

FY23: JUNE 2023

## **Disclaimer Regarding Forward-Looking Statements**

This content contains forecasts, projections, goals, plans, and other forward-looking statements regarding Company's financial results and other data provided from time to time through AGM/ conference calls transcripts, webcasts, presentations, investor conferences, newsletters and similar events and communications. Such forward-looking statements are based on the Company's assumptions, estimates, outlook, and other judgments made in light of information available at the time of preparation of such statements and involve both known and unknown risks and uncertainties.

Accordingly, plans, goals, and other statements may not be realized as described, and actual financial results, success/failure or progress of development, and other projections may differ materially from those presented herein.

Even when subsequent changes in conditions or other circumstances make it preferable to update or revise forecasts, plans, or other forward-looking statements, the Company disclaims any obligation to update or revise this content.

## FY23: Revenue Surge, Margin Decline, and Shifting Profit Pools

- Nifty-500 ex-financials: 24% inflation driven revenue growth in FY23, 12% CAGR FY19-23.
- EBITDA margins have declined from FY22 peaks, returning to pre-pandemic levels.
- Net profits declined by 9% in FY23 compared to FY22 but have grown in-line with revenue at 11% CAGR from FY19 to FY23.
- Balance sheet leverage slightly worsened, ROE down from FY22 peak but still >15% excluding commodities (+300 bps vs. FY19).

In FY23, there has been a shift in the profit pool from the energy and metals sectors towards industrials and discretionary sectors, compared to FY22.

The analysis has been done of NSE-500 constituents as on May 31,2023 ex financials universe, data is sourced from Capitaline.

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 5 not have any future position in these sector(s)/stock(s)/issuer(s).

## **Balance Sheet: ROE declines from FY22 high**

**RETURN ON EQUITY ABOVE PRE-PANDEMIC LEVELS** 

- Return on equity (ROE) decline on year-on-year basis. Ex-commodity ROE is above 15%
- Net debt to equity deteriorates marginally. Leverage for Energy, Communications Services, and Consumer discretionary has increased.

#### CFO and Capex CAGR FY19-23

## **Market Capitalization vs Operating Profit growth**

Market Cap CAGR > Operating profits CAGR : Capital Goods, Utilities, Healthcare, Metals and Technology

- 2. For Banks and NBFC's the operating profits is pre-provisioning operating profits (PPOP).
- 3. M-cap CAGR is May 19 to May 23
- 4. Operating profits CAGR is FY19-23 actuals and FY24 based on Bloomberg consensus estimates
- 5. Source: Capitaline and Bloomberg

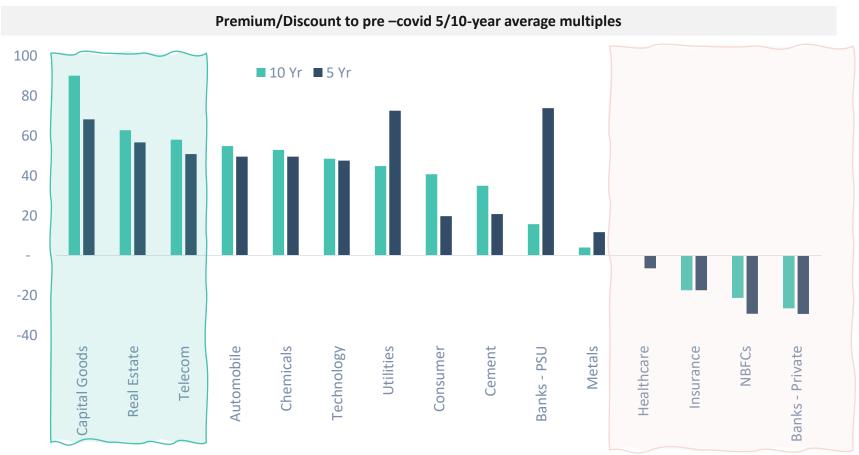

DSP

Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. These figures pertain to performance of the index/Model and do not in any manner indicate the returns/performance of the Scheme. It is not possible to invest directly in an index.

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 12 not have any future position in these sector(s)/stock(s)/issuer(s).

