SECTION IV - INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader equity and bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Additional Risk Factors for Foreign Investors:

i. Political Risk

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Scheme invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Scheme invests. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Scheme invests.

ii. Economic Risk

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

iii. Foreign Currency Risk

The Scheme is denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

iv. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Investors.

Specific Risk Factors:

Liquidity risks: Trading volumes, settlement periods and transfer procedures may restrict the liquidity of

the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Scheme(s) can go up and down because of various factors that affect the capital markets in general.

- **Risks related to equity investments:**

Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, changes in law/ policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors. Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

Passive Investments: As the scheme proposes to invest not less than 95% of the net assets in the securities of the underlying Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets. The value of the Scheme's investments, may be affected generally by factors affecting equity markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down

In the event the Nifty Midcap 150 Quality 50 Index is dissolved or withdrawn by NSE Indices Limited (formerly known as India Index Services and Products Ltd. (IISL)), the Trustees reserve the right to modify the schemes so as to track a different and suitable index and appropriate intimation will be sent to the unitholder of the scheme.

Tracking Error Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the respective scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the respective scheme. Tracking Error may arise including but not limited to the following reasons:

- i. Expenditure incurred by the fund.
- ii. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all time as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- iii. Securities trading may halt temporarily due to circuit filters.
- iv. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- v. Rounding off of quantity of shares in underlying index.
- vi. IDCW payout.
- vii. Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.
- viii. Execution of large buys / sell orders
- ix. Transaction cost (including taxes and insurance premium) and recurring expenses
- x. Realization of Unit holders funds

- xi. Index providers may either exclude or include new scrips in their periodic review of the scrips that comprise the underlying index. In such an event, the Fund will try to reallocate its portfolio but the available investment/reinvestment opportunity may not permit absolute mirroring immediately.

SEBI Regulations (if any) may impose restrictions on the investment and/or divestment activities of the Scheme. Such restrictions are typically outside the control of the AMC and may cause or exacerbate the Tracking Error.

It will be the endeavor of the fund manager to keep the tracking error as low as possible. However, in case of events like, dividend received from underlying securities, rights issue from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances may result in tracking error. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

Risk Factors associated with investments in Fixed Income Securities:

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. However, debt securities in this scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- **Risk factors associated with investment in Tri-Party Repo:** The mutual fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default

losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund

- **Risks associated with trading in derivatives:**

The use of derivatives may expose Scheme to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can therefore increase Scheme volatility.

Derivatives require the maintenance of adequate controls to monitor the transactions and the embedded market risks that they add to the portfolio. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Other risks in using derivatives include but are not limited to:

- (a) **Counterparty Risk** - this occurs when a counterparty fails to abide by its contractual obligations and therefore, the Scheme are compelled to negotiate with another counter party, at the then prevailing (possibly unfavourable) market price. For exchange traded derivatives, the risk is mitigated as the exchange provides the guaranteed settlement but one takes the performance risk on the exchange.
- (b) **Market Liquidity Risk** - this occurs where the derivatives cannot be transacted due to limited trading volumes and/or the transaction is completed with a severe price impact.
- (c) **Model Risk** - the risk of mis-pricing or improper valuation of derivatives.
- (d) **Basis Risk** - arises due to a difference in the price movement of the derivative vis-à-vis that of the security being hedged.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued involve uncertainty and decision of the Investment Manager may not always be profitable. No assurance can be given that the Investment Manager will be able to identify or execute such strategies. Some other risks investors must read carefully before making any investments in this Scheme, as it is expected to make investments in equity derivatives are as follows:

Derivative trades involve execution risks, whereby the rates seen on the screen may not be the rate at which ultimate execution takes place.

- The option buyer's risk is limited to the premium paid.
- Investments in index/stock futures face the similar risk as the investments in the underlying stock or index.
- Risk of loss in trading in futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and potentially high volatility of the futures markets.
- The derivatives market may not have the volumes that may be seen in other developed markets, which may result in volatility in the values.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Risk associated with Securities Lending & Borrowing and Short Selling:

Securities Lending and Borrowing ("SLB") is an exchange traded product in India, with trades done on order matching platforms setup by the clearing corporation/house of recognized stock exchanges. In accordance with SEBI guidelines, there is a robust risk management system and safeguards exercised

by the clearing corporation/house, which also guarantee financial settlement hence eliminating counterparty risk on borrowers.

