SECTION IV - INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader equity and bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Additional Risk Factors for Foreign Investors:

1. Foreign Currency Risk:

The Schemes are denominated in Indian Rupees (INR) which is different from the home currency for Foreign Portfolio Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Portfolio Investors could be lower because of the currency movements. The AMC does not manage currency risk for Foreign Portfolio Investors and it is the sole responsibility of the Foreign Portfolio Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/ AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

2. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Portfolio Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Portfolio Investors.

Scheme Specific Risk Factors:

DSPGIFOF intends to predominantly invest in units of Innovation Funds and ETFs. The Scheme may also invest a certain portion of its corpus in money market securities and/or units of money market/liquid schemes of DSP Mutual Fund. Hence scheme specific risk factors of such underlying schemes will be applicable. All risks associated with such schemes, including performance of their underlying stocks, derivative instruments, stock-lending, offshore investments etc., will therefore be applicable in the case of the Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying schemes.

Risk associated with Fund of Fund schemes:

- The Scheme's performance will predominantly depend upon the performance of the corresponding Underlying Funds and ETFs
- Any change in the investment policy or the fundamental attributes of the Underlying Fund in which the Scheme invests may affect the performance of the Scheme.
- Investments in the Underlying Funds and ETFs, which are equity funds, will have all the risks associated with investments in equity and the offshore markets. The portfolio disclosure of the Scheme will be largely limited to the particulars of the relevant Underlying Fund and investments by the Scheme in money market instruments. Therefore, Unit Holders may not be able to obtain specific details of the Scheme in respect of the Underlying Fund's portfolio.

- Dependence on the Investment Managers of the underlying schemes: The success of the underlying schemes depends on the ability of the respective Investment Managers to develop and implement investment strategies that achieve their investment objective. Moreover, subjective decisions made by the Investment Manager may cause an underlying scheme to incur losses or to miss profit opportunities
- In addition to the recurring expenses of the Scheme, the Unit Holders shall also bear the applicable expenses of the Underlying Funds and ETFs. Therefore, the returns that the Unit Holder of the Scheme may receive shall be substantially impacted or may, at times, be lower than the returns that a Unit Holder, who is directly investing in the same Underlying Fund, could obtain.

Risk associated with underlying schemes (Funds and/or ETFs):

- Financial Markets, Counterparties and Service Providers: The underlying schemes may be exposed to finance sector companies that act as a service provider or as counterparty for financial contracts. In times of extreme market volatility, such companies may be adversely affected, with a consequent adverse effect on the returns. Regulators and self-regulatory organisations and exchanges are authorised to take extraordinary actions in the event of market emergencies. The effect of any future regulatory actions could be substantial and adverse.
- markets have undergone pervasive and fundamental Intervention: Since 2007, global financial markets have undergone pervasive and fundamental disruption and suffered significant instability which has led to governmental intervention. Regulators in many jurisdictions have implemented or proposed a number of emergency regulatory measures. Government and regulatory interventions have sometimes been unclear in scope and application, resulting in confusion and uncertainty which in itself has been detrimental to the efficient functioning of financial markets. It is impossible to predict what additional interim or permanent governmental restrictions may be imposed on the markets and/or the effect of such restrictions on the ability to implement a Fund's investment objective. Whether current undertakings by governing bodies of various jurisdictions or any future undertakings will help stabilise the financial markets is unknown. The Fund Managers cannot predict how long the financial markets will continue to be affected by these events and cannot predict the effects of these or similar events in the future on a Fund or global economy and the global securities markets. The Fund Managers are monitoring the situation. Instability in the global financial markets or government intervention may increase the volatility of the Funds and hence the risk of loss to the value of your investment.
- Liquidity Risk: Trading volumes in the underlying investments of the Underlying schemes may fluctuate significantly depending on market sentiment. There is a risk that investments made by the Underlying schemes may become less liquid in response to market developments, adverse investor perceptions or regulatory and government intervention (including the possibility of widespread trading suspensions implemented by domestic regulators). In extreme market conditions, there may be no willing buyer for an investment and so that investment cannot be readily sold at the desired time or price, and consequently the relevant Fund may have to accept a lower price to sell the relevant investment or may not be able to sell the investment at all. An inability to sell a particular investment or portion of assets can have a negative impact of the value of the Underlying schemes or prevent the relevant Underlying schemes from being able to take advantage of other investment opportunities.

Similarly, investment in equity securities issued by unlisted companies, small and mid-capitalisation companies and companies based in emerging countries are particularly subject to the risk that during certain market conditions, the liquidity of particular issuers or industries, or all securities within a particular investment category, will reduce or disappear suddenly and without warning as a result of adverse economic, market or political events, or adverse market sentiment.

Liquidity risk also includes the risk that relevant Underlying schemes may be forced to defer redemptions, issue in specie redemptions or suspend dealing because of stressed market conditions, an unusually high volume of redemption requests, or other factors beyond the control of the investment manager. To meet redemption requests, the Underlying schemes may be forced to sell investments at an unfavorable time and/or conditions, which may have a negative impact on the value of the Fund.

- Credit Risk & Market Risk: To the extent that the underlying schemes invest in corporate debt securities, they are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations (credit risk). Debt securities may also be subject to price volatility due to factors such as changes in credit rating, interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer among others (market risk).
- Term Structure of Interest Rates (TSIR) Risk: To the extent that the underlying schemes are invested in fixed income securities, the NAV of the Units issued under the Scheme is likely to be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.

• Country Risks:

The value of the underlying Scheme's assets may be affected by uncertainties such as changes in a country's government policies, taxation, restrictions on foreign investment, currency decisions, applicable laws and regulations, together with any natural disasters or political upheaval, which could weaken a country's securities markets

- Equity Risks: The values of equities fluctuate daily and a Scheme investing in equities could incur significant losses. The price of equities can be influenced by many factors at the individual company level, as well as by broader economic and political developments, including changes in investment sentiment, trends in economic growth, inflation and interest rates, issuer-specific factors, corporate earnings reports, demographic trends and catastrophic events.
- Smaller Capitalisation Companies: Securities issued by small companies may be riskier, more volatile or less liquid than those of large companies. They are often new companies with shorter track records, less extensive financial resources, and less established markets. They may not have as many tradable shares compared with large companies, therefore, they tend to be less liquid.
- Emerging Markets: Emerging markets are typically those of poorer or less developed countries which exhibit lower levels of economic and/or capital market development, and higher levels of share price and currency volatility. Amongst these, those which exhibit the lowest levels of economic and/or capital market development may be referred to as frontier markets, and the below mentioned risks may be amplified for these markets. Some emerging markets governments exercise substantial influence over the private economic sector and the political and social uncertainties that exist for many developing countries are particularly significant. Another risk common to most such countries is that the economy is heavily export oriented and, accordingly, is dependent upon international trade. The existence of overburdened infrastructures and inadequate financial systems also presents risks in certain countries, as do environmental problems. In adverse social and political circumstances, governments have been involved in policies of expropriation, confiscatory taxation, nationalisation, intervention in the securities market and trade settlement, and imposition of foreign investment restrictions and exchange controls, and these could be repeated in the future. In addition to withholding taxes on investment income, some emerging markets may impose capital gains taxes on foreign investors.

Generally accepted accounting, auditing and financial reporting practices in emerging markets may be significantly different from those in developed markets. Compared to mature markets, some emerging markets may have a low level of regulation, enforcement of regulations and monitoring of investors' activities. Those activities may include practices such as trading on material nonpublic information by certain categories of investor. The securities markets of developing countries are not as large as the more established securities markets and have substantially less trading volume, resulting in a lack of liquidity and high price volatility. There may be a high concentration of market capitalisation and trading volume in a small number of issuers representing a limited number of industries as well as a high concentration of investors and financial intermediaries. These factors may adversely affect the timing and pricing of a Scheme's acquisition or disposal of securities.

Practices in relation to the settlement of securities transactions in emerging markets involve higher risks than those in developed markets, in part because of the need to use brokers and counterparties which are less well capitalised, and custody and registration of assets in some countries may be unreliable.

Delays in settlement could result in investment opportunities being missed if a Scheme is unable to acquire or dispose of a security. The Depositary is responsible for the proper selection and supervision of its correspondent banks in all relevant markets in accordance with applicable law and regulation. In certain emerging markets, registrars are not subject to effective government supervision nor are they always independent from issuers. Investors should therefore be aware that the Funds concerned could suffer loss arising from these registration problems.

- Risk of Investing in Specific Sectors: Where investment is made in one or in a limited number of market sectors, Underlying schemes may be more volatile than other more diversified Schemes. The companies within these sectors may have limited product lines, markets, or financial resources, or may depend on a limited management group. Such Schemes may also be subject to rapid cyclical changes in investor activity, regulatory changes and / or the supply of and demand for specific products and services. As a result, a stock market or economic downturn in the relevant specific sector or sectors or a regulatory change having disproportionate impact on the specific sector would have a larger impact on a Scheme that concentrates its investments in that sector or sectors than on a more diversified Fund. Tmay also be special risk factors associated with individual sectors such as Technology.
- Managers of the underlying schemes believes are capitalising on disruptive innovation and developing technologies to displace older technologies or create new markets may not in fact do so. Companies that initially develop a novel technology may not be able to capitalise on the technology. Companies that develop disruptive technologies may face political or legal attacks from competitors, industry groups or local and national governments. These companies may also be exposed to risks applicable to sectors other than the disruptive innovation theme for which they are chosen, and the securities issued by these companies may underperform the securities of other companies that are primarily focused on a particular theme. The underlying Scheme may invest in a company that does not currently derive any revenue from disruptive innovations or technologies, and there is no assurance that a company will derive any revenue from disruptive innovations or technologies in the future. A disruptive innovation or technology may constitute a small portion of a company's overall business. As a result, the success of a disruptive innovation or technology may not affect the value of the equity securities issued by the company
- Information Technology Sector Risk: the information technology sector includes companies engaged in internet software and services, technology hardware and storage peripherals, electronic equipment instruments and components, and semiconductors and semiconductor equipment. Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Information technology companies may have limited product lines, markets, financial resources or personnel. The products of information technology companies may face rapid product obsolescence due to technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Failure to introduce new products, develop and maintain a loyal customer base, or achieve general market acceptance for their products could have a material adverse effect on a company's business. Companies in the information technology sector are heavily dependent on intellectual property and the loss of patent, copyright and trademark protections may adversely affect the profitability of these companies.
- Internet Company Risks: many internet-related companies have incurred large losses since their inception and may continue to incur large losses in the hope of capturing market share and generating future revenues. Accordingly, many such companies expect to incur significant operating losses for the foreseeable future, and may never be profitable. The markets in which many internet companies compete face rapidly evolving industry standards, frequent new service and product announcements, introductions and enhancements, and changing customer demands. The failure of an internet company to adapt to such changes could have a material adverse effect on the company's business. Additionally, the widespread adoption of new internet, networking, telecommunications technologies, or other technological changes could require substantial expenditures by an internet company to modify or adapt its services or infrastructure, which could have a material adverse effect on an internet company's business.

