risks relating to these types of receivables depend upon various factors including macro - economic factors of these industries and economies. Specific factors like nature and adequacy of collateral securing these receivables, adequacy of documentation in case of auto finance and home loans and intentions and credit profile of the borrower influence the risks relating to the asset borrowings underlying the securitised debt.

- Risks associated with pool characteristics:

(a) Size of the loan: This generally indicates the kind of assets financed with loans. While a pool of loan assets comprising of smaller individual loans provides diversification, if there is excessive reliance on very small ticket size, it may result in difficult and costly recoveries.

(b) Loan to Value Ratio: This indicates how much percentage value of the asset is financed by borrower's own equity. The lower LTV, the better it is. This ratio stems from the principle that where the borrower's own contribution of the asset cost is high, the chances of default are lower. To illustrate for a Truck costing Rs. 20 lakhs, if the borrower has himself contributed Rs.10 lakhs and has taken only Rs. 10 lakhs as a loan, he is going to have lesser propensity to default as he would lose an asset worth Rs. 20 lakhs if he defaults in repaying an installment. This is as against a borrower who may meet only Rs. 2 lakhs out of his own equity for a truck costing Rs. 20 lakhs. Between the two scenarios given above, the later would have higher risk of default than the former.

(c) Original maturity of loans and average seasoning of the pool: Original maturity indicates the original repayment period and whether the loan tenors are in line with industry averages and borrower's repayment capacity. Average seasoning indicates whether borrowers have already displayed repayment discipline. To illustrate, in the case of a personal loans, if a pool of assets consists of those who have already repaid 80% of the installments without default, this certainly is a superior asset pool than one where only 10% of installments have been paid. In the former case, the portfolio has already demonstrated that the repayment discipline is far higher.

(d) Default rate distribution: This indicates how much % of the pool and overall portfolio of the originator is current, how much is in 0-30 DPD (days past due), 30-60 DPD, 60-90 DPD and so on. The rationale here is very obvious, as against 0-30 DPD, the 60-90 DPD is certainly a higher risk category.

- Credit Rating and Adequacy of Credit Enhancement: Unlike in plain vanilla instruments, in securitisation transactions, it is possible to work towards a target credit rating, which could be much higher than the originator's own credit rating. This is possible through a mechanism called "Credit enhancement". The process of "Credit enhancement" is fulfilled by filtering the underlying asset classes and applying selection criteria, which further diminishes the risks inherent for a particular asset class. The purpose of credit enhancement is to ensure timely payment to the investors, if the actual collection from the pool of receivables for a given period is short of the contractual payout on securitisation. Securitisation is normally non-recourse instruments and therefore, the repayment on securitisation would have to come from the underlying assets and the credit enhancement. Therefore, the rating criteria centrally focus on the quality of the underlying assets.

The Scheme will predominantly invest in those securitisation issuances which have AA and above rating indicating high level of safety from credit risk point of view at the time of making an investment. However, there is no assurance by the rating agency either that the rating will remain at the same level for any given period of time or that the rating will not be lowered or withdrawn entirely by the rating agency.

- Limited Liquidity & Price Risk: Presently, the secondary market for securitised papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

- Limited Recourse to Originator & Delinquency: Securitised transactions are normally backed by pool of receivables and credit enhancement as stipulated by the rating agency, which differ from issue to issue. The Credit Enhancement stipulated represents a limited loss cover to the Investors. These Certificates represent an undivided beneficial interest in the underlying receivables and there is no obligation of either the Issuer or the seller or the originator, or the parent or any affiliate of the seller, issuer and originator. No financial recourse is available to the Certificate Holders against the Investors' Representative. Delinquencies and credit losses may cause depletion of the amount available under the credit enhancement and thereby the investor payouts may get affected if the amount available in the credit enhancement facility is not enough to cover the shortfall. On persistent default of an obligor to repay his obligation, the servicer may repossess and sell the underlying Asset. However, many factors may affect, delay or prevent the repossession of such asset or the length of time required to realize the sale proceeds on such sales. In addition, the price at which such asset may be sold may be lower than the amount due from that Obligor.

- Risks due to possible prepayments: Weighted Tenor / Yield: Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments Full prepayment of underlying loan contract may arise under any of the following circumstances;

- a. Obligor pays the receivable due from him at any time prior to the scheduled maturity date of that receivable; or
- b. Receivable is required to be repurchased by the seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or
- c. The servicer recognizing a contract as a defaulted contract and hence repossessing the underlying asset and selling the same.
- d. In the event of prepayments, investors may be exposed to changes in tenor and yield.

- Bankruptcy of the Originator or Seller: If originator becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the sale from originator to trust was not a sale then an Investor could experience losses or delays in the payments due. All possible care is generally taken in structuring the transaction so as to minimize the risk of the sale to Trust not being construed as a 'True Sale'. Legal opinion is normally obtained to the effect that the assignment of Receivables to Trust in trust for and for the benefit of the Investors, as envisaged herein, would constitute a true sale.

- Bankruptcy of the Investor's Agent: If Investor's agent, becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor's Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the agreement. All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent. Legal opinion is normally obtained to the effect that the Investors Agent's recourse to assets/receivables is restricted in its capacity as agent and trustee and not in its personal capacity.

- Risk of co-mingling: The servicers normally deposit all payments received from the obligors into the collection account. However, there could be a time gap between collection by a servicer and depositing the

same into the collection account especially considering that some of the collections may be in the form of cash. In this interim period, collections from the loan agreements may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to Investors, the Investors may be exposed to a potential loss. Due care is normally taken to ensure that the Servicer enjoys highest credit rating on standalone basis to minimize co-mingling risk.

• **Risks relating to tax incidence on securitization Special Purpose Vehicles:** In October 2011, the income tax authorities issued a claim on certain securitisation SPVs, stating that the gross income of such SPVs was liable to tax. The matter is presently under sub judice with the Bombay High Court. Several industry participants approached the Ministry of Finance (MoF) to seek clarity and reinforce the “pass through” status of a securitisation SPV. The Finance Bill, 2013, has sought to clarify the tax position by stating that securitisation SPVs are not liable to pay income tax. However, any tax incidence on gross income of SPVs could result in dilution of payouts to investors.

Risks associated with investments in REITs & InvITs:

- i. **Market Risk:** REITs and InvITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager’s investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures. The scheme will undertake active portfolio management as per the investment objective to reduce the marker risk.
- ii. **Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk. The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying units.
- iii. **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns. However, the reinvestment risk will be limited as the proceeds are expected to be a small portion of the portfolio value.
- iv. **Risk of lower-than-expected distributions:** The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/INVIT receives as dividend or the interest and principal payments from portfolio assets. The cash flows generated by portfolio assets from operations may fluctuate based on, among other things
 - a. Economic viability of tenants and success of off-takers
 - b. Economic cycles and inherent business risk negatively impacting valuations, returns and profitability of assets
 - c. Force majeure events such as earthquakes, floods etc. rendering the assets inoperable
 - d. Fluctuations in the working capital & Debt service requirements and other liabilities of the portfolio assets
 - e. Ability to borrow funds and access capital markets
 - f. Changes in applicable laws and regulations, which may restrict the payment of IDCW
 - g. Capital expenditures on portfolio assets
 - h. Restrictive Insurance policies not providing adequate protection against various risks natural disasters, accidents, etc.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risk associated with Securities Lending & Borrowing and Short Selling:

Securities Lending and Borrowing ("SLB") is an exchange traded product in India, with trades done on order matching platforms setup by the clearing corporation/house of recognized stock exchanges. In accordance with SEBI guidelines, there is a robust risk management system and safeguards exercised by the clearing corporation/house, which also guarantee financial settlement hence eliminating counterparty risk on borrowers.

The Scheme may participate as a lender in the SLB market and lend securities held in the portfolio for earning fees from such lending to enhance revenue of the Scheme. The key risk to the Scheme is creation of temporary illiquidity due to the inability to sell such lent securities, till the time such securities are returned on the contractual settlement date or on exercise of early recall.

The Scheme may enter into short selling transactions in accordance with the guidelines prescribed by SEBI. The key risk to the Scheme is increase in the price of such securities, requiring the Scheme to purchase the securities sold short to cover the position even at unreasonable prices resulting in a huge loss to the Scheme.

Risks Associated with fixed income Derivatives:

The Scheme may invest in fixed income derivatives for swap of fixed rate debt instruments swapped to floating rate or floating rate debt instruments swapped to fixed rate, hedging and portfolio rebalancing or any other purposes as may be permitted under regulatory guidelines. The Scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements or other derivative as may be permitted by SEBI / RBI / such other Regulatory Authority from time to time.

The use of derivatives may expose the Scheme to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can therefore increase Scheme volatility.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Derivatives require the maintenance of adequate controls to monitor the transactions and the embedded market risks that they add to the portfolio. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Identification and execution of the strategies to be pursued involve uncertainty and decision of the Investment Manager may not always be profitable. No assurance can be given that the Investment Manager will be able to identify or execute such strategies.

Other risks in using derivatives include but are not limited to:

- a) Counterparty Risk - this occurs when a counterparty fails to abide by its contractual obligations and therefore, the Schemes are compelled to negotiate with another counter party, at the then prevailing (possibly unfavourable) market price. For exchange traded derivatives, the risk is

mitigated as the exchange provides the guaranteed settlement but one takes the performance risk on the exchange

- b) Market Liquidity risk - this occurs where the derivatives cannot be transacted due to limited trading volumes and/or the transaction is completed with a severe price impact.
- c) Model Risk - the risk of mispricing or improper valuation of derivatives
- d) Basis Risk arises due to a difference in the price movement of the derivative vis-à-vis that of the security being hedged

Risk factors with respect to imperfect hedging using interest rate futures:

An Interest Rate Futures is an agreement to buy or sell a debt instrument at a specified future date at a price that is fixed today. Interest Rate Futures are Exchange traded. These future contracts are cash settled.

Perfect Hedging means hedging the underlying using IRF contract of same underlying.

Imperfect hedging means the underlying being hedged and the IRF contract has correlation of closing prices of more than 90%.

In case of imperfect hedging, the portfolio can be a mix of:

- i) Corporate Bonds and Government securities or
- ii) Only Corporate debt securities or
- iii) Only government securities with different maturities

Risk associated with imperfect hedging includes:

Basis Risk: The risk arises when the price movements in derivative instrument used to hedge the underlying assets does not match the price movements of the underlying assets being hedged. Such difference may potentially amplify the gains or losses, thus adding risk to the position.

Price Risk: The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Risk of mismatch between the instruments: The risk arises if there is a mismatch between the prices movements in derivative instrument used to hedge, compared to the price movement of the underlying assets being hedged. For example when IRF which has government security as underlying is used, to hedge a portfolio that contains corporate debt securities.

Correlation weakening and consequent risk of regulatory breach: SEBI Regulation mandates minimum correlation criterion of 0.9 (calculated on a 90 day basis) between the portfolio being hedged and the derivative instrument used for hedging. In cases where the correlation falls below 0.9, a rebalancing period of 5 working days has been permitted. Inability to satisfy this requirement to restore the correlation level to the stipulated level, within the stipulated period, due to difficulties in rebalancing would lead to a lapse of the exemption in gross exposure computation. The entire derivative exposure would then need to be included in gross exposure, which may result in gross exposure in excess of 100% of net asset value.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the investment manager to identify such opportunities. Identification and execution of the strategies to be pursued by the investment manager involve uncertainty and decision of investment manager may not always be profitable. No assurance can be given that the investment manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the scheme of DSP Mutual Fund to better generate liquidity during market dislocation to help the scheme fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with clause 16A of the SEBI Master Circular, the scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

We would further like to bring to the notice of the investors that pursuant to SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 read with clause 16A of the SEBI Master Circular & any other circulars/ guidelines/ letters issued by SEBI / AMFI from time to time, the calculations of Potential Risk Class (PRC) Matrix, asset allocation limits, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF wherever applicable. Additionally, in terms of aforesaid circular, the investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes.

Investors are requested to read details disclosure on investment of the schemes in the CDMDF as listed in sub-section "C. How will the Scheme allocate its assets?" And sub-section "D. Where will the Scheme Invest?" in Section "Section II- Information about the scheme".

