Type of Scheme	An open ended scheme replicating/ tracking Nifty 50 index
Investment Objective	The Scheme seeks to provide returns that, before expenses, closely correspond to the total return of the underlying index (NIFTY 50 index), subject to tracking errors. There is no assurance that the investment objective of the Scheme will be realized.
Asset Allocation Pattern	Under normal circumstances, it is anticipated that the asset allocation of the Scheme shall be as follows:

Instruments	Indicative a (% of tota	Risk Profile		
	Minimum	Maximum		
Equity and Equity Related Securities of companies constituting Nifty 50, the Underlying Index	95%	100%	Medium High	to
Cash and Cash Equivalents / Money Market Instruments* with residual maturity not exceeding 91 days	0%	5%	Low Medium	to

*Money Market Instruments will include TREPS, Commercial Paper, Certificates of Deposit, Treasury Bills, Bills Rediscounting, Repos, short-term Government securities and any other such short-term instruments as may be allowed under the regulations prevailing from time to time.

The Scheme retains the flexibility to invest across all the securities in money market instruments as permitted by SEBI / RBI from time to time, including Liquid/Money Market schemes of mutual funds.

The net assets of the scheme will be invested in stocks constituting the Nifty 50. This would be done by investing in all the stocks comprising the Nifty 50 in the same weightage that they represent in the Nifty 50. A small portion of the net assets will be invested in TREPS / money market instruments permitted by SEBI / RBI.

Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading positions. Exposure to such derivatives will be restricted to 20% of net assets of the scheme. The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of such deviation.

The Scheme will not lend more than 50% of its corpus. The Scheme will enter into securities lending in accordance with the framework specified by SEBI in this regard.

The Scheme will not invest in foreign securities. The Scheme will not invest in equity

linked debentures. The Scheme will not invest in Securitized Debt. The Scheme will not participate in repo of money market and corporate debt securities.

The Scheme will not make any investment in debt instruments having structured obligations and credit enhancements. The Scheme may enter into short selling transactions in accordance with the guidelines prescribed by SEBI.

The cumulative gross exposure through equity, debt, derivative positions, other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time should not exceed 100% of the net assets of the scheme.

In the event of involuntary corporate action, the Scheme shall endeavor to dispose the security not forming part of the Underlying index within 7 business days from the date of listing, subject to availability of adequate liquidity for the security.

The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of occurrence of deviation. Where the portfolio is not rebalanced within 7 Days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Schemes. Any alteration in the investment pattern will be for a short term on defensive considerations; the intention being at all times to protect the interests of the Unit Holders.

It may be noted that no prior intimation/indication will be given to investors when the composition/asset allocation pattern under the Scheme undergoes changes within the permitted band as indicated above.

Investment Strategy

The Scheme will track its Underlying Index and will use a "passive" or indexing approach to endeavor to achieve scheme's investment objective. The scheme will neither try to beat the index it tracks nor take active approach in times when markets seem to be over/under valued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Since the scheme is an exchange traded fund, the scheme will only invest in the security constituting the underlying index.

Since the scheme is an exchange traded fund, it will endeavor that at no point of time the scheme will deviate from the index.