The Scheme may participate as a lender in the SLB market and lend securities held in the portfolio for earning fees from such lending to enhance revenue of the Scheme. The key risk to the Scheme is creation of temporary illiquidity due to the inability to sell such lent securities, till the time such securities are returned on the contractual settlement date or on exercise of early recall.

The Scheme may enter into short selling transactions in accordance with the guidelines prescribed by SEBI. The key risk to the Scheme is increase in the price of such securities, requiring the Scheme to purchase the securities sold short to cover the position even at unreasonable prices resulting in a loss to the Scheme.

- **Risks Associated with Transaction In Units Through Stock Exchange Mechanism**

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognised stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognised exchange in this regard.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors each and no single investor shall account for more than 25% of the corpus of the Scheme(s). These conditions shall be complied with, in each calendar quarter on an average basis, as specified by SEBI. In case of non-fulfillment of the condition of 20 investors in a calendar quarter, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations shall become applicable automatically without any reference from SEBI, and accordingly the Scheme shall be wound up and the units redeemed at the relevant applicable NAV. If there is breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be available and thereafter, the investor who is in breach of the rule, shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption on the applicable Net Asset Value on the 15th day of the notice period

The net assets of the scheme will be invested in stocks constituting the Nifty Midcap 150 Quality 50 Index. This would be done by investing in all the stocks comprising the Nifty Midcap 150 Quality 50 Index in the same weightage that they represent in the Nifty Midcap 150 Quality 50 Index. A small portion of the net assets will be invested Cash and Cash Equivalents.

Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period and portfolio shall be rebalanced within 7 days.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Equity Derivatives can be used as a tool for cash equitization and where the fund has got cash (within the maximum permissible asset allocation table), in case where rebalance comes, then instead of cash, index contract can be used for temporary basis. However, it is to be noted investment is derivatives for a temporary period and portfolio shall be rebalanced within 7 days.

The Scheme will not maintain any leveraged or trading positions. Exposure to such derivatives will be restricted to 20% of net assets of the scheme. The Scheme shall rebalance the portfolio in case of any

deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of such deviation.

The Scheme will not lend more than 20% of its corpus and not more than 5% of its corpus can be deployed through single intermediary. The Scheme will enter into securities lending in accordance with the framework specified by SEBI in this regard.

The Scheme will not make any investment in debt instruments having structured obligations and credit enhancements. The Scheme may enter into short selling transactions in accordance with the guidelines prescribed by SEBI.

The cumulative gross exposure through equity, Derivative position and other permitted securities/ asset class shall not exceed 100% of the net assets of the scheme, subject to regulatory approval, if any. The Scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives from time to time.

In the event of involuntary corporate action, the Scheme shall endeavor to dispose the security not forming part of the Underlying index within 7 days from the date of listing, subject to availability of adequate liquidity for the security.

Portfolio rebalancing:

The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of occurrence of deviation. Where the portfolio is not rebalanced within 7 Days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Schemes.

It may be noted that no prior intimation/indication will be given to investors when the composition/asset allocation pattern under the Scheme undergoes changes within the permitted band as indicated above.

In case of change in constituents of the index due to periodic review, the portfolio of Scheme shall be rebalanced within 7 calendar days.

Further, any transactions undertaken in the portfolio of Index Schemes in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

CHANGE IN INVESTMENT PATTERN

The Scheme, will hold all the securities that comprise the underlying Index in the same proportion as the index.

Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by 2% p.a. for daily 12 month rolling return. However, in case of events like, IDCW issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the scheme is an open ended index linked equity scheme, it will endeavor that at no point of time the scheme will deviate from the index. In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will rebalance the same within 7 days.

In the interest of investors, the AMC reserves the right to change the above asset allocation pattern due to corporate action activity undertaken in the underlying securities. The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of such deviation.

D. WHERE WILL THE SCHEME INVEST?

The corpus of the Scheme will invest in Securities which are constituents of Nifty Midcap 150 Quality 50 Index and in Cash and Cash Equivalents.

The corpus of the Scheme will be invested in various types of securities (including but not limited to) such as:

1. Equity and Equity related Securities of companies constituting Nifty Midcap 150 Quality 50 Index
2. Stock futures / index futures and such other permitted derivative instruments.
3. Cash and Cash Equivalents.
4. Derivatives only for portfolio balancing.