- Semiconductor Company Risk: competitive pressures may have a significant effect on the financial condition of semi-conductor companies and, as product cycles shorten and manufacturing capacity increases, these companies may become increasingly subject to aggressive pricing, which hampers profitability. Reduced demand for end-user products, under-utilization of manufacturing capacity, and other factors could adversely impact the operating results of companies in the semiconductor sector. Semiconductor companies typically face high capital costs and may be heavily dependent on intellectual property rights. The semiconductor sector is highly cyclical, which may cause the operating results of many semiconductor companies to vary significantly. The stock prices of companies in the semiconductor sector have been and likely will continue to be extremely volatile.
- **Depositary Receipts Risk:** the issuers of certain depositary receipts are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities. Investment in depositary receipts may be less liquid than the underlying shares in their primary trading market. Depositary receipts may not necessarily be denominated in the same currency as the underlying securities into which they may be converted. In addition, the issuers of the stock underlying unsponsored depositary receipts are not obligated to disclose material information in the United States.
- Restrictions on Foreign Investment: Some countries prohibit or impose substantial restrictions on investments by foreign entities such as a Fund. As illustrations, certain countries require governmental approval prior to investments by foreign persons, or limit the amount of investment by foreign persons in a particular company, or limit the investment by foreign persons in a company to only a specific class of securities which may have less advantageous terms than securities of the company available for purchase by nationals. Certain countries may restrict investment opportunities in issuers or industries deemed important to national interests. The manner in which foreign investors may invest in companies in certain countries, as well as limitations on such investments, may have an adverse impact on the operations of an Underlying scheme. For example, an Underlying scheme may be required in certain of such countries to invest initially through a local broker or other entity and then have the share purchases re-registered in the name of the Underlying scheme. Re-registration may in some instances not be able to occur on a timely basis, resulting in a delay during which an Underlying scheme may be denied certain of its rights as an investor, including rights as to dividends or to be made aware of certain corporate actions. There also may be instances where an Underlying scheme places a purchase order but is subsequently informed, at the time of re-registration, that the permissible allocation to foreign investors has been filled, depriving the Underlying scheme of the ability to make its desired investment at the time.

Substantial limitations may exist in certain countries with respect to an Underlying scheme ability to repatriate investment income, capital or the proceeds of sales of securities by foreign investors. An Underlying scheme could be adversely affected by delays in, or a refusal to grant any required governmental approval for repatriation of capital, as well as by the application to the Underlying scheme of any restriction on investments. A number of countries have authorised the formation of closed-end investment companies to facilitate indirect foreign investment in their capital markets. Shares of certain closed-end investment companies may at times be acquired only at market prices representing premiums to their net asset values. If an Underlying scheme acquires shares in closed-end investment companies, shareholders would bear both their proportionate share of expenses in the Fund (including management fees) and, indirectly, the expenses of such closed end investment companies. In addition, certain countries such as India and the PRC implement quota restrictions on foreign ownership of certain onshore investments. These investments may at times be acquired only at market prices representing premiums to their net asset values and such premiums may ultimately be borne by the relevant Underlying scheme.

• Taxation of underlying schemes and assets: Investors should note in particular that the proceeds from the sale of securities in some markets or the receipt of any dividends and other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source. As a result, the Underlying Scheme (and therefore the Scheme) could become subject to additional taxation in such countries that is not anticipated either at the date of this SID or when investments are made, valued or disposed of

Investors should note that there may be additional taxes, charges or levies applied in respect of the Scheme's investments depending on the location of the assets of the Underlying Fund and the jurisdiction in which the Underlying Fund is located, registered or operated. Investors should also

note that the Underlying Fund's investment. managers and the Scheme's ability to provide tax information and audited accounts in respect of the Underlying Fund to Unit Holders of the Scheme is dependent on the relevant tax and other information being provided to the Underlying Fund in timely fashion. Accordingly, delays may occur in respect of delivery of such information to the Scheme's Unit Holders.

- Currency Risk: The assets in which the Underlying Scheme is invested and the income from the assets may be quoted in currencies which are different from the Underlying Fund's base currency. The performance of the Underlying Fund may therefore be affected by movements in the exchange rate between the currencies in which the assets are held and the Underlying Fund's base currency and hence there can be the prospect of additional loss or gain for the Unit Holder than what may be normally derived from the assets in which the Underlying Fund invests. The performance of the Underlying Fund may also be affected by changes in exchange control regulations. Conversion into foreign currency or transfer from some markets of proceeds received from the sale of securities cannot be guaranteed. Exchange rate fluctuations may also occur between the trade date for a transaction and the date on which the currency is acquired to meet settlement obligations. Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.
- Valuation Risk: The price the underlying scheme could receive upon the sale of a security or other asset may differ from the underlying scheme's valuation of the security or other asset and from the value used by the Underlying Index, particularly for securities or other assets that trade in low volume or volatile markets or that are valued using a fair value methodology as a result of trade suspensions or for other reasons. In addition, the value of the securities or other assets in the underlying scheme's portfolio may change on days or during time periods when shareholders will not be able to purchase or sell the Fund's shares. Authorized Participants who purchase or redeem Fund shares on days when the Fund is holding fair-valued securities may receive fewer or more shares, or lower or higher redemption proceeds, than they would have received had the underlying scheme not fair-valued securities or used a different valuation methodology. The underlying Scheme's ability to value investments may be impacted by technological issues or errors by pricing services or other thirdparty service providers.
- Risks Associated with Derivatives: The Underlying scheme may use derivatives in connection with its investment strategies. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the investment manager of the Underlying scheme to identify such opportunities. Identification and execution of the strategies to be pursued by the investment manager of the Underlying scheme involve uncertainty and decision of the investment manager of may not always be profitable. No assurance can be given that the investment manager of the Underlying Scheme will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in Securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in the losses that significantly exceed the Underlying Scheme's original investment. Certain derivatives may give rise to a form of leverage. Due to the low margin deposits normally required in trading financial derivative instruments, an extremely high degree of leverage is typical for trading in financial derivative instruments. As a result, the Underlying Scheme may be more volatile than if the Underlying Fund had not been leveraged. A relatively small price movement in a derivative contract may result in substantial losses to the investor.

Derivatives are also subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful, resulting in losses to the Underlying Scheme and the cost of such strategies may reduce the Underlying Fund's returns and increase the Underlying Scheme's potential for loss.

The Underlying Scheme may use derivatives to hedge market and currency risk, and for the purposes of efficient portfolio management. The use of derivatives may expose the Underlying Scheme to a

higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions are geared.

The Underlying Scheme may take short positions on a security through the use of financial derivative instruments in the expectation that their value will fall in the open market. The possible loss from taking a short position on a security differs from the loss that could be incurred from a cash investment in the security; the former may be unlimited as there is no restriction on the price to which a security may rise, whereas the latter cannot exceed the total amount of the cash investment. The short selling of investments may also be subject to changes in regulations, which could impose restrictions that could adversely impact returns to investors.

- Risks of Exchange Traded Derivative Transactions: The securities exchange on which the shares of
 the Underlying Fund may be listed may have the right to suspend or limit trading in all securities
 which it lists. Such a suspension would expose the Underlying Scheme to losses and delays in its
 ability to redeem shares.
- Legal risk OTC Derivatives, Repurchase and Reverse Repurchase Transactions, Securities Lending and Re-used Collateral: There is a risk that agreements and derivatives techniques are terminated due, for instance, to bankruptcy, supervening illegality or change in tax or accounting laws. In such circumstances, an underlying scheme may be required to cover any losses incurred. Furthermore, certain transactions are entered into on the basis of complex legal documents. Such documents may be difficult to enforce or may be the subject of a dispute as to interpretation in certain circumstances. Whilst the rights and obligations of the parties to a legal document may for example be governed by English or Luxembourg law, in certain circumstances (for example insolvency proceedings) other legal systems may take priority which may affect the enforceability of existing transactions.
- Securities Lending: The underlying schemes may engage in securities lending. The underlying schemes engaging in securities lending will have a credit risk exposure to the counterparties to any securities lending contract. Fund investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the underlying schemes.
- Risks Relating to Repurchase Agreements: In the event of the failure of the counterparty with which collateral has been placed, the underlying schemes may suffer loss as there may be delays in recovering collateral placed out or the cash originally received may be less than the collateral placed with the counterparty due to inaccurate pricing of the collateral or market movements.
- Risks Relating to Reverse Repurchase Agreements: In the event of the failure of the counterparty
 with which cash has been placed, the underlying schemes may suffer loss as there may be delay in
 recovering cash placed out or difficulty in realising collateral or proceeds from the sale of the
 collateral may be less than the cash placed with the counterparty due to inaccurate pricing of the
 collateral or market movements.
- Repurchase and Reverse Repurchase Agreements: Under a repurchase agreement an underlying schemes sells a security to counterparty and simultaneously agrees to repurchase the security back from the counterparty at an agreed price and date. The difference between the sale price and the repurchase price establishes the cost of the transaction. The resale price generally exceeds the purchase price by an amount which reflects an agreed-upon market interest rate for the term of the agreement. In a reverse repurchase agreement a underlying schemes purchases an investment from a counterparty which undertakes to repurchase the security at an agreed resale price on an agreed future date. The underlying schemes therefore bears the risk that if the seller defaults the Fund might suffer a loss to the extent that proceeds from the sale of the underlying securities together with any other collateral held by the underlying schemes in connection with the relevant agreement may be less than the repurchase price because of market movements. A underlying schemes cannot sell the securities which are the subject of a reverse repurchase agreement until the term of the agreement has expired or the counterparty has exercised its right to repurchase the securities.
- Cybersecurity Risk. Failures or breaches of the electronic systems of the underlying scheme, the underlying scheme's adviser, distributor, the Index Provider and other service providers, market makers, Authorized Participants or the issuers of securities in which the underlying scheme invests

have the ability to cause disruptions, negatively impact the underlying scheme's business operations and/or potentially result in financial losses to the underlying scheme and its shareholders.

Infectious Illness Risk. An outbreak of an infectious respiratory illness, COVID 19, caused by a novel coronavirus has resulted in travel restrictions, disruption of healthcare systems, prolonged quarantines, cancellations, supply chain disruptions, lower consumer demand, layoffs, ratings downgrades, defaults and other significant economic impacts. Certain markets have experienced temporary closures, extreme volatility, severe losses, reduced liquidity and increased trading costs. Such events can have an impact on the underlying Schemes and could impact their ability to purchase or sell securities or cause elevated tracking error and increased premiums or discounts to the NAV. Other infectious illness outbreaks in the future may result in similar impacts.

Operational Risk. The underlying schemes are exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures.

Counterparty Risk: An underlying scheme will be exposed to the credit risk of the parties with which it transacts and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the relevant underlying scheme. This would include the counterparties to any derivatives, repurchase / reverse repurchase agreement or securities lending agreement that it enters into. Trading in derivatives which have not been collateralised gives rise to direct counterparty exposure.

- **Collateral risk:** Although collateral may be taken to mitigate the risk of a counterparty default. there is a risk that the collateral taken, especially where it is in the form of securities, when realised will not raise sufficient cash to settle the counterparty's liability. This may be due to factors including inaccurate pricing of collateral, failures in valuing the collateral on a regular basis, adverse market movements in the value of collateral, a deterioration in the credit rating of the issuer of the collateral, or the illiquidity of the market in which the collateral is traded. Where an underlying scheme is in turn required to post collateral with a counterparty, there is a risk that the value of the collateral it places with the counterparty is higher than the cash or investments received by it. In either case, where there are delays or difficulties in recovering assets or cash, collateral posted with counterparties, or realising collateral received from counterparties, the underlying schemes may encounter difficulties in meeting redemption or purchase requests or in meeting delivery or purchase obligations under other contracts. As an underlying scheme may reinvest cash collateral it receives, there is a risk that the value on return of the reinvested cash collateral may not be sufficient to cover the amount required to be repaid to the counterparty. In this circumstance, the underlying scheme would be required to cover the shortfall. In case of cash collateral reinvestment, all risks associated with a normal investment will apply. As collateral will take the form of cash or certain financial instruments, the market risk is relevant. Collateral received by an underlying scheme may be held either by the Depositary or by a third party custodian. In either case, there may be a risk of loss where such assets are held in custody, resulting from events such as the insolvency or negligence of a custodian or sub-custodian.
- Sustainability Risk: The risk arising from any environmental, social or governance events or conditions that, were they to occur, could cause material negative impact on the value of the investments in the underlying schemes. Specific sustainability risk can vary for each product and asset class, and include but are not limited to:
 - Transition Risk The risk posed by the exposure to issuers that may potentially be negatively affected by the transition to a low carbon economy due to their involvement in exploration, production, processing, trading and sale of fossil fuels, or their dependency upon carbon intensive materials, processes, products and services. Transition risk may result to several factors, including rising costs and/or limitation of greenhouse gas emissions, energy-efficiency requirements, reduction in fossil fuel demand or shift to alternative energy sources, due to policy, regulatory, technological and market demand changes. Transition risk may negatively affect the value of investments by impairing assets or by increasing liabilities, capital expenditures, operating and financing costs.

