SECTION I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Additional Risk Factors for Foreign Investors:

1. Political Risk

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Scheme invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Scheme invest. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Scheme invest.

2. Economic Risk

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

3. Foreign Currency Risk

The Scheme is denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

4. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Investors.

Scheme Specific Risk Factors

1. Risks associated with Overseas Securities:

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Schemes, the Schemes may invest in overseas markets and securities which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances. Further, the scheme may not be able to invest in overseas markets if overseas limits as per RBI and SEBI circulars are exhausted at AMC or industry level which may negatively impact the performance of the schemes.

- i. Currency Risk: The scheme may invest in overseas securities and the income from those securities may be quoted in currencies which are different from the schemes base currency. The performance of the scheme may therefore be affected by movements in the exchange rate between the currencies in which the assets are held and the schemes base currency and hence there can be the prospect of additional loss or gain for the Unit Holder than what may be normally derived from the assets in which the scheme invests. The performance of the scheme fund may also be subject to exchange control regulations. Conversion into foreign currency or transfer from some markets of proceeds received from the sale of securities cannot be guaranteed. Exchange rate fluctuations may also occur between the trade date for a transaction and the date on which the currency is acquired to meet settlement obligations. Movements in currency exchange rates can adversely affect the return of your investment.
- ii. Risks arising from exhaustion of overseas limits as per applicable SEBI and RBI circulars: The schemes capability to invest in overseas securities is subject to the limits assigned by the SEBI & RBI from time to time basis. In case of exhaustion of the limits to invest in overseas securities is exhausted either at an individual Mutual Fund level or at Industry level or otherwise as restricted by SEBI or RBI, the scheme may not be able to allocate and invest in overseas securities and the AMC will suitably reallocate the proceeds to other investments as permissible under the asset allocation specified in the scheme document.

2. Market Liquidity Risk

The liquidity of investments made in the Scheme may be restricted by trading volumes, settlement periods and transfer procedures. Although the investment universe constitutes securities which will have adequate market liquidity, there is a possibility that market liquidity could get impacted on account of company/sector/general market related events and there could be a price impact on account of portfolio rebalancing and/or liquidity demands on account of redemptions.

Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are un-invested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well- developed and liquid secondary market for debt securities, would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

3. Credit Risk

Fixed income securities (debt and money market securities) are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations.

However the Scheme intends to invest in Sovereign rated securities and thus there should be minimal credit risk.

4. Rating Migration Risk

Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a sovereign rated or AAA rated issuer will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.

5. Interest Rate Risk

While Sovereign securities carry minimal credit risk since they are issued by the Government, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the Sovereign Credit Rating.

Common measure used to determine the price sensitivity for fixed income securities is called duration. Securities with longer duration tends to be more sensitive to interest rate changes i.e. their prices are more volatile than those securities with shorter duration. For example, the price of the security having a duration of five years will decline by a greater percentage than the bond having a one year duration when the interest rates rises. Thus when the Scheme invests a substantial portion in securities with longer duration, any rise in the interest rates shall cause the value of the investments to decline significantly, which would adversely affect the performance of the scheme. An movement in interest rates may lead to heightened volatility and may adversely affect certain fixed-income investments, including those held by the Scheme.

6. Term Structure of Interest Rates (TSIR) Risk

The NAV of the Scheme's Units, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.

7. Re-investment Risk

The investments made by the Scheme is subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

8. Risk associated with floating rate securities

To the extent the Scheme's underlying investments are having exposure in floating rate debt instruments or fixed debt instruments swapped for floating rate return, they will be affected by Interest rate movement (Basis Risk) - Coupon rates on floating rate securities are reset periodically in line with the benchmark index movement. Normally, the interest rate risk inherent in a floating rate instrument is limited compared to a fixed rate instrument. Changes in the prevailing level of interest rates will likely affect the value of the Scheme's holdings until the next reset date and thus the value of the Scheme's Units. The value of securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The Mutual Scheme could be exposed to interest rate risk (i) to the extent of time gap in the resetting of the benchmark rates, and (ii) to the extent the benchmark index fails to capture interest rate changes appropriately;

Spread Movement (Spread Risk) - Though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments;

Settlement Risk (Counterparty Risk) - Specific floating rate assets may also be created by swapping a fixed return into a floating rate return. In such a swap, there is the risk that the counterparty (who will pay floating rate return and receive fixed rate return) may default;

Liquidity Risk: The market for floating rate securities is still in its evolutionary stage and therefore may render the market illiquid from time to time, for such securities that the Scheme is invested in. Floating rate securities issued by the Government (coupon linked to treasury bill benchmark or an inflation linked bond) have lower sensitivity to interest rate movements compared to other fixed rate securities.

9. Risk associated with investments in overseas mutual funds / ETFs / Index Funds:

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Scheme, the Scheme may invest in overseas ETFs/index funds which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances. Further, the scheme may not be able to invest in overseas markets if overseas limits as per RBI and SEBI circulars are exhausted at AMC or industry level which may negatively impact the performance of the schemes. Risks related to investments in overseas ETFs/index funds include:

- I. In addition to the recurring expenses of the Scheme, the Unit Holders shall also bear the applicable expenses of the Underlying ETF/index fund. Therefore, the returns that the Unit Holder of the Scheme may receive may be impacted or may, at times, be lower than the returns that a Unit Holder, who is directly investing in the same Underlying ETF/index fund, could obtain.
- II. Index-Related Risk. There is no guarantee that the underlying ETF's/index funds investment results will have a high degree of correlation to those of the Underlying Index or that the underlying ETF/index fund will achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the underlying ETF's/index funds ability to adjust its exposure to the required levels in order to track the Underlying Index. Errors in index data, index computations or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, which may have an adverse impact on the underlying ETF/index fund. Unusual market conditions may cause the Index Provider to postpone a scheduled rebalance, which could cause the Underlying Index to vary from its normal or expected composition.
- III. Passive Investment Risk. The underlying ETF/index fund is not actively managed, and the fund manager generally does not attempt to take defensive positions under any market conditions, including declining markets.
- IV. Tracking Error Risk. The underlying ETF/index fund may be subject to tracking error, which is the divergence of its performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the ETF/index fund portfolio and those included in the Underlying Index, pricing differences (including, as applicable, differences between a security's price at the local market close and the ETF's/index funds valuation of a security at the time of calculation of the Fund's NAV), transaction costs incurred by the ETF/index fund, the holding of uninvested cash, differences in timing of the accrual of or the valuation of dividends or interest, the requirements to maintain pass through tax treatment, portfolio transactions carried out to minimize the distribution of capital gains to shareholders, acceptance of custom baskets, changes to the Underlying Index or the costs to the ETF/index fund of complying with various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the ETF/index fund incurs fees and expenses, while the Underlying Index does not.
- V. Financial Markets, Counterparties and Service Providers: The underlying ETFs/index funds may be exposed to finance sector companies that act as a service provider or as counterparty for financial contracts. In times of extreme market volatility, such companies may be adversely affected, with a consequent adverse effect on the returns. Regulators and self-regulatory organisations and exchanges are tabilize to take extraordinary actions in the event of market emergencies. The effect of any future regulatory actions could be substantial and adverse.
- VI. Global Financial Market Crisis and Governmental Intervention: Since 2007, global financial markets have undergone pervasive and fundamental disruption and suffered significant instability which has led to governmental intervention. Regulators in many jurisdictions have implemented or proposed a number of emergency regulatory measures. Government and regulatory interventions have sometimes been unclear in scope and application, resulting in confusion and uncertainty which in itself has been detrimental to the efficient functioning of financial markets. It is impossible to predict what additional interim or permanent governmental restrictions may be imposed on the markets and/or the effect of such restrictions on the ability to implement a Fund's investment objective. Whether current undertakings by governing bodies of various jurisdictions or any future undertakings will help tabilize the financial markets is unknown. The Fund Managers cannot predict how long the financial markets will continue to be affected by these events and cannot predict the effects of these or similar events in the future on an ETF/index fund or global economy and the global securities markets. The Fund Managers are monitoring the situation. Instability in the global

financial markets or government intervention may increase the volatility of the ETFs and hence the risk of loss to the value of your investment.