Risks associated with transacting in scheme units through stock exchange mechanism

In respect of transactions in units of the schemes through NSE and/or BSE or any other recognized stock exchange promoted platforms, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the AMC and Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.

Risk associated with principles of efficient portfolio management:

The Scheme may use models, techniques and instruments for efficient portfolio management and may also attempt to hedge or reduce the risk. The Scheme's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is further dependent on the ability to predict movements in the prices of securities being hedged and movements in macro variables such as interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Thus due to mentioned bottleneck these techniques and instruments if imperfectly used have the risk of the Scheme incurring losses due to mismatches particularly in a volatile market. There could be possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an exchange.

Further the returns from the types of securities or assets in which the scheme invests may under perform returns of general Securities markets or different asset classes. Different types of Securities tend to go through cycles of out-performance and under-performance in comparison of Securities markets.

Risk associated with favorable taxation of certain scheme in India:

In any event beyond the control of AMC if the scheme is not able to invest the minimum % of the threshold that it is required to invest in eligible asset classes as per the domestic income tax regulation and rule, the benefit of lower tax, if any, on income distribution or capital gains may not be available to the Unit Holders.

The summary of tax implications given in the taxation section (Units and Offer Section) is based on the existing provisions of the tax laws. The current taxation laws may change due to change in the domestic Tax Act or any subsequent changes / amendments in Finance Act / Rules / Regulations. Such change may entail a higher tax to the scheme or to the investors by way of any tax as made applicable thus adversely impacting the scheme.

The investors are requested to consult their tax counsel for detail understanding of the tax laws and the risk factor associated with such tax laws.

C. Risk mitigation strategies

Risks associated with Debt Securities and Money Market Securities:

- i. **Market Liquidity Risk:** The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. The Investment Manager will select fixed income securities, which have or are expected to have high secondary market liquidity. Market Liquidity Risk will be managed actively within the portfolio liquidity limits by maintaining proper asset-liability match to ensure payout of the obligations.

Amongst all the segments of the fixed income market in India, the government securities market demonstrates the highest market liquidity. The liquidity varies from security to security with benchmark securities for the reference tenors like 10 years, 5 years etc. showing relatively higher market liquidity. With time, the benchmark government security changes and thus hence liquidity propagates from one security to the other.

- ii. **Credit Risk:** Credit Risk associated with fixed income securities (including and not limited to instruments having structured obligations, credit enhancements, special features or are unrated) will be managed by making investments in securities issued by borrowers post detailed credit review internally. The credit research process includes a detailed in-house analysis and due diligence where limits are assigned for each of the issuer (other than government of India) for the amount as well as maximum permissible tenor. The credit process ensures that issuer limits are reviewed periodically by taking into consideration the financial statements and operating strength of the issuer.
- iii. **Rating Migration Risk:** The endeavor is to invest in well researched issuers. The due diligence performed by the fixed income team before assigning credit limits and the periodic credit review and monitoring should help keep the rating migration risk low for company-specific issues.
- iv. **Interest Rate Risk:** The investment managers will endeavor to keep the duration within the permissible limit as defined by the scheme document and based on the investment objectives.
- v. **Re-investment Risk:** The Investment Manager will endeavor that besides the tactical and/or strategic interest rate calls, the portfolio is fully invested.

- vi. **Term Structure of Interest Rates (TSIR) Risk:** The Scheme is expected to have duration based on the investment objective and limits defined in the scheme documents. Depending on the nature of the scheme, the Term Structure of Interest Rates (TSIR) Risk cannot be eliminated and it exists as a primary feature of the scheme.

Risks associated with fixed income Derivative investments:

Investment managers will ensure adherence to the limits and the guidelines as issued by SEBI / RBI and as mentioned in the scheme offer document from time to time for forward rate agreements and interest rate swaps and other fixed income derivative products.

Risks associated with Investments in REITs and InvITs:

The Investment Manager endeavors to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.

Risks associated with Stock Lending:

The investment managers will lend securities as per the guideline prescribed by SEBI and will ensure adherence to the limits assigned for stock lending and will ensure that the liquidity Risk is managed actively within the portfolio liquidity limits by maintaining proper asset-liability match to ensure payout of the obligations.

Also to ensure that the counterparty risk is limited the AMC will participate in stock lending only through exchange mechanism where the settlement is guaranteed or bilaterally post inhouse credit evaluation and avoid excess concentration of counterparty risk in case of bilateral lending.

Risks associated with favorable taxation of certain Scheme:

Investment Manager regular monitor's investment thresholds of Scheme of the Fund house to ensure compliance with the relevant tax laws & regulation.

Risk associated with investments in repo of corporate debt securities:

The Investment Manager will endeavor to manage counterparty risk in corporate debt repos by dealing only with counterparties having strong credit profiles or through tri-party corporate repos done on the exchange platforms. The collateral risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities, where potential for downgrade/default is low. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instruments.

Risk Management & Liquidity Management Tools

DSP mutual fund schemes as mandated wide various SEBI & AMFI circulars, have adopted the following for risk management & liquidity management tools

Potential Risk Matrix (PRC) & Risk-o-meter: Investors are requested to review this scheme's Potential Risk Matrix (PRC) to understand the maximum risk that this scheme will run as per design and & Risk-o-meter to understand periodical measurement of that risk on a regular basis. Investor are suggested to read about various disclosures under the section "C.PERIODIC DISCLOSURES" pertaining to "Compliance with Potential

Risk Class Matrix norms” & “Risk-o-meter” to understand in detail the disclosure frequency and remedial measures in case of breaches in the boundaries.

Mandatory Liquidity requirement: DSP mutual fund scheme adopts the Liquidity Risk Management framework mandated by SEBI and AMFI which helps estimates liquidity requirement by determining liquidity risk arising from the liability side and tries to covers all potential liquidity risk scenarios up to agreed confidence interval and has mandated remedial measures both for managing the risk on an ongoing basis (LRaR & LCRaR) as well as action plan in case there is a difference between actual outcome and projected outcome. Investors can refer to the circular 135/ BP/93/ 2021-22 dated July 24, 2021 and subsequent circulars for detail understanding on the Liquidity Risk Management Framework.

Further Investment manager also evaluates and monitors the Asset Liability Mismatch (ALM) which addresses the gap in the estimated potential liquidity requirement over a 90-day period and schemes investment / assets liquidity to meet the potential requirement and best ensures that scheme has necessary liquidity to meets its liability obligations.

Stress testing the scheme portfolio: The investment manager periodically stress test the scheme portfolio to addresses the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level and evaluate the stress in terms of its impact on the NAV of the scheme. The stress test is performed using the methodology and periodicity as mandated by AMFI in consultation to SEBI

Swing Pricing: **Swing Pricing:** The Investment Manager has a Swing Pricing framework in place for open ended debt schemes to address situations of severe liquidity stress at an AMC level, reversal of scheme wind up decision in future post announcement, or a severe dysfunction at market level. The Swing Pricing offers the contingency plan in case of extreme exigencies. Investors are suggested to read the detailed disclosure pertaining to this policy in “Swing Pricing Framework” under section Section IX(D)(2)of Statement of Additional Information (SAI).

It is to be noted that in case of applicability of the swing pricing the realization of the redemption proceeds would be subject to swing factor applicable for the investor’s transaction.

II. Information about the scheme:

A. **Where will the scheme invest**

Detailed description of the instruments (including overview of debt markets in India, if applicable) mentioned in Section I

Government Securities	Securities created and issued by the Central Government and/or a State Government (including Treasury Bills) or Government Securities as defined in the Government Securities Act, 2006, as amended or re-enacted from time to time.
Derivatives	Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as: interest rates, exchange rates, commodities, and equities.
Money Market Instruments	Commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments having maturity upto 1 year

Repos & Reverse Repos	Repo (Repurchase Agreement) or Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds.
REIT	REIT or Real Estate Investment Trust is a trust registered with SEBI to carry out the activity prescribed under SEBI (Real Estate Investment Trusts) Regulations, 2014. A REIT raises funds by issuing units to investors and invest those funds primarily in assets in real estate sector. The investment in such assets can be made directly or through SPV/Holding Company. The income generated from the underlying assets of the REIT are regularly distributed to the unit holders.
InvIT	InvIT of Infrastructure Investment Trust is a trust registered with SEBI to carry out the activity prescribed under SEBI (Infrastructure Investment Trusts) Regulations, 2014. An InvIT raises funds by issuing units to investors and invests those funds primarily in assets in infrastructure sector. The investment in such assets can be made directly or through SPV/Holding Company by the InvIT. Investors who hold units in an InvIT are called unit holders. The income generated from the underlying assets of the InvIT are regularly distributed to the unit holders.
AT1 Bonds	Additional Tier 1 (AT1) bonds are a type of perpetual bonds. Banks use these bonds to increase their core equity base. AT1 bonds never mature, implying that the bond issuers will never repay the principal. However, banks pay regular interest. But, if the bank's capital ratio falls below a specific percentage or if the bank is making losses, the interest payments can be skipped. AT1 bonds offer higher returns than ordinary bonds. However, they do not have a maturity date.
AT2 Bonds	Banks issue Subordinated Tier 2 bonds to meet their Tier 2 capital requirements. These have to be for a minimum period of 5 years at the time of issue. They are unsecured and subordinated in claims to depositors, unsecured creditors and senior bonds of the bank. Bank Tier 2 bonds do not have Put Option and only have a Call Option (option for early repayment) which the bank can exercise after minimum of 5 years and after approval from Reserve Bank of India (RBI). The most important difference of Bank Tier 2 bonds from Bank senior bonds is its loss absorption feature. If a bank is approaching or has approached a point of non-viability (PONV), then RBI can write off the principal amount outstanding on Tier 2 bonds.
TREPS	TREPs is a money market instrument that enables entities to borrow and lend against sovereign collateral security. The maturity ranges from 1 day to 90 days and can also be made available upto 1 year. Central Government securities including T-bills are eligible securities that can be used as collateral for borrowing through TREPs.
Credit Default Swaps (CDS)	A Credit Default Swap (CDS) is a financial derivative that allows an investor to "swap" or offset their credit risk with that of another investor. Essentially, it is a form of insurance against the default of a borrower. The buyer of a CDS makes periodic payments to the seller and, in return, receives a payoff if the underlying financial instrument (such as a bond or loan) defaults. CDS are commonly used to hedge against the risk of default or to speculate on the creditworthiness of an entity.

Debt instruments with SO/CE Rating	Debt instruments with Structured Obligation (SO) or Credit Enhancement (CE) ratings are bonds or loans that have been enhanced with additional credit support to reduce default risk. SO ratings indicate that the instrument's creditworthiness is improved through structural mechanisms like collateral, guarantees, or insurance. CE ratings signify that external support, such as a third-party guarantee or letter of credit, bolsters the instrument's credit profile. These enhancements provide greater security to investors, often resulting in higher credit ratings and lower interest rates compared to non-enhanced debt instruments.
Corporate Debt Market Development Fund (CDMDF)	The Corporate Debt Market Development Fund (CDMDF) is an initiative aimed at enhancing liquidity and stability in the corporate debt market. It provides a backstop facility to support the secondary market for corporate bonds, ensuring that there is sufficient demand and reducing the impact of market disruptions. The fund is typically backed by contributions from market participants and, in some cases, government support. By improving market confidence and encouraging more investment in corporate bonds, the CDMDF helps develop a more robust and resilient corporate debt market.
Usance Bills	A usance bill, also known as a time draft or usance draft, is a type of bill of exchange that allows the buyer a specific period, known as the usance period, to pay the seller after receiving the goods or services. This financial instrument provides the buyer with a credit period, facilitating smoother cash flow and working capital management.
Interest Rate Swaps	An interest rate swap (IRS) is a derivative contract where two parties exchange interest payments based on a notional amount. One party typically pays a fixed rate, while the other pays a floating rate pegged to a benchmark. IRS help manage interest rate risk or speculate on future rate movements.
Forward Rate Agreement	A forward rate agreement (FRA) is a short-term interest rate locking mechanism. Two parties agree on a fixed rate for a future loan or deposit, protecting them from interest rate changes. The difference between the agreed rate and the market rate at settlement is settled in cash, making FRAs a popular hedging tool in the OTC market.
Interest Rate Derivatives	Interest rate derivatives are contracts linked to future interest rate movements. Used for hedging or speculation, they allow parties to lock in rates (e.g., swaps) or bet on rate changes (e.g., options). Common types include interest rate swaps, forward rate agreements, and options. These are complex instruments with risks, requiring careful understanding and risk management.
Zero Coupon Bonds	A zero-coupon bond is a type of debt security that does not pay periodic interest (coupons). Instead, it is issued at a significant discount to its face value and matures at its full face value. Return from the bond is the difference between the purchase price and the amount received at maturity.
Treasury Bills	Treasury bills (T-bills) are short-term government securities issued at a discount to their face value and mature within one year. They do not pay periodic interest but provide returns by maturing at their full face value, with the difference between the purchase price and the maturity value representing the investor's earnings. T-bills are considered low-risk investments due to government backing.