- Physical Risk: The risk posed by the exposure to issuers that may potentially be negatively affected by the physical impacts of climate change. Physical risk includes acute risks arising from extreme weather events such as storms, floods, droughts, fires or heatwaves, and chronic risks arising from gradual changes in the climate, such as changing rainfall patterns, rising sea levels, ocean acidification, and biodiversity loss. Physical risk may negatively affect the value of investments by impairing assets, productivity or revenues or by increasing liabilities, capital expenditures, operating and financing costs.
- Social Risk: The risk posed by the exposure to issuers that may potentially be negatively affected by social factors such as poor labour standards, human rights violations, damage to public health, data privacy breaches, or increased inequalities. Social risk may negatively affect the value of investments by impairing assets, productivity or revenues or by increasing liabilities, capital expenditures, operating and financing costs.
- Governance Risk: The risk posed by the exposure to issuers that may potentially be negatively affected by weak governance structures. For companies, governance risk may result from malfunctioning boards, inadequate remuneration structures, abuses of minority shareholders or bondholders rights, deficient controls, aggressive tax planning and accounting practices, or lack of business ethics. For countries, governance risk may include governmental instability, bribery and corruption, privacy breaches and lack of judicial independence. Governance risk may negatively affect the value of investments due to poor strategic decisions, conflict of interest, reputational damages, increased liabilities or loss of investor confidence.
- China risks general Political, Economic and Social Risks Investments in the People Republic of China ("China") will be sensitive to any political, social and diplomatic developments which may take place in or in relation to China. Investors should note that any change in the policies of China may adversely impact on the securities markets in the PRC as well as the performance of the underlying schemes which may have investments in Chinese securities.
 - Economic Risks: The economy of China differs from the economies of most developed countries in many respects, including with respect to government involvement in its economy, level of development, growth rate and control of foreign exchange. All these may have an adverse impact on the performance of the underlying scheme concerned.
 - Legal and Regulatory Risk: The legal system of China is based on written laws and regulations. However, many of these laws and regulations are still untested and the enforceability of such laws and regulations remains unclear. In particular, Chinese regulations which govern currency exchange in China are relatively new and their application is uncertain. Such regulations also empower the China Securities Regulatory Commission and the State Administration of Foreign Exchange to exercise discretion in their respective interpretation of the regulations, which may result in increased uncertainties in their application. Renminbi related risks Renminbi ("RMB") is currently not a freely convertible currency as it is subject to foreign exchange control and fiscal policies of and repatriation restrictions imposed by the Chinese government. There are currently no repatriation limits that affect the Sub-Fund. If such policies change in future, the underlying schemes position may be adversely affected. There is no assurance that RMB will not be subject to devaluation, in which case the value of their investments will be adversely affected.
 - Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect: Underlying schemes which can invest in China A-shares through the Shanghai Hong Kong Stock Connect and Shenzhen Hong Kong Stock Connect programmes are subject to any applicable regulatory limits. The Shanghai-Hong Kong Stock Connect program is a securities trading and clearing linked program developed by Hong Kong Exchanges and Clearing Limited ("HKEX"), the Hong Kong Securities Clearing Company Limited ("HKSCC"), Shanghai Stock Exchange ("SSE") and China Securities Depository and Clearing Corporation Limited ("ChinaClear") with an aim to achieve mutual stock market access between mainland China and Hong Kong. This program will allow foreign investors to trade certain SSE listed China A-shares through their Hong Kong based brokers. The Shenzhen-Hong Kong Stock Connect is a similar cross-boundary investment channel, however it connects the Shenzhen Stock Exchange with HKEx.

Again, it provides mutual stock market access between mainland China and Hong Kong and broadens the range of China A-shares that international investors can trade. The underlying schemes seeking to invest in the domestic securities markets of the PRC may use both the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect programmes are subject to the following additional risks: General Risk: The relevant regulations are untested and subject to change. There is no certainty as to how they will be applied which could adversely affect the underlying schemes. The programmes require use of new information technology systems which may be subject to operational risk due to their crossborder nature. If the relevant systems fail to function properly, trading in both Hong Kong, Shanghai and Shenzhen markets through the programmes could be disrupted. Clearing and Settlement Risk: The HKSCC and China Clear have established the clearing links and each will become a participant of each other to facilitate clearing and settlement of cross boundary trades. For cross-boundary trades initiated in a market, the clearing house of that market will on one hand clear and settle with its own clearing participants, and on the other hand undertake to fulfil the clearing and settlement obligations of its clearing participants with the counterparty clearing house. Legal/Beneficial Ownership: Where securities are held in custody on a cross-border basis, there are specific legal/beneficial ownership risks linked to compulsory requirements of the local Central Securities Depositaries, HKSCC and ChinaClear. As in other emerging and less developed markets, the legislative framework is only beginning to develop the concept of legal/formal ownership and of beneficial ownership or interest in securities. In addition, HKSCC, as nominee holder, does not guarantee the title to Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect securities held through it and is under no obligation to enforce title or other rights associated with ownership on behalf of beneficial owners. Consequently, the courts may consider that any nominee or custodian as registered holder of Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect securities would have full ownership thereof, and that those Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect securities would form part of the pool of assets of such entity available for distribution to creditors of such entities and/or that a beneficial owner may have no rights whatsoever in respect thereof. Consequently the underlying scheme and the Depositary cannot ensure that the ownership of these securities or title thereto is assured. To the extent that HKSCC is deemed to be performing safekeeping functions with respect to assets held through it, it should be noted that the Depositary and the underlying scheme will have no legal relationship with HKSCC and no direct legal recourse against HKSCC in the event that the underlying scheme suffer losses resulting from the performance or insolvency of HKSCC. In the event ChinaClear defaults, HKSCC's liabilities under its market contracts with clearing participants will be limited to assisting clearing participants with claims. HKSCC will act in good faith to seek recovery of the outstanding stocks and monies from ChinaClear through available legal channels or the liquidation of ChinaClear. In this event, the underlying scheme may not fully recover its losses or its Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect securities and the process of recovery could also be delayed. Operational Risk: The HKSCC provides clearing, settlement, nominee functions and other related services of the trades executed by Hong Kong market participants. PRC regulations which include certain restrictions on selling and buying will apply to all market participants. Quota Limitations: The program is subject to quota limitations which may restrict the underlying schemes ability to invest in China A-shares through the program on a timely basis. Investor Compensation: The underlying scheme will not benefit from local investor compensation schemes. Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect will only operate on days when both the PRC and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. There may be occasions when it is a normal trading day for the PRC market but the underlying schemes cannot carry out any China A-shares trading. The underlying schemes may be subject to risks of price fluctuations in China A-shares during the time when Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect are not trading as a result.

• Risk associated with underlying ETFs:

 Authorized Participant Concentration Risk. Only an Authorized Participant may engage in creation or redemption transactions directly with the underlying ETF, and none of those Authorized Participants is obligated to engage in creation and/or redemption transactions. The underlying ETF has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation or redemption orders with respect to the underlying ETF and no other Authorized Participant is able to step forward to create or redeem, shares in the underlying ETF may be more likely to trade at a premium or discount to NAV and possibly face trading halts or delisting.

- o Index-Related Risk. There is no guarantee that the underlying ETF's investment results will have a high degree of correlation to those of the Underlying Index or that the underlying ETF will achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the underlying ETF's ability to adjust its exposure to the required levels in order to track the Underlying Index. Errors in index data, index computations or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, which may have an adverse impact on the underlying ETF. Unusual market conditions may cause the Index Provider to postpone a scheduled rebalance, which could cause the Underlying Index to vary from its normal or expected composition
- Passive Investment Risk. The underlying ETF is not actively managed, and the fund manager generally does not attempt to take defensive positions under any market conditions, including declining markets
- Tracking Error Risk. The underlying ETF may be subject to tracking error, which is the divergence of its performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the ETF portfolio and those included in the Underlying Index, pricing differences (including, as applicable, differences between a security's price at the local market close and the ETF's valuation of a security at the time of calculation of the Fund's NAV), transaction costs incurred by the ETF, the holding of uninvested cash, differences in timing of the accrual of or the valuation of dividends or interest, the requirements to maintain pass through tax treatment, portfolio transactions carried out to minimize the distribution of capital gains to shareholders, acceptance of custom baskets, changes to the Underlying Index or the costs to the ETF of complying with various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the ETF incurs fees and expenses, while the Underlying Index does not.

Risks Associated With Overseas Investments

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Scheme, the Scheme may invest in overseas markets and securities which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances.

Risks Associated with Transaction in Units through Stock Exchange Mechanism

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognised stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognised exchange in this regard.

Risks Associated with Investment in Money Market Instruments

The following risks are applicable to the extent of the Schemes investment in money market instruments

 Market Liquidity Risk: The liquidity of investments made in the Schemes may be restricted by trading volumes, settlement periods and transfer procedures. Although the investment universe constitutes securities which will have high market liquidity, there is a possibility that market liquidity could get impacted on account of company/sector/general market related events and there could be a price impact on account of portfolio rebalancing and/or liquidity demands on account of redemptions. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Schemes are uninvested and no return is earned thereon. The inability of the Schemes to make intended securities purchases, due to settlement problems, could cause the Schemes to miss certain investment opportunities. By the same token, the inability to sell securities held in the Schemes' portfolios, due to the absence of a well-developed and liquid secondary market for debt securities, would result at times, in potential losses to the Schemes, should there be a subsequent decline in the value of securities held in the Schemes' portfolios. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Schemes and may lead to the Schemes incurring losses till the security is finally sold.

- Credit Risk: Fixed income securities (debt and money market securities) are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations. The Investment Manager will endeavor to manage credit risk through in-house credit analysis. Different types of securities in which the Schemes would invest as given in the SID carry different levels of credit risk. Accordingly the Schemes' risk may increase or decrease depending upon their investment patterns. E.g. corporate bonds carry a higher amount of risk than Government securities. Further, even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.
- Rating Migration Risk: Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.
- Term Structure of Interest Rates (TSIR) Risk: The NAV of the Schemes' Units, to the extent that the Schemes are invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.
- Re-investment Risk: The investments made by the Schemes are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The additional income from reinvestment is the 'interest on interest' component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- Risk associated with investments in repo of corporate debt securities

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the below risks. The Scheme may also invest in tri-party repo as per prescribed guidelines of RBI and SEBI

- I. Counterparty Risk: This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. The Investment Manager will endeavor to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis or with entities regulated by SEBI/RBI/IRDA
- II. Collateral Risk: In the event of default by the repo counterparty, the scheme will have recourse to the corporate debt securities. Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities. In addition,

appropriate haircuts will be applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

Risks associated with segregated portfolio

- 1. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- 2. Security comprises of segregated portfolio may not realise any value.
- 3. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

B. RISK MANAGEMENT STRATEGIES

Risk Associated with Underlying Schemes

- Liquidity Risk on account of investments in overseas funds: The investments are made in international funds, which provide daily liquidity.
- Expense Risks associated with investments in overseas funds: The aggregate of expenses incurred by the Indian Fund-of-Funds scheme and the underlying international funds is subject to limits prescribed by SEBI.
- Portfolio Disclosure Risks associated with investments in overseas fund: Although full portfolio disclosure is not available at the end of each month, top ten holdings as well as sector holdings are made available at the end of each month for the overseas fund. Full portfolio holdings can be obtained from underlying Overseas funds generally with a three-month lag i.e. March portfolio can be obtained at the end of June
- Investment Policy and/or fundamental attribute change risks associated with investments in
 overseas funds: Investments are made in such international funds, which have similar investment
 objectives to the domestic fund in India. However, there exists possibility that there is a change in
 the fundamental attributes of the international fund. In such circumstances, the Investment
 Manager will seek to invest in other international funds, which have the same investment objective
 as the domestic fund.