- VII. Liquidity Risk: Trading volumes in the underlying investments of the Underlying ETFs/index funds may fluctuate significantly depending on market sentiment. There is a risk that investments made by the Underlying ETFs/index funds may become less liquid in response to market developments, adverse investor perceptions or regulatory and government intervention (including the possibility of widespread trading suspensions implemented by domestic regulators). In extreme market conditions, there may be no willing buyer for an investment and so that investment cannot be readily sold at the desired time or price, and consequently the relevant ETF/index fund may have to accept a lower price to sell the relevant investment or may not be able to sell the investment at all. An inability to sell a particular investment or portion of assets can have a negative impact of the value of the Underlying ETF/index fund or prevent the relevant Underlying ETFs/index funds from being able to take advantage of other investment opportunities. Liquidity risk also includes the risk that relevant Underlying ETFs/index funds may be forced to defer redemptions, issue in specie redemptions or suspend dealing because of stressed market conditions, an unusually high volume of redemption requests, or other factors beyond the control of the investment manager. To meet redemption requests, the Underlying schemes may be forced to sell investments at an unfavorable time and/or conditions, which may have a negative impact on the value of the Scheme.
- VIII. Credit Risk & Market Risk: The underlying ETFs/index funds invest in fixed income securities, they are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations (credit risk). Securities may also be subject to price volatility due to factors such as changes in credit rating, interest rates, general level of market liquidity and market perception of the creditworthiness of the issuer among others (market risk).
- IX. Term Structure of Interest Rates (TSIR) Risk: To the extent that the underlying ETFs/index funds are invested in fixed income securities, the NAV of the Units issued under the ETFs is likely to be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.
- X. Country Risks: The value of the underlying ETF's/index funds assets may be affected by uncertainties such as changes in a country's government policies, taxation, restrictions on foreign investment, currency decisions, applicable laws and regulations, together with any natural disasters or political upheaval, which could weaken a country's securities markets
- XI. Risk of Investing in Sovereign Treasury STRIPS: Sovereign STRIPS are created when the interest and principal components of a Sovereign note or bond are separated and sold as separate securities. STRIPS are also called "zero-coupon" securities because they do not make periodic interest payments and therefore have longer durations than Sovereign securities of similar maturities that distribute interest on a current basis. Instead, they are typically sold at a discount from their face value and can be redeemed at face value when they mature. Sovereign STRIPS only make a payment upon maturity. As a result, the market value of Sovereign STRIPS is generally more volatile than the value of other fixed-income securities with similar maturities that make periodic interest payments. Sovereign STRIPS generally respond to changes in interest rates to a greater degree than other fixed-income securities with similar maturities and credit quality. Sovereign STRIPS generally lose value when interest rates rise. The Fund is generally required to distribute investment income as cash dividends to Fund shareholders, but because Sovereign STRIPS do not pay interest and are typically purchased at an original issue discount. As a result, the Fund may need to liquidate assets, at potentially inopportune times, to satisfy such income dividend distribution requirements.
- XII. Delays in settlement could result in investment opportunities being missed if an ETF/index fund is unable to acquire or dispose of a security. The Depositary is responsible for the proper selection and supervision of its correspondent banks in all relevant markets in accordance with applicable law and regulation. Investors should therefore be aware that the ETFs/index fund concerned could suffer loss arising from these registration problems.
- XIII. Risk of Investing in Specific Sectors and Themes: Where investment is made in one or in a limited number of market sectors, Underlying ETFs/index funds may be more volatile than other more diversified Schemes. Such ETFs/index funds may also be subject to rapid cyclical changes in investor activity, regulatory changes and / or the supply of and demand for specific securities. As a result, an economic downturn in the relevant country or a regulatory change having

disproportionate impact on the economy would have a larger impact on an ETF/index fund that concentrates its investments in that specific theme then a more diversified Fund.

- XIV. Restrictions on Foreign Investment: Some countries prohibit or impose substantial restrictions on investments by foreign entities such as a Fund. As illustrations, certain countries require governmental approval prior to investments by foreign persons, or limit the amount of investment by foreign persons in a particular company, or limit the investment by foreign persons in a company to only a specific class of securities which may have less advantageous terms than securities of the company available for purchase by nationals. Certain countries may restrict investment opportunities in issuers or industries deemed important to national interests. The manner in which foreign investors may invest in companies in certain countries, as well as limitations on such investments, may have an adverse impact on the operations of an Underlying ETF/index fund. For example, an Underlying ETF/index fund may be required in certain of such countries to invest initially through a local broker or other entity and then have the share purchases re-registered in the name of the Underlying ETF/index fund. Re-registration may in some instances not be able to occur on a timely basis, resulting in a delay during which an Underlying ETF/index fund may be denied certain of its rights as an investor, including rights as to dividends or to be made aware of certain corporate actions. There also may be instances where an Underlying ETF places a purchase order but is subsequently informed, at the time of re-registration, that the permissible allocation to foreign investors has been filled, depriving the Underlying ETF/index fund of the ability to make its desired investment at the time.
- XV. Substantial limitations may exist in certain countries with respect to an Underlying ETFs/index funds ability to repatriate investment income, capital or the proceeds of sales of securities by foreign investors. An Underlying ETF/index fund could be adversely affected by delays in, or a refusal to grant any required governmental approval for repatriation of capital, as well as by the application to the Underlying ETF/index fund of any restriction on investments. In addition, certain countries implement quota restrictions on foreign ownership of certain onshore investments.
- XVI. Taxation of underlying ETFs/index funds and assets: Investors should note in particular that the proceeds from the sale of securities in some markets or the receipt of any dividends and other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source. As a result, the Underlying ETF/index fund (and therefore the Scheme) could become subject to additional taxation in such countries. Investors should note that there may be additional taxes, charges or levies applied in respect of the ETF's investments depending on the location of the assets of the Underlying ETF/index fund and the jurisdiction in which the Underlying ETF/index fund is located, registered or operated. Investors should also note that the Underlying ETF's/index funds investment managers and the ETF's/index funds ability to provide tax information and audited accounts in respect of the Underlying ETF/index fund to Unit Holders of the Scheme is dependent on the relevant tax and other information being provided in timely fashion. Accordingly, delays may occur in respect of delivery of such information to the Scheme's Unit Holders.
- XVII. Currency Risk: The assets in which the Underlying ETF/index fund is invested and the income from the assets may be quoted in currencies which are different from the Underlying ETF's/index funds base currency. The performance of the Underlying ETF/index fund may therefore be affected by movements in the exchange rate between the currencies in which the assets are held and the Underlying ETF's/index funds base currency and hence there can be the prospect of additional loss or gain for the Unit Holder than what may be normally derived from the assets in which the Underlying ETF/index fund invests. The performance of the Underlying ETF/index fund may also be affected by changes in exchange control regulations. Conversion into foreign currency or transfer from some markets of proceeds received from the sale of securities cannot be guaranteed. Exchange rate fluctuations may also occur between the trade date for a transaction and the date on which the currency is acquired to meet settlement obligations. Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimize the effect of currency fluctuations may not always be successful.
- XVIII. Valuation Risk: The price the underlying ETF/index fund could receive upon the sale of a security or other asset may differ from the underlying ETF's/index funds valuation of the security or other asset and from the value used by the Underlying Index, particularly for securities or other assets that trade in low volume or volatile markets or that are valued using a fair value methodology as a result of trade suspensions or for other reasons. The underlying ETF's/index funds ability to value

investments may be impacted by technological issues or errors by pricing services or other thirdparty service providers.

