	 Tracking Difference is defined as the annualized difference of daily returns between the index and the NAV of the Scheme. Tracking difference of the Scheme shall be disclosed on the website of the AMC (i.e. www.dspim.com) and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units. In this example, the Silver benchmark prices as the LMBA Silver fixing converted for Indian Rupee for landed cost. A synthetic silver ETF tracking this benchmark has been considered. Following is the tracking difference -

	Synthetic Silver ETF	-8.65%	14.37%	16.58%	9.33%	
	Silver Benchmark Index	-8.11%	15.81%	17.56%	9.72%	
	Tracking Difference (in %)	-0.55%	-1.44%	-0.98%	-0.39%

SECTION IV - INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader equity and bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Scheme specific risk factors:

The specific risk factors related to the Scheme include, but are not limited to the following:

- Market Risk: The value of the Units relates directly to the value of the silver held by the Scheme and fluctuations in the price of silver could adversely affect investment value of the Units. The factors that may affect the price of silver, inter alia, include demand & supply, economic and political developments, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, movement/trade of silver that may be imposed by RBI, trade and restrictions on import/export of silver or silver jewellery etc. Hence the investor may also lose money due to fluctuation in the prices of the silver. The returns from physical silver may underperform returns from any other asset class. Price volatility in Silver as a commodity may be much higher because of the industrial use of it. The commodity also goes through different business cycle according to demand situation arising from specific industries. Silver as a commodity is very different from Gold. While Gold is considered as the most defensive bet and has act as safe haven to an investor the same may not be the case with silver.
- Asset Class Risk: The returns from the types of Securities in which the Scheme invests may underperform returns of general Securities markets or different asset classes. Different types of Securities tend to go through cycles of out-performance and under-performance in comparison of Securities markets.
- Liquidity Risk: Trading in units of the scheme on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged.

The Mutual Fund scheme has to sell silver only to bullion bankers/ traders who are authorized to buy silver. Though, there are adequate number of players (commercial or bullion bankers) to whom the Fund can sell silver. However, the Fund may have to resort to distress sale of silver if there is no or low demand for silver to meet its cash needs of redemption or expenses. The Scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements. The Trustee, in general interest of the Unit holders of the Scheme offered under this Scheme

Information Document and keeping in view of the unforeseen circumstances / unusual market conditions, may limit the total number of Units, which can be redeemed on any Business Day

The Lack of an Active Trading Market

Although the units are listed and traded on the exchange, there can be no guarantee that an active trading market for the units will be maintained. If you need to sell your Shares at a time when no active market for them exists, the price you receive, assuming that you are able to sell them, likely will be lower than the price you would receive if an active market did exist.

Withdrawal from Participation by Market Makers May Affect the Liquidity of Units

If one or more Market Makers withdraws from participation, it may become more difficult to create or redeem Creation Units, which may reduce the liquidity of the Units. Such circumstances may be more pronounced in market conditions of increased volatility. If it becomes more difficult to create or redeem Creation Units, the correlation between the price of the Units and the NAV may be affected, which may affect the trading market for the Units.

- **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Market Maker/ Large Investor to arbitrage resulting into wider premium/ discount to NAV. Any changes in any other regulation relating to import and export of silver or silver jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the scheme to buy/sell silver against the purchase and redemption requests received.
- **Passive Management of Investments:** Scheme shall follow a passive investment strategy. The scheme's performance may be affected by the general price decline in the silver prices. The scheme shall invest in Silver regardless of their investment merit. The scheme does not aim to take any defensive position in case of falling markets.
- Active Market: Although the scheme is proposed to be listed on exchange, there can be no assurance that an active secondary market will be developed or maintained. The AMC and the Trustees will not be liable for delay in trading of Units on Stock Exchange due to the occurrence of any event beyond their control. For an investor in less than creation unit size, exchange quotes may not be always available.
- **Risks associated with handling, storing and safekeeping of physical silver**: There is a risk that part or all of the Scheme's silver could be lost, damaged or stolen. Access to the Scheme's silver could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.
- Tracking Error: The Fund Manager may not be able to invest the entire corpus in the same proportion as in the underlying benchmark due to various factors such as fees, expenses of the scheme, corporate action, cash balance, changes in underlying benchmark and regulatory policies which may affect the AMCs/schemes ability to achieve close correlation with the underlying benchmark. Tracking error may be accounted by the various reasons which includes expenses, cash balance to meet redemptions, time to reallocate the portfolio subsequent to changes in the underlying benchmark etc. The Fund Manager will endeavour to keep the tracking error as low as possible.