The scheme may invest the funds of the scheme in short term deposits of scheduled commercial banks as permitted under extant regulations.

Pending deployment of funds of the Scheme, the AMC may invest funds of the Scheme in short-term deposits of scheduled commercial banks, subject to the following conditions issued by SEBI vide its circular SEBI/IMD/CIR No. 1/91171 /07 dated April 16, 2007, SEBI/HO/IMD/DF4/CIR/P/2019/093 dated August 16, 2019 and SEBI/HO/IMD/DF2/CIR/P/2019/101 dated September 20, 2019

- i. "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
- ii. Such short-term deposits shall be held in the name of the Scheme.
- iii. The Scheme shall not park more than 15% of their net assets in the short term deposit(s) of all the scheduled commercial banks put together. However, it may be raised to 20% with the prior approval of the Trustee. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
- iv. The Scheme shall not park more than 10% of their net assets in short term deposit(s) with any one scheduled commercial bank including its subsidiaries.
- v. The Trustee shall ensure that the funds of the Scheme are not parked in the short term deposits of a bank which has invested in the Scheme.
- vi. The Trustee shall also ensure that the bank in which a scheme has short term deposits do not invest in the scheme until the scheme has short term deposits with such bank.
- vii. AMC will not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

The above provisions do not apply to term deposits placed as margins for trading in cash and derivative market.

Further, due to corporate action in companies comprising of the index, the scheme may be allocated/allotted securities which are not part of the index. For example, the Scheme may invest in stocks not included in the relevant underlying index in order to reflect various corporate actions (such as mergers) and other changes in the relevant underlying index (such as reconstitutions, additions, deletions and these holdings will be in anticipation and in the direction of impending changes in the underlying index)

Investments in Derivative Instruments

As part of the Fund Management process, the Scheme may use Derivative instruments such as index futures and options, stock futures and options contracts, warrants, convertible Securities, swap agreements or any other Derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objectives of the Scheme for a short period of time and the portfolio shall be rebalanced within 7 days.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures/options can be an efficient way of achieving the Scheme's investment objective. Notwithstanding the pricing, they can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the

underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index.

In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading positions.

Purpose of investment in Derivatives

- a) The Scheme shall fully cover its positions in the Derivatives market by holding underlying Securities/cash or cash equivalents/option and/or obligation for acquiring underlying assets to honour the obligations contracted in the Derivatives market.
- b) The Securities held would be marked to market by the AMC to ensure full coverage of investments made in Derivative products at all times.

Trading in Derivatives

The Mutual Fund may use various derivatives only for the purpose of Portfolio Rebalancing of the Scheme. Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index. The Scheme while investing in equities shall transact in exchange traded equity derivatives only and these instruments may take the form of Index Futures, Index Options, Futures and Options on individual equities/securities and such other derivative instruments as may be appropriate and permitted under the SEBI Regulations and guidelines from time to time.

Key features of Trading in Derivatives

The use of derivatives provides flexibility to the Schemes only for the purpose of Portfolio Rebalancing. The following section describes some of the more common derivatives transactions with illustrations.

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as interest rates, exchange rates, commodities and equities.

1. Futures

A futures contract is a standardized contract between two parties where one of the parties commits to sell, and the other to buy, a stipulated quantity of a security at an agreed price on or before a given date in future.

Currently, futures contracts have a maximum expiration cycle of 3 months. Three contracts are available for trading, with 1 month, 2 months and 3 months expiry respectively. A new contract is introduced on the next trading day following the expiry of the relevant monthly contract. Futures contracts typically expire on the last Thursday of the month. For example a contract with the December 2021 expiration expires on the last Thursday of December 2021 (December 31, 2021).

Basic Structure of an Index Future

The Stock Index futures are instruments designed to give exposure to the equity markets indices. The Stock Exchange, Mumbai (BSE) and The National Stock Exchange (NSE) have trading in index futures of 1, 2 and 3 month maturities. The pricing of an index future is the function of the underlying index and short-term interest rates. Index futures are cash settled, there is no delivery of the underlying stocks.

Example using hypothetical figures:

1 month ABC Index Future

If the Scheme buys 2,000 futures contracts, each contract value is 50 times the futures index price.

Purchase Date	:	January 4, 2022
Spot Index	:	13800.00

Future Price	:	13900.00
Date of Expiry	:	January 28, 2022
Margin	:	10%

Assuming the exchange imposes a total margin of 10%, the Investment Manager will be required to provide a total margin of approx. Rs. 1390,000,000 (i.e. $10\% \times 13900 \times 2000 \times 50$) through eligible securities and cash.