Risks Associated with Investment in Money Market Instruments

- Market Liquidity Risk: The Investment Manager will select fixed income securities, which have or are expected to have high secondary market liquidity
- Credit Risk: Credit Risk associated with fixed income securities will be managed by making
 investments in securities issued by borrowers, which have a good credit profile. The credit research
 process includes a detailed in-house analysis and due diligence.
- Term Structure of Interest Rates (TSIR) Risk: As the investments of the Scheme are very short duration in nature, the risk can be expected to be small.

C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors each and no single investor shall account for more than 25% of the corpus of the Scheme. These conditions shall be complied with, in each calendar quarter on an average basis, as specified by SEBI. In case of non-fulfillment of the condition of 20 investors in a calendar quarter, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations shall become applicable automatically without any reference from SEBI, and accordingly the Scheme shall be wound up and the units redeemed at the relevant applicable NAV. If there is breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be available and thereafter, the investor who is in breach of the rule, shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the

aforesaid 15 days would lead to automatic redemption on the applicable Net Asset Value on the 15th day of the notice period.

D. SPECIAL CONSIDERATIONS

- Subject to the SEBI (MF) Regulations, funds managed by the affiliates/associates of the Sponsors may invest either directly or indirectly in the Schemes and may acquire a substantial portion of the Schemes' Units and collectively constitute a majority investor in the Schemes. Accordingly, redemption of Units held by such funds may have an adverse impact on the value of the Units of the Schemes because of the timing of any such redemption and may impact the ability of other Unit Holders to redeem their respective Units.
- As the liquidity of the Schemes' investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Schemes' portfolios. In view of this, the Trustee has the right, in its sole discretion, to limit redemptions under certain circumstances.
- Neither the SID and SAI, nor the Units have been registered in any jurisdiction. The distribution of this SID in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of this SID and the SAI in such jurisdictions are required to inform themselves about, and to observe, any such restrictions. No person receiving a copy of this SID or any accompanying application form in such jurisdiction may treat this SID or such application form as constituting an invitation to them to subscribe for Units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance of any registration or other legal requirements.

Besides, better access to information on the financial health of many foreign companies helps portfolio managers make informed investment decisions.

Although these benefits are very attractive, one must not lose sight of the fact that risks also exist with regard to investments in foreign markets. These include fluctuating currency prices, relevant regulations of exchanges/countries, financial reporting standards, liquidity and political instability among others. The Investment Manager, with a view to protecting the interests of the unitholders, may also invest in foreign debt securities, as deemed appropriate and in accordance with guidelines stipulated in this regard by SEBI and RBI from time to time.

BGF World Tech fund D2 USD

	This fund offers a diversified exposure across all the sub-sectors in the
the underlying fund	technology space including hardware, software and internet and across
	multiple geographies. It is the flagship Active Technology sector fund

	managed by the team at BlackRock.
Investment Objective	The World Technology Fund seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is in the technology sector. There is no guarantee that a positive investment outcome will be achieved.
Investment Strategy	The Fund looks to add alpha through both stock selection and sub-sector allocation, believing that it is critical to own the right companies in the sub- sectors that are experiencing strong growth, while being mindful of valuation.
Long Term drivers	The team believes that inefficiencies in the market can be tapped, and the return objective realised, through the consistent application of an active investment process that is collaborative, highly disciplined, researchintensive, multi- disciplinary, regime-aware, global in its frame of reference, and risk-informed. Stock selection is based on bottom-up, fundamental company research by sub- industry. Portfolio strategy and risk management are integral components of the portfolio construction process. The team believes that this integrated approach is critical to achieving its goal of seeking to generate consistent, superior and risk adjusted returns. The team aims to provide a balance of legacy technology firms that can continually. While this is our belief, no investment is risk free. Proprietary technology platforms may help manage risk, but risk cannot be eliminated.
Investment Process	The investment process is highly collaborative. The team's portfolio manager and analyst work in partnership, conducting research, honing strategy and selecting stocks. The portfolio manager is responsible for stock selection. The team begins the process by establishing a strategic framework for investing, which serves as a guide for taking risk. It is comprised of the team's points of view on sub-industry, stock, style and market risks.
	Portfolio strategy is dynamic, informed by the team's ongoing fundamental sub-industry and company research, and conditioned by financial market observations.
	Stocks are selected on the basis of the team's bottom-up fundamental analysis. The process cuts across both traditional growth and value sectors. The team believes that all investment decisions are based on a sound investment thesis with a potentially favourable, probability-weighted outcome. Individual position sizes are determined through an assessment of each stock's relative risk and reward. The portfolio may also use derivatives to hedge market and currency risk and for the purposes of efficient portfolio management, however this is not a primary strategy. The team seeks to mitigate portfolio risk through diversification by industry, country, market-capitalisation, issuer, and, to a lesser extent, investment style. The team generally invests in companies across the capitalisation curve. The portfolio typically invests in 80 to 120 positions. While risk diversification is standard practice for the team, there are no mandated guidelines for industry or position concentration, or for investment style. All exposures are fundamentally based and risk-appropriate in the sole judgment of the investment team.
	The team is label agnostic in its selection process but holds a strong belief that different macro and financial market regimes require adaptions to the selection criteria. All investment decisions are based on a sound investment thesis with a potentially favourable, probability-weighted outcome, and are consistent with portfolio strategy. The team aims to ensure that at any given time they understand the riskiness of the portfolio relative to the benchmark and, crucially the sources of risk. The team benefits from BlackRock's real time risk analytics which are available on the desk top as

Risk Profile And Risk Control	The team aims to ensure that at any given time they understand the riskiness of the portfolio relative to the benchmark and, crucially the sources of risk. The fund's portfolio construction adheres amongst other parameters to the risk parameters below which ensure that risk is diverse, deliberate and appropriately scaled:		
	 Strict control of portfolio construction to combine focus with risk Minimise unintended risk - no blind spots Have diverse range of exposures Key aim is to avoid performance being driven by a single stock or 		
	 'factor' Largest positions will reflect risk adjusted upside to price target, level of conviction and visibility of catalysts The BGF World Technology Fund benefits from BlackRock's real time risk analytics which are available on the desk top as well as regular meetings with the Risk & Quantitative Analysis (RQA) team which provide additional insights into the fund risk profile, such as macro / economic stress tests, style and factor changes, market volatility and correlations. BlackRock's emphasis on risk management serves to meet our objective of generating excess return within a risk-controlled investment framework. We believe our real-time analysis of a vast array of risk measures allows us to assess 		

the potential impact of various sector and security strategies on total return. As a result, we believe consistent value is added and performance volatility is controlled. We believe the substantial investment we have made in proprietarily-developed analytical systems and personnel strongly differentiates our firm.

BlackRock Solutions technology provides integrated automated transaction processing and risk management and supplies valuable information to portfolio managers for their use in making investment decisions and calibrating risk positions. Transaction processing components facilitate operating efficiency by linking together trade information, security data, guideline compliance, and portfolio operations.

RQA has adopted a Risk & Performance Targets framework ("RPT") as an additional level of surveillance. On a daily basis, risk levels are reviewed against pre-specified risk bands for every portfolio managed by BlackRock and any portfolio that falls outside of these bands must follow a defined resolution, escalation and documentation process. Risk Management Measure for the Fund: Commitment Approach. Whilst the investment approach described seeks to control risk, risks cannot be eliminated.

Currency Management and Hedging Policies

The portfolio may also use derivatives to hedge market and currency risk and for the purposes of efficient portfolio management, however this is not a primary strategy. In accordance with the investment limits and restrictions, all the BGF funds may use derivatives to hedge market and currency risk, and for the purposes of efficient portfolio management.

Tracking Error: The fund has a preferred tracking error target of 4-8% versus the MSCI ACWI IT Index as set by Risk & Quantitative Analysis (RQA), which is the internal independent entity focused on risk monitoring. The portfolio manager pays attention to tracking error and will adjust the portfolio if he feels the level of risk is inappropriate. He will do this in a variety of ways, including adjusting the number of holdings in the portfolio, adjusting specific stock positions and adjusting regional / sector / factor biases.

Exchange rate risk: The fund invests a large portion of assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment. Investors in this Fund should understand that capital growth is not a priority and values may fluctuate and the level of income may vary from time to time and is not guaranteed.

Equity Risk: The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.

Sector Specific Risk: The fund invests in a limited number of market sectors. Compared to investments which spread investment risk through investing in a

variety of sectors, share price movements may have a greater effect on the overall value of this fund.

	looks to invest in companies having scope to grow to multiples of their current size and has the potential to transform the returns for investors over time.
Investment	The investment objective of the Fund is to provide strong returns over the
Objective	long term by investing primarily in a concentrated, unconstrained global

	equity portfolio.
	The Fund may also invest in other transferable securities, money market instruments, cash and cash equivalents.
Investment Strategy	The Fund will seek to achieve its objective primarily through investment in a concentrated but diversified portfolio of equity securities typically comprising of between 30 and 60 holdings which shall principally be listed, traded or dealt in on one or more of the Regulated Markets referred to in Schedule II. The equity securities in which the Fund will invest shall primarily consist of common stocks and other transferable securities such as convertible securities, preferred securities, convertible preferred securities, warrants and rights. The equity securities in which the Fund may invest will not be selected from any particular industry sector or from any particular country and will typically have a market capitalisation of more than U.S. \$4 billion at the time of purchase.
Long Toyen drivors	The investment strategy of the Fund is to invest primarily in global equities which are listed, traded or dealt in on Regulated Markets with the aim of producing strong returns over the long term. Stocks with strong growth potential are selected on an individual stock selection basis by a dedicated team of portfolio managers, drawing on their own research and that of other investment teams at Baillie Gifford.
Long Term drivers	Long-term investment horizon
	A growth bias
	Bottom-up portfolio construction
Investment Process	High active share The portfolio managers employ a bottom-up approach to stock selection and select investments without regard to the geographic, industry, sector, or individual company weightings on any index. The portfolio managers focus on company research and the long-term outlook of companies and industries. Ideas can come from a wide variety of sources, including, but not limited to, research trips, company meetings, and relationships with industry thought leaders and academics. Stock ideas will be researched to assess a range of factors, including: geographic and industry positioning, competitive advantage, management, financial strength and valuation. The portfolio managers generally select securities of between 30-60 growth companies. The Fund is a non-diversified fund, which means that it may invest a relatively large percentage of its assets in a small number of issuers, industries or sectors. The Fund aims to hold securities for long periods (typically 5-10 years), which results in relatively low portfolio turnover and is in line with the Fund's long-term investment outlook.
	The Fund may invest without limitation in securities quoted or denominated in currencies other than the U.S. dollar and may hold such currencies. The Fund does not expect to engage in currency hedging and thus expects to be fully exposed to currency fluctuations relative to the U.S. dollar
	The Fund's management team meets regularly to discuss individual stock selection, review portfolio holdings and potential stock purchases. The team also holds ad hoc meetings as required to discuss relevant developments in the portfolio. All of the members of the team are responsible for researching stocks and every investor contributes to the generation of new ideas, stock research and stock discussions. Once a stock has been fully researched and discussed by all in the team, the portfolio managers are responsible for making the ultimate decision on its inclusion (or otherwise) in the portfolio. Their decisions place an emphasis on backing enthusiasm rather than

	achieving a full consensus. Each portfolio manager has ownership and accountability for portfolio decisions.