Corporate Debt	Corporate debt refers to bonds or other forms of debt securities issued by companies to raise capital. Investors lend money to the corporation in exchange for periodic interest payments and the return of the principal amount at maturity. This type of debt is used by companies to fund operations, expansions, or other financial needs.
Convertible Securities	Convertible securities are financial instruments, such as bonds or preferred shares, that can be converted into a predetermined number of the issuing company's common stock. This conversion can typically be done at the holder's discretion and is often subject to specific terms and conditions. Convertible securities offer the potential for capital appreciation through stock price increases while providing downside protection through fixed interest payments or dividends.
Debt Obligations of Government of India	Debt obligations of the Government of India include financial instruments like Government Bonds (G-Secs), Treasury Bills (T-Bills), Savings Bonds, and Sovereign Gold Bonds (SGBs). These instruments are issued to finance government expenditures and manage monetary policy, offering varying maturities and interest rates. G-Secs are long-term securities with semi-annual interest payments, while T-Bills are short-term, issued at a discount. These debt obligations are considered low-risk investments due to government backing, providing stable returns and portfolio diversification.
Debt Obligations of State Government of India	Debt obligations of State Governments of India primarily include State Development Loans (SDLs). SDLs are bonds issued by state governments to finance their budgetary needs and developmental projects. These bonds have varying maturities, typically ranging from 1 to 10 years, and offer fixed interest payments. SDLs are considered relatively safe investments, as they are backed by the state governments' revenues and, to some extent, the central government.
Debt Obligations of Local Governments of India	Debt obligations of local governments in India, such as municipal bonds, are financial instruments issued by urban local bodies (ULBs) to fund infrastructure projects and other development activities. These bonds typically offer fixed interest payments and have varying maturities.
Participation certificates	Participation Certificates, including pass-through and pay-through certificates, represent an investor's interest in a pool of assets such as receivables. Pass-through certificates directly pass the principal and interest payments from the asset pool to investors, minus servicing fees. Pay-through certificates restructure these cash flows before passing them to investors, allowing for different tranches with varied risk and return profiles. These instruments offer investors exposure to the underlying assets' cash flows, providing diversification and potentially attractive returns.
Units of Mutual Funds	Units of mutual funds represent an investor's share in a mutual fund scheme. When investors buy mutual fund units, they pool their money with other investors to collectively invest in a diversified portfolio of assets such as stocks, bonds, or other securities. Each unit reflects the proportionate ownership of the fund's assets. The value of these units, known as the Net Asset Value (NAV), fluctuates based on the performance of the underlying assets.

Securitised debt	Securitised debt refers to financial instruments created through the process of securitisation, where various types of receivables or loans (such as mortgages, auto loans, or credit card debt) are pooled together and transformed into tradable securities. These securities, often in the form of bonds or notes, are then sold to investors. Securitised debt instruments allow issuers to convert illiquid assets into liquid funds and provide investors with access to diversified income streams backed by the underlying assets. Common forms include mortgage-backed securities (MBS) and asset-backed securities (ABS).
Structured Notes	Structured Notes are hybrid financial instruments that combine traditional debt securities with derivative components to offer customized investment solutions. These notes typically pay a return based on the performance of an underlying asset, index, or benchmark, such as stocks, commodities, interest rates, or currencies. Structured notes are designed to meet specific investment objectives, providing features like principal protection, enhanced yields, or leverage. While they can offer attractive returns and tailored risk exposure, they also carry higher complexity and risk compared to traditional fixed-income securities, making them suitable for more sophisticated investors.
Bills re-discounting	Bills re-discounting is a financial practice where banks purchase bills of exchange from other financial institutions at a discounted rate, providing immediate liquidity to the selling institution. This transaction allows banks to manage their short-term liquidity needs efficiently, as they can convert their assets into cash before their maturity dates.
Fixed Income Securities of domestic Government agencies and statutory bodies	Fixed income securities issued by domestic government agencies and statutory bodies are debt instruments that provide regular interest payments and return the principal amount at maturity. These securities are typically considered low-risk investments due to the backing of government-related entities. Examples include bonds issued by public sector undertakings (PSUs), municipal bonds, and securities from other government-affiliated organizations.
Commercial Papers	Commercial Papers (CPs) are short-term, unsecured debt instruments issued by corporations, financial institutions, and other large entities to meet their immediate funding needs, such as working capital requirements. Typically issued at a discount to face value and with maturities ranging from a few days to one year, CPs offer investors a relatively safe, liquid investment option with competitive returns compared to other short-term instruments. Due to their short maturity periods, CPs are often used by companies as a cost-effective alternative to bank loans for short-term financing needs.
Commercial Bills	Commercial Bills are short-term, negotiable financial instruments used in trade finance, representing a written order from one party (the drawer) to another (the drawee) to pay a specified amount to the bearer or a named party (the payee) at a future date. They are commonly used by businesses to finance their working capital needs by enabling the seller of goods to receive immediate payment, while the buyer gets a credit period to make the payment. These bills can be discounted with banks or financial institutions before maturity, providing liquidity to the holder. They play a crucial role in facilitating trade transactions and managing short-term funding requirements.

Certificate of deposit	A Certificate of Deposit (CD) is a short- to medium-term, interest-bearing deposit instrument issued by banks and financial institutions to individuals or corporations. CDs have a fixed maturity date, typically ranging from a few months to several years, and offer a fixed interest rate higher than regular savings accounts. They are negotiable and can be traded in the secondary market before maturity. CDs provide a low-risk investment option for investors seeking predictable returns, as they are generally insured and backed by the issuing institution's creditworthiness.
Coupon bearing bonds	Coupon-bearing bonds are debt securities that pay periodic interest payments, known as coupons, to bondholders based on a fixed or variable interest rate. These bonds have a predetermined maturity date, at which the issuer repays the principal amount to the bondholder. The coupon rate is typically stated as a percentage of the bond's face value and determines the amount of interest paid to the bondholder at each coupon payment date. They are commonly issued by governments, municipalities, corporations, and other entities to raise capital for various projects and operations.
State development loan (SDL)	State development loan (SDL) is a bond issued by a state government to fund its various developmental projects and infrastructure initiatives
Short Term Deposits	Pending deployment of funds as per the investment objective of the Scheme, the Funds may be parked in short term deposits of the Scheduled Commercial Banks, subject to guidelines and limits specified by SEBI.

Investment in units of schemes of own/other Mutual Fund

The Scheme may invest in other Schemes managed by the AMC or in the Schemes of any other Mutual Fund(s), provided such investment is in conformity to the investment objectives of the Scheme and in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments and the aggregate inter-scheme investment made by all Schemes of the Mutual Fund or in the Scheme under the management of other asset management companies shall not exceed 5% of the net asset value of the Mutual Fund.

Inter scheme asset transfer

Transfer of investments from one Scheme to another Scheme in the Mutual Fund shall be allowed as per guidelines prescribed under clause 12.30 of the SEBI Master Circular and amendments made from time to time. Further, clause 9.11 of the SEBI Master Circular, has prescribed the methodology for determination of price to be considered for inter-scheme transfers.

Investment in Short-Term Deposits

Pending deployment of the funds of the Scheme shall be in terms of clause 12.16 of the SEBI Master Circular, the AMC may invest funds of the Scheme in short term deposits of scheduled commercial banks, subject to following conditions:

1. The term 'short term' for parking of funds shall be treated as a period not exceeding 91 days.
2. Such deposits shall be held in the name of the Scheme.

3. The Scheme shall not park more than 15% of its net assets in the short term deposit(s) of all the scheduled commercial banks put together. However, it may be raised to 20% with the prior approval of the Trustee. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
4. The Scheme shall not park more than 10% of its net assets in short term deposit(s) with any one scheduled commercial bank including its subsidiaries.
5. The Trustee shall ensure that the funds of the Scheme are not parked in the short term deposits of a bank which has invested in that Scheme.
6. AMC will not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.
7. The Trustee shall also ensure that the bank in which a scheme has short term deposits do not invest in the scheme until the scheme has short term deposits with such bank.

The above provisions do not apply to term deposits placed as margins for trading in cash and derivative market.

Investment limits for investing in HFCs

AMC shall ensure that total exposure in a particular sector (excluding investments in Bank CDs, TREPS, G-Secs, TBills, short term deposits of Scheduled Commercial Banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme and an additional exposure to financial services sector (over and above the limit of 20%) not exceeding 10% of the net assets of the scheme shall be allowed only by way of increase in exposure to HFCs. The additional exposure to such securities issued by HFCs should be rated AA and above and these HFCs should be registered with National Housing Bank (NHB) and the total investment/ exposure in HFCs shall not exceed 20% of the net assets of the Scheme. Further, an additional exposure of 5% shall be allowed for investments in securitized debt instruments based on retail housing loan portfolio and/or affordable housing loan portfolio.

Investment in Domestic Securitized Debt

Depending upon the Investment Manager's views, the Schemes may invest in domestic securitized debt such as ABS or MBS. The investments in domestic securitized debt will be made only after giving due consideration to factors such as but not limited to the securitization structure, quality of underlying receivables, credentials of the servicing agent, level of credit enhancement, liquidity factor, returns provided by the securitized paper vis-a-vis other comparable investment alternatives.

Although the returns provided by securitized debt could be higher, one must not lose sight of the fact that risks also exist with regard to investments in securitized debt. Investments in pass-through certificates of a securitization transaction represent an undivided beneficial interest in the underlying receivables and do not represent an obligation of either the issuer or the seller, or the parent of the seller, or any affiliate of the seller or the issuer or the trustee in its personal capacity, save to the extent of credit enhancement to be provided by the credit enhancer. The trust's principal asset will be the pool of underlying receivables. The ability of the trust to meet its obligations will be dependent on the receipt and transfer to the designated account of collections made by the servicing agent from the pool, the amount available in the cash collateral account, and any other amounts received by the trust pursuant to the terms of the transaction documents. However, the credit enhancement stipulated in a securitization transaction represents a limited loss cover only.

Delinquencies and credit losses may cause depletion of the amount available under the cash collateral account and thereby the scheduled payouts to the investors may get affected if the amount available in the cash collateral account is not enough to cover the shortfall.

Further Unit holders are requested to refer below the disclosure relating to investments in securitized debt, in the SEBI prescribed format:

(i) How the risk profile of securitized debt fits into the risk appetite of the scheme

The scheme seeks to generate an attractive return, consistent with prudent risk, from a portfolio which is substantially constituted of quality debt securities. The scheme also seeks to generate capital appreciation by investing a smaller portion of its corpus in equity and equity related securities of issuers domiciled in India.

In line with the investment objective, securitised debt instruments having a high credit quality commensurate with other debt instruments in the portfolio and in line with internal fund manager guidelines will be considered for investment.

(ii) Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc

The parameters used to evaluate originators are

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Company specific factors

In addition, a detailed review and assessment of rating rationale is done including interactions with the originator as well as rating agency.

Critical Evaluation Parameters (for pool loan) regarding the originator / underlying issuer:

- Default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios of the ultimate borrower - both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of re-schedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

(iii) Risk mitigation strategies for investments with each kind of originator

Analysis of originator: Dedicated credit research analysts, analyses and evaluates each originator and sets up limits specifying both the maximum quantum and maximum tenor for investments and investments are considered only within these limits.

Originator analysis typically encompasses:

- Size and reach of the originator
- Collection process, infrastructure and follow-up mechanism
- Quality of MIS
- Credit enhancement for different type of originator

(iv) The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

Eligible assets: Only assets with an established track record of low delinquencies and high credit quality over

several business cycles will be considered for investment.