"Tracking Error" i.e. the annualised standard deviation of the difference in daily returns between physical silver and the NAV of Silver ETF based on past one year rolling over data (For ETFs in existence for a period of less than one year, annualized standard deviation shall be calculated based on available data) shall not exceed 2%. The disclosure regarding the same shall be made on daily basis on the website of the AMC and AMFI. Tracking Error may arise including but not limited to the following reasons: -

- a) Expenditure incurred by the fund.
- b) Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, for corporate actions or otherwise.

- c) Securities trading may halt temporarily due to circuit filters.
- d) Disinvestments to meet redemptions, recurring expenses, etc.
- e) Execution of large buy / sell orders
- f) Transaction cost (including taxes and insurance premium) and recurring expenses
- g) Realisation of Unit holders' funds
- h) Accounting for indirect taxes including tax reclaims
- SEBI Regulations (if any) may impose restrictions on the investment and/or disvestment activities of the Scheme. Such restrictions are typically outside the control of the AMC and may cause or exacerbate the Tracking Error

It will be the endeavor of the fund manager to keep the tracking error as low as possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the benchmark.

In case of unavoidable circumstances in the nature of force majeure which are beyond the control of the AMCs, the tracking error may exceed 2%, and the same shall be brought to the notice of the Board of DSP Trustee Private Limited ('Trustees') with the corrective actions taken by the AMC, if any.

• Redemption Risk: Investors may note that even though this is an open ended scheme, the Scheme would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are listed, subject to rules and regulations of the Stock Exchange. The AMC will appoint Market Makers (MMs) to provide liquidity for the units of Silver ETFs in secondary market on an ongoing basis. The Market Maker(s) would offer daily two-way quote (buy and sell quotes) in the market. Further, the price received upon redemption of units may be less than the value of the silver represented by them.

The market price of the ETF unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. Hence, the units of the scheme may trade above or below the NAV. However, given that the investors can transact with AMC directly beyond the creation unit size of the scheme there should not be a significant variation (large premium or discount) and it may not sustain due to the arbitrage opportunity available.

The silver price reflects the prices of silver at a point in time, which is the price at close of business day. The scheme, however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of silver.

- Investments by the Scheme are subject to availability of silver. If favorable investment opportunities do not exist or opportunities have notably diminished, the scheme may suspend accepting fresh subscriptions.
- The Units will be issued only in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund during liquidity window depends upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.
- Conversion of underlying physical silver into the Units of the Scheme may attract capital gain tax depending on acquisition cost and holding period.
- **Currency Risk**: The formula for deriving the NAV of the units of the scheme is based on the imported (landed) value of the silver, which is computed by multiplying international market price by US Dollar value. Hence the value of NAV or silver will depend upon the conversion value and attracts all the risk associated with such conversion.
- Physical silver: There is a risk that part or all of the Scheme's silver could be lost, damaged or stolen. Access to the Scheme's silver could also be restricted by natural events or human

actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.

- Indirect taxation: For the valuation of silver by the Scheme, indirect taxes like customs duty, VAT, etc. would also be considered. Hence, any change in the rates of indirect taxation / applicable taxes would affect the valuation of the Scheme.
- During the process of creation or redemption of the Scheme in creation unit size, the AMC will source or sell the physical silver from a counterparty. The price at which the silver is bought or sold at will include a spread also, apart from cost price of the silver, taxes and other transaction cost. Thus cost may vary depending on the source from which silver is bought or sold, due to different cost being changed by the counterparty. This varying buying or selling cost will impact the cost at which units are created for the investor or redeemed for the investor. AMC will most likely be passing on all the cost associated with buying and selling of the physical silver, including spread, transaction cost, taxes etc. on to the investor/investors. This will impact the per unit cost realized by the investor in case of creation or redemption directly with the AMC.
- The AMC within the regulatory guidelines and room given in Scheme information document, may use derivative on silver (like Futures) for rebalancing, holding, creation of fresh units or redemption of existing units for the Scheme. The use of derivatives may affect the performance of the scheme and tracking error. It may also impact the value at units are created or redeemed by the scheme.
- **Counter party Risk**: There is no Exchange for physical silver in India. The Mutual Fund may have to buy or sell silver from the open market, which may lead to counter party risks for the Mutual Fund for trading and settlement.