Assuming on the date of expiry, i.e. January 4, 2022 ABC Index closes at 13950, the net impact will be a profit of Rs. 5,000,000 for the Scheme, i.e. $(13950 - 13900) \times 2000 \times 50$ (Futures price = Closing spot price = Rs. 13950.00)

Profits for the Scheme = $(13950 - 13900) \times 2000 \times 50 = \text{Rs. } 5,000,000$.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity.

The net impact for the Scheme will be in terms of the difference of the closing price of the index and cost price. Thus, it is clear from the above example that the profit or loss for the Scheme will be the difference between the closing price (which can be higher or lower than the purchase price) and the purchase price. The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

Basic Structure of a Stock Future

A futures contract on a stock gives its owner the right and obligation to buy or sell stocks. Single Stock Futures traded on NSE (National Stock Exchange) are physically settled; on the expiration day, depending upon the side of the trade, security is either delivered or received against the payment. A purchase or sale of futures on a security gives the trader essentially the same price exposure as a purchase or sale of the security itself. In this regard, trading stock futures is no different from trading the security itself.

Example using hypothetical figures:

The Scheme holds shares of XYZ Ltd., the current price of which is Rs. 500 per share. The Scheme sells one month futures on the shares of XYZ Ltd. at the rate of Rs. 540.

If the price of the stock falls, the Mutual Fund will suffer losses on the stock position held. However, in such a scenario, there will be a profit on the short futures position.

At the end of the period, the price of the stock falls to Rs. 450 and this fall in the price of the stock results in a fall in the price of futures to Rs. 470. There will be a loss of Rs. 50 per share (Rs. 500 - Rs. 450) on the holding of the stock, which will be offset by the profits of Rs. 70 (Rs. 540 - Rs. 470) made on the short futures position.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Certain factors like margins and other related costs have been ignored. The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

2. Options

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

An option contract may be of two kinds:

1) Call option

An option that provides the buyer the right to buy is a call option. The buyer of the call option can call upon the seller of the option and buy from him the underlying asset at the agreed price. The seller of the option has to fulfill the obligation upon exercise of the option.

2) Put option

The right to sell is called a put option. Here, the buyer of the option can exercise his right to sell the underlying asset to the seller of the option at the agreed price.

Option contracts are classified into two styles:

(a) European Style

In a European option, the holder of the option can only exercise his right on the date of expiration only.

(b) American Style

In an American option, the holder can exercise his right anytime between the purchase date and the expiration date.

Basic Structure of an Equity Option

In India, options contracts on indices and stocks are European style and physically settled

Example using hypothetical figures:

Market type	: N
Instrument Type	: OPTSTK
Underlying	: XYZ Ltd. (XYZ)
Purchase date	: January 4, 2022
Expiry date	: January 28, 2022
Option Type	: Put Option (Purchased)
Strike Price	: Rs. 5,750.00
Spot Price	: Rs. 5,800.00
Premium	: Rs. 200.00
Lot Size	: 100
No. of Contracts	: 50

Say, the Mutual Fund purchases on January 4, 2022, 1 month Put Options on XYZ Ltd. (XYZ) on the NSE i.e. put options on 5000 shares (50 contracts of 100 shares each) of XYZ.

If the share price of XYZ Ltd. falls to Rs. 5,500 /- on January 28, 2022 and the Investment Manager decides to exercise the option, the impact will be as Follows:

$$\text{Premium Expense} = \text{Rs. } 200 * 50 * 100 = \text{Rs. } 10,00,000/-$$

$$\text{Stocks to be given at} = \text{Rs. } 5,750/-$$

$$\text{Profits for the Mutual Fund} = (5,750.00 - 5,500.00) * 50 * 100 = \text{Rs. } 12,50,000/-$$

$$\text{Net Profit} = \text{Rs. } 12,50,000 - \text{Rs. } 10,00,000 = \text{Rs. } 2,50,000/-$$

In the above example, the Investment Manager hedged the market risk on 5000 shares of XYZ Ltd. by purchasing put options.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Certain factors like margins have been ignored. The purchase of Put Options does not increase the market risk in the Mutual Fund as the risk is already in the Mutual Fund's portfolio on account of the underlying asset position (in his example shares of XYZ Ltd.). The Premium paid for the option is treated as an expense and added to the holding cost of the relevant security. Additional risks could be on account of illiquidity and potential mis-pricing of the options.