Analysis of pool: Characteristics such as average pool maturity (in months), average loan to value ratio, average seasoning of the pool, maximum single exposure, geographical distribution and average single exposure are studied to determine pool quality

Risk mitigating measures: Credit enhancement facilities (including cash, guarantees, excess interest spread, subordinate tranches), liquidity facilities and payment structure are studied in relation to historical collection and default behavior of the asset class to ensure adequacy of credit enhancement in a stress scenario.

(v) Minimum retention period of the debt by originator prior to securitization

We will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

(vi) Minimum retention percentage by originator of debts to be securitized

We will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

(vii) The mechanism to tackle conflict of interest when the Mutual Fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the Fund

The AMC has a rigorous credit due diligence process for all fixed income investments, which also encompasses securitized debt. A dedicated team of credit analysts is responsible for credit research and surveillance.

(viii) The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The AMC has a rigorous risk management process for all fixed income investments, which also encompasses securitized debt. Dedicated credit research analysts are responsible for monitoring risks including credit and liquidity risk. The functions of the team include:

- Detailed credit analysis of issuers: based on the management evaluation, operating strength and financial strength to determine suitability for investment. Periodic reviews on a quarterly/annual basis are undertaken for eligible issuers. Ratings are monitored on a daily basis and any changes are immediately recorded and suitable action taken.

For securitized pool loan exposures, the analysis includes pool seasoning, pool asset quality, diversification, collateral margin, originator analysis and credit enhancement mechanisms. Pool performance statistics published by rating agencies are analyzed for performance of other securitised pools of the same originator as well as for the performance of the asset class as a whole. Regular interactions with the rating agencies are done to discuss performance trends. Documents are vetted by the legal and compliance team. In addition, monthly payout reports from the trustees are analysed for collection performance and adequacy of cash collateral.

Framework that is applied while evaluating investment decision relating to a pool securitization transaction:

Investments in derivatives

SEBI has permitted all the mutual funds to participate in the derivatives trading subject to observance of guidelines issued by SEBI in this behalf. Pursuant to this, the mutual funds may use various derivative and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unit holders' interest.

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as interest rates, exchange rates, commodities, and equities.

The fixed Income derivative market has made considerable progress in last two years. Interest rate swaps have become an integral part of Risk Management practice for most banks. Corporate Treasury have issued Innovative instruments like floating rate debt and constant maturity swaps.

1. Interest Rate Swap (IRS)

Any swap is effectively an exchange of one set of cash-flows for another considered to be of equal value. If the exchange of cash flows is linked to interest rates, it becomes an interest rate swap.

An interest rate swap is an agreement between two parties to exchange future payment streams based on a notional amount. Only the interest on the notional amount is swapped, and the principal amount is never exchanged.

In a typical interest rate swap, one party agrees to pay a fixed rate over the term of the agreement and to receive a variable or floating rate of interest. The counterparty receives a stream of fixed rate payments at regular intervals as described in the agreement and pays the floating rate of interest. A fixed/ floating interest rate swap is characterized by:

1. Fixed interest rate;
2. Variable or floating interest rate, which is periodically reset;
3. Notional principal amount upon which total interest payments are based; and
4. The terms of the agreement, including a schedule of interest rate reset dates, payment dates and termination date.

The primary reason for engaging in an interest rate swap is to hedge the interest rate exposure. An illustration could be an institution having long-term fixed rate assets (longer tenor securities receiving fixed rate) in a rising interest rate environment; it can hedge the interest rate exposure by purchasing an interest rate swap where the institution receives floating interest rate and pays fixed rate. In this case, an interest rate swap is likely to reduce the duration and interest rate volatility of the fund.

Example:

Terms:

Fixed Interest Rate : 8.50% p.a.
 Variable Interest Rate : NSE Over-Night MIBOR reset daily and compounded daily
 Notional Principal Amount: Rs.100 Crore
 Period of Agreement : 1 year
 Payment Frequency : Semi-annual

Now, suppose the six-month period from the effective date of the swap to the first payment date comprises 182 days and the daily compounded NSE Over-Night MIBOR is 8.15% p.a. on the first payment date, then the fixed and variable rate payment on the first payment date would be as follows:

Fixed rate payment:

Rs. 4,23,83,562 = (Rs.100,00,00,000) x (8.50%) x (182 Days / 365 Days)

Variable rate payment:

Rs. 4,06,38,356 = (Rs.100,00,00,000) x (8.15%) x (182 Days / 365 Days)

Often, a swap agreement will call for only the exchange of net amount between the counterparties. In the above example, the fixed-rate payer will pay the variable-rate payer a net amount of Rs. 17,45,205 = Rs. 4,23,83,562 - Rs. 4,06,38,356.

The second and final payment will depend on the daily NSE MIBOR compounded daily for the remaining 183 days. The fixed rate payment will also change to reflect the change in holding period from 182 days to 183 days.

2. Forward Rate Agreement (FRA)

An FRA is an off balance sheet agreement to pay or receive on an agreed future date, the difference between an agreed interest rate and the interest rate actually prevailing on that future date, calculated on an agreed notional principal amount. It is settled against the actual interest rate prevailing at the beginning of the period to which it relates rather than paid as a gross amount.

An FRA is referred to by the beginning and end dates of the period covered. Thus a 5x8 FRA is one that covers a 3-month period beginning in 5-months and ending in 8-months. FRAs are purchased to hedge the interest rate risk; an investor facing uncertainty of the interest rate movements can fix the interest costs by purchasing an FRA.

An illustration could be a corporation having floating rate debt linked to an index such as say, 3-Month MIBOR. If the existing interest cost is at 8% on Rs.100 Crore for the next three months, the corporation can purchase a 3x6 FRA @ 8.1% on Rs.100 Crore and fix the interest cost for the 3-6 months period. If the actual 3-Month MIBOR after 3-months is at 8.25%, the corporation has saved 15 bps in interest cost. As the settlement is done at the beginning of the period, the savings in interest expense are discounted to a present value using a 3-month rate to calculate the actual settlement amount.

The flows for the institution will be, as follows:

Interest Savings = Rs. 100 Crore * 15 bps * 92/365

(assuming 92 days in the 3 month FRA period and 365 days in the conventional year)
 = Rs.3,78,082.19

Settlement Amount = Rs.3,78,082.19/ (1+8.25%*92/365)

Please note that the above examples are hypothetical in nature and the figures are assumed.

3. Interest Rate Futures

An Interest Rate Futures ('IRF') contract is "an agreement to buy or sell a debt instrument at a specified future date at a price that is fixed today." The underlying security for Interest Rate Futures is either Government Bond or T-Bill. Interest Rate Futures are Exchange traded and standardized contracts based on 6 year, 10 year and 13 year Government of India Security and 91-day Government of India Treasury Bill (91DTB). These future contracts are cash settled. These instruments can be used for hedging the underlying cash positions.

The overall gross exposure for a fund is computed as sum of exposure to equity, cash, debt instruments and derivatives (other than for hedging purposes) and it should not be more than 100%. Derivative position is considered to be for hedging purposes only if the following conditions are met:

1. **Perfect Hedging** - We hedge the underlying using IRF contract of same underlying
2. **Imperfect hedging** - the Underlying being hedged and the IRF contract has a 90 day correlation of closing prices of more than 90%. In case of correlation breaking at any time the derivative position would be counted as an exposure. SEBI allows maximum of 20% imperfect hedging.

For example, assume a portfolio comprising the following structure:

Security	Amount (crs)	Price (Rs)
IGB 6.79% 2027	100	100.40
IGB 6.79% 2029	50	98.35
IGB 7.72% 2025	25	104.55
Cash	25	
Total	200	

Assuming the fund manager intends to hedge the portfolio using IRF and uses contracts on IGB 6.79% 2027 as it is most liquid.

Maximum imperfect hedging allowed, based on SEBI limit of 20% for the above fund is 200*20% = 40 crs

Maximum perfect hedging using 6.79% 2027 is 100 crs (as amount of 6.79% 2027 in the fund is 100 crs)

Total hedge the fund can do = 100 crs + 40 crs =140 crs

Assuming the 90 day historical correlation between the instruments in the portfolio are as follows

90 day historical correlation	IGB 6.79% 2027	IGB 6.79% 2029	IGB 7.72% 2025
IGB 6.79% 2027	1	0.95	0.80
IGB 6.79% 2029	0.95	1	0.75
IGB 7.72% 2025	0.80	0.75	1

Given that we are using IRF on 6.79% 2027, we can hedge 6.79% 2029 using IRFs as correlation is more than 90% upto 40 crs (based on the 20% limit of imperfect hedging).

Since one contract of IRF has a notional of Rs. 2 lakhs, in this example the fund manager sells Rs. 140 crores/2 lakhs = 7000 contracts, to hedge his position.

Hence after hedging the fund is as shown below:

Security	Amount (crs)	Price (Rs)	Comments
IGB 6.79% 2027	100	100.40	100% hedged - Perfect hedging
IGB 6.79% 2029	50	98.35	40% hedged - Imperfect hedging
IGB 7.72% 2025	25	104.55	Unhedged
Cash	25		Unhedged
IRF 6.79% 2027	140	100.35	
Total	200		

At maturity of the Interest Rate Futures

Case 1: bonds close higher than at the time the hedge was entered into

Security	Amount (crs)	Price before hedging (Rs)	Price on maturity of hedge (Rs)	Gain	Net Gain (lakhs)
IGB 6.79% 2027	100	100.4	100.5	0.1	10.00
IGB 6.79% 2029	50	98.35	98.5	0.15	7.50
IGB 7.72% 2025	25	104.55	104.6	0.05	1.25
Cash	25				-
Without IRF					18.75
IRF 6.79% 2027	140	100.35	100.5	-0.15	(21.00)
Total With IRF	200				(2.25)

Case 2: bonds close lower than at the time the hedge was entered into

Security	Amount (crs)	Price before hedging	Price on maturity of hedge (Rs)	Gain	Net Gain (lakhs)
IGB 6.79% 2027	100	100.4	100.3	-0.1	(10.00)
IGB 6.79% 2029	50	98.35	98.23	-0.12	(6.00)
IGB 7.72% 2025	25	104.55	104.5	-0.05	(1.25)
Cash	25				-
Without IRF					(17.25)
IRF 6.79% 2027	140	100.35	100.3	0.05	7.00
Total with IRF	200				(10.25)

As can be seen in the cases above, in case yields move higher, IRFs help in reducing the loss to the fund.

With respect to investments made in derivative instruments, the Scheme shall comply with the following exposure limits in line with clause 12.24.1 and clause 12.25 of the SEBI Master Circular:

1. The cumulative gross exposure through equity, debt, derivative positions (including commodity and fixed income derivatives), repo transactions and credit default swaps in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/assets as may be permitted by SEBI from time to time should not exceed 100% of the net assets of the scheme. However, the following shall not be considered while calculating the gross exposure:
 - a. Security-wise hedged position and

- b. Exposure in cash or cash equivalents with residual maturity of less than 91 days.
2. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:
 - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.
 - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
 3. (a) Mutual Funds may enter into plain vanilla Interest Rate Swaps (IRS) for hedging purposes. The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme.
 - (b) In case of participation in IRS is through over the counter transactions, the counter party has to be an entity recognized as a market maker by RBI and exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme. However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable.
 4. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.

Investments in debt instruments with SO/CE rating-

The Scheme shall invest in Debt instruments having Structured Obligations/Credit Enhancements in accordance with provisions of clause 4.3.1 of Master Circular as may be amended by SEBI from time to time. The same are currently as under:

The investment of the Scheme in the following instruments shall not exceed 10% of the debt portfolio of the Scheme and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the Scheme:

- a. Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade; and
- b. Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.

For this purpose, a group means a group as defined under regulation 2 (mm) of the Regulations and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates. However the above Investment limits shall not be applicable on investments in securitized debt instruments, as defined in SEBI (Public Offer and Listing of Securitized Debt Instruments) Regulations 2008.

Investment in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares.

Investments in debt instruments with special features (AT1 and AT2 Bonds) -

As per clause 12.2.2 of the SEBI Master Circular-

- i. No Mutual Fund under all its schemes shall own more than 10% of debt instruments having Special Features issued by a single issuer.
- ii. A scheme shall not invest -
 - a) more than 10% of its NAV of the debt portfolio of the scheme in debt instruments having Special Features; and
 - b) more than 5% of its NAV of the debt portfolio of the scheme in debt instruments having Special Features issued by a single issuer.