- XIX. Risks Associated with Derivatives: The Underlying ETF/index fund may use derivatives in connection with its investment strategies. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the investment manager of the Underlying ETF/index fund to identify such opportunities. Identification and execution of the strategies to be pursued by the investment manager of the Underlying ETF/index fund involve uncertainty and decision of the investment manager of may not always be profitable. No assurance can be given that the investment manager of the Underlying ETF/index fund will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in Securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in the losses that significantly exceed the Underlying ETF's/index funds original investment. Certain derivatives may give rise to a form of leverage. Due to the low margin deposits normally required in trading financial derivative instruments, an extremely high degree of leverage is typical for trading in financial derivative instruments. As a result, the Underlying ETF/index fund may be more volatile than if the Underlying ETF/index fund had not been leveraged. A relatively small price movement in a derivative contract may result in substantial losses to the investor. Derivatives are also subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful, resulting in losses to the Underlying ETF/index fund and the cost of such strategies may reduce the Underlying ETF's/index funds returns and increase the Underlying ETF's/index funds potential for loss.
- XX. Risks of Exchange Traded Derivative Transactions: The securities exchange on which the shares of the Underlying ETF/index fund may be listed may have the right to suspend or limit trading in all securities which it lists. Such a suspension would expose the Underlying ETF/index fund to losses and delays in its ability to redeem shares.
- XXI. Legal risk OTC Derivatives, Repurchase and Reverse Repurchase Transactions, Securities Lending and Re-used Collateral: There is a risk that agreements and derivatives techniques are terminated due, for instance, to bankruptcy, supervening illegality or change in tax or accounting laws. In such circumstances, an underlying ETF/index fund may be required to cover any losses incurred. Furthermore, certain transactions are entered into on the basis of complex legal documents. Such documents may be difficult to enforce or may be the subject of a dispute as to interpretation in certain circumstances. Whilst the rights and obligations of the parties to a legal document may for example be governed by English or Luxembourg law, in certain circumstances (for example insolvency proceedings) other legal systems may take priority which may affect the enforceability of existing transactions.
- XXII. Securities Lending: The underlying ETFs/index funds may engage in securities lending. The underlying ETFs/index funds engaging in securities lending will have a credit risk exposure to the counterparties to any securities lending contract. Fund investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the underlying ETFs/index funds.
- XXIII. Infectious Illness Risk. An outbreak of an infectious respiratory illness, COVID 19, caused by a novel coronavirus has resulted in travel restrictions, disruption of healthcare systems, prolonged quarantines, cancellations, supply chain disruptions, lower consumer demand, layoffs, ratings downgrades, defaults and other significant economic impacts. Certain markets have experienced temporary closures, extreme volatility, severe losses, reduced liquidity and increased trading costs. Such events can have an impact on the underlying ETFs/index funds and could impact their ability to purchase or sell securities or cause elevated tracking error and increased premiums or discounts to the NAV. Other infectious illness outbreaks in the future may result in similar impacts.
- XXIV. Operational Risk. The underlying ETFs/index funds are exposed to operational risks arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures.

- XXV. Counterparty Risk: An underlying ETF/index fund will be exposed to the credit risk of the parties with which it transacts and may also bear the risk of settlement default. Credit risk is the risk that the counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the relevant underlying ETF/index fund. This would include the counterparties to any derivatives, repurchase / reverse repurchase agreement or securities lending agreement that it enters into. Trading in derivatives which have not been collateralised gives rise to direct counterparty exposure.
- XXVI. Risk of Investing in the U.S.: A decrease in imports or exports, changes in trade regulations, inflation and/or an economic recession in the U.S. may have a material \adverse effect on the U.S. economy and the securities listed on U.S. exchanges. Proposed and adopted policy and legislative changes in the U.S. are changing many aspects of financial, commercial, public health, environmental, and other regulation and may have a significant effect on U.S. markets generally, as well as on the value of certain securities. Governmental agencies project that the U.S. will continue to maintain elevated public debt levels for the foreseeable future. Although elevated debt levels do not necessarily indicate or cause economic problems, elevated public debt service costs may constrain future economic growth. Circumstances could arise that could prevent the timely payment of interest or principal on U.S. government debt, such as reaching the legislative "debt ceiling." Such non-payment would result in substantial negative consequences for the U.S. economy and the global financial system. If U.S. relations with certain countries deteriorate, it could adversely affect U.S. issuers as well as non-U.S. issuers that rely on the U.S. for trade. The U.S. has also experienced increased internal unrest and discord. If these trends were to continue, it may have an adverse impact on the U.S. economy and the issuers in which the Fund invests.
- XXVII. U.S. Treasury Obligations Risk. U.S. Treasury obligations may differ from other securities in their interest rates, maturities, times of issuance and other characteristics. Similar to other issuers, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund's U.S. Treasury obligations to decline. U.S. Treasury securities are rated AA+ by S&P Global Ratings. A downgrade of the rating of U.S. Treasury securities may cause the value of the Fund's U.S. Treasury obligations to decline. Because U.S. government debt obligations are often used as a benchmark for other borrowing arrangements, a downgrade could also result in higher interest rates for a range of borrowers, cause disruptions in the international bond markets and have a substantial adverse effect on the U.S. and global economy. A high national debt level may increase market pressures to meet government funding needs, which may drive debt cost higher and lead the government to issue additional debt, thereby increasing refinancing risk. A high national debt also raises concerns that the U.S. government will not be able to make principal or interest payments when they are due. If market participants determine that U.S. sovereign debt levels have become unsustainable, the value of the U.S. dollar could decline, thus increasing inflationary pressures, particularly with respect to services outsourced to non-U.S. providers and imported goods and constrain or prevent the U.S. government from implementing effective countercyclical fiscal policy in economic downturns. Direct obligations of the U.S. Treasury have historically involved little risk of loss of principal if held to maturity. However, due to fluctuations in interest rates, the market value of such securities may vary during the period that shareholders own shares of the Fund. Notwithstanding that U.S. Treasury obligations are backed by the full faith and credit of the United States, circumstances could arise that could prevent the timely payment of interest or principal, such as reaching the legislative "debt ceiling." Such non-payment would result in losses to the Fund and substantial negative consequences for the U.S. economy and the global financial system.

10. Risks associated with investing in Tri Party Repo (TREPS)

DSP mutual fund is a member of Securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India Limited (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally by CCIL which helps reduce the settlement and counterparty risks for these transactions. CCIL manages the risks through its risk management processes such that the ultimate risk to its members from fails is either eliminated or reduced to the minimum. CCIL thus maintains margin and default fund contributions of each member for various business segments as per the terms of its Bye Laws, Rules and Regulations to cover potential losses arising from the default member.

In an event of any clearing member failing to honor settlement obligations, the margin and default Fund is utilized to complete the settlement. As per the waterfall mechanism, after the defaulter's

margins and the defaulter's contribution to the default fund have been utilized, CCIL's own contribution is used to meet the losses and thereafter any residual loss is appropriated from the contributions of the non-defaulting members.