• Risks Related to the Custody of Silver

The Custodian is responsible for the safekeeping of the silver bullion and also facilitates the transfer of silver bullion into and out of the vault. Although the Custodian is a market maker, clearer and approved weigher under the rules of the LBMA (which sets out good practices for participants in the bullion market), the LBMA is not an official or governmental regulatory body. Accordingly, the ETF is dependent on the Custodian to comply with the best practices of the LBMA and to implement satisfactory internal controls for its silver bullion custody operations in order to keep the silver bullion secure. The Custodian is responsible for loss or damage to the silver only under limited circumstances. The AMC does not insure its silver (Underlying silver of the scheme). The Custodian maintains insurance on such terms and conditions as it considers appropriate in connection with its custodial obligations under the Custodian Agreement and is responsible for all costs, fees and expenses arising from the insurance policy or policies. The AMC is not a beneficiary of any such insurance and does not have the ability to dictate the existence, nature or amount of coverage. Therefore, Shareholders cannot be assured that the Custodian maintains adequate insurance or any insurance with respect to the silver held by the Custodian on behalf of the Trust.

• **Operational Risks:** Silver Exchange Traded Funds are relatively new products and their value could decrease if unanticipated operational or trading problems arise. Silver Exchange Traded Fund, an open ended Exchange Traded Fund, is therefore subject to operational risks. The scheme may not be able to acquire or sell the desired number of units of silver due to conditions prevailing in the market, such as, but not restricted to circuit filters on the silver ETF (if any), liquidity and volatility in silver prices. The units of the scheme will be compulsorily issued in dematerialised form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository (ies) on which the Mutual Fund has no control. Further, Investors may note that buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/ broker, payment of brokerage, securities transactions tax and such other costs.

The NAV of the units of Silver ETF are determined based on the formula as prescribed by the SEBI, whereas the actual price in the market may be different from the value of silver at based on the prescribed formula. This may lead to a condition where the NAV is too different from the domestic market price of silver. In such cases the trustees reserves the right to delay or suspend the buy/sell transactions.

A day on which valuation on London Bullion Market Association (LBMA) is not available shall not be a Business day and hence NAV for the said day shall not be available to the Investors.

Actual or perceived disruptions in the processes used to determine the LBMA Silver Price, or lack of confidence in that benchmark, may adversely affect the return on your investment in the scheme (if any).

The Trustee, in general interest of the Unit holders of the Scheme offered under this Scheme Information Document and keeping in view of the unforeseen circumstances/ unusual market conditions, may limit the total number of Units, which can be redeemed on any Business Day.

Governments, central banks and related institutions, own a significant portion of the aggregate world silver holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world silver prices, the price of Units of the Scheme will be adversely affected.

If the process of creation and redemption of Baskets encounters any unanticipated difficulties or is materially restricted due to any illiquidity in the market for physical silver, the possibility for arbitrage transactions by Market Makers, intended to keep the price of the ETF units closely linked to the price of silver may not exist and, as a result, the price of the ETF units may fall or otherwise diverge from NAV

- Conversion of underlying physical silver into the Units of the Scheme may attract capital gain tax depending on acquisition cost and holding period.
- **Risk associated with Lending of physical Silver**: The physical silver lending activity by Scheme will have the inherent probability of collateral value drastically falling in time of strong downward market trends resulting in inadequate value of collateral. It is also possible that the borrowing party and / or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Also the risk could be in the form of non-availability of ready physical silver for sale, during the period physical silver is lent. Physical silver would be lent if permitted by the concerned regulatory authorities in India.