The Investment Adviser seeks to understand how environmental and social initiatives within companies can create value by strengthening durable competitive advantages, creating growth opportunities, driving profitability, and/or aligning with secular growth trends. The Investment Adviser generally engages with company management teams to discuss their ESG practices, with the aim of identifying how sustainability themes present opportunities and risks that can be material to the value of the security over the long-term. Other aspects of the investment process include a proprietary, systematic evaluation of governance policies, specifically focusing on compensation alignment on longterm value creation. The Investment Adviser does not treat ESG as a deterministic, reductive screen, nor as a portfolio construction tool layered on top of a passive vehicle. Bluebox Global Technology Fund

	<i></i>
Basis of selection of the underlying fund	The Fund's investment style is focused more on "Enablers" in Innovation space over "Disruptive companies". The Direct Connection of computers to the real world has enabled the technology revolution of the past 15 years, driving an acceleration in tech adoption simultaneously across all industry verticals. With every other industry investing its excess returns in technology, IT sector can continue to outperform the broader market as it steals the growth from the rest of the economy. The Fund focuses on the companies enabling Direct Connection, giving it exposure to the most exciting developments in the sector without needing to chase over-hyped themes or invest in over-valued stocks. The fund is a technology fund, but is not obsessed with technology; rather obsessed with technology companies. Technology companies that are
	profitable and create value for their shareholders.
	Adding the fund will help to diversify the Global Innovation theme.
Investment	The Fund's principle objective is to seek long term capital growth by
Objective	investing mainly in shares of companies having their principle business in the technology sector or profiting from it. The Fund invests globally and is not benchmark constrained.
Investment Strategy	The overall investment strategy of the BlueBox Global Technology Fund is to seek out companies that will create value for the Shareholders from the multi-year tailwind in the information technology sector provided by the direct connection of computers to the real world.
	The BlueBox Global Technology Fund will typically hold 30-40 positions. The holding periods are expected to be generally fairly long (multiple years) and turnover low, although at times the BlueBox Global Technology Fund will play the cyclicality of certain technology sub-sectors, with shorter holding periods. The geographic focus of the strategy is global. The sector focus is predominantly the information technology sector, however the BlueBox Global Technology Fund may also acquire shares in companies classified in other sectors with a strong information technology element.
	Holdings will be primarily of publicly listed companies, typically with a market capitalisation of about \$1bn or more, but the BlueBox Global Technology Fund will take part in initial public offerings (where the market cap may be significantly below \$1bn at listing)
	The BlueBox Global Technology Fund may not acquire shares carrying voting rights which should enable it to exercise significant influence over the management of an issuing body.
	The BlueBox Global Technology Fund will not invest in FDIs.
	It is currently not contemplated for the BlueBox Global Technology Fund to invest in Russian equities or equity related securities.
	Investments in a currency other than the Reference Currency of the BlueBox Global Technology Fund may be hedged against the Reference Currency of the BlueBox Global Technology Fund.

Long Term drivers	The Fund is active and managed without any reference to a benchmark. The Investment Manager has discretion over the composition of its portfolio subject to this objective and investment policy. • A strong underlying technology trend, principally Direct Connection • A company's ability to create value as a result of that trend • Strong barriers to entry • A reasonable division of generated value between outside shareholders and other stakeholders.

Overview of Overseas Debt Market

The nature and number of debt instruments available in international debt markets is very wide. In terms of diverse instruments as well as liquidity, overseas debt markets offer great depth and are extremely well developed. Investment in international debt greatly expands the universe of top quality debt, which is no longer restricted to the limited papers available in the domestic debt market. The higher rated overseas sovereign, quasi-government and corporate debt offer lower default risk in addition to offering a high degree of liquidity since these are traded across major international markets. Investments in rated international debt offer multiple benefits of risk reduction, a much wider universe of top quality debt and also potential gains from currency movements.

Investments in international markets are most often in U.S. dollars, though the Euro, Pound Sterling and the Yen are also major currencies. Though this market is geographically well-spread across global financial centers, the markets in the U.S., European Union and London offer the most liquidity and depth of instruments.

Besides factors specific to the country / issuer, international bond prices are influenced to a large extent by a number of other factors; chief among these are the international economic outlook, changes in interest rates in major economies, trading volumes in overseas markets, cross currency movements among major currencies, rating changes of countries / corporations and major political changes globally.

 - b) Subsequent downgrades of the said instruments from 'below investment grade', or
 - c) Similar such downgrades of a loan rating

In case of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments, actual default of either the interest or principal amount by the issuer of such instruments shall be considered as a Credit Event for creation of Segregated Portfolio.

2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.

- 3) In case of unrated debt or money market instruments of an issuer that does not have any outstanding rated debt or money market instruments, actual default of either the interest or principal amount by the issuer of such instruments shall be considered as a Credit Event for creation of Segregated Portfolio
- 4) Creation of segregated portfolio is optional and is at the discretion of the AMC. It shall be created only if the Scheme Information Document (SID) of the scheme has provisions for segregated portfolio with adequate disclosures.

Process for Creation of Segregated Portfolio:

- 1) On the date of credit event, AMC should decide on creation of segregated portfolio. Once AMC decides to segregate portfolio, it should:
 - a) seek approval of trustees prior to creation of the segregated portfolio.
 - b) immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. The Fund will also disclose that the segregation shall be subject to Trustee approval. Additionally, the said press release will be prominently disclosed on the website of the AMC.
 - c) ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme will be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once Trustee approval is received by the AMC:
 - a) Segregated portfolio will be effective from the day of credit event
 - b) AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information will also be submitted to SEBI.
 - c) An e-mail or SMS will be sent to all unit holders of the concerned scheme.
 - d) The NAV of both segregated and main portfolios will be disclosed from the day of the credit event.
 - e) All existing investors in the scheme as on the day of the credit event will be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - f) No redemption and subscription will be allowed in the segregated portfolio. However, upon recovery of any money from segregated portfolio, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio.
 - g) AMC should enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests
 - h) Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- 3) If the trustees do not approve the proposal to segregate portfolio, AMC will issue a press release immediately informing investors of the same.
- 4) In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Processing of Subscription and Redemption Proceeds:

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as under:

- i. Upon trustees' approval to create a segregated portfolio -
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

TER for the Segregated Portfolio

- 1) AMC will not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. In addition to the TER mentioned above, the legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio as mentioned below.
- 3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Explanations:

- 1) The term 'segregated portfolio' means a portfolio, comprising of debt or money market instrument affected by a credit event that has been segregated in a mutual fund scheme.
- 2) The term 'main portfolio' means the scheme portfolio excluding the segregated portfolio.
- The term 'total portfolio' means the scheme portfolio including the securities affected by the credit event.

Risks associated with segregated portfolio:

- 4. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- 5. Security comprises of segregated portfolio may not realise any value.
- 6. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Disclosure Requirements:

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

- a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- b. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the Mutual Fund and the Scheme.
- c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.
- d. The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
- e. The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance shall clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery (ies), if any, shall be disclosed as a footnote to the scheme performance.
- f. The disclosures at paragraph 7(d) and 7(e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/written-off.
- g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Monitoring by Trustees:

- a. In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:
 - i. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
 - ii. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
 - iii. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
 - iv. The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.
- b. In order to avoid mis-use of segregated portfolio, trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

This section provides details an investor needs to know for investing in the Scheme.

A. NEW FUND OFFER (NFO)

This section does not apply, as the ongoing offer of the Scheme has commenced after the NFO, and the Units are available for continuous subscription and redemption.

B. ONGOING OFFER DETAILS

1. Ongoing/Continuous Offer Period

(This is the date from which the Scheme will reopen for subscriptions/redemptions after the closure of the NFO period)

The Continuous offer for the Scheme commenced from February 11, 2022

2. Plans and Options offered under the Scheme

Plans	Options Available	Sub-Options	IDCW Frequency/Record Date
Regular Plan and	Growth	-	-
Direct Plan	IDCW	Payout IDCW & Reinvest IDCW	At the discretion of Trustee

Investors may note that under Income Distribution cum Capital Withdrawal options the amounts can be distributed out of investor's capital (Equalization Reserve), which is part of sale price that represents realized gains.

(i) Growth Option - Option A

The Mutual Fund will not declare any IDCWs under this option. The income earned under this Option will remain invested in the option and will be reflected in the NAV. This option is suitable for investors who are not looking for current income but who have invested with the intention of capital appreciation. Moreover, if Units under this option are held as capital asset for a period of greater than twelve months from the date of acquisition, Unit Holders will get the benefit of long term capital gains tax.

(ii) Income Distribution cum Capital Withdrawal option (Option B)

The above Option is suited for investors seeking income through IDCWs declared by the Scheme. Only Unit Holders opting for the IDCW Option (Option B) will receive IDCWs. The Trustee, in its sole discretion, may also declare interim IDCWs.

This Option in turn offers two sub-options i.e. "Payout IDCW" and "Reinvest IDCW", as under:

Payout IDCW

As per the SEBI (MF) Regulations, the Mutual Fund shall despatch IDCW proceeds to the Unit Holders within 15 days from the record date of the IDCW. IDCWs will be paid by cheque, net of taxes, as may be applicable. Unit Holders will also have the option of direct payment of IDCW to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the registered address of the sole/first holder as indicated in the original application form.

To safeguard the interest of Unit Holders from loss or theft of IDCW cheques, investor should provide the name of their bank, branch and account number in the Application Form. IDCW cheques will be sent to the Unit Holder after incorporating such information.

Investors may however note that in case the IDCW distributed (net of tax deducted at source, wherever applicable) is for an amount equal to or less than Rs. 100/-, the IDCW, instead of being paid out to the Unit holder will be reinvested by issuing additional Units of the Scheme at the Applicable NAV on the next Business day after the Record Date. The additional Units issued and held as long term capital asset will get the benefit of long-term capital gains tax if sold after being held for greater than twelve months. For this purpose, twelve months will be computed from the date when such additional units are allotted.

Reinvest IDCW

Under this sub-option, IDCWs are reinvested by way of allotment of additional Units of the Scheme, instead of receiving IDCW payout. Such additional Units by way of reinvestment of IDCWs will be at the Applicable NAV on the next Business day after the Record Date. The additional Units issued under this sub-option and held as long term capital asset will get the benefit of long-term capital gains tax if sold after being held for greater than twelve months. For this purpose, twelve months will be computed from the date when such additional units are allotted.

Effect of IDCW: On declaration of IDCW, the NAV of the IDCW option will further stand reduced by the applicable statutory levy/surcharge/cess/ any other levy payable by the scheme in respect of separate category of investors if any. Notwithstanding varying rates of statutory levies, the ex- IDCW NAV will remain the same for all categories of investors in a particular option, though the amount of IDCW received by Unit Holders may vary depending on the category of each Unit Holder. For details on taxation of IDCW please refer the SAI.