Thus the scheme is subject to risk of the margin and default fund contribution being appropriated in the case of failure of any settlement obligations. Further, the scheme's contribution may be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

11. Risk factors related to Taxation of overseas investments:

Investment in U.S. Based Mutual Fund / ETF

Taxation of underlying ETFs/ funds and assets: Investors should note in particular that the proceeds from the sale of securities in some markets or the receipt of any dividends and other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source. As a result, the Underlying ETF/ fund (and therefore the Scheme) could become subject to additional taxation in such countries. Investors should note that there may be additional taxes, charges or levies applied in respect of the ETF's investments depending on the location of the assets of the Underlying ETF/ fund and the jurisdiction in which the Underlying ETF/ fund is located, registered or operated. Investors should also note that the Underlying ETF's/ funds investment managers and the ETF's/ funds ability to provide tax information and audited accounts in respect of the Underlying ETF/ fund to Unit Holders of the Scheme is dependent on the relevant tax and other information being provided in timely fashion. Accordingly, delays may occur in respect of delivery of such information to the Scheme's Unit Holders.

12. Risks Associated with Transaction in Units Through Stock Exchange Mechanism

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Mutual Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.

13. Risk of substantial redemption:

The Scheme(s) at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments

Further the liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods in the underlying investments. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to sell intended securities due to liquidity & settlement problems, could cause delay for processing the large number of direct redemptions. The Trustee, in the general interest of the Unit holders of the Schemes offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Working Day depending on the total "Saleable Underlying Stock" available with the Fund.

B. RISK MANAGEMENT STRATEGIES

1. Market Liquidity Risk: Amongst all the segments of the fixed income market in India, the government securities market demonstrates the highest market liquidity. The liquidity varies from security to security with benchmark securities for the reference tenors like 10 years, 5 years etc. showing relatively higher market liquidity. With time, the benchmark liquidity changes and hence liquidity propagates from one security to the other. The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. The Investment Manager will select fixed income securities, which have or are

expected to have high secondary market liquidity. Market Liquidity Risk will be managed actively within the portfolio liquidity limits.

- 2. Credit Risk: Credit Risk associated with fixed income securities will be managed by making investments in securities issued by borrowers, which have a good credit profile. The credit research process includes a detailed in-house analysis and due diligence. Limits are assigned for each of the issuer (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.
- **Rating Migration Risk:** The endeavor is to invest in high grade/quality sovereign securities and thus ensuring the rating migration risk to be minima;
- 4. Interest Rate Risk: The Scheme is expected to have duration based on the underlying securities. The interest rate risk cannot be eliminated and it exists as it is the primary feature of the scheme by providing investors access to a higher interest rate risk portfolio, which would benefit in a declining interest rate environment.
- **5. Re-investment Risk:** The Investment Manager will endeavor that besides the tactical and/or strategic interest rate calls, the portfolio is fully invested.
- 6. Term Structure of Interest Rates (TSIR) Risk: The Scheme is expected to have duration based on the underlying securities. As the nature of the scheme is to have higher duration, the Term Structure of Interest Rates (TSIR) Risk cannot be eliminated and it exists as it is the primary feature of the scheme.
- **7. Risks associated with floating rate securities:** There is restricted liquidity in floating rate securities, resulting in lack of price discovery. Hence, incremental investments in floating rate securities are going to be limited.

8. Risk Associated with overseas mutual funds / ETFs and Index securities:

- i. Liquidity Risk on account of investments in overseas funds: The investments are made in international funds, which provide daily liquidity.
- ii. Expense Risks associated with investments in overseas funds: The aggregate of expenses incurred by the Indian Fund-of-Funds scheme and the underlying international funds is subject to limits prescribed by SEBI.
- iii. Portfolio Disclosure Risks associated with investments in overseas fund: Although full portfolio disclosure is not available at the end of each month, top ten holdings as well as sector holdings are made available at the end of each month for the overseas fund. Full portfolio holdings can be obtained from underlying Overseas funds generally with a three-month lag i.e. March portfolio can be obtained at the end of June
- iv. Investment Policy and/or fundamental attribute change risks associated with investments in overseas funds: Investments are made in such international funds, which have similar investment objectives to the domestic fund in India. However, there exists possibility that there is a change in the fundamental attributes of the international fund. In such circumstances, the Investment Manager will seek to invest in other international funds, which have the same investment objective as the domestic fund.
- v. Monitoring overseas investment limits: The Investment Manager will keep monitoring the overseas investments limits. In case of an adverse event the Investment Manager may initiate appropriate action like investing across other areas as permitted by the scheme document or any other action to ensure that the investor interest is safeguarded.

9. Risk Management & Liquidity Management tools

DSP mutual fund schemes as mandated wide various SEBI & AMFI circulars, have adopted the following for risk management & liquidity management tools

- 1. Potential Risk Matrix (PRC) & Risk-o-meter: Investors are requested to review this scheme's Potential Risk Matrix (PRC) to understand the maximum risk that this scheme will run as per design and & Risk-o-meter to understand periodical measurement of that risk on a regular basis. Investor are suggested to read about various disclosures under the section "C.PERIODIC DISCLOSURES" pertaining to "Compliance with Potential Risk Class Matrix norms" & "Risk-o-meter" to understand in detail the disclosure frequency and remedial measures in case of breaches in the boundaries.
- 2. <u>Mandatory Liquidity requirement:</u> DSP mutual fund scheme adopts the Liquidity Risk Management framework mandated by SEBI and AMFI which helps estimates liquidity requirement by determining liquidity risk arising from the liability side and tries to covers all potential liquidity risk scenarios up to agreed confidence interval and has mandated remedial measures both for managing the risk on an ongoing basis (LRaR & LCRaR) as well as action plan in case there is a difference between actual outcome and projected outcome. Investors can refer to the circular 135/ BP/93/ 2021-22 dated July 24, 2021 and subsequent circulars for detail understanding on the Liquidity Risk Management Framework.

Further Investment manager also evaluates and monitors the Asset Liability Mismatch (ALM) which addresses the gap in the estimated potential liquidity requirement over a 90-day period and schemes investment / assets liquidity to meet the potential requirement and best ensures that scheme has necessary liquidity to meets its liability obligations.

- 3. <u>Stress testing the scheme portfolio:</u> The investment manager periodically stress test the scheme portfolio to addresses the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level and evaluate the stress in terms of its impact on the NAV of the scheme. The stress test is performed using the methodology and periodicity as mandated by AMFI in consultation to SEBI
- 4. <u>Swing Pricing:</u> DSP mutual fund scheme has Swing Pricing policy in place to help in case of severe liquidity stress at an AMC level or a severe dysfunction at market level, the Swing Pricing offers the contingency plan in case of extreme exigencies. Investors are suggested to read the detail disclosure pertaining to this policy in Section N. "Swing Pricing Framework"

C. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme/Plans shall have a minimum of 20 investors each and no single investor shall account for more than 25% of the corpus of the Scheme(s)/Plan(s). These conditions shall be complied with, in each calendar quarter on an average basis, as specified by SEBI. In case of non-fulfillment of the condition of 20 investors in a calendar quarter, the provisions of Regulation 39(2) (c) of the SEBI (MF) Regulations shall become applicable automatically without any reference from SEBI, and accordingly the Scheme/ Plan(s) shall be wound up and the units redeemed at the relevant applicable NAV. If there is breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be available and thereafter, the investor who is in breach of the rule, shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

D. SPECIAL CONSIDERATIONS

- Subject to the SEBI (MF) Regulations, funds managed by the affiliates/associates of the Sponsors may invest either directly or indirectly in the Schemes and may acquire a substantial portion of the Schemes' Units and collectively constitute a majority investor in the Schemes. Accordingly, redemption of Units held by such funds may have an adverse impact on the value of the Units of the Schemes because of the timing of any such redemption and may impact the ability of other Unit Holders to redeem their respective Units.
- As the liquidity of the Schemes' investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Schemes' portfolios. redemptions under certain circumstances.