The above investment limit for a scheme shall be within the overall limit for debt instruments issued by a single issuer, as specified at clause 1 of the Seventh Schedule of SEBI (Mutual Fund) Regulations, 1996, and other prudential limits with respect to the debt instruments.

Investments in repo of corporate debt securities

Guidelines for participation of mutual funds in Repo in corporate debt securities.

SEBI has vide Clause 12.18 of the SEBI Master Circular enabled mutual funds to participate in repos in corporate debt securities as per the guidelines issued by RBI from time to time and subject to few conditions listed in the circular. Accordingly, the Scheme may participate in Repo in corporate debt securities in accordance with directions issued by RBI and SEBI from time to time and in accordance with guidelines framed by the Board of AMC and Trustee Company in this regard.

Conditions applicable: -

- The net exposure of any Mutual Fund scheme to repo transactions in corporate debt securities shall not be more than 10 % of the net assets of the Scheme.
- The cumulative gross exposure through debt, derivative positions, repo transactions in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme.
- Mutual funds shall participate in repo transactions only in AA and above rated corporate debt securities.

These conditions will be subject to any revisions announced by SEBI from time to time.

Other Guidelines

- i. Category and credit rating of counter party:
 1. SEBI regulated mutual funds
 2. RBI regulated Banks, Non-Banking Finance Companies, Primary Dealers
 3. IRDA regulated Insurance companies
 4. Corporates for whom credit limits have been assigned are eligible counterparties. These corporates should have a minimum investment grade credit rating. For new counterparties, approval from Head - Risk will be taken and an assessment will be done by the Risk & Quantitative Analysis team.
- ii. Tenor of collateral: <=20 years for corporate debt securities.
- iii. Applicable haircuts: RBI, in its circular no. IDMD.PCD. 09 /14.03.02 /2012-13 dated January 7, 2013 prescribed the following minimum haircuts on the market value of the underlying security:
 - a. AAA rated: 7.5%
 - b. AA+ rated: 8.5%
 - c. AA rated: 10%

The above haircuts are subject to change based on how market practice evolves with respect to corporate bond repo. Prior approval of the Investment committee shall be sought for change in the haircut from existing % to such other % as deemed fit.

iv. Valuation of repo assets: At cost.

Investments in units of REIT and InvIT -

1. The Mutual Fund under all its schemes shall not invest more than 10% of units issued by a single issuer of REIT and InvIT.
2. The Scheme shall not invest:
 - more than 10% of its NAV in the units of REITs and InvITs; and
 - more than 5% of its NAV in the units of REITs and InvITs issued by a single issuer.

Investment in unrated instruments

As per 12.1.5 of SEBI Master Circular, Investment in unrated debt and money market instruments, other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. shall be subject to the following:

- a) Investments should only be made in such instruments, including bills re-discounting, usance bills, etc., that are generally not rated and for which separate investment norms or limits are not provided in SEBI (Mutual Fund) Regulations, 1996 and various circulars issued thereunder.
- b) Exposure of mutual fund schemes in such instruments shall not exceed 5% of the net assets of the schemes.

All such investments shall be made with the prior approval of the Board of AMC and the Board of trustees.

Investment in CD MDF

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with clause 16A of the SEBI Master Circular, scheme shall invest 25 bps of its AUM.

CD MDF Framework-

CD MDF shall comply with the Guarantee Scheme for Corporate Debt (GSCD) as notified by Ministry of Finance vide notification no. G.S.R. 559(E) dated July 26, 2023 and SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/128 dated July 27, 2023 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time, which includes the framework for corporate debt market development fund. The framework will inclusive of following points-

- a) The CD MDF shall deal only in following securities during normal times:
 - Low duration Government Securities
 - Treasury bills
 - Tri-party Repo on G-sec
 - Guaranteed corporate bond repo with maturity not exceeding 7 days
- b) The fees and expenses of CD MDF shall be as follows:
 - During Normal times: (0.15% + tax) of the Portfolio Value charged on daily pro-rata basis.
 - During Market stress: (0.20% + tax) of the Portfolio Value charged on daily pro-rata basis.
 - "Portfolio Value" means the aggregate amount of portfolio of investments including cash balance without netting off of leverage undertaken by the CD MDF.
- c) Corporate debt securities to be bought by CD MDF during market dislocation include listed money market instruments. The long term rating of issuers shall be considered for the money market instruments. However, if there is no long term rating available for the same issuer, then based on

credit rating mapping of CRAs between short term and long term ratings, the most conservative long term rating shall be taken for a given short term rating.

- d) CDMDf shall follow the Fair Pricing document, while purchase of corporate debt securities during market dislocation as specified in clause 16A of the SEBI Master Circular and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time
- e) CDMDf shall follow the loss waterfall accounting and guidelines w.r.t. purchase allocation and trade settlement of corporate debt securities bought by CDMDf as specified in clause 16A of the SEBI Master Circular and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time.

Overview of Debt Market in India

The Indian bond market comprises mainly of Government securities; State Development Loans (SDL), bonds issued by Public Sector Undertakings (PSU), Development Financial Institutions (DFI) and Infrastructure-related agencies; debentures and money market instruments issued by corporate sectors and banks. The Government of India routinely issues Government securities and Treasury bills for liquidity and fiscal management. While the Government issues Treasury bills for 91 days, 182 days and 364 days in a discounted form, coupon-bearing Government securities are issued for maturity ranging from 1 year to as high as 50 years. Both Treasury bills and coupon-bearing securities are auctioned by the RBI on behalf of the Government of India. The Indian bond market has also witnessed issuance of bonds from Government-sponsored institutions, DFIs, and infrastructure-related agencies. These bonds are rated by credit rating agencies like CRISIL, ICRA, CARE and India Ratings. They are widely held by market participants because of their liquidity and reduced risk perception due to the government stake in some of them.

The Indian corporate sector has also been frequently raising capital through issuance of non-convertible debentures and commercial papers. These debentures/commercial Papers are mostly rated by rating agencies like CRISIL, ICRA, CARE and India Ratings. There is an active and vibrant secondary market for these debentures/commercial Papers. These normally trade at a marginally higher yield than bonds issued by PSU and other government-sponsored agencies.

Overview of Money Market in India

Money market instruments includes commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time. Money market assets are liquid and actively traded segment of fixed income markets.

Treasury bills are issued by the Government of India through regular weekly auctions, while Cash Management Bills are issued on an ad-hoc basis. They are mostly subscribed by banks, state governments, mutual funds and other entities. As on 25 Oct 2024, total outstanding treasury bills are Rs. 7,59,178 crore*. Certificate of Deposits are issued by scheduled banks for their short-term funding needs. They are normally available for up to 365 days tenor. Certificate of deposits issued by public sector banks are normally rated A1+ (highest short-term rating) by various rating agencies. As on 18 Oct 2024, outstanding Certificate of Deposits are Rs. 4,84,134 crore*. Certificate of deposits currently trade at a spread of around 95 basis points** over comparable treasury bills as on 31 Oct 2024, for a one-year tenor.

Commercial Papers are issued by corporate entities for their short-term cash requirements. Commercial Papers are normally rated A1+ (highest short-term rating). As on 15 Oct 2024, total outstanding Commercial Papers are Rs. 4,38,134 crore*. Commercial papers trade at around 120 basis points** over comparable treasury bills as on 31 Oct 2024, for a one-year tenor.

Call Money, TREPS and CROMS are mainly used by the borrowers to borrow a large sum of money on an over-night basis. While Call Money is an unsecured mode of borrowing, TREPS and CROMS are secured borrowing backed by collaterals approved by the Clearing Corporation of India.

B. What are the Investment Restrictions?

As per the Trust Deed read with the SEBI (MF) Regulations, the following investment restrictions apply in respect of the Scheme at the time of making investments. However, all investments by the Scheme will be made in accordance with the Investment Objective and Investment Pattern described earlier, as well as the SEBI (MF) Regulations, including Schedule VII thereof, as amended from time to time.

Subject to the asset allocation table under Section II Part C of this document, the following investment restrictions are presently applicable:

1. (i) The Scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorized to carry out such activity under the SEBI Act 1992. Such investment limit may be extended to 12% of the NAV of the scheme with the prior approval of the Board of Trustees and the Board of AMC.

Clause 12.8 of the SEBI Master Circular introduced the following norms for credit rating based single issuer limit for actively managed mutual fund schemes.

A Scheme shall not invest more than:

- a. 10% of its NAV in debt and money market securities rated AAA; or
- b. 8% of its NAV in debt and money market securities rated AA; or
- c. 6% of its NAV in debt and money market securities rated A and below

issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified in clause 1 of Seventh Schedule of the Mutual Fund Regulation.

Provided that such limit shall not be applicable for investments in Government securities, T-Bills and triparty repo on Government securities or treasury bills.

Provided further that investment within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with the Board.

(ii) The Scheme shall not invest in unlisted debt instruments including commercial papers (CPs), other than (a) government securities, (b) other money market instruments and (c) derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. which are used by mutual funds for hedging.

Provided that Mutual Fund Schemes may invest in unlisted Non-Convertible Debentures (NCD) upto a maximum of 10% of the debt portfolio of the scheme subject to the condition that such unlisted NCDs have a simple structure (i.e. with fixed and uniform coupon, fixed maturity period, without any options, fully paid up upfront, without any credit enhancements or structured obligations) and are rated and secured with coupon payment frequency on monthly basis.

(iii) Investment in unrated debt and money market instruments, other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. shall be subject to the following:

- a. Investments should only be made in such instruments, including bills re-discounting, usance bills, etc., that are generally not rated and for which separate investment norms or limits are not provided in SEBI (Mutual Fund) Regulations, 1996 and various circulars issued thereunder.
- b. Exposure of mutual fund schemes in such instruments shall not exceed 5% of the net assets of the schemes.

All such investments shall be made with the prior approval of the Board of AMC and the Board of trustees.

2. All fresh investments by mutual fund schemes in CPs would be made only in CPs which are listed or to be listed.
3. Restrictions on Investment in debt instruments having Structured Obligations / Credit Enhancements: The investment of mutual fund schemes in the following instruments shall not exceed 10% of the debt portfolio of the schemes and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the schemes:
 - i. Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade and
 - ii. Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.
 - iii. Investment limits as mentioned above shall not be applicable on investments in securitized debt instruments, as defined in SEBI (Public Offer and Listing of Securitized Debt Instruments) Regulations 2008.
 - iv. Investment in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares.

For this purpose, a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 (Regulations) and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

4. Transfer of investments from one Scheme to another Scheme in the Mutual Fund shall be allowed as per guidelines prescribed under clause 12.30 of the SEBI Master Circular and amendments made from time to time. Also SEBI vide Clause No. 9.11 of the SEBI Master Circular has prescribed the methodology for determination of price to be considered for inter-scheme transfers.
5. The Scheme may invest in another scheme (except fund of funds Schemes) under the AMC or any other mutual fund without charging any fees, provided that the aggregate inter-scheme investment made by all Scheme under the same management or in Scheme under the management of any other asset management company shall not exceed 5% of the Net Asset Value of the Mutual Fund.
6. The Scheme shall not invest in Fund of Funds scheme.
7. The Mutual Fund shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities. Provided further that sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by the RBI in this regard.
8. The Mutual Fund shall get the securities purchased/transferred in the name of the Mutual Fund on account of the Scheme, wherever the instruments are intended to be of a long term nature.
9. Pending deployment of funds of the Scheme, the AMC may invest funds of the Scheme in short-term

deposits of scheduled commercial banks shall be in terms of clause 12.16 of the SEBI Master Circular:

1. "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
2. Such short-term deposits shall be held in the name of the Scheme.
3. The Scheme shall not park more than 15% of their net assets in the short term deposit(s) of all the scheduled commercial banks put together. However, it may be raised to 20% with the prior approval of the Trustee. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
4. The Scheme shall not park more than 10% of their net assets in short term deposit(s) with any one scheduled commercial bank including its subsidiaries.
5. The Trustee shall ensure that the funds of the Scheme are not parked in the short term deposits of a bank which has invested in the Scheme.
6. AMC will not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.
7. The Trustee shall also ensure that the bank in which a scheme has short term deposits do not invest in the scheme until the scheme has short term deposits with such bank.