Exposure to Equity Derivatives

i. Position limit for the Mutual Fund in index options contracts:

- a. The Mutual Fund position limit in all index options contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest in the market in index options, whichever is higher, per Stock Exchange.

- b. This limit would be applicable on open positions in all options contracts on a particular underlying index.
- ii. **Position limit for the Mutual Fund in index futures contracts:**
- a. The Mutual Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest in the market in index futures, whichever is higher, per Stock Exchange.
- b. This limit would be applicable on open positions in all futures contracts on a particular underlying index.
- iii. **Position limit for the Mutual Fund for stock based derivative contracts:**
The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).
- iv. **Position limit for the Scheme:**
The position limits for the Scheme and disclosure requirements are as follows:
- a. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a Fund shall not exceed the higher of 1% of free float market capitalization (in terms of number of shares).
Or
5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).
- b. This position limit shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
- c. For index based contracts, the Mutual Fund shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

As and when SEBI notifies amended limits in position limits for exchange traded derivative contracts in future, the aforesaid position limits, to the extent relevant, shall be read as if they were substituted with the SEBI amended limits.

Exposure Limits:

With respect to investments made in derivative instruments, the Schemes shall comply with the following exposure limits in line with SEBI Circular Cir/IMD/DF/11/2010 dated August 18, 2010:

1. However, the following shall not be considered while calculating the gross exposure:
 - a. Security-wise hedged position and
 - b. Exposure in cash or cash equivalents with residual maturity of less than 91 days
2. The total exposure related to option premium must not exceed 20% of the net assets of the Scheme.
3. The Mutual Fund shall not write options or purchase instruments with embedded written options.
4. Definition of Exposure in case of Derivative Positions:

However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option Bought	Option Premium Paid * Lot Size * Number of Contracts

E. WHAT ARE THE INVESTMENT STRATEGIES?

Strategy for Equity Securities

The Scheme will be managed passively with investments in stocks in the same proportion as in NIFTY Midcap 150 Quality 50 Index. The investment strategy would revolve around minimizing the tracking error through periodic rebalancing of the portfolio, taking into account the change in weights of stocks in the indices as well as the incremental collections / redemptions in the Scheme. A small portion of the net assets will be held as cash & cash equivalent.

Portfolio Turnover

Portfolio turnover is defined as the lower of the aggregate value of purchases or sales, as a percentage of the average corpus of the Scheme during a specified period of time.

The portfolio turnover in the Scheme will be a function of the inflows in the form of subscriptions into the Scheme and outflows in the form of redemptions from the Scheme, as well as the market opportunities available to the Investment Manager. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio(s). It will be the endeavor of the Investment Manager to keep portfolio turnover rates as low as possible. However, there are trading opportunities that present themselves from time to time, where in the opinion of the Investment Manager, there is an opportunity to enhance the total returns of the portfolio. The Investment Manager will endeavor to balance the increased cost on account of higher portfolio turnover with the benefits derived therefrom. Although the exchange-traded equity derivatives contracts in India are available upto 3 months, the liquidity is predominantly in the one month contracts (near month contracts).

TRACKING ERROR

Tracking Error may arise due to reasons including but not limited to the following: -

- a. Expenditure incurred by the fund.
- b. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- c. Securities trading may halt temporarily due to circuit filters.
- d. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- e. Rounding off of quantity of shares in underlying index.
- f. IDCW payout.
- g. Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.
- h. Execution of large buy / sell orders
- i. Transaction cost (including taxes and insurance premium) and recurring expenses
- j. Realization of Unit holder's funds
- h. Index providers may either exclude or include new scrips in their periodic review of the scrips that comprise the underlying index. In such an event, the Fund will try to reallocate its portfolio but the available investment/reinvestment opportunity may not permit absolute mirroring immediately.

It will be the endeavor of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum. However, in case of events like, IDCW received from underlying securities, rights issue from underlying securities and market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index. Further, in case of unavoidable circumstances in the nature of force majeure which are beyond the control of the AMC, the tracking error may exceed 2% and the same shall be brought to the notice of the Board of Trustees with the corrective actions taken by the AMC, if any.

Tracking Error of the Index Schemes based on past one year rolling data, shall be disclosed on a daily basis, on the website of AMC i.e. www.dspim.com and AMFI.