The scheme's investment objective is to generate income & long term capital appreciation by investing in units of ETFs and/or Funds focused on US Treasury Bonds. The proportion of an investment in an underlying funds/ETFs will be determined based on discretion of the fund manager of the Scheme considering prevailing market conditions, the macroeconomic environment (including interest rates and inflation), general liquidity and other considerations in the economy and markets. Portfolio Turnover

Portfolio turnover is defined as the lower of the aggregate value of purchases or sales as a percentage of the corpus of a scheme during a specified period of time. The Scheme is open ended, with subscriptions and redemptions expected on a daily basis, resulting in net inflow/outflow of funds, and on account of the various factors that affect portfolio turnover; it is difficult to give an estimate, with any reasonable amount of accuracy.

Therefore, the Scheme has no specific target relating to portfolio turnover.

Options offered under the Scheme

- Growth
- Income Distribution cum Capital Withdrawal option (IDCW)
 - 1. Payout of Income Distribution cum Capital Withdrawal (IDCW)
 - 2. Reinvestment of Income Distribution cum Capital Withdrawal (IDCW)

Default Option

- Growth Option in case Growth Option or Income Distribution cum Capital Withdrawal (IDCW) Option is not indicated.
- Payout sub-option in case Payout of IDCW Option or Reinvestment of IDCW Option is not indicated.

(i) Growth Option - Option A

The Mutual Fund will not declare any IDCWs under this option. The income earned under this Option will remain invested in the option and will be reflected in the NAV. This option is suitable for investors who are not looking for current income but who have invested with the intention of capital appreciation. Moreover, if Units under this option are held as capital asset for a period of greater than twelve months from the date of acquisition, Unit Holders will get the benefit of long term capital gains tax.

(ii) Income Distribution cum Capital Withdrawal option (Option B)

The above Option is suited for investors seeking income through IDCWs declared by the Scheme. Only Unit Holders opting for the IDCW Option (Option B) will receive IDCWs. The Trustee, in its sole discretion, may also declare interim IDCWs.

This Option in turn offers two sub-options i.e. "Payout IDCW" and "Reinvest IDCW", as under:

Payout IDCW

As per the SEBI (MF) Regulations, the Mutual Fund shall dispatch IDCW proceeds to the Unit Holders within 7 Working Days of the record date of the IDCW. IDCWs will be paid by cheque, net of taxes, as may be applicable. Unit Holders will also have the option of direct payment of IDCW to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the registered address of the sole/first holder as indicated in the original application form.

To safeguard the interest of Unit Holders from loss or theft of IDCW cheques, investor should provide the name of their bank, branch and account number in the Application Form. IDCW cheques will be sent to the Unit Holder after incorporating such information.

Investors may however note that in case the IDCW distributed (net of tax deducted at source, wherever applicable) is for an amount equal to or less than Rs. 100/-, the IDCW, instead of being paid out to the Unit holder will be reinvested by issuing additional Units of the Scheme at the Applicable NAV on the next Business day after the Record Date. The additional Units issued and held as long term capital asset will get the benefit of long-term capital gains tax if sold after being held for greater than twelve months. For this purpose, twelve months will be computed from the date when such additional units are allotted.

Reinvest IDCW

Under this sub-option, IDCWs are reinvested by way of allotment of additional Units of the Scheme, instead of receiving IDCW payout. Such additional Units by way of reinvestment of IDCWs will be at the Applicable NAV on the next Business day after the Record Date. The additional Units issued under this sub-option and held as long term capital asset will get the benefit of long-term capital gains tax if sold after being held for greater than twelve months. For this purpose, twelve months will be computed from the date when such additional units are allotted.

Effect of IDCW: On declaration of IDCW, the NAV of the IDCW option will further stand reduced by the applicable statutory levy/surcharge/cess/ any other levy payable by the scheme in respect of separate category of investors if any. Notwithstanding varying rates of statutory levies, the ex- IDCW NAV will remain the same for all categories of investors in a particular option, though the amount of IDCW received by Unit Holders may vary depending on the category of each Unit Holder. For details on taxation of IDCW please refer the SAI.

Notes:

- a. The Trustee intends to declare IDCWs comprising substantially of net income and net capital gains. It should be noted that the actual distribution of IDCWs and frequency of distribution will be entirely at the discretion of the Trustee. To the extent the entire net income and realised gains are not distributed, it will remain invested in the Option and reflected in the NAV.
- b. An investor on record for the purpose of IDCW distributions is an investor who is a Unit Holder as of the Record Date. In order to be a Unit Holder, an investor has to be allocated Units representing receipt of clear funds by the Scheme.
- c. Investors should indicate the name of the Scheme and/or Option, clearly in the application form. In case of valid applications received, without indicating the Scheme and/or Option etc. or where the details regarding Option are not clear or ambiguous, the following defaults will be applied:

If no indication is given under the following	Default
Option - Growth/IDCW	Growth
Sub-option - Payout IDCW/Reinvest IDCW	Payout IDCW

Investors shall note that once Units are allotted, AMC shall not entertain requests regarding change of Option, with a retrospective effect. Investors shall also note that any change in IDCW sub-option, due to additional investment or on the basis of a request received from the investor, will be applicable to all existing Units in the IDCW option of the Scheme.

IDCW Policy The Trustee intends to declare IDCWs comprising substantially of net income and net capital gains. It should be noted that the actual distribution of IDCWs and frequency of distribution will be entirely at the discretion of the Trustee. To the extent the entire net income and realised gains are not distributed, it will remain invested in the Option and reflected in the NAV. The investor acknowledges that Electronic Transaction is not a secure means of giving instructions / transactions requests and that the investor is aware of the risks involved including those arising out of such transmission being inaccurate, imperfect, ineffective, illegible, having a lack of quality or clarity, garbled, altered, distorted, not timely etc. The investor's request to the Recipient to act on Electronic Transaction is for the investor's convenience and the Recipient is not obliged or bound to act on the same. The investor authorizes the recipient to accept and act on any Electronic Transaction which the recipient believes in good faith to be given by the investor and the recipient may at its discretion treat any such transaction as if the same was given to the recipient under the investor's original signature.

submitted at any of the Official Points of Acceptance of transaction, the details of Official Points of Acceptance are mentioned at the end of this SID. As all allotments are provisional, subject to realisation of payment instrument and subject to the AMC having been reasonably satisfied that the Mutual Fund has received clear funds, any redemption or switch out transaction in the interim is liable to be rejected at the sole discretion of the AMC.

A Unit Holder may request redemption of a specified amount or a specified number of Units only. If the redemption request is made for a specified amount and the number of Units is also specified by the Unit Holder, the number of Units specified will be considered for deciding the redemption amount. Unit Holders may also request for redemption of their entire holding and close the account by indicating the same at an appropriate place in the transaction slip/common transaction form.

It may, however, be noted that in the event of death of the Unit Holder, the nominee or legal heir, (subject to production of requisite documentary evidence to the satisfaction of the AMC) as the case may be, shall be able to redeem the investment at any point of time.

In case an investor has purchased Units on more than one day (either under the NFO Period or through subsequent purchases) the Units purchased first (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First-In-First-Out basis.