The above provisions do not apply to term deposits placed as margins for trading in cash and derivative market.

10. The Scheme shall not make any investment in:
 - a. any unlisted security of any associate or group company of the Sponsors; or
 - b. any security issued by way of private placement by an associate or group company of the Sponsors; or
 - c. the listed securities of group companies of the Sponsors, which is in excess of 25% of the net assets, except for investments by equity oriented exchange traded funds and index funds and subject to such conditions as may be specified by the SEBI.
11. The net exposure of the Scheme to repo transactions in corporate debt securities shall not be more than 10 % of the net assets of the Scheme.
12. The Scheme will not invest in foreign debt securities.
13. Save as otherwise expressly provided under SEBI (MF) Regulations, the Mutual Fund shall not advance any loans for any purpose and the Mutual Fund shall not borrow except to meet temporary liquidity needs of the Scheme for the purpose of payment of interest or IDCWs to Unit Holders, provided that the Mutual Fund shall not borrow more than 20% of the net assets of the Scheme and the duration of such borrowing shall not exceed a period of six months.
14. If any company invests more than 5 percent of the NAV of any of the Scheme, investment made by that Scheme or any other Scheme of the Mutual Fund in that company or its subsidiaries will be disclosed in accordance with the SEBI (MF) Regulations.
15. The total exposure of all Debt oriented Schemes in a particular sector (excluding investments in Bank CDs, TREPS, G-Secs, TBills, short term deposits of Scheduled Commercial Banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme and an additional exposure to financial services sector (over and above the limit of 20%) not exceeding 10% of the net assets of the scheme shall be allowed only by way of increase in exposure to HFCs. The additional exposure to such securities issued by HFCs should be rated AA and above and these HFCs should be registered with National Housing Bank (NHB) and the total investment/ exposure in HFCs shall not exceed 20% of the net assets of the Scheme. Further, an additional exposure of 5% shall be allowed for investments in securitized debt instruments based on retail housing loan portfolio and/or affordable housing loan portfolio.

At the time of investment, the AMC would use Association of Mutual Funds in India (AMFI) defined sector category.

The list of sector/category of investment including rating and limits are subject to regulatory changes.

16. i) The total exposure of the Scheme in a particular group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the Scheme. Such investment limit may be extended to 25% of the net assets of the Scheme with the prior approval of the Board of Trustees.

ii) The investments by debt mutual fund schemes in debt and money market instruments of group companies of both the sponsor and the asset management company shall not exceed 10% of the net assets of the scheme. Such investment limit may be extended to 15% of the net assets of the scheme with the prior approval of the Board of Trustees.

For this purpose, a group means a group as defined under regulation 2 (mm) of SEBI (Mutual Funds) Regulations, 1996 (Regulations) and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.

17. The cumulative gross exposure through debt, derivative positions (including commodity and fixed income derivatives), repo transactions and credit default swaps in corporate debt securities, Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme.

However, the following shall not be considered while calculating the gross exposure:

a) Security-wise hedged position and

b) Exposure in cash or cash equivalents with residual maturity of less than 91 days.

18. The Mutual Fund under all its schemes shall not invest more than 10% of units issued by a single issuer of REIT and InvIT.

19. The Scheme shall not invest:

a. more than 10% of its NAV in the units of REITs and InvITs; and

b. more than 5% of its NAV in the units of REITs and InvITs issued by a single issuer.

20. No sponsor of a mutual fund, its associate or group company including the asset management company of the fund, through the schemes of the mutual fund or otherwise, individually or collectively, directly or indirectly, have -

a. 10% or more of the share-holding or voting rights in the asset management company or the trustee company of any other mutual fund; or

b. representation on the board of the asset management company or the trustee company of any other mutual fund.

21. Further, it is to be noted that Scheme shall be holding minimum of 10% of net assets of the Scheme in liquid assets in terms of clause 4.6.1 of the SEBI Master Circular or as prescribed at Annexure 1 of AMFI Best Practice Circular on Prudential norms for Liquidity Risk Management for Open-ended Debt Schemes, whichever is higher.

Further, in terms of AMFI Best Practice Guideline Circular dated November 13, 2021 and such other circulars and guidelines provided, it was clarified that asset allocation limits base shall be considered as net assets excluding the extent of minimum stipulated eligible assets i.e. higher of 10% of net assets or LR-CRaR (Liquidity ratio based on 30-day Conditional Redemption at Risk).

22. The Scheme will comply with any other Regulation applicable to the investments of mutual funds

from time to time.

23. Subject to SEBI (MF) Regulations and the applicable guidelines issued by SEBI, the Mutual Fund may engage in stock lending. The AMC shall comply with all reporting requirements and the Trustee shall carry out periodic review as required by SEBI guidelines. Stock lending means the lending of stock to another person or entity for a fixed period of time, at a negotiated compensation. The securities lent will be returned by the borrower on expiry of the stipulated period.

The Investment Manager will apply the following limits, should it desire to engage in Stock Lending:

- a. Not more than 20% of the net assets of a Scheme can generally be deployed in Stock Lending.
- b. Not more than 5% of the net assets of a Scheme can generally be deployed in Stock Lending to any single intermediary.

24. The Scheme shall not invest in foreign securitized debt.

25. In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with clause 16A of the SEBI Master Circular, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

These investment limitations/parameters as expressed (linked to the Net Asset/Net Asset Value/capital) shall, in the ordinary course, apply as at the date of the most recent transaction or commitment to invest, and changes do not have to be effected merely because, owing to appreciation or depreciation in value or by reason of the receipt of any rights, bonuses or benefits in the nature of capital or of any Scheme of arrangement or for amalgamation, reconstruction or exchange, or at any repayment or redemption or other reason outside the control of the Mutual Fund, any such limits would thereby be breached. If these limits are exceeded for reasons beyond its control, the AMC shall adopt as a priority objective the remedying of that situation, taking due account of the interests of the Unit Holders.

Apart from the Investment Restrictions prescribed under the SEBI (MF) Regulations, there are internal risk parameters for limiting exposure to a particular security, country or sector. Such parameters are prescribed from time to time to respond to the dynamic market conditions and market opportunities.

The Trustee /AMC may alter the above stated limitations from time to time, and also to the extent the SEBI (MF) Regulations change, so as to permit the Scheme to make their investments in the full spectrum of permitted investments in order to achieve their investment objective.

All investment restrictions shall be applicable at the time of making investments.

Maximum Amount to be raised (if any)	Not Applicable
Dividend Policy (IDCW)	<p>(i) Growth Option</p> <p>Under this option, the Mutual Fund will not declare any IDCW. The income earned by the Scheme will remain invested in the Scheme concerned and will be reflected in the NAV. This Option is suitable for investors who are not looking for current income but who have invested only with the intention of capital appreciation. Please refer the section "A. Tax Benefit of Investing in the Mutual Funds" under "Tax & Legal & General Information" in the SAI.</p> <p>(ii) IDCW Option / Monthly IDCW Option / Weekly IDCW Option / Quarterly IDCW Option</p> <p>The above options are suited for investors seeking income through IDCW declared by the Scheme. Only Unit Holders opting for such option(s) will receive IDCWs. Under these options, the Scheme envisage declaring IDCWs comprising substantially of net income and realized gains.</p> <p>The options stated in point (ii) above, in turn offer two sub-options i.e. "Payout of IDCW" or "Reinvestment of IDCW"</p> <ul style="list-style-type: none"> • Payout of IDCW

As per the SEBI (MF) Regulations, the Mutual Fund shall despatch to the Unit Holders, IDCW warrants within 7 working days from record date for IDCW. IDCWs will be payable to those Unit Holders whose names appear in the Register of Unit Holders on the date (Record Date). IDCWs will be paid by cheque, net of taxes as may be applicable. Unit Holders will also have the option of direct payment of IDCW to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the Registered address of the sole/first holder as indicated in the original application form entirely at the risk of the unitholders. To safeguard the interest of Unit Holders from loss or theft of IDCW cheques, investors should provide the name of their bank, branch and account number in the application form. IDCW cheques will be sent to the Unit Holder after incorporating such information.

If the IDCW amount payable to Unit holders (net of tax deducted at source, wherever applicable) is for:

i. an amount less than Rs. 10, 000/- in case of Weekly IDCW Payout sub-option under Regular Plan (under which the subscription/switch in/SIP/STP-ins is available)/Direct Plan of the Scheme;

ii. an amount equal to or less than Rs. 100/- in case of payout sub options of IDCW, Monthly IDCW and Quarterly IDCW under Regular Plan (under which the subscription/switch in/SIP/STP-ins is available)/Direct Plan of the Scheme;

The IDCW amount payable will be compulsorily and automatically reinvested in the respective Scheme/Plan by issuing additional Units of the Scheme/Plan at the Applicable NAV on the next Business day after the Record Date. There shall be no load on IDCW so reinvested.

- **Reinvestment of IDCW**

Under this sub-option, IDCWs will be reinvested by way of additional Units of the Scheme instead of being paid out. Such reinvestment will be at the applicable NAV on the next Business Day after the Record Date. There shall however, be no entry load/exit load, if any, on the IDCW so reinvested. The IDCW so reinvested shall be constructive payment of IDCWs to the Unit Holders and constructive receipt of the same amount from each Unit Holder, for reinvestment in Units.

(iii) Weekly Reinvestment of IDCW Option / Daily Reinvestment of IDCW Option

Under these options, the Scheme envisage declaring IDCW comprising substantially of net income and realised gains. The IDCWs declared would be compulsorily reinvested by way of additional Units in the Schemes instead of being paid out in cash. When such additional Units are issued, account statements will be issued to the Unit Holders only upon receipt of a specific request for the same from the Unit Holder. The IDCWs so reinvested shall be constructive payment of IDCWs to the Unit Holders and constructive receipt of the same amount

from each Unit Holder, for reinvestment in Units. There shall however, be no entry load, if any, on the IDCWs so re-invested.

All Units will rank pari passu, among Units within the same Option in each Scheme or within the same Option in the relevant Plan of the Scheme concerned, as to assets, earnings and the receipt of IDCW distributions, if any, as may be declared by the Trustee. However, the receipt of IDCW distribution will be subject to: (i) categorisation of investors for applicability of statutory levies; and (ii) surcharge/cess/any other levy payable by the scheme in respect of separate category of investors, if applicable.

The IDCW declared under the IDCW Reinvest options under Discontinued Plan, will be reinvested in the corresponding options of the Regular Plan ('Continuing Plan') of the Scheme.

Unit Holder(s) of the aforesaid Schemes can seek payout of IDCW, provided the option has Payout Facility, by submitting the written request at any of the Official Point of Acceptance of Transactions (OPAT) of the AMC/CAMS.

Effect of IDCW: The NAV of the Unit Holders in IDCW Option, Monthly IDCW Option, Daily Reinvestment of IDCW Option, Weekly IDCW Option, and Quarterly IDCW option will stand reduced by the amount of IDCW declared.

On declaration of IDCW, the NAV of the respective IDCW Options will further stand reduced by the applicable statutory levy / surcharge/cess/ any other levy payable by the scheme in respect of separate category of investors if any. Notwithstanding varying rates of statutory levies, the ex IDCW NAV will remain the same for all categories of investors in a particular option, though the amount of IDCW received by Unit Holders may vary depending on the category of each Unit Holder.

For details on taxation of IDCW please refer the SAI.

Notes

The Trustee may decide to declare distributions under the IDCW Option of the Scheme subject to availability of distributable surplus. There is no assurance or guarantee to the Unit Holders as to the rate of IDCW will be regularly paid, though it is the intention of the Scheme to make IDCW distribution under the respective plan/options of the Scheme.

For IDCW Options having a defined frequency, the Trustee at its sole discretion may also declare interim distributions between two successive record dates. The declaration/actual payment of IDCW and the frequency thereof will depend on the availability of distributable surplus computed in accordance with SEBI (MF)

Regulations. The decision of the Trustee in this regard shall be final.

An investor on record of the CAMS / Statement of Beneficiary Owners maintained by the Depositories for the purpose of IDCW distribution is an investor who is a Unit Holder/ Beneficial Owners as on the Record Date. In order to be a Unit Holder, an investor has to be allocated Units representing receipt of clear funds by the Scheme.