15. Transactions Through Channel Distributors

Investors may enter into an agreement with certain distributors (with whom AMC also has a tie up) referred to as "Channel Distributors" who provide the facility to investors to transact in units of mutual funds through various modes such as their website/ other electronic means or through Power of Attorney in favour of the Channel Distributor, as the case may be.

Under such arrangement, the Channel Distributors will aggregate the details of transactions (viz. subscriptions/ redemptions/switches) of their various investors and forward the same electronically to the AMC / RTA for processing on daily basis as per the cut-off timings applicable to the relevant Scheme. The Channel Distributor is required to send copy of investors' KYC and agreement entered into between the investor & distributor to the RTA (one time for central record keeping) as also the transaction documents / proof of transaction authorization as the case may be, to the AMC / RTA as per agreed timelines.

Normally, the subscription proceeds, when invested through this mode, are by way of direct credits to the specified bank account of DSP Mutual Fund. The redemption proceeds (subject to deduction of tax at source, if any) and IDCW payouts, if any, are paid by the AMC to the investor directly through direct credit in the bank account of the investor specified by the distributor or through issuance of payment instrument, as applicable

In case KYC and other necessary documents are not furnished within the stipulated timeline, the transaction request shall be liable to be rejected or the folio will be locked for future subscriptions/ switches. The Mutual Fund, the AMC, the Trustee, along with their directors, employees and representatives shall not be liable for any errors, damages or losses arising out of or in connection with the transactions undertaken by investors or as provided by the distributors through the above mode.

It may be noted that investors investing through this mode may also approach the AMC / ISC directly with their transaction requests (financial / non-financial) or avail of the online transaction facilities offered by the AMC.

16. Subscription of Units Through Electronic Mode

Subject to the investor fulfilling certain terms and conditions as stipulated by AMC from time to time, the AMC, Mutual Fund, Registrar or any other agent or representative of the AMC, Mutual Fund, the Registrar (“Recipient”) may accept transactions through any electronic mode (fax/web/telephonic/mobile/SMS texts/electronic transactions) (“Electronic Transactions”). The acceptance of Electronic Transactions will be solely at the risk of the investor and the Recipient shall not in any way be liable or responsible for any loss, damage caused to the investor directly or indirectly, as a result of the investor sending or purporting to send such transactions including where such transaction sent / purported to be sent is not processed on account of the fact that it was not received by the Recipient.

The investor acknowledges that Electronic Transaction is not a secure means of giving instructions / transactions requests and that the investor is aware of the risks involved including those arising out of such transmission being inaccurate, imperfect, ineffective, illegible, having a lack of quality or clarity, garbled, altered, distorted, not timely etc. The investor’s request to the Recipient to act on Electronic Transaction is for the investor’s convenience and the Recipient is not obliged or bound to act on the same. The investor authorizes the recipient to accept and act on any Electronic Transaction which the recipient believes in good faith to be given by the investor and the recipient may at its discretion treat any such transaction as if the same was given to the recipient under the investor’s original signature.

In case there is any difference between the particulars mentioned in the fax/ web/ electronic transmission received as against the original document which may be received thereafter, the Recipient shall not be liable for any consequences arising therefrom.

The investor agrees that the recipient may adopt additional security measures including signature verification, telephone call backs or a combination of the same, which may be recorded and the investor consents to such recording and agrees to co-operate with the recipient to enable confirmation of such transaction requests. In consideration of the Recipient from time to time accepting and at its sole discretion (including but not limited to the AMC extending/ discontinuing such facilities from time to time) acting on any Electronic Transaction request received / purporting to be received from the investor, the investor agrees to indemnify and keep indemnified the AMC, Directors, employees, agents, representatives of the AMC, Mutual Fund and Trustees from and against all actions, claims, demands, liabilities, obligations, losses, damages, costs and expenses of whatever nature (whether actual or contingent) directly or indirectly suffered or incurred, sustained by or threatened against the indemnified parties whatsoever arising from or in connection with or any way relating to the indemnified parties in good faith accepting and acting on Electronic Transaction requests including relying upon such transaction requests purporting to come from the investor even though it may not come from the Investor. The AMC reserves the right to modify the terms and conditions or to discontinue the facility at any point of time.