In case the Units are standing in the names of more than one Unit Holder, where mode of holding is specified as Joint redemption requests will have to be signed by all joint holders. However, in cases of holding specified as 'Anyone or Survivor', any one of the Unit Holders will have the power to make redemption requests, without it being necessary for all the Unit Holders to sign. However, in all cases, the proceeds of the redemption will be paid to the first-named holder only.

Redemption or repurchase proceeds shall be dispatched to Unit Holders within 5 Working Days from the date of acceptance of redemption or repurchase.

The redemption payment will be issued in favour of the sole/ first Unit Holder's registered name and bank account number, if provided. Payment via cheque, where issued, will be sent to the address of the sole/first Holder registered with the fund at the time of dispatch entirely at the risk of the unit holder. The redemption cheque/demand draft will be payable at par at all the places where the official points of acceptance of transaction are located. Bank charges for collection of redemption proceeds will be borne by the Unit Holder. With a view to safeguarding their interest, it is mandatory that Unit Holders indicate their Bank Account No., name of the bank and branch in the application for purchasing Units of the Scheme. A fresh account statement will also be sent/emailed to redeeming investors, indicating the new balance to the credit in the account, along with the redemption cheque.

Unit holders are requested to note that application for redemption or switch out for units for which funds are not realized via purchase or switch-in in the Scheme of the Fund shall be liable to be rejected. In other words, redemption of units will be processed only if the funds for such units are realized in the Scheme by a way of payment instructions/transfer or switch-in funding process.

The proceeds towards redemptions and IDCWs will be despatched by a reasonable mode of despatch like courier, Speed post, etc. in case of cheque/demand draft or directly credited to the bank account (as per the details mentioned by the investor), entirely and solely at the risk of the investor. The Mutual Fund will endeavour to remit redemption proceeds via electronic means, as made available by RBI. Where such electronic means are not available or feasible under any circumstances, the Mutual Fund will remit the redemption proceeds by way of cheques. The investor will not hold the Mutual Fund or the AMC or the Registrar responsible for any non-receipt or delay of receipt of redemption & IDCW proceeds due to any negligence or deficiency in service by the courier company, postal authorities or the bank executing direct credits, or due to incorrect bank account details provided by the investor.

Effect of Redemption

On redemption, the unit capital and reserves will stand reduced by an amount equivalent to the product of the number of Units redeemed and the Redemption Price as on the date of redemption. Units once redeemed will be extinguished and will not be re-issued.

Fractional Units

Since a request for purchase is generally made in Rupee amounts and not in terms of number of Units of the Scheme, a Unit Holder may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places. However, fractional Units will, in no way, affect the Unit Holder's ability to redeem the Units, either in part or in full, standing to his/her/its credit.

[®] Finance Act, 2023 has amended surcharge rates for individuals and HUFs or association of persons [other than a cooperative society], or body of individuals, whether incorporated or not, or an artificial juridical person referred to in sub-clause (vii) of clause (31) of section 2 who opt for the new tax regime under section 115BAC. As per the amended section, the maximum rate of surcharge shall be 25% for income computed under section 115BAC of the Income tax Act, 1961 (new tax regime) instead of 37% under normal provisions (Old tax regime). The new tax regime would be the default tax regime from FY 2023-24 onwards.

^The Finance Act, 2022 has levied the surcharge to be at par with Equity Oriented Scheme with effect from 1 April 2022

**In case company opts for new regime of taxation, then the surcharge would be applicable at the rate of 10% irrespective of the taxable income.

Specified Mutual Fund" means a Mutual Fund by whatever name called, where not more than thirty five per cent. of its total proceeds is invested in the equity shares of domestic companies. Finance Act 2023 has inserted Section 50AA in the Income Tax Act, 1961. As per the said section, with effect from 1 April 2023, gains/losses from units of Specified Mutual Fund would be deemed to be short term capital gain/loss irrespective of period of holding i.e. the definition of holding for more than 36 months to be considered as long term capital asset is withdrawn. This is applicable for all such units which are acquired on or after Apr 1, 2023.

*The Finance Act 2021 introduced special provisions for higher rate of TDS in case of non-filers of Income tax return (referred to as "specified person"). Specified person does not include a non-resident who does not have permanent establishment in India. Finance Act 2023, with effect from 1st April, 2023, amended the said proviso to also exclude a person who is not required to furnish the return of income for the assessment year relevant to the said previous year and is notified by the Central Government in the Official Gazette in this behalf.

Any person entitled to receive any sum or income or amount, on which tax is deductible under Chapter XVIIB (hereafter referred to as deductee), shall furnish his Permanent Account Number to the person responsible for deducting such tax (hereafter referred to as deductor), failing which tax shall be deducted at the higher of the following rates, namely:

- (i) at the rate specified in the relevant provision of this Act; or
- (ii) at the rate or rates in force; or
- (iii) at the rate of twenty per cent.

The aforesaid provision dealing with higher taxation in the absence of furnishing Permanent Account Number shall not apply to a non-resident with effect from 1st June, 2016 on

furnishing the following details and documents by such non-resident:

- (i) name, e-mail id, contact number;
- (ii) address in the country or specified territory outside India of which the non-resident is a resident;
- (iii) a certificate of his being resident in any country or specified territory outside India from the Government of that country or specified territory if the law of that country or specified territory provides for issuance of such certificate;
- (iv) Tax Identification Number of the non-resident in the country or specified territory of his residence and in case no such number is available, then a unique number on the basis of which the non-resident is identified by the Government of that country or the specified territory of which he claims to be a resident.

In case of investments by NRIs in closed ended funds during NFO, at the time of redemption of units, TDS will be deducted at the applicable rate. However, in respect of those Unit Holders who have acquired the units on the Stock Exchange post listing of units, the Unit Holders would need to provide a certificate from a Chartered Accountant certifying the details of acquisition of units to the Fund within two days of maturity of the Scheme, so as to enable the Fund to deduct TDS at the applicable rates. In the event of such details not being provided, the Fund would deduct TDS on the redemption proceeds at the highest rate of TDS applicable.

For further details on taxation please refer to the clause on Taxation in the SAI.

I. USA securities

General US Taxation Rules with Respect to Foreign Persons

Generally, US imposes tax on foreign person either on gross basis or on net basis. Foreign persons who are not engaged in a trade or business in the US are subject to US gross withholding tax on US source income which is fixed determinable annual or periodical generally called as FDAP income. A foreign person that is engaged in a US trade or business will be subject to US taxation on effectively connected taxable income (ECTI). In addition to the income tax imposed on ECTI, the US also imposes a branch profits tax on foreign corporations that has branch or permanent establishment in US. The branch profit tax is imposed on deemed remittances of after-tax effectively connected earnings and profits of foreign corporation's US branch or permanent establishment. One can claim reduced tax rate or exemption from tax under US income tax treaty. The below discussion is based on the understanding that the Scheme would be treated as a corporation for US tax purposes. and the investors in the Mutual Fund Scheme are not tax resident of the USA or based in the USA. Thus, as long as the Scheme is treated as a corporation for US tax purposes, the investors in the Scheme should not directly be subject to US tax. For purposes of this discussion, a foreign person is a person who is not a US citizen or US resident for tax purposes and includes a foreign entity that is classified as a corporation for US tax purposes.

Investment in US listed companies

US Taxation on Disposition of Shares of US listed Companies

Subject to the discussion below concerning the taxation of ECTI, generally income from the sale of personal property by a foreign person is not US source income and should not be subject to US taxation. Thus, capital gains received by the Scheme on the disposition of shares of US listed companies, should not be subject to taxation in the US.

Trading in stock or securities is generally not considered US trade or business unless taxpayer is a dealer in stock or securities and effects the trade through US offices directly or through US office of its agent other than independent agent.