Notes:

- a. The Trustee intends to declare IDCWs comprising substantially of net income and net capital gains. It should be noted that the actual distribution of IDCWs and frequency of distribution will be entirely at the discretion of the Trustee. To the extent the entire net income and realised gains are not distributed, it will remain invested in the Option and reflected in the NAV.
- b. An investor on record for the purpose of IDCW distributions is an investor who is a Unit Holder as of the Record Date. In order to be a Unit Holder, an investor has to be allocated Units representing receipt of clear funds by the Scheme.
- c. Investors should indicate the name of the Scheme and/or Option, clearly in the application form. In case of valid applications received, without indicating the Scheme and/or Option etc. or where the details regarding Option are not clear or ambiguous, the following defaults will be applied:

If no indication is given under the following	Default
Option - Growth/IDCW	Growth
Sub-option - Payout IDCW/Reinvest IDCW	Payout IDCW

Investors shall note that once Units are allotted, AMC shall not entertain requests regarding change of Option, with a retrospective effect. Investors shall also note that any change in IDCW sub-option, due to additional investment or on the basis of a request received from the investor, will be applicable to all existing Units in the IDCW option of the Scheme.

Processing of Application Form/Transaction Request: The below table summarizes the procedures which would be adopted while processing application form/transaction request by the AMC.

IDCW Policy

The Trustee intends to declare IDCWs comprising substantially of net income and net capital gains. It should be noted that the actual distribution of IDCWs and frequency of distribution will be entirely at the discretion of the Trustee. To the extent the entire net income and realised gains are not distributed, it will remain invested in the Option and reflected in the NAV.

Effect of IDCW: Post declaration of IDCW, the NAV of the Units under the IDCW Payout Option (Option B) will stand reduced by the amount of IDCW declared and applicable IDCW distribution tax/surcharge/cess/any other statutory levy.

For details on taxation of IDCW please refer the SAI.

3. Minimum amount for Application/Redemption

 First Purchase and Subsequent Purchase 	Rs. 500/- and Re. 1/- amount thereafter
	Note: The minimum application amount will not be applicable for investment made in schemes in line with SEBI circulars on Alignment of interest of Designated Employees of AMC.
SIP Purchase	Rs. 500/- and any amount thereafter
Minimum amount for Redemption*	Rs. 500/-

*In case of Units held in dematerialized mode, the redemption request can be given only with DPs or on Stock Exchange Platform; and only in number of Units and the provision pertaining to 'Minimum amount for Redemption' shall not be applicable to such investors.

The Trustee shall have absolute discretion to reject any application for purchase of Units, if in its opinion, increasing the size of the Unit Capital is not in the general interest of the Unit Holders, or if for any other reason it does not believe it would be in the best interest of the Scheme or its Unit Holders to accept such an application.

4. Ongoing price for subscription (Purchase Price))/ switch-in from other schemes/ plans by investor

(This is the price you need to pay for purchase/switch-in)

Pursuant to SEBI Circular No. SEBI/IMD/CIR No. 4/168230/09 dated June 30, 2009, there is no entry load for purchase of Units of the Scheme. Accordingly, Purchase Price will be equal to Applicable NAV.

The Purchase Price of the Units on an ongoing basis will be calculated as described below, which is based on the Applicable NAV

Example: The applicable NAV of the Scheme is Rs. 11.00 p.u. Since Entry load is not applicable, the purchase / subscription price will be calculated as follows:

Purchase Price = Applicable NAV*(1+Entry Load) = Rs. 11 *(1+0) = Rs. 11.00*1 = Rs.11.00

5. Ongoing price for redemption (sale) /switch outs (to other Schemes/plans of the Mutual Fund)/intra-Plan switching by investors (Redemption Price)

(This is the price you will receive for redemptions/switch outs)

Redemption Price of Units will be calculated on the basis of the Applicable NAV, subject to the Exit Load applicable.

Redemption Price = Applicable NAV x (1 - Exit Load)

Illustration:

Say, Applicable NAV = Rs. 12.0000 and the Exit Load is 0.50%,

Redemption Price = $12 \times (1-0.005) = \text{Rs. } 11.9400.$

Investors may note that the Trustee has the right to modify the existing Load Structure in any manner or introduce an Exit Load or a combination or Exit Load and/or any other Load subject to a maximum as prescribed under the SEBI (MF) Regulations. Should the Trustee on any date, impose or enhance any load, such imposition or enhancement shall be applicable on prospective investment only.

The Mutual Fund shall ensure that the Redemption Price is not lower than 95% of the NAV

For details on load structure please see, Section 'VII. Fees and Expenses, C. Load Structure.'

While determining the price of the units, the mutual fund shall ensure that the repurchase price of scheme is not lower than 95 per cent of the Net Asset Value as provided under SEBI (MF) Regulations.

In the event of delay/failure to despatch the IDCW warrants within the aforesaid 15 days, the AMC will be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (currently @ 15% per annum).

13. Transactions Through Channel Distributors

Investors may enter into an agreement with certain distributors (with whom AMC also has a tie up) referred to as "Channel Distributors" who provide the facility to investors to transact in units of mutual

funds through various modes such as their website / other electronic means or through Power of Attorney in favour of the Channel Distributor, as the case may be.

Under such arrangement, the Channel Distributors will aggregate the details of transactions (viz. subscriptions/ redemptions/switches) of their various investors and forward the same electronically to the AMC / RTA for processing on daily basis as per the cut-off timings applicable to the relevant schemes. The Channel Distributor is required to send copy of investors' KYC and agreement entered into between the investor & distributor to the RTA (one time for central record keeping) as also the transaction documents / proof of transaction authorization as the case may be, to the AMC / RTA as per agreed timelines.

Normally, the subscription proceeds, when invested through this mode, are by way of direct credits to the specified bank account of DSP Mutual Fund. The redemption proceeds (subject to deduction of tax at source, if any) and IDCW payouts, if any, are paid by the AMC to the investor directly through direct credit in the bank account of the investor specified by the distributor or through issuance of payment instrument, as applicable.

In case KYC and other necessary documents are not furnished within the stipulated timeline, the transaction request shall be liable to be rejected or the folio will be locked for future subscriptions/ switches. The Mutual Fund, the AMC, the Trustee, along with their directors, employees and representatives shall not be liable for any errors, damages or losses arising out of or in connection with the transactions undertaken by investors or as provided by the distributors through the above mode.

It may be noted that investors investing through this mode may also approach the AMC / ISC directly with their transaction requests (financial / non-financial) or avail of the online transaction facilities offered by the AMC.

14. Subscription of Units Through Electronic Mode

Subject to the investor fulfilling certain terms and conditions as stipulated by AMC from time to time, the AMC, Mutual Fund, Registrar or any other agent or representative of the AMC, Mutual Fund, the ("Recipient") may accept transactions through any electronic mode (fax/web/telephonic/mobile/SMS texts/electronic transactions) ("Electronic Transactions"). acceptance of Electronic Transactions will be solely at the risk of the investor and the Recipient shall not in any way be liable or responsible for any loss, damage caused to the investor directly or indirectly, as a result of the investor sending or purporting to send such transactions including where such transaction sent / purported to be sent is not processed on account of the fact that it was not received by the Recipient.

The investor acknowledges that Electronic Transaction is not a secure means of giving instructions / transactions requests and that the investor is aware of the risks involved including those arising out of such transmission being inaccurate, imperfect, ineffective, illegible, having a lack of quality or clarity, garbled, altered, distorted, not timely etc. The investor's request to the Recipient to act on Electronic Transaction is for the investor's convenience and the Recipient is not obliged or bound to act on the same. The investor authorizes the recipient to accept and act on any Electronic Transaction which the recipient believes in good faith to be given by the investor and the recipient may at its discretion treat any such transaction as if the same was given to the recipient under the investor's original signature.

In case there is any difference between the particulars mentioned in the fax/ web/ electronic transmission received as against the original document which may be received thereafter, the Recipient shall not be liable for any consequences arising therefrom.

The investor agrees that the recipient may adopt additional security measures including signature verification, telephone call backs or a combination of the same, which may be recorded and the investor consents to such recording and agrees to co-operate with the recipient to enable confirmation of such transaction requests. In consideration of the Recipient from time to time accepting and at its sole discretion (including but not limited to the AMC extending / discontinuing such facilities from time to time) acting on any Electronic Transaction request received / purporting to be received from the investor, the investor agrees to indemnify and keep indemnified the AMC, Directors, employees, agents, representatives of the AMC, Mutual Fund and Trustees from and against all actions, claims, demands, liabilities, obligations, losses, damages, costs and expenses of whatever nature (whether actual or

contingent) directly or indirectly suffered or incurred, sustained by or threatened against the indemnified parties whatsoever arising from or in connection with or any way relating to the indemnified parties in good faith accepting and acting on Electronic Transaction requests including relying upon such transaction requests purporting to come from the investor even though it may not come from the Investor. The AMC reserves the right to modify the terms and conditions or to discontinue the facility at any point of time.

15. Redemption

Units can be redeemed (sold back to the Mutual Fund) at the relevant Redemption Price. The redemption requests can be made on the pre-printed forms (transaction slip/common transaction form) or by using the form at the bottom of the account statement. The redemption request can be submitted at any of the Official Points of Acceptance of transaction, the details of Official Points of Acceptance are mentioned at the end of this SID. As all allotments are provisional, subject to realisation of payment instrument and subject to the AMC having been reasonably satisfied that the Mutual Fund has received clear funds, any redemption or switch out transaction in the interim is liable to be rejected at the sole discretion of the AMC.

A Unit Holder may request redemption of a specified amount or a specified number of Units only. If the redemption request is made for a specified amount and the number of Units is also specified by the Unit Holder, the number of Units specified will be considered for deciding the redemption amount. Unit Holders may also request for redemption of their entire holding and close the account by indicating the same at an appropriate place in the transaction slip/common transaction form.

In case an investor has purchased Units on more than one day (either under the NFO Period or through subsequent purchases) the Units purchased first (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First-In-First-Out basis.

In case the Units are standing in the names of more than one Unit Holder, where mode of holding is specified as Joint redemption requests will have to be signed by all joint holders. However, in cases of holding specified as 'Anyone or Survivor', any one of the Unit Holders will have the power to make redemption requests, without it being necessary for all the Unit Holders to sign. However, in all cases, the proceeds of the redemption will be paid to the first-named holder only.

Redemption or repurchase proceeds shall be dispatched to Unit Holders within 10 Business Days from the date of acceptance of redemption or repurchase.

The Mutual Fund however, reserves the right to despatch the redemption proceeds beyond the above-mentioned number of days. Unit Holders are encouraged and advised to submit their requests for bank mandate/ Multiple Bank Accounts Registration request atleast 10 business days prior to date of redemption / IDCW payment, if any. The AMC reserves the right to extend/modify the timelines on a case to case basis.

The redemption payment will be issued in favour of the sole/ first Unit Holder's registered name and bank account number, if provided. Payment via cheque, where issued, will be sent to the address of the sole/first Holder registered with the fund at the time of dispatch entirely at the risk of the unit holder. The redemption cheque/demand draft will be payable at par at all the places where the official points of acceptance of transaction are located. Bank charges for collection of redemption proceeds will be borne by the Unit Holder. With a view to safeguarding their interest, it is mandatory that Unit Holders indicate their Bank Account No., name of the bank and branch in the application for purchasing Units of the Scheme. A fresh account statement will also be sent/emailed to redeeming investors, indicating the new balance to the credit in the account, along with the redemption cheque.

Unit holders are requested to note that application for redemption or switch out for units for which funds are not realized via purchase or switch-in in the Scheme of the Fund shall be liable to be rejected. In other words, redemption of units will be processed only if the funds for such units are realized in the Scheme by a way of payment instructions/transfer or switch-in funding process.

The proceeds towards redemptions and IDCWs will be despatched by a reasonable mode of despatch like courier, Speed post, etc. in case of cheque/demand draft or directly credited to the bank account (as per the details mentioned by the investor), entirely and solely at the risk of the investor. The Mutual

Fund will endeavour to remit redemption proceeds via electronic means, as made available by RBI. Where such electronic means are not available or feasible under any circumstances, the Mutual Fund will remit the redemption proceeds by way of cheques. The investor will not hold the Mutual Fund or the AMC or the Registrar responsible for any non-receipt or delay of receipt of redemption & IDCW proceeds due to any negligence or deficiency in service by the courier company, postal authorities or the bank executing direct credits, or due to incorrect bank account details provided by the investor.