IDCW, if declared, will be paid (subject to deduction of tax at source, if any) to those Unit holders whose names appear in the Register of Unit holders on the record date. In case of units held in dematerialized mode, the Depositories (NSDL/CDSL) will provide the list of eligible demat account holders and the number of units held by them in electronic form on the Record date to the Registrars and Transfer Agent of the Mutual Fund.

On payment of IDCW, the NAV will stand reduced by the amount of IDCW and Dividend distribution tax/statutory levy (if applicable) paid. The Trustee/AMC reserves the right to change the record date from time to time.

IDCW Distribution Procedure

In accordance with clause 11.6.1 of Master Circular, the procedure for IDCW Distribution would be as under:

- a. Quantum of IDCW and the record date will be fixed by the Trustee. IDCW so decided shall be paid, subject to availability of distributable surplus. Further, with respect to declaration of IDCW upto monthly frequency, the trustees can delegate to the officials of AMC to declare and fix the record date as well as decide the quantum of IDCW subject to the conditions as laid under clause 11.6.3 of Master Circular.
- b. Within one calendar day of decision by the Trustee, the AMC shall issue notice to the public communicating the decision about the IDCW including the record date, in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the head office of the Mutual Fund is situated.
- c. The Record Date will be 2 working days from the date of publication in at least one English newspaper or in a newspaper published in the language of the region where the Head Office of the mutual fund is situated, whichever is issued earlier. Record date shall be the date which will be considered for the purpose of determining the eligibility of investors whose names appear on the register of Unit holders maintained by the Mutual Fund/statement of beneficial ownership maintained by the Depositories, as applicable, for receiving IDCW.
- d. The notice will, in font size 10, bold, categorically state that pursuant to payment of IDCW, the NAV of the Scheme would fall to the extent of payout and statutory levy (if applicable).
- e. The NAV will be adjusted to the extent of IDCW distribution and statutory levy, if any, at the close of business hours on record date.

	<p>f. Before the issue of such notice, no communication indicating the probable date of IDCW declaration in any manner whatsoever, will be issued by Mutual Fund.</p>
<p>Allotment (Detailed procedure)</p>	<p>Full allotment will be made to all valid applications received. Allotment to NRIs/FIIs will be subject to RBI approval, if required. Subject to the SEBI (MF) Regulations, the Trustee may reject any application received in case the application is found invalid/incomplete or for any other reason in the Trustee's sole discretion. All allotments will be provisional, subject to realization of payment instrument and subject to the AMC having been reasonably satisfied about receipt of clear funds. Any redemption or switch out transaction in the interim is liable to be rejected at the sole discretion of the AMC. In case of cheque returns, the Mutual Fund will send the copy of the returned cheque and bank return memo by normal post within 15 days of the Registrar having received, at its registered office, the physical and the return memo. The Mutual Fund will not be responsible for any loss or damage to the applicant on account of any delay in informing him/her/it about the return of the cheque, where such delay is caused by the clearing mechanisms of banks and clearing houses involved in realization of cheques.</p> <p>It is mandatory for NRIs to attach a copy of the payment cheque/FIRC/Debit Certificate to ascertain the repatriation status of the amount invested. NRI applicants should also clearly tick on account type as NRE or NRO or FCNR to determine the repatriation status of the investment amount. The AMC and the Registrar may ascertain the repatriation status purely based on the details provided in the application form under 'Investment and payment details' and will not be liable for any incorrect information provided by the applicants. Applicants will have to coordinate with their authorized dealers and banks to repatriate the investment amount as and when needed.</p> <p>Allotment confirmation specifying the number of Units allotted shall be sent to the Unit holders at their registered e-mail address and/or mobile number by way of email and/or SMS within 5 Business Days from the date of receipt of transaction request.</p> <p>All applications and/or refunds that are rejected for any reason whatsoever will be returned through instruments or payment channels such as RTGS, NEFT, IMPS, direct credit, etc. or any other mode allowed by Reserve Bank of India from time to time, for payments including refunds to unitholders in form of the cheque, demand draft.</p> <p>Further, AMCs may also use modes of despatch such as speed post, courier etc. for payments including refunds to unitholders in addition to the registered post with acknowledgement due within 15 days to the address as mentioned by the applicant. The Mutual Fund reserves the right to recover from an investor any loss caused to the Scheme on account of dishonor of cheques issued by him/her/it for purchase of Units.</p>

	<p>For investors who have given demat account details, the Units will be credited to the investor's demat account after due verification and confirmation from NSDL/CDSL of the demat account details and only after the funds are credited into the Mutual Fund's scheme(s) account to the satisfaction of the AMC.</p> <p>Allotment confirmation specifying the number of Units allotted shall be sent to the Unit holders at their registered e-mail address and/or mobile number by way of email and/or SMS within 5 Business Days from the date of receipt of transaction request.</p> <p>Note: Allotment of units will be done after deduction of applicable stamp duty and transaction charges, if any.</p>
Refund	<p>If application is rejected, refunds will be completed within 5 Business Days from the transaction date for all cases where the remitter details are available. If the Mutual Fund refunds the amount after 5 Business Days, interest as specified by SEBI (currently, 15% per annum) shall be paid by the AMC. Refunds will be made through electronic modes such as RTGS, NEFT, Direct Credits & Cheques as applicable.</p>

However, if the investor wishes to opt for physical copy may request for the same.</p> <p>Half-yearly CAS shall be issued at the end of every six months (i.e. September/ March) on or before 21st day of succeeding month, to all investors providing the prescribed details across all schemes of mutual funds and securities held in dematerialized form across demat accounts, if applicable.</p> <p>For further details, please refer SAI.</p>
Dividend/ IDCW	<p>The IDCW proceeds will be paid directly into the Unitholder's bank account through various electronic payout modes such as Direct credit/NEFT/RTGS and cheques as applicable within 7 working days of the record date of IDCW</p> <p>In the event of delay/failure to despatch the IDCW warrants within the aforesaid period, interest for the period of delay in transfer of IDCW shall be paid by AMC to unitholders at the rate of 15% per annum along with the proceeds of IDCW.</p>
Redemption	<p>Units can be redeemed (sold back to the Mutual Fund) at the relevant Redemption Price. The redemption requests can be made on the pre-printed forms (transaction slip/common transaction form) or by using the form at the bottom of the account statement. The redemption request can be submitted at any of the Official Points of Acceptance of transaction, the details of which are mentioned at the end of this SID. As all allotments are provisional, subject to realization of payment instrument and subject to the AMC having been reasonably satisfied that the Mutual Fund has received clear funds, any redemption or switch out transaction in the interim is liable to be rejected at the sole discretion of the AMC.</p> <p>A unit Holder may request redemption of a specified amount or a specified number of Units only. If the redemption request is made for a specified amount and the number of Units is also specified by the Unit Holder, the number of Units specified will be considered for deciding the redemption amount. Unit Holders may also request for redemption of their entire holding and close the account by indicating the same at an appropriate place in the transaction slip/common transaction slip.</p> <p>It may, however, be noted that in the event of death of the Unit Holder, the nominee or legal heir, (subject to production of requisite documentary evidence to the satisfaction of the AMC) as the case may be, shall be able to redeem the investment.</p>

In case an investor has purchased Units on more than one day (either under the NFO Period or through subsequent purchases) the Units purchased first (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First-In-First-Out basis.

In case the Units are standing in the names of more than one Unit Holder, where mode of holding is specified as Joint redemption requests will have to be signed by all joint holders. However, in cases of holding specified as 'Anyone or Survivor', any one of the Unit Holders will have the power to make redemption requests, without it being necessary for all the Unit Holders to sign. However, in all cases, the proceeds of the redemption will be paid to the first-named holder only.

The Redemption or repurchase proceeds shall be dispatched to Unit Holders within three Working Days from the date of acceptance of redemption or repurchase.

Investor may note that in case of exceptional scenarios as prescribed by AMFI vide its communication no. AMFI/ 35P/ MEM-COR/ 74 / 2022-23 dated January 16, 2023 read with Clause 14.1.3 of the SEBI Master Circular, the AMC may not be able to adhere with the timelines prescribed above.

Unit Holders are encouraged and advised to submit their requests for bank mandate/ Multiple Bank Accounts Registration request atleast 10 business days prior to date of redemption / IDCW payment, if any. The AMC reserves the right to extend/modify the timelines on a case to case basis.

The redemption payment will be issued in favour of the sole/ first Unit Holder's registered name and bank account number, if provided. Payment via cheque, where issued, will be sent to the address of the sole/first Holder registered with the fund at the time of dispatch entirely at the risk of the unit holder. The redemption cheque/demand draft will be payable at par at all the places where the official points of acceptance of transaction are located. Bank charges for collection of redemption proceeds will be borne by the Unit Holder. With a view to safeguarding their interest, it is mandatory that Unit Holders indicate their Bank Account No., name of the bank and branch in the application for purchasing Units of the Scheme. A fresh account statement will also be sent/mailed to redeeming investors, indicating the new balance to the credit in the account, along with the redemption cheque.

Unit holders are requested to note that application for redemption or switch out for units for which funds are not realized via purchase or switch-in in the Scheme of the Fund shall be liable to be rejected. In other words, redemption of units will be processed only if the funds for such units are realized in the Scheme by a way of payment instructions/transfer or switch-in funding process.

The proceeds towards redemptions and IDCW will be dispatched by a reasonable mode of dispatch like courier, speed post, UCP, etc. in case of cheque/demand draft or directly credited to the bank account (as per the details mentioned by the investor), entirely and solely at the risk of the investor. The Mutual Fund will endeavour to remit redemption proceeds via electronic means, as made available by RBI. Where such electronic means are not available or feasible under any circumstances, the Mutual Fund will remit the redemption proceeds by way of cheques. The investor will not hold the Mutual Fund or the AMC or the Registrar responsible for any non-receipt or delay of receipt of redemption & IDCW proceeds due to any negligence or deficiency in service by the courier company, postal authorities or the bank executing direct credits, or due to incorrect bank account details provided by the investor.

In case of redemptions, Unit holders should note that Two Factor Authentication [2FA] is mandatory for all redemption / switches including STP/SWP submitted through electronic mode. OTP will be sent to either email id or mobile number registered in the folio and the Unit holder have to confirm on the OTP received. On successful validation only, the redemptions will be accepted and processed.

Redemption by NRIs and FPIs

Credit balances in the account of an NRI/FPI investor may be redeemed by such investors in accordance with the procedure described above and subject to the procedures laid down by RBI, if any. Such redemption proceeds will be paid by means of a Rupee cheque payable to the NRI's/FPIs or by a foreign currency draft drawn at the then rates of exchange less bank charges, subject to RBI procedures and approvals.

Effect of Redemption

On redemption, the unit capital and reserves will stand reduced by an amount equivalent to the product of the number of Units redeemed and the Redemption Price as on the date of redemption. Units once redeemed will be extinguished and will not be re-issued.

Fractional Units

Since a request for purchase is generally made in Rupee amounts and not in terms of number of Units of the Scheme, a Unit Holder may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places. However, fractional Units will, in no way, affect the Unit Holder's ability to redeem the Units, either in part or in full, standing to his/her/its credit.