17. Redemption

Units can be redeemed (sold back to the Mutual Fund) at the relevant Redemption Price. The redemption requests can be made on the pre- printed forms (transaction slip/common transaction form) or by using the form at the bottom of the account statement. The redemption request can be submitted at any of the Official Points of Acceptance of transaction, the details of Official Points of Acceptance are mentioned at the end of this SID. As all allotments are provisional, subject to realisation of payment instrument and subject to the AMC having been reasonably satisfied that the Mutual Fund has received clear funds, any redemption or switch out transaction in the interim is liable to be rejected at the sole discretion of the AMC.

A Unit Holder may request redemption of a specified amount or a specified number of Units only. If the redemption request is made for a specified amount and the number of Units is also specified by the Unit Holder, the number of Units specified will be considered for deciding the redemption amount. Unit Holders may also request for redemption of their entire holding and close the account by indicating the same at an appropriate place in the transaction slip/common transaction form.

It may, however, be noted that in the event of death of the Unit Holder, the nominee or legal heir, (subject to production of requisite documentary evidence to the satisfaction of the AMC) as the case may be, shall be able to redeem the investment only after the completion of one year or any time thereafter, from the date of allotment of the Units to the deceased Unit Holder.

In case an investor has purchased Units on more than one day (either under the NFO Period or through subsequent purchases) the Units purchased first (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First-In-First-Out basis.

In case the Units are standing in the names of more than one Unit Holder, where mode of holding is specified as Joint redemption requests will have to be signed by all joint holders. However, in cases of holding specified as 'Anyone or Survivor', any one of the Unit Holders will have the power to make redemption requests, without it being necessary for all the Unit Holders to sign. However, in all cases, the proceeds of the redemption will be paid to the first-named holder only.

Redemption or repurchase proceeds shall be dispatched to Unit Holders within 10 Business Days from the date of acceptance of redemption or repurchase.

Unit Holders are encouraged and advised to submit their requests for bank mandate/ Multiple Bank Accounts Registration request atleast 10 business days prior to date of redemption / IDCW payment, if any. The AMC reserves the right to extend/modify the timelines on a case to case basis.

The redemption payment will be issued in favour of the sole/ first Unit Holder's registered name and bank account number, if provided. Payment via cheque, where issued, will be sent to the address of the sole/first Holder registered with the fund at the time of dispatch entirely at the risk of the unit holder. The redemption cheque/demand draft will be payable at par at all the places where the official points of acceptance of transaction are located. Bank charges for collection of redemption proceeds will be borne by the Unit Holder. With a view to safeguarding their interest, it is mandatory that Unit Holders indicate their Bank Account No., name of the bank and branch in the application for purchasing Units of the Scheme. A fresh account statement will also be sent/emailed to redeeming investors, indicating the new balance to the credit in the account, along with the redemption cheque.

Unit holders are requested to note that application for redemption or switch out for units for which funds are not realized via purchase or switch-in in the Scheme of the Fund shall be liable to be rejected. In other words, redemption of units will be processed only if the funds for such units are realized in the Scheme by a way of payment instructions/transfer or switch-in funding process.

The proceeds towards redemptions and IDCW will be despatched by a reasonable mode of despatch like courier, post, UCP, etc. in case of cheque/demand draft or directly credited to the bank account (as per the details mentioned by the investor), entirely and solely at the risk of the investor. The Mutual Fund will endeavour to remit redemption proceeds via electronic means, as made available by RBI. Where such electronic means are not available or feasible under any circumstances, the Mutual Fund will remit the redemption proceeds by way of cheques. The investor will not hold the Mutual Fund or the AMC or the Registrar responsible for any non-receipt or delay of receipt of redemption & IDCW proceeds due to any negligence or deficiency in service by the courier company, postal authorities or the bank executing direct credits, or due to incorrect bank account details provided by the investor.

Redemption by NRIs and FPIs

Credit balances in the account of an NRI/FPI investor may be redeemed by such investors in accordance with the procedure described above and subject to the procedures laid down by RBI, if any. Such redemption proceeds will be paid by means of a Rupee cheque payable to the NRI's/FPIs.

Effect of Redemption

On redemption, the unit capital and reserves will stand reduced by an amount equivalent to the product of the number of Units redeemed and the Redemption Price as on the date of redemption. Units once redeemed will be extinguished and will not be re-issued.