Redemption by NRIs and FPIs

Credit balances in the account of an NRI/FPI investor may be redeemed by such investors in accordance with the procedure described above and subject to the procedures laid down by RBI, if any. Such redemption proceeds will be paid by means of a Rupee cheque payable to the NRI's/FPIs.

Effect of Redemption

On redemption, the unit capital and reserves will stand reduced by an amount equivalent to the product of the number of Units redeemed and the Redemption Price as on the date of redemption. Units once redeemed will be extinguished and will not be re-issued.

Fractional Units

Since a request for purchase is generally made in Rupee amounts and not in terms of number of Units of the Scheme, a Unit Holder may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places. However, fractional Units will, in no way, affect the Unit Holder's ability to redeem the Units, either in part or in full, standing to his/her/its credit.

Redemption by investors transacting through the Stock Exchange mechanism

Investors who wish to transact through the stock exchange shall place orders for redemptions as currently practiced for secondary market activities. Investors must submit the Delivery Instruction Slip to their Depository Participant on the same day of submission of redemption request, within such stipulated time as may be specified by NSE/BSE/ ICEX, failing which the transaction will be rejected. However, in respect of those Unit Holders who have acquired the units on the Stock Exchange post listing of units, the Unit Holders would need to provide a certificate from a Chartered Accountant certifying the details of acquisition of units to the Fund within two days of maturity of the Scheme, so as to enable the Fund to deduct TDS at the applicable rates. In the event of such details not being provided, the Fund would deduct TDS on the redemption proceeds at the highest rate of TDS applicable.

I. USA securities

1. General US Taxation Rules with Respect to Foreign Persons

Generally, US imposes tax on foreign person either on gross basis or on net basis. Foreign persons who are not engaged in a trade or business in the US are subject to US gross withholding tax on US source income which is fixed determinable annual or periodical generally called as FDAP income. A foreign person that is engaged in a US trade or business will be subject to US taxation on effectively connected taxable income (ECTI). In addition to the income tax imposed on ECTI, the US also imposes a branch profits tax on foreign corporations that has branch or permanent establishment in US. The branch profit tax is imposed on deemed remittances of after-tax effectively connected earnings and profits of foreign corporation's US branch or permanent establishment. One can claim reduced tax rate or exemption from tax under US income tax treaty. The below discussion is based on the understanding that the Scheme would be treated as a corporation for US tax purposes. and the investors in the Mutual Fund Scheme are not tax resident of the USA or based in the USA. Thus, as long as the Scheme is treated as a corporation for US tax purposes, the investors in the Scheme should not directly be subject to US tax. For purposes of this discussion, a foreign person is a person who is not a US citizen or US resident for tax purposes and includes a foreign entity that is classified as a corporation for US tax purposes.

2. Investment in US listed companies

a) US Taxation on Disposition of Shares of US listed Companies
Subject to the discussion below concerning the taxation of ECTI, generally income from the sale of personal property by a foreign person is not US source income and should not be subject to US taxation. Thus, capital gains received by the Scheme on the disposition of shares of US listed companies, should not be subject to taxation in the US.

Trading in stock or securities is generally not considered US trade or business unless taxpayer is a dealer in stock or securities and effects the trade through US offices directly or through US office of its agent other than independent agent.

However, if the Scheme invests in any entities that are treated as partnership for U.S federal income tax purposes and if these partnerships are engaged in a U.S. trade or business, then the Scheme itself would be treated as engaged in such a U.S. trade or business and would likely be required to file a U.S. income tax return and potentially pay U.S. tax on its distributive share of partnership income. It may also be subject to potential withholding tax with respect to sales of an interest in such partnership.

Gain derived by a non-U. S resident from the disposition of a U.S Real Property Interest (USRPI) may be treated as income that is effectively connected with the conduct of a U.S trade of business and thus subject to U.S federal income tax (and to a requirement to file a U.S. income tax return) under

the Foreign Investment in Real Property Tax Act (FIRPTA). A USRPI includes an interest in a US Real Property Holding Company (USRPHC) which generally is defined as a US company whose assets, measured by fair market value, consist of 50% or more of USRPIs at any time during a five-year period. Such income is considered to be ECTI with the conduct of a U.S trade of business and is subject to US taxation. A foreign person who disposes of a USRPI will be subject to a 15% (w.e.f. 16 February 2016) withholding tax on the gross proceeds received and will be required to file a US federal income tax return. The final tax liability on the recognized gain on disposition of the USRPI will be set off by the 15% withholding tax on gross proceeds.

There is an exception that applies to FIRPTA for publicly traded shares of a - Qualified Investment Entity (QIE). The exception provides that if the stock of a QIE is regularly traded on an established securities market located in the USA (e.g., the NYSE), the stock will be treated as a USRPI only in the case of a more than 5% holder (over the course of a 5 year look-back period). The 5% holding is increased to 10% for publicly traded real estate investment trust (REIT). Such exception also applies to the disposition of an interest in a publicly traded partnership (PTP).

Thus, capital gains derived by the Scheme from the sale of regularly traded listed US equities should not be subject to tax in the US provided the Scheme holds an interest of 5% (10% for publicly traded REIT) or less of any class of stock. In cases where the Scheme has held, at any time within the 5-year period ending on the date of disposition, more than 5% (10% for publicly traded REIT) of the shares of a publicly-traded company that is also a USRPI, gain from disposition of such interest is subject to US federal corporate income tax.

If a partnership (including a PTP), is engaged in a U.S. trade or business, and if a non-U.S. partner disposes of the partnership interest, a portion of gain or loss is treated as connected with the conduct of a U.S. trade or business, and is therefore subject to U.S. tax. Such income also generates a requirement to file a U.S. tax return. This provision is not subject to 5% exception as mentioned above for PTPs that are USPRI. US requires 10% withholding if non-U.S. partner disposes of an interest in the partnership. Such tax withheld can be set off against the final tax liability of the partner who sold its interest.

b) Dividend Income

US source non-effectively connected dividend income received by a foreign person is subject to a 30% withholding tax. Thus US source dividends received by the Scheme from investments in US listed companies should be subject to withholding tax of 30%. Such dividend withholding tax can be reduced pursuant to a double tax treaty as discussed further below.

- 3. Investment in US Mutual Funds (US MF) or Exchange Traded Funds (US ETF)
 - a) US Taxation on Disposition of Units of US MF or US ETF
 As discussed above in point 1, generally income from the sale of personal property by a foreign
 person is not US source income and should not be subject to US taxation. Thus, capital gains received
 by the Scheme on the disposition of interests in mutual funds and exchange traded funds (ETF),
 should not be subject to taxation in the US.

However, if the mutual fund or ETF that is sold is a USRPHC, then the gain is considered to be effectively connected with a U.S. trade or business and thus subject to U.S taxation, unless the mutual fund or ETF whose shares are sold is (a)publicly traded and the investor held an interest of 5% or less in the mutual fund or ETF at all times during the year preceding the sale or (b) the mutual fund is a domestically controlled qualified investment entity.

b) US Taxation on Income Distribution by US MF or US ETF US source non-effectively connected dividend income received by a foreign person is subject to a 30% withholding tax. A mutual fund or ETF that is not subject to the USRPHC - related rules described above may distribute ordinary dividends which should be subject to 30% withholding tax. Dividends designated by a Regulated Investment Company (RIC) (e.g. a mutual fund) as capital gain dividends are treated as long term capital gains in the hands of the shareholders. Except as described above for mutual funds or ETFs that otherwise qualify as USRPHCs, because long-term capital gains are sourced to the domicile of the recipient, such capital gain dividends should not be U.S source if the recipient is a non-U.S person, and thus would not be subject to U.S taxation.

A foreign person or other qualified investment entity by a qualified investment entity to the extent attributable to gain from sales or exchanges by the qualified investment entity of USRPIs, is treated as gain from the sale or

exchange of a USRPI by the foreign person unless such distribution is with respect to stock that is publicly traded on a U.S exchange and the foreign person did not own more than 5% (or no more than 10% in the case of a REIT) of such class of stock at any time during the 1-year period ending on the date of distribution. Where the distribution is treated as gain from the sale or exchange of a USRPI, the distribution is treated as income effectively connected to a U.S trade or business, subject to tax at U.S corporate tax rates and withheld on at a rate of 21% of the distribution. The total amount in tax paid should not exceed the liability as determined by applying the U.S corporate rate.

Where distributions from the mutual fund or ETF are characterized as gain from the sale of a USRPI as discussed above, the income is considered effectively connected with the conduct of a U.S trade or business such that the branch profits tax provisions must be considered. The dividend equivalent amounts are subject to withholding tax at a rate of 30%. The dividend equivalent amount is generally equal to a foreign corporation's effectively connected earnings and profits. Generally, gain on disposition of an interest in a USRPHC is excluded from the definition of effectively connected earnings and profits.

4. Treaty Benefits to the Mutual Fund or ETF:

It is likely that the Scheme should be considered as a Person under Indian tax laws and so a tax resident of India and so is likely to be eligible to claim the Double Taxation Avoidance Agreement ('the DTAA' or 'the Treaty') benefits between India and the US on the income earned and tax, if any, payable in the US subject to completion of necessary documentations and the Scheme obtaining a tax residence certificate form the Indian tax authorities. As long as the Scheme is treated as a corporation for US tax purposes, the investors in the Scheme should not directly be subject to US tax. The main benefit of the DTAA is that it reduces the US withholding tax amount with respect to certain U.S. source FDAP payments and may exempt ECTI if it is not attributable to a U.S. permanent establishment.

As per the Treaty:

- i. The Business income earned by the Scheme in the US should not be taxable in the US if the Fund does not have a permanent establishment in the US; If the Scheme has a permanent establishment in the US, then it will be subject to US tax on profits that are attributable to that permanent establishment. US attributes business profits to U.S. permanent establishments of Indian resident corporations under the same ECTI rules applicable to nontreaty residents with respect to the assets and activities conducted in the permanent establishment. A more limited force of attraction rule is also applicable.; The Scheme could be considered to have a permanent establishment in the US if it invests in a partnership that is engaged in a trade or business in the US;
- ii. Capital gains arising on disposition of USRPIs is taxable in the US as per the US tax laws. There is no exception in the DTAA for US taxation of disposition of USRPIs under the FIRPTA rules;
- iii. In general, dividend income beneficially earned by the Scheme in the US should be taxable at the rate of 25% for portfolio ownership interests below 10%;
- iv. Interest income beneficially earned by the Scheme in the US should be subject to withholding tax at the rate of 15% (to the extent not otherwise exempt under US internal rules such as the portfolio interest exception); and
- v. Any other income should be taxable in the US as per US tax laws.

II. Luxembourg securities

Taxation on investment in Luxembourg investment funds

There are no withholding taxes on dividends paid by Luxembourg investment funds.

The fund being Non-residing investors (individuals or corporations) are exempt from taxation in Luxembourg on capital gains realized upon sale of their shares in a Luxembourg corporate investment fund (even in cases where they held a substantial shareholding of more than 10%).

III. Ireland securities

Taxation on investment in an Irish Fund

Where a Shareholder is not resident (or ordinarily resident) in Ireland for Irish tax purposes, an Irish Fund should not deduct any Irish tax in respect of the Shareholder's Shares. In order for the non-Irish resident shareholder to be exempt from Irish Investment Undertaking Tax ("IUT"), it must complete

the relevant non-resident declaration and provide a copy of that declaration to the Irish Fund. The declaration may also be provided by an Intermediary who holds Shares on behalf of non-Irish Resident Shareholders provided that, to the best of the Intermediary's knowledge, the Shareholders are not resident (or ordinarily resident) in Ireland.