However if the Scheme invests in any entities that are treated as partnership for U.S federal income tax purposes and if these partnerships are engaged in a U.S. trade or business, then the Scheme itself would be treated as engaged in such a U.S. trade or business and would likely be required to file a U.S. income tax return and potentially pay U.S. tax on its distributive share of partnership income. It may also be subject to potential withholding tax with respect to sales of an interest in such partnership.

Gain derived by a non-U.S resident from the disposition of a U.S Real Property Interest (USRPI) may be treated as income that is effectively connected with the conduct of a U.S trade of business and thus subject to U.S federal income tax (and to a requirement to file a U.S. income tax return) under the Foreign Investment in Real Property Tax Act (FIRPTA). A USRPI includes an interest in a US Real Property Holding Company (USRPHC) which generally is defined as a US company whose assets, measured by fair market value, consist of 50% or more of USRPIs at any time during a five-year period. Such income is considered to be ECTI with the conduct of a U.S trade of business and is subject to US taxation. A foreign person who disposes of a USRPI will be subject to a 15% (w.e.f. 16 February 2016) withholding tax on the gross proceeds received and will be required to file a US federal income tax return. The final tax liability on the recognized gain on disposition of the USRPI will be set off by the 15% withholding tax on gross proceeds.

There is an exception that applies to FIRPTA for publicly traded shares of a - Qualified Investment Entity (QIE). The exception provides that if the stock of a QIE is regularly traded on an established securities market located in the USA (e.g., the NYSE), the stock will be treated as a USRPI only in the case of a more than 5% holder (over the course of a 5 year look-back period). The 5% holding is increased to 10% for publicly traded real estate investment trust (REIT). Such exception also applies to the disposition of an interest in a publicly traded partnership (PTP).

Thus, capital gains derived by the Scheme from the sale of regularly traded listed US equities should not be subject to tax in the US provided the Scheme holds an interest of 5% (10% for publicly traded REIT) or less of any class of stock. In cases where the Scheme has held, at any time within the 5-year period ending on the date of disposition, more than 5% (10% for publicly traded REIT) of the shares of a publicly-traded company that is also a USRPI, gain from disposition of such interest is subject to US federal corporate income tax.

If a partnership (including a PTP), is engaged in a U.S. trade or business, and if a non-U.S. partner disposes of the partnership interest, a portion of gain or loss is treated as connected with the conduct of a U.S. trade or business, and is therefore subject to U.S. tax. Such income also generates a requirement to file a U.S. tax return. This provision is not subject to 5% exception as mentioned above for PTPs that are USPRI. US requires 10% withholding if non-U.S. partner disposes of an interest in the partnership. Such tax withheld can be set off against the final tax liability of the partner who sold its interest.

Dividend Income

US source non-effectively connected dividend income received by a foreign person is subject to a 30% withholding tax. Thus US source dividends received by the Scheme from investments in US listed companies should be subject to withholding tax of 30%. Such dividend withholding tax can be reduced pursuant to a double tax treaty as discussed further below.

Investment in US Mutual Funds (US MF) or Exchange Traded Funds (US ETF)

US Taxation on Disposition of Units of US MF or US ETF

As discussed above in point 1, generally income from the sale of personal property by a foreign person is not US source income and should not be subject to US taxation. Thus, capital gains received by the Scheme on the disposition of interests in mutual funds and exchange traded funds (ETF), should not be subject to taxation in the US.

However, if the mutual fund or ETF that is sold is a USRPHC, then the gain is considered to be effectively connected with a U.S. trade or business and thus subject to U.S taxation, unless the mutual fund or ETF whose shares are sold is (a)publicly traded and the investor held an interest of 5% or less in the mutual fund or ETF at all times during the year preceding the sale or (b) the mutual fund is a domestically controlled qualified investment entity.

US Taxation on Income Distribution by US MF or US ETF

US source non-effectively connected dividend income received by a foreign person is subject to a 30% withholding tax. A mutual fund or ETF that is not subject to the USRPHC - related rules described above may distribute ordinary dividends which should be subject to 30% withholding tax. Dividends designated by a Regulated Investment Company (RIC) (e.g. a mutual fund) as capital gain dividends are treated as long term capital gains in the hands of the shareholders. Except as described above for mutual funds or ETFs that otherwise qualify as USRPHCs, because long-term capital gains are sourced to the domicile of the recipient, such capital gain dividends should not be U.S source if the recipient is a non-U.S person, and thus would not be subject to U.S taxation.

A foreign person or other qualified investment entity by a qualified investment entity to the extent attributable to gain from sales or exchanges by the qualified investment entity of USRPIs, is treated as gain from the sale or

exchange of a USRPI by the foreign person unless such distribution is with respect to stock that is publicly traded on a U.S exchange and the foreign person did not own more than 5% (or no more than 10% in the case of a REIT) of such class of stock at any time during the 1-year period ending on the date of distribution. Where the distribution is treated as gain from the sale or exchange of a USRPI, the distribution is treated as income effectively connected to a U.S trade or business, subject to tax at U.S corporate tax rates and withheld on at a rate of 21% of the distribution. The total amount in tax paid should not exceed the liability as determined by applying the U.S corporate rate.

Where distributions from the mutual fund or ETF are characterized as gain from the sale of a USRPI as discussed above, the income is considered effectively connected with the conduct of a U.S trade or business such that the branch profits tax provisions must be considered. The dividend equivalent amounts are subject to withholding tax at a rate of 30%. The dividend equivalent amount is generally equal to a foreign corporation's effectively connected earnings and profits. Generally, gain on disposition of an interest in a USRPHC is excluded from the definition of effectively connected earnings and profits.

Treaty Benefits to the Mutual Fund or ETF:

It is likely that the Scheme should be considered as a Person under Indian tax laws and so a tax resident of India and so is likely to be eligible to claim the Double Taxation Avoidance Agreement ('the DTAA' or 'the Treaty') benefits between India and the US on the income earned and tax, if any, payable in the US subject to completion of necessary documentations and the Scheme obtaining a tax residence certificate form the Indian tax authorities. As long as the Scheme is treated as a corporation for US tax purposes, the investors in the Scheme should not directly be subject to US tax. The main benefit of the DTAA is that it reduces the US withholding tax amount with respect to certain U.S. source FDAP payments and may exempt ECTI if it is not attributable to a U.S. permanent establishment.

As per the Treaty:

The Business income earned by the Scheme in the US should not be taxable in the US if the Fund does not have a permanent establishment in the US; If the Scheme has a permanent establishment in the US, then it will be subject to US tax on profits that are attributable to that permanent establishment. US attributes business profits to U.S. permanent establishments of Indian resident corporations under the same ECTI rules applicable to non-treaty residents with respect to the assets and activities conducted in the permanent establishment. A more limited force of attraction rule is also applicable.; The Scheme could be considered to have a permanent establishment in the US if it invests in a partnership that is engaged in a trade or business in the US;

Capital gains arising on disposition of USRPIs is taxable in the US as per the US tax laws. There is no exception in the DTAA for US taxation of disposition of USRPIs under the FIRPTA rules;

In general, dividend income beneficially earned by the Scheme in the US should be taxable at the rate of 25% for portfolio ownership interests below 10%;

Interest income beneficially earned by the Scheme in the US should be subject to withholding tax at the rate of 15% (to the extent not otherwise exempt under US internal rules such as the portfolio interest exception); and

Any other income should be taxable in the US as per US tax laws.

Luxembourg securities

Taxation on investment in Luxembourg investment funds

There are no withholding taxes on dividends paid by Luxembourg investment funds.