Fractional Units

Since a request for purchase is generally made in Rupee amounts and not in terms of number of Units of the Scheme, a Unit Holder may be left with fractional Units. Fractional Units will be computed and accounted for up to four decimal places. However, fractional Units will, in no way, affect the Unit Holder's ability to redeem the Units, either in part or in full, standing to his/her/its credit.

Redemption by investors transacting through the Stock Exchange mechanism

Investors who wish to transact through the stock exchange shall place orders for redemptions as currently practiced for secondary market activities. Investors must submit the Delivery Instruction Slip to their Depository Participant on the same day of submission of redemption request, within such stipulated time as may be specified by NSE/BSE, failing which the transaction will be rejected. Investors shall seek redemption requests in terms of number of Units only and not in Rupee amounts. Investor shall receive redemption amount through Broker/ Clearing Member's account. The AMC/Mutual Fund shall pay proceeds to the Broker/ Clearing Member and Broker/ Clearing Member in turn to the respective investor's account. Refer "Trading in Units through Stock Exchange mechanism", for detailed provisions.

As per SEBI (MF) Regulations, the Mutual Fund shall despatch the redemption proceeds within 10 Business Days from the date of acceptance of redemption request. In the event of delay/failure to despatch the redemption/repurchase proceeds within the aforesaid 10 Business Days, the AMC will be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (currently @ 15% per annum).

19. IDCW Warrants

IDCW warrants shall be dispatched to the Unit Holders within 15 days from the record date for declaration of the IDCW. In the event of delay/failure to despatch the IDCW warrants within the aforesaid 15 days, the AMC will be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (currently @ 15% per annum).

20. Minimum balance to be maintained and consequences of non maintenance

Further, if an investor makes a redemption request few days after purchase of Units, till clearance of funds is identified, the Mutual Fund shall have the right to reject the redemption request until such time as the Mutual Fund ensures that the amount remitted by the investor (for purchase of Units) is realized and that the proceeds have been credited to the Scheme's Account. However, this is only applicable if the value of redemption is such that some or all of the freshly purchased Units may have to be redeemed to effect the full redemption.

21. Suspension/Restriction on Redemption of Units of the Scheme

Subject to the approval of the Boards of the AMC and of the Trustee and subject also to necessary communication of the same to SEBI, the redemption of / switch-out of Units of Scheme(s) of the Fund, may be temporarily suspended/ restricted. In accordance with SEBI circular ref. no. SEBI/HO/IMD/DF2/CIR/P/2016/57 dated May 31, 2016 and subject to prevailing regulations, restriction on/suspension of redemptions / switch-out of Units of the Scheme(s) of the Fund, may be imposed when there are circumstances leading to systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets such as:

- a) Liquidity issues: when market at large becomes illiquid affecting almost all securities rather than any issuer specific security;

- b) Market failures, exchange closures: when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies;
- c) Operational issues: when exceptional circumstances are caused by force majeure, unpredictable operational problems and technical failures (e.g. a black out).

Restriction on / suspension of redemption of Units of the Scheme(s) may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.

When restriction on / suspension of redemption of Units of the Scheme(s) is imposed, the following procedure shall be applied:

- i. No redemption / switch-out requests upto Rs. 2 lakhs shall be subject to such restriction.
- ii. Where redemption / switch-out requests are above Rs. 2 lakhs, the AMC shall redeem the first Rs. 2 lakhs without such restriction and remaining part over and above Rs. 2 lakhs shall be subject to such restriction.

Also refer to the section 'Suspension of Purchase and Redemption of Units' in the Statement of Additional Information.

22. Restrictions, if any, on the right to freely retain or dispose off Units being offered

The Trustee may, in the general interest of Unit Holders, keeping in view the unforeseen circumstances/unusual market conditions, limit the total number of Units which may be redeemed on any Business Day to 5% of the total number of Units then in issue under the Scheme (or such higher percentage as the Trustees may determine).

Any Units, which by virtue of these limitations are not redeemed on a particular Business Day, will be carried forward for redemption to the next Business Day, in order of receipt. Redemptions so carried forward will be priced on the basis of the Redemption Price of the Business Day or Non Business Day (if and as applicable) on which redemption is made. Under such circumstances, to the extent multiple redemption requests are received at the same time on a single Business Day, redemptions will be made on pro-rata basis, based on the size of each redemption request, the balance amount being carried forward for redemption to the next Business Day(s).

Also, in the event of an order being received from any regulatory authority/body, directing attachment of the Units of any investor, redemption of Units will be restricted in due compliance of such order.