Risk Factors associated with investments in Fixed Income Securities:

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. However, debt securities in this scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.
- Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

- **Pre-payment Risk**: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- Risk factors associated with investment in Tri-Party Repo: The mutual fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund

Risk Factors Associated with Investments in Exchange Traded Commodity Derivatives (ETCD):

- **Commodity risks**: The Fund may invest in commodities markets and may therefore have investment exposure to the commodities markets and one or more sectors of the commodities markets, which may subject the Fund to greater volatility than investments in traditional securities, such as stocks and bonds. Volatility in the commodities markets may be caused by changes in overall market movements, domestic and foreign political and economic events and policies, war, acts of terrorism, changes in domestic or foreign interest rates and/or investor expectations concerning interest rates, domestic and foreign inflation rates, investment and trading activities of mutual funds, hedge funds and commodities funds, and factors such as drought, floods, weather, livestock disease, embargoes, tariffs and other regulatory developments, or supply and demand disruptions. Because the Fund's performance is linked to the performance of volatile commodities, investors should be willing to assume the risks of potentially significant fluctuations in the value of the Fund's shares.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may always not be available. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given that the fund manager(s) will be able to identify or execute such strategies.
- The AMC within the regulatory guidelines and room given in Scheme information document, may use derivative on silver (like Futures) for rebalancing, holding, creation of fresh units or redemption of existing units for the Scheme. The use of derivatives may affect the performance of the scheme and tracking error. It may also impact the value at units are created or redeemed by the scheme.
- Systemic risks which may be witnessed while trading in Indian Commodities Market are Liquidity risk, Price risk in terms of volatility, Exchange Risk and counterparty risks.

- Liquidity Risk: While ETCDs that are listed on an exchange carry lower liquidity risk, the ability to sell these contracts is limited by the overall trading volume on the exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes of the ETCD contracts in which it invests. Additionally, change in margin requirements or intervention by government agencies to reduce overall volatility in the underlying commodity could lead to adverse impact on the liquidity of the ETCD.
- **Price risk**: ETCDs are leveraged instruments hence, a small price movement in the underlying security could have a large impact on their value. Also, the market for ETCDs is nascent in India hence, arbitrages can occur between the price of the physical commodity and the ETCD, due to a variety of reasons such as technical issues and volatile movement in the price of the physical good. This can result in mispricing and improper valuation of investment decisions as it can be difficult to ascertain the amount of the arbitrage.
- Settlement risk: ETCDs can be settled either through the exchange or physically. The inability to sell ETCDs held in the Schemes' portfolio in the exchanges due to the extraneous factors may impact liquidity and would result in losses, at times, in case of adverse price movement. Wherein the underlying commodity is physically delivered in order to settle the derivative contract, such settlement could get impacted due to various issues, such as logistics, Government policy for trading in such commodities.
- If the Commodities futures position passes its last square off date or the 'Intention' is missed to be provided before the Delivery Intention period, the buyer or the seller will be allocated delivery of the commodity. Thus, there emerges a risk of holding goods in physical form at the warehouses. Though the commodity is inclusive of insurance cost, there is a small deductible in each claim which is not payable by the Insurance company.

Risk Management Strategies

TRACKING ERROR RISK

While the objective of the Scheme is to closely track the price of Physical Silver, the performance may not be commensurate with the Price of Silver on any given day or over any given period. Such variations are commonly referred to as the tracking error.

Tracking errors may cause the scheme to generate returns which are not in line with the performance of the underlying benchmark and may arise from a variety of factors including but not limited to:

- a) Expenditure incurred by the fund.
- b) Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, for corporate actions or otherwise.
- c) Securities trading may halt temporarily due to circuit filters.
- d) Disinvestments to meet redemptions, recurring expenses, etc.
- e) Execution of large buy / sell orders
- f) Transaction cost (including taxes and insurance premium) and recurring expenses
- g) Realisation of Unit holders' funds
- h) Accounting for indirect taxes including tax reclaims
- i) SEBI Regulations (if any) may impose restrictions on the investment and/or disinvestment activities of the Scheme. Such restrictions are typically outside the control of the AMC and may cause or exacerbate the Tracking Error.

AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile. However, there can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying benchmark.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

Being an open-ended Exchange Traded Fund, the guidelines issued by SEBI vide its Circular no. SEBI/IMD/CIR No. 10/22701/03 dated December 12, 2003 regarding Minimum Number of Investors in Scheme and that no single investor should account for more than 25% of the corpus of the scheme shall not be applicable to this Scheme.

C. SPECIAL CONSIDERATIONS

- Subject to the SEBI (MF) Regulations, funds managed by the associates of the Sponsors may invest either directly or indirectly in the Scheme and may acquire a substantial portion of the Scheme Units and collectively constitute a majority investor in the Scheme. Accordingly, redemption of Units held by such funds may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemption and may impact the ability of other Unit Holders to redeem their respective Units.
- As the liquidity of the Scheme investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Scheme portfolios. In view of this, the Trustee has the right, in its sole discretion, to limit redemptions under certain circumstances.
- Neither the SID and SAI, nor the Units have been registered in any jurisdiction. The distribution of this SID in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of this SID and the SAI in such jurisdictions are required to inform themselves about, and to observe, any such restrictions. No person receiving a copy of this SID or any accompanying application form in such jurisdiction may treat this SID or such application form as constituting an invitation to them to subscribe for Units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance of any registration or other legal requirements.
- Investment decisions made by the Investment Manager may not always be profitable.
- The AMC provides Investment Management Services to DSP India Fund and DSP India Investment Fund (both based out in Mauritius). The AMC provides investment management and trade execution related services to offshore sovereign funds. The AMC also provides a non-binding advisory services to the offshore funds/ offshore investment manager, who is managing an offshore fund which will invest through FPI route. The AMC provide investment management services to DSP ICAV, an umbrella type Irish Collective Asset-management Vehicle. The AMC is the holding company to DSP Pension Fund Managers Private Limited (DSPPFM). The AMC, in accordance with SEBI approval, acts as Investment Managers to DSP Alternative Investment Fund Category III (DSPAIF - C - III) (SEBI registration no. IN/AIF3/13-14/0059). Further, DSP Trustee Private Limited, act as Trustees to the DSPAIF - C - III. The AMC has systems in place to ensure that there is no conflict of interest between the aforesaid activities.
- The Mutual Fund/AMC has not authorized any person to give any information or make any representations, either oral or written, not stated in this SID in connection with issue of Units under the Scheme. Prospective investors are advised not to rely upon any information or representations not incorporated in this SID as the same have not been authorized by the Mutual Fund or the AMC. Any subscription, purchase or sale made by any person on the basis of statements or representations which are not contained in this SID or which are inconsistent with the information contained herein shall be solely at the risk of the investor.
- Suspicious Transaction Reporting: If after due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, the AMC shall report any such suspicious transactions to competent authorities under PMLA and rules/guidelines issued thereunder by SEBI and/or RBI, furnish any such information in connection therewith to such authorities and take any other actions as may be required for the purposes of fulfilling its obligations under PMLA and rules/guidelines issued thereunder by SEBI and/or RBI without obtaining the prior approval of the investor/Unit Holder/any other person.

- The AMC and its Registrar reserve the right to disclose/share investors' personal information with the following third parties:
 - 1. Registrar, Banks and / or authorised external third parties who are involved in transaction processing, dispatches, etc., of investors' investment in the Scheme;

PORTFOLIO TURNOVER

Portfolio Turnover measures the volume of trading that occurs in a Scheme's portfolio (silver and silver related instruments) during a given time period. The Scheme is an open-ended Exchange Traded Fund and it is expected that there may be a number of subscriptions and repurchases on a daily basis through Stock Exchange(s) or Market Makers and Large Investors. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any. However, it will be the endeavor of the Fund Manager to maintain an optimal portfolio turnover rate commensurate with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme.