The fund being Non-residing investors (individuals or corporations) are exempt from taxation in Luxembourg on capital gains realized upon sale of their shares in a Luxembourg corporate investment fund (even in cases where they held a substantial shareholding of more than 10%).

Ireland securities

Taxation on investment in an Irish Fund

Where a Shareholder is not resident (or ordinarily resident) in Ireland for Irish tax purposes, an Irish Fund should not deduct any Irish tax in respect of the Shareholder's Shares. In order for the non-Irish resident shareholder to be exempt from Irish Investment Undertaking Tax ("IUT"), it must complete the relevant non-resident declaration and provide a copy of that declaration to the Irish Fund. The declaration may also be provided by an Intermediary who holds Shares on behalf of non-Irish Resident Shareholders provided that, to the best of the Intermediary's knowledge, the Shareholders are not resident (or ordinarily resident) in Ireland.

If this declaration is not received by an Irish Fund (and in the absence of written notice of approval from Revenue Commissioners being obtained by the Irish Fund dispensing with the requirement to provide such a declaration), an Irish Fund should deduct Irish tax in respect of the shares held by the non-Irish Resident Shareholder. An Irish Fund should also deduct Irish tax if the Irish Fund has information which reasonably suggests that a Shareholder's declaration is incorrect. A Shareholder will generally have no entitlement to recover such Irish tax. An Irish Fund must be informed if a Shareholder becomes Irish tax resident.

Generally, Shareholders who are not Irish tax resident will have no other Irish tax liability with respect to their Shares. However, if a Shareholder is a company which holds its Shares through an Irish branch or agency, the Shareholder may be liable to Irish corporation tax in respect of profits and gains arising in respect of the Shares (on a self-assessment basis).

In case if the fund is deemed to be a Non-Exempt Shareholders then a Shareholder is subject to tax (e.g. because it has not provided the required non-resident declaration), an Irish Fund should deduct Irish tax on distributions, redemptions and transfers and, additionally, on 'eighth anniversary' events, as described below.

Distributions from an Irish Fund

If an Irish Fund pays a distribution to a non-exempt Shareholder, an Irish Fund should deduct Irish tax from the distribution. The amount of Irish tax deducted will be:

25% of the distribution; where the distribution is paid to a shareholder who is an Irish resident company which has made the relevant declaration for the 25% rate to apply.

41% of the distribution in all other cases.

Redemptions and transfer of shares

If an Irish Fund redeems Shares held by a non-exempt Shareholder, an Irish Fund should deduct Irish tax from the redemption payment made to the Shareholder. Similarly, if a non-exempt Shareholder transfers (by sale or otherwise) an entitlement to Shares, an Irish Fund will account for Irish Investment Undertaking tax in respect of that transfer. The amount of Irish tax deducted or accounted for will be calculated by reference to the gain (if any) which has accrued to the Shareholder on the Shares being redeemed or transferred and will be equal to:

25% of such gain; where the shareholder is an Irish resident company which has made the appropriate declaration for the 25% rate to apply;

41% of the gain in all other cases.

If Shares are not denominated in euro, a Shareholder may be liable (on a self-assessment basis) to Irish capital gains taxation on any currency gain arising on the redemption or transfer of the Shares.

"Eighth Anniversary" Events

If a non-exempt Shareholder does not dispose of Shares within eight years of acquiring them, the Shareholder will be deemed for Irish tax purposes to have disposed of the Shares on the eighth anniversary of their acquisition (and any subsequent eighth anniversary). On such deemed disposal, an Irish Fund will account for Irish tax in respect of the increase in value (if any) of those Shares over that eight-year period. The amount of Irish tax accounted for will be equal to:

25% of the increase in value of the shares where the Shareholder is a company which has made the appropriate declaration for the 25% rate to apply;

41% of the increase in value in all other cases.

Any Irish tax paid in respect of the increase in value of Shares over the eight-year period may be set off on a proportionate basis against any future Irish tax which would otherwise be payable in respect of those Shares and any excess may be recovered on an ultimate disposal of the Shares.

Share Exchanges

Where a Shareholder Exchanges Shares on arm's length terms for other Shares in the Irish Fund and no payment is received by the Shareholder, an Irish Fund should not deduct Irish tax in respect of the exchange.

Stamp Duty on transacting in shares

No Irish stamp duty (or other Irish transfer tax) will apply to the issue, transfer or redemption of Shares. If a Shareholder receives a distribution in specie of assets from the ICAV, a charge to Irish stamp duty could potentially arise.

Taxation on investment in Irish Exchange Traded Funds (ETFs)

Similar to active funds, ETFs are exempt from Irish tax on income and gains derived from their investments and are not subject to Irish tax on their net asset value. As such income and gains arising to an ETF are allowed to accumulate gross of Irish tax.

Non-Irish Resident Shareholders do not suffer any Irish tax on the occurrence of a chargeable event (e.g. distribution or redemption) provided that the relevant non-resident declaration has been provided to the fund. If the relevant declaration is not in place the ETF may be obliged to withhold tax at the appropriate rate. However, withholding tax does not need to be applied in the event that shares are held in a recognized clearing system (regardless of whether or not there is a declaration in place).

D. COMPUTATION OF NAV

The NAV of the Units of a Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under each Scheme may be calculated by either of the following methods shown below:

		Market	or	Fair	Value	of	Scheme's	investments
NAV Per Unit (Rs.)	=	+ Current As	sets - (Current Li	abilities an	d Provi	sions	
,		No. of U	nits ou	tstanding	under the	Scheme	9	_

The numerical illustration of the above method is provided below:

Market or Fair Value of Scheme's investments (Rs.) = 11,42,53,650.00 Current Assets (Rs.) = 10,00,000.00 Current Liabilities and Provisions (Rs.) = 5,00,000.00 No. of Units outstanding under the Scheme = 1,00,00,000

N.B.: The aforesaid provisions pertaining to "Calculation of NAV" shall apply in respect of each individual Scheme and/or plan as the case may be. The NAV Per Unit above is rounded off to four decimals.

The NAV will be calculated as of the close of every Business Day.

NAVs will be rounded off to three or four decimal places based on the nature and category of the scheme. The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Note: In respect of Schemes having Growth and IDCW Options, there will be more than one NAV, one for each Option, after the declaration of the first IDCW by that Scheme.

Since this Scheme invests in units of underlying funds, the NAV of the Scheme for a business day (Day T) will be based on the NAV of the underlying fund for that day (Day T). Since the NAV of the underlying fund for a business day (Day T) would normally be available either late in the evening of the business day (Day T) or on the following business day (T+1), the Scheme will declare the NAV for a Business day on the next Business Day, based on the NAV of the underlying fund for the business day for which the NAV is declared (Day T).

Illustration: Relating to computation and publication of NAV of the Scheme for a business day (Day T)

Day T	Business day for which NAV is to be declared
Day T late evening or Day T+1 early morning	Underlying fund will publish their NAV
Day T+1 by 10.00 a.m.	AMC will compute the NAV of the Scheme for Day T AMC will publish the NAV of the Scheme for Day on its website, upload the same on AMFI website

Valuation of the scheme's assets, calculation of the scheme's NAV and the accounting policies & standards will be subject to such norms and guidelines that SEBI may prescribe from time to time and shall be subject to audit on an annual basis.

Valuation of Foreign Exchange Conversion: On the valuation day, all the assets and liabilities in foreign currency will be valued in Indian Rupees on the basis of methodology provided in the Valuation Policy. The Trustees/AMC reserves the right to change the source for determining the exchange rate. The reasons for the change in the source for determining the exchange rate will be recorded in writing.