If this declaration is not received by an Irish Fund (and in the absence of written notice of approval from Revenue Commissioners being obtained by the Irish Fund dispensing with the requirement to provide such a declaration), an Irish Fund should deduct Irish tax in respect of the shares held by the non-Irish Resident Shareholder. An Irish Fund should also deduct Irish tax if the Irish Fund has information which reasonably suggests that a Shareholder's declaration is incorrect. A Shareholder will generally have no entitlement to recover such Irish tax. An Irish Fund must be informed if a Shareholder becomes Irish tax resident.

Generally, Shareholders who are not Irish tax resident will have no other Irish tax liability with respect to their Shares. However, if a Shareholder is a company which holds its Shares through an Irish branch or agency, the Shareholder may be liable to Irish corporation tax in respect of profits and gains arising in respect of the Shares (on a self-assessment basis).

In case if the fund is deemed to be a Non-Exempt Shareholders then a Shareholder is subject to tax (e.g. because it has not provided the required non-resident declaration), an Irish Fund should deduct Irish tax on distributions, redemptions and transfers and, additionally, on 'eighth anniversary' events, as described below.

Distributions from an Irish Fund

If an Irish Fund pays a distribution to a non-exempt Shareholder, an Irish Fund should deduct Irish tax from the distribution. The amount of Irish tax deducted will be:

- 1. 25% of the distribution; where the distribution is paid to a shareholder who is an Irish resident company which has made the relevant declaration for the 25% rate to apply.
- 2. 41% of the distribution in all other cases.

Redemptions and transfer of shares

If an Irish Fund redeems Shares held by a non-exempt Shareholder, an Irish Fund should deduct Irish tax from the redemption payment made to the Shareholder. Similarly, if a non-exempt Shareholder transfers (by sale or otherwise) an entitlement to Shares, an Irish Fund will account for Irish Investment Undertaking tax in respect of that transfer. The amount of Irish tax deducted or accounted for will be calculated by reference to the gain (if any) which has accrued to the Shareholder on the Shares being redeemed or transferred and will be equal to:

- 1. 25% of such gain; where the shareholder is an Irish resident company which has made the appropriate declaration for the 25% rate to apply;
- 2. 41% of the gain in all other cases.

If Shares are not denominated in euro, a Shareholder may be liable (on a self-assessment basis) to Irish capital gains taxation on any currency gain arising on the redemption or transfer of the Shares. "Eighth Anniversary" Events

If a non-exempt Shareholder does not dispose of Shares within eight years of acquiring them, the Shareholder will be deemed for Irish tax purposes to have disposed of the Shares on the eighth anniversary of their acquisition (and any subsequent eighth anniversary). On such deemed disposal, an Irish Fund will account for Irish tax in respect of the increase in value (if any) of those Shares over that eight-year period. The amount of Irish tax accounted for will be equal to:

- 1. 25% of the increase in value of the shares where the Shareholder is a company which has made the appropriate declaration for the 25% rate to apply;
- 2. 1% of the increase in value in all other cases.

Any Irish tax paid in respect of the increase in value of Shares over the eight-year period may be set off on a proportionate basis against any future Irish tax which would otherwise be payable in respect of those Shares and any excess may be recovered on an ultimate disposal of the Shares. Share Exchanges

Where a Shareholder Exchanges Shares on arm's length terms for other Shares in the Irish Fund and no payment is received by the Shareholder, an Irish Fund should not deduct Irish tax in respect of the exchange.

Stamp Duty on transacting in shares

No Irish stamp duty (or other Irish transfer tax) will apply to the issue, transfer or redemption of Shares. If a Shareholder receives a distribution in specie of assets from the ICAV, a charge to Irish stamp duty could potentially arise.

Taxation on investment in Irish Exchange Traded Funds (ETFs)

Similar to active funds, ETFs are exempt from Irish tax on income and gains derived from their investments and are not subject to Irish tax on their net asset value. As such income and gains arising to an ETF are allowed to accumulate gross of Irish tax.

Non-Irish Resident Shareholders do not suffer any Irish tax on the occurrence of a chargeable event (e.g. distribution or redemption) provided that the relevant non-resident declaration has been provided to the fund. If the relevant declaration is not in place the ETF may be obliged to withhold tax at the appropriate rate. However, withholding tax does not need to be applied in the event that shares are held in a recognized clearing system (regardless of whether or not there is a declaration in place).

For further details on taxation please refer to the clause on Taxation in the SAI.

D. COMPUTATION OF NAV

NAV of Units under the Scheme/Plan may be calculated by either of the following methods shown below:

Market or Fair Value of Scheme/Plan's investments

+ Current Assets - Current Liabilities and Provisions

No. of Units outstanding under the Scheme/Plan

Or

Unit Capital + Reserves and Surplus

No. of Units outstanding under the Scheme/Plan

N.B.: The aforesaid provisions pertaining to "Calculation of NAV", shall apply in respect of each individual Scheme and/or plan as the case may be.

The NAV will be calculated as of the close of every Business Day. NAVs will be rounded off to four decimal places. The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

NAV is calculated and announced on each Business Day.

Note: In respect of Schemes having Growth and IDCW Options, there will be more than one NAV, one for each Option, after the declaration of the first IDCW by that Scheme.

Since this Scheme invests predominantly in units of underlying funds, the NAV of the Scheme for a business day (Day T) will be based on the NAV of the underlying fund for that day (Day T). Since the NAV of the underlying fund for a business day (Day T) would normally be available either late in the evening of the business day (Day T) or on the following business day (T+1), the Scheme will declare the NAV for a Business day on the next Business Day, based on the NAV of the underlying fund for the business day for which the NAV is declared (Day T).

Illustration: Relating to computation and publication of NAV of the Scheme for a business day (Day T)

Day T	Business day for which NAV is to be declared
Day T late evening or Day T+1	Underlying fund will publish their NAV
early morning	
Day T+1 by 10.00 a.m.	AMC will compute the NAV of the Scheme for Day T
	AMC will publish the NAV of the Scheme for Day on its website, upload
	the same on AMFI website and disseminate to the Press

Valuation of the scheme's assets, calculation of the scheme's NAV and the accounting policies & standards will be subject to such norms and guidelines that SEBI may prescribe from time to time and shall be subject to audit on an annual basis.

Valuation of Foreign Exchange Conversion: On the valuation day, all the assets and liabilities in foreign currency will be valued in Indian Rupees on the basis of Foreign Exchange rate quoted on Bloomberg/Reuters around India markets close time (which is currently around 3:30 p.m. IST) or at the RBI Reference rate as at the close of the Banking hours on that day in India. The Trustees/AMC reserves the right to change the source for determining the exchange rate. The reasons for the change in the source for determining the exchange rate will be recorded in writing. The Rupee value of Investments valued in the manner described above and other assets and liabilities represented in foreign currency shall be obtained by multiplying the aforesaid rate.

SECTION VII. FEES AND EXPENSES

This section outlines the expenses that will be charged to the Scheme.

A. NFO EXPENSE

These are the fees and expenses incurred for operating the Scheme. These expenses include and are not limited to Investment Management and Advisory Fee charged by the AMC, Registrar's fee, Marketing and selling costs etc., as given in the **Table 2** which summarizes estimated annualized recurring expenses as a % of daily net assets of the Scheme.

Operating & recurring expenses under regulation 52 (6) & 52 (6A):

The mentioned suit was filed inter-alia for the acts of infringement, passing off and damages by the Defendant, whose trade mark is deceptively similar to the AMC's registered DSP marks. On February 04, 2020, the Honorable High Court granted ad-interim relief restraining the Defendant from using of trademark.
 - AMC holds non-convertible debentures issued by Accelerating Education and Development Private limited (AEDPL), a Resonance group entity vide Debenture Trust Deed dated November 10, 2016. AEDPL defaulted in repayment of redemption amount. AMC filed a petition under section 9 of the Arbitration and Conciliation Act, 1996 before the Delhi High Court seeking interim reliefs inter alia in the nature of non-alienation of assets for securing the entire amount of Rs. 144,76,82,011/- due and payable by Resonance Group to AMC. The Delhi High Court was pleased to issue notice to the petition under section 9. AEDPL and other Resonance group entities have undertaken not to alienate their assets. The pleadings stand completed and the matter is ripe for arguments. The matter is listed for hearing on 17th May 2022.
 - a). AMC along with other debenture holders subscribed for non-convertible debentures (NCDs) issued by Sintex BAPL Limited ("Sintex"). As per the Debenture Trust Deed, Sintex was required

to obtain NOC from the Debenture holders prior to sale of its stake in any of its subsidiaries. Further, Sintex has to mandatorily prepay the Debenture Holders out of such sale proceeds and the same were mandatorily required to be deposited in the Specified Bank Account (as defined under the Debenture Trust Deed) over which the Debenture Holders have first ranking exclusive charge. Pursuant to the request of Sintex, the Debenture Trustee i.e. Vistra ITCL (India) Limited (upon the instructions of Debenture Holders) gave its consent for the sale of its step-down subsidiary viz Sintex NP SAS. Necessary documents were executed in favour of the Debenture Trustee including making it exclusive signatory over the offshore account where sale proceeds are presently lying.

However, Axis Bank has filed a declaratory Suit ("Suit") before City Civil Court, Ahmedabad ("Court") claiming first charge over the sale proceeds on the basis of an 'Undertaking' allegedly executed by Sintex in their favour. In view of the above, DSP Investment Managers Private Limited filed an intervention application before the Court to intervene in the aforesaid matter and oppose grant of any reliefs to Axis Bank. During the pendency of the Suit, AMC assigned its exposure ("Assignor") on March 31, 2022, pursuant to which AMC, there is no debt owed to the AMC against Sintex in respect of the NCDs. The Assignor is in the process of filing a substitution application to substitute itself in place and stead of AMC in the Suit. The matter is listed for hearing on May 21, 2022. Once a formal order will be passed by the Court on May 21, 2022, allowing the substitution application, AMC will cease to be a party to the Suit.

• b). AMC along with other debenture holders subscribed for non-convertible debentures issued by Sintex BAPL Limited ("Sintex"). Sintex defaulted on its debt repayments in August 2019.

While, the AMC and other lenders were contemplating settlement with Sintex, an operational creditor- Zielem Industries Private Limited ("Zielem") filed a Company Petition before the National Company Law Tribunal (NCLT), at Ahmedabad against Sintex which was admitted vide order dated 18th December 2020 and Corporate Insolvency Resolution Process (CIRP) against the Sintex had commenced. Subsequent to the Admission Order, Sintex Plastics Technology Limited (in its capacity as the shareholder of Sintex) ("SPTL") settled the matter with Zielem. Basis the settlement, SPTL filed an application before NCLT seeking withdrawal of the CIRP against the Sintex ("Withdrawal Application"). AMC filed an intervention application in the Withdrawal Application so as to enable the AMC to oppose withdrawal of the CIRP against Sintex.

The Withdrawal Application was allowed by the NCLT, Ahmedabad vide order dated June 29, 2021 ("Order"). AMC filed an Appeal before the NCLAT ("Appeal") against the Order. The Appeal is admitted, and the Order is stayed by the NCLAT. Sintex is in control and custody of the interim resolution professional. During the pendency of the Appeal, AMC assigned its exposure ("Assignor") on March 31, 2022. Upon assignment, there is no debt owed to the AMC against Sintex in respect of the NCDs. The Assignor has filed a substitution application to substitute itself in place and stead of AMC in the Appeal on April 18, 2022.

The NCLAT is yet to pass an order allowing the substitution application. The matter is listed for hearing before NCLAT on May 26, 2022. Upon a formal order being passed by the NCLAT allowing the substitution application, DSP will cease to be a party to the Appeal.