Redemption by investors transacting through the Stock Exchange mechanism

	<p>Investors who wish to transact through the stock exchange shall place orders for redemptions as currently practiced for secondary market activities. Investors must submit the Delivery Instruction Slip to their Depository Participant on the same day of submission of redemption request, within such stipulated time as may be specified by NSE/BSE, failing which the transaction will be rejected. Investors shall seek redemption requests in terms of number of Units only and not in Rupee amounts. Redemption amounts shall be paid by the AMC to the bank mandate registered with the Depository Participant.</p> <p>Redemption by investors who hold Units in dematerialized form</p> <p>Redemption request for Units held in demat mode shall not be accepted at the offices of the Mutual Fund/AMC/Registrar. Unit holders shall submit such request only through their respective Depository Participant.</p>
Bank Mandate	<p>It is mandatory for every applicant to provide the name of the bank, branch, address, account type and number as per requirements laid down by SEBI and any other requirements stated in the Application Form. <p>Transactions Through Channel Distributors</p>	<p>Investors may enter into an agreement with certain distributors (with whom AMC also has a tie up) referred to as “Channel Distributors” who provide the facility to investors to transact in units of mutual funds through various modes such as their website</p>

	<p>/ other electronic means or through Power of Attorney in favor of the Channel Distributor, as the case may be.</p> <p>Under such arrangement, the Channel Distributors will aggregate the details of transactions (viz. subscriptions/redemptions/switches) of their various investors and forward the same electronically to the AMC / RTA for processing on daily basis as per the cut-off timings applicable to the relevant schemes. The Channel Distributor is required to send copy of investors' KYC and agreement entered into between the investor & distributor to the RTA (one time for central record keeping) as also the transaction documents / proof of transaction authorization as the case may be, to the AMC / RTA as per agreed timelines.</p> <p>Normally, the subscription proceeds, when invested through this mode, are by way of direct credits to the specified bank account of DSP Mutual Fund. The redemption proceeds (subject to deduction of tax at source, if any) and IDCW payouts, if any, are paid by the AMC to the investor directly through direct credit in the bank account of the investor specified by the distributor or through issuance of payment instrument, as applicable.</p> <p>In case KYC and other necessary documents are not furnished within the stipulated timeline, the transaction request shall be liable to be rejected or the folio will be locked for future subscriptions/ switches. The Mutual Fund, the AMC, the Trustee, along with their directors, employees and representatives shall not be liable for any errors, damages or losses arising out of or in connection with the transactions undertaken by investors or as provided by the distributors through the above mode.</p> <p>It may be noted that investors investing through this mode may also approach the AMC / ISC directly with their transaction requests (financial / non-financial) or avail of the online transaction facilities offered by the AMC.</p>
<p>Subscription of Units Through Electronic Mode</p>	<p>Subject to the investor fulfilling certain terms and conditions as stipulated by AMC from time to time, the AMC, Mutual Fund, Registrar or any other agent or representative of the AMC, Mutual Fund, the Registrar (“Recipient”) may accept transactions through any electronic mode (fax/web/ / /electronic transactions) (“Electronic Transactions”). The acceptance of Electronic Transactions will be solely at the risk of the investor and the Recipient shall not in any way be liable or responsible for any loss, damage caused to the investor directly or indirectly, as a result of the investor sending or purporting to send such transactions including where such transaction sent / purported to be sent is not processed on account of the fact that it was not received by the Recipient.</p> <p>The investor acknowledges that Electronic Transaction is not a secure means of giving instructions / transactions requests and that the investor is aware of the risks involved including those arising out of such transmission being inaccurate, imperfect,</p>

	<p>ineffective, illegible, having a lack of quality or clarity, garbled, altered, distorted, not timely etc. The investor's request to the Recipient to act on Electronic Transaction is for the investor's convenience and the Recipient is not obliged or bound to act on the same. The investor authorizes the recipient to accept and act on any Electronic Transaction which the recipient believes in good faith to be given by the investor and the recipient may at its discretion treat any such transaction as if the same was given to the recipient under the investor's original signature.</p> <p>In case there is any difference between the particulars mentioned in the fax/ web/ electronic transmission received as against the original document which may be received thereafter, the Recipient shall not be liable for any consequences arising therefrom.</p> <p>The investor agrees that the recipient may adopt additional security measures including signature verification, telephone call backs or a combination of the same, which may be recorded and the investor consents to such recording and agrees to co-operate with the recipient to enable confirmation of such transaction requests. In consideration of the Recipient from time to time accepting and at its sole discretion (including but not limited to the AMC extending / discontinuing such facilities from time to time) acting on any Electronic Transaction request received / purporting to be received from the investor, the investor agrees to indemnify and keep indemnified the AMC, Directors, employees, agents, representatives of the AMC, Mutual Fund and Trustees from and against all actions, claims, demands, liabilities, obligations, losses, damages, costs and expenses of whatever nature (whether actual or contingent) directly or indirectly suffered or incurred, sustained by or threatened against the indemnified parties whatsoever arising from or in connection with or any way relating to the indemnified parties in good faith accepting and acting on Electronic Transaction requests including relying upon such transaction requests purporting to come from the investor even though it may not come from the Investor. The AMC reserves the right to modify the terms and conditions or to discontinue the facility at any point of time.</p> <p>Unit holders should note that Two Factor Authentication [2FA] is mandatory for all subscriptions including SIP registration submitted through electronic mode. OTP will be sent to either email id or mobile number registered in the folio and the Unit holder have to confirm on the OTP received. On successful validation only, the subscriptions / systematic registration will be accepted and processed.</p>
<p>Third Party Payment Avoidance & additional documents/ declaration required</p>	<p>To safeguard the interests of applicant/investors and avoid fraudulent transactions in any other name, the Mutual Fund does not accept Third Party Payments. In case of subscriptions, the Mutual Fund shall verify the bank account from which the funds have been paid for the subscription. In case it is identified that the funds have not come from the investor's bank account, the subscription will be rejected. Please refer SAI for Details.</p>

The information on NAVs of the Scheme/plans may be obtained by the Unit Holders, on any day, by calling the office of the AMC or any of the Investor Service Centres at various locations. The NAV of the Scheme will also be updated on the AMFI website www.amfiindia.com and on www.dspim.com.

In case of delay, the reasons for such delay would be explained to AMFI in writing. If the NAVs of the Scheme are not available before commencement of business hours on the following day due to any reason, the Fund shall issue a press release providing reasons for the delay and explaining when the Fund would be able to publish the NAVs.

If the NAVs of the Scheme for a business day (Day T) is not published till 3.00 p.m. on the following business day (T+1) due to any reason, the Investment Manager shall temporary suspend all transactions (subscription/redemption) from T+2 business day onwards, till NAVs of the Scheme for Day T and Day T+1 are published.

In case NAV of Corporate Debt Market Development Fund ('CDMDF') units is not available by 9:30 p.m. of same Business Day, NAV declaration timing for Mutual Fund Schemes holding units of CDMDF shall be 10 a.m. on next business day instead of 11 p.m. on same Business Day.

Latest available NAVs shall be available to unitholders through SMS, upon receiving a specific request in this regard. Refer relevant disclosures mentioned in the SAI available on AMC website i.e. www.dspim.com

D. Transaction charges and stamp duty-

Transaction charges: AMC has discontinued the payment of transaction charges to distributors effective May 01, 2023. Accordingly, no transaction charges shall be deducted from the investment amount given by the investor, for transactions / applications received through the distributors (i.e. in Regular Plan) and full investment amount will be invested in the Scheme.

Stamp Duty: Mutual fund units issued against Purchase transactions would be subject to levy of stamp duty @ 0.005% of the amount invested.

For further details, please refer SAI.

E. **Associate Transactions-** Please refer to Statement of Additional Information (SAI)

F. **Taxation-** For details on taxation please refer to the clause on Taxation in the SAI apart from the following:

The information provided is as per the provisions of the Income-tax Act, 1961 ("the Act"), as amended by the Finance (No.2) Act, 2024. The information is provided for general information only. It does not purport to be a complete analysis of all relevant tax considerations; nor does it purport to be a complete description of all potential tax costs, tax incidence and risks for the investors. In view of the individual nature of the implications, each investor is advised to consult his or her own tax advisors/authorized dealers with respect to the specific amount of tax and other implications arising out of his or her participation in the Schemes. It is assumed that units of mutual fund are held as capital asset by the investors.

§“Specified Mutual Fund” means a Mutual Fund by whatever name called, where not more than 35 per cent of its total proceeds is invested in the equity shares of domestic companies. Finance Act 2023 has inserted Section 50AA in the Act. As per the said section, with effect from 1 April 2023, gains/losses from units of Specified Mutual Fund would be deemed to be short term capital gain/losses irrespective of the holding period. This is applicable for all such units which are acquired on or after Apr 1, 2023. For units which were acquired prior to that, rates applicable to long term capital gains shall be applicable if the units are held for a period of 36 months or more as on the date of redemption (if redeemed upto 22 July 2024) and 24 months or more (if redeemed on or after 23 July 2024).

Additional Notes

1. Income of Mutual Fund is exempt from tax as per section 10(23D) of the Act.
2. Based on the investment objectives of the scheme, the scheme will potentially be classified as "Specified Mutual Fund" for the purpose of taxation. Accordingly, the rates covered above are as applicable to Specified Mutual Funds.
3. These rates should also applicable to units acquired in case of consolidation of options under any scheme of a mutual fund (in the absence of any specific exemption provision in the Act)
4. The above rates are subject to surcharge as applicable (refer table below for rates) and Health and Education cess at the rate of 4% on income tax and surcharge.

Particulars	Income > 50 lakhs and upto 1 crores(in Rs)	Income > 1 cr and upto 2 cr(in Rs)	Income > 2 cr and upto 5 cr(in Rs)	Income > 5 cr and upto 10 cr(in Rs)	Income exceeding 10 cr(in Rs)

Gains (units acquired prior to 1 April 2023)					
Non Resident Individuals / HUFs / BOIs / AOPs and Artificial juridical persons - Short Term Capital Gains and Income Distribution	10%	15%	25%	25% ^{&}	25% ^{&}
Firms, Local authorities	-	12%	12%	12%	12%
Co-operative societies		7%	7%	7%	12%
Domestic Company		7%	7%	7%	12%
** (New regime under section 115BAA)	-	10%	10%	10%	10%
FII/ FPI, Foreign company	-	2%	2%	2%	5%
Please note surcharge is not applicable in case of TDS deducted on income distributed to resident investors under section 194K					

& Finance Act, 2023 has amended surcharge rates for individuals and HUFs or association of persons [other than a cooperative society], or body of individuals, whether incorporated or not, or an artificial juridical person referred to in sub-clause (vii) of clause (31) of section 2 who opt for the new tax regime under section 115BAC. As per the amended section, the maximum rate of surcharge shall be 25% for income computed under section 115BAC of the Income tax Act, 1961 (new tax regime) instead of 37% under normal provisions (Old tax regime). The new tax regime would be the default tax regime from FY 2023-24 onwards.

++ In case company opts for new regime of taxation, then the surcharge would be applicable at the rate of 10% irrespective of the taxable income.

5. The Finance Act 2021 introduced special provisions for higher rate of TDS in case of non-filers of Income tax return (referred to as “specified person”). Specified person does not include a non-resident who does not have permanent establishment in India. Finance Act 2023, with effect from 1st April, 2023, amended the said proviso to also exclude a person who is not required to furnish the return of income for the assessment year relevant to the said previous year and is notified by the Central Government in the Official Gazette in this behalf.

6. Any person entitled to receive any sum or income or amount, on which tax is deductible under Chapter XVII B (hereafter referred to as deductee), shall furnish his Permanent Account Number to the person responsible for deducting such tax (hereafter referred to as deductor), failing which tax shall be deducted at the higher of the following rates, namely:

- (i) at the rate specified in the relevant provision of this Act; or
- (ii) at the rate or rates in force; or
- (iii) at the rate of twenty per cent.

The aforesaid provision dealing with higher taxation in the absence of furnishing Permanent Account Number shall not apply to a non-resident with effect from 1st June, 2016 on furnishing the following details and documents by such non-resident:

- (i) name, e-mail id, contact number;
- (ii) address in the country or specified territory outside India of which the non-resident is a resident;
- (iii) a certificate of his being resident in any country or specified territory outside India from the Government of that country or specified territory if the law of that country or specified territory provides for issuance of such certificate;
- (iv) Tax Identification Number of the non-resident in the country or specified territory of his residence and in case no such number is available, then a unique number on the basis of which the non-resident is identified by the Government of that country or the specified territory of which he claims to be a resident.

7. In case of investments by NRIs in closed ended funds during NFO, at the time of redemption of units, TDS will be deducted at the applicable rate. However, in respect of those Unit Holders who have acquired the units on the Stock Exchange post listing of units, the Unit Holders would need to provide a certificate from a Chartered Accountant certifying the details of acquisition of units to the Fund within two days of maturity of the Scheme, so as to enable the Fund to deduct TDS at the applicable rates. In the event of such details not being provided, the Fund would deduct TDS on the redemption proceeds at the highest rate of TDS applicable.

8. For detailed tax implications, please refer to 'SECTION VIII - TAX & LEGAL & GENERAL INFORMATION' provided in 'Statement of Additional Information ('SAI')'.

G. Rights of Unitholders- Please refer to SAI for details.