TRACKING ERROR

Tracking Error may arise due to reasons including but not limited to the following: -

- a. Expenditure incurred by the fund.
- b. The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- c. Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.
- d. Execution of large buy / sell orders
- e. Transaction cost (including taxes and insurance premium) and recurring expenses
- f. Realization of Unit holder's funds

It will be the endeavor of the fund manager to keep the tracking error as low as possible. The tracking error i.e. the annualized standard deviation of the difference in daily returns between physical silver and the NAV of Silver ETF based on past one year rolling over data (For ETFs in existence for a period of less than one year, annualized standard deviation shall be calculated based on available data) shall not exceed 2%. The disclosure regarding the same shall be made on daily basis on the website of DSP Mutual Fund and on the website of AMFI.

In case of unavoidable circumstances in the nature of force majeure which are beyond the control of the AMCs, the tracking error may exceed 2%, and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any..

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the benchmark.

Cut off timing for subscriptions/ redemptions

In case of Purchase / Redemption directly with Mutual Fund:

The requirement of "cut-off" timing for NAV applicability as prescribed by SEBI from time to time shall not be applicable for direct transaction with AMCs in ETFs by Market Makers and other eligible investors.

However, as the Scheme is an Exchange Traded Fund, the Subscriptions and Redemptions of Units would be based on the Portfolio Deposit and Cash Component as defined by the Fund for that respective Working Day.

Settlement of Purchase/Sale of Units of the Scheme on Stock Exchange:

Buying/Selling of Units of the Scheme on Stock Exchange is just like buying/selling any other normal listed security. If an investor has bought Units, an investor has to pay the purchase amount to the broker/sub-broker such that the amount paid is realised before the funds pay-in day of the settlement cycle on the Stock Exchange(s). If an investor has sold Units, an investor has to deliver the Units to the broker/sub-broker before the securities paying day of the settlement cycle on the Stock Exchange(s). The Units (in the case of Units bought) and the funds (in the case of Units sold) are paid out to the broker on the pay-out day of the settlement cycle on the Stock Exchange(s). The Stock Exchange(s) regulations stipulate that the trading member should pay the money or Units to the investor within 24 hours of the pay-out.

If an investor has bought Units, he should give standing instructions for "Delivery-In" to his /her/its DP for accepting Units in his/her/its beneficiary account. An investor should give the details of his/her beneficiary account and the DP-ID of his/her/its DP to his/ her/its trading member. The trading member will transfer the Units directly to his/her/ its beneficiary account on receipt of the same from NSE"s/ BSE"s Clearing Corporation. An investor who has sold Units should instruct his/her/its Depository Participant (DP) to give "Delivery Out" instructions to transfer the Units from his/her/its beneficiary account to the Pool Account of his/her/its trading member through whom he/she/it have sold the Units. The details of the Pool A/C (CM-BP-ID) of his/her trading member to which the Units are to be transferred, Unit quantity etc. should be given well before the prescribed securities pay-in day. SEBI has advised that the Delivery Out instructions should be given at least 24 hours prior to the cut-off time for the prescribed securities pay-in to avoid any rejection of instructions due to data entry errors, network problems, etc.

Rolling Settlement

As per the SEBI's circular dated March 4, 2003, the rolling settlement on T+2 basis for all trades has commenced from April 1, 2003 onwards. The Pay-in and Pay-out of funds and the Units will take place within 2 working days after the trading date. The pay-in and pay-out days for funds and securities are prescribed as per the Settlement Cycle. A typical Settlement Cycle of Rolling Settlement is given below:

Day Activity:

Т	The day on which the transaction is executed by a trading member
T+1	Confirmation of all trades including custodial trades by 11.00 a.m.
T+1	Processing and downloading of obligation files to brokers/custodians by 1.30 p.m.
	Pay-in of funds and securities by 11.00 a.m.

application in the Withdrawal Application so as to enable the AMC to oppose withdrawal of the CIRP against Sintex.

The Withdrawal Application was allowed by the NCLT, Ahmedabad vide order dated June 29, 2021 ("Order"). AMC filed an Appeal before the NCLAT ("Appeal") against the Order. The Appeal is admitted, and the Order is stayed by the NCLAT. Sintex is in control and custody of the interim resolution professional.