### Valuation: Premium or Discount to pre-pandemic averages

Healthcare, Insurance, NBFC and Pvt Banks are at discount to pre-covid averages

1. 5 yr and 10 yr Pre covid multiples are from Jan-15 to Jan-20 and Jan-10 to Jan-20 respectively

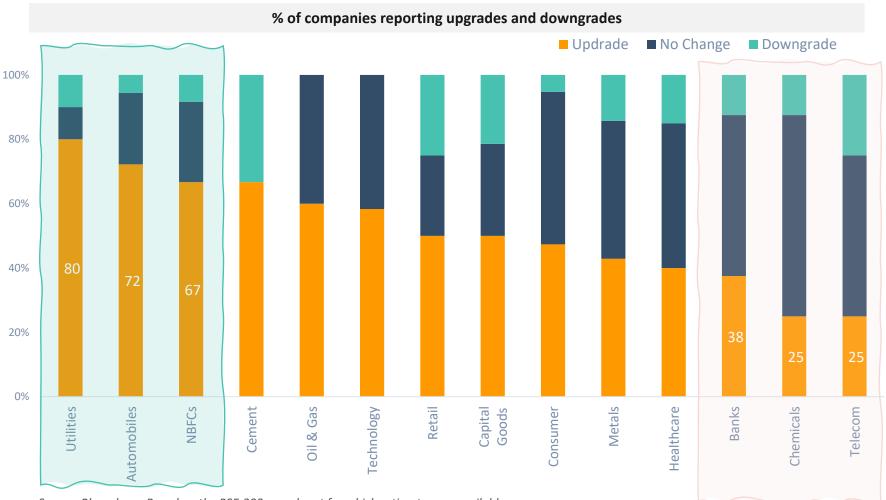

- 2. Price to book multiples are used for NBFC, Banks, Metals, Oil and Gas, Real Estate and utilities
- 3. Price to Earnings is used for Technology
- 4. EV/EBITDA is used for Auto, Capital goods, Cement, Chemicals, Consumer, Healthcare, Telecom
- 5. Source: Bloomberg. The universe is BSE-200

## **Sectoral Updates**

# DSP

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 15 not have any future position in these sector(s)/stock(s)/issuer(s).

### Auto: Improvement seen across segments except 2W/3W

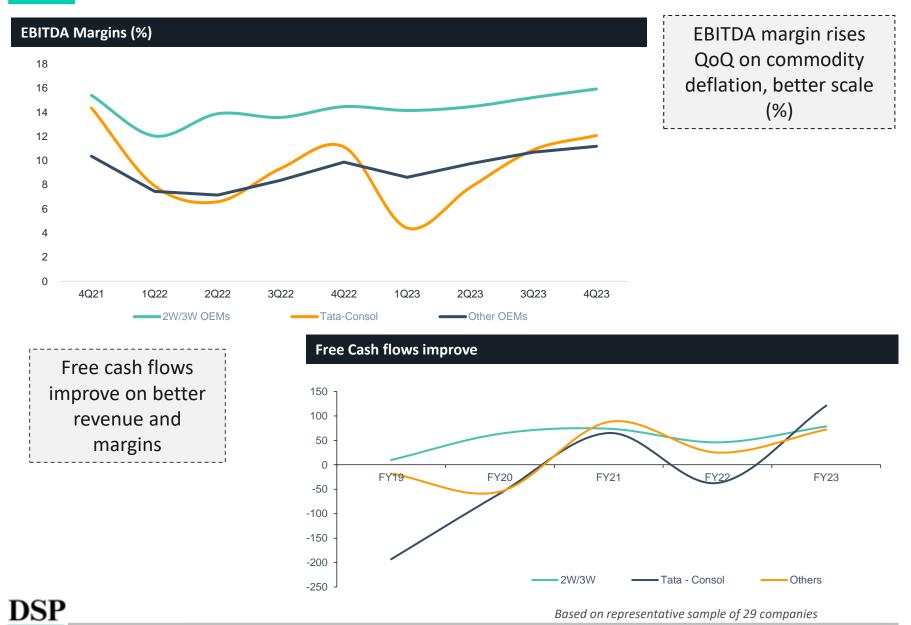

DSP

Based on representative sample of 29 companies

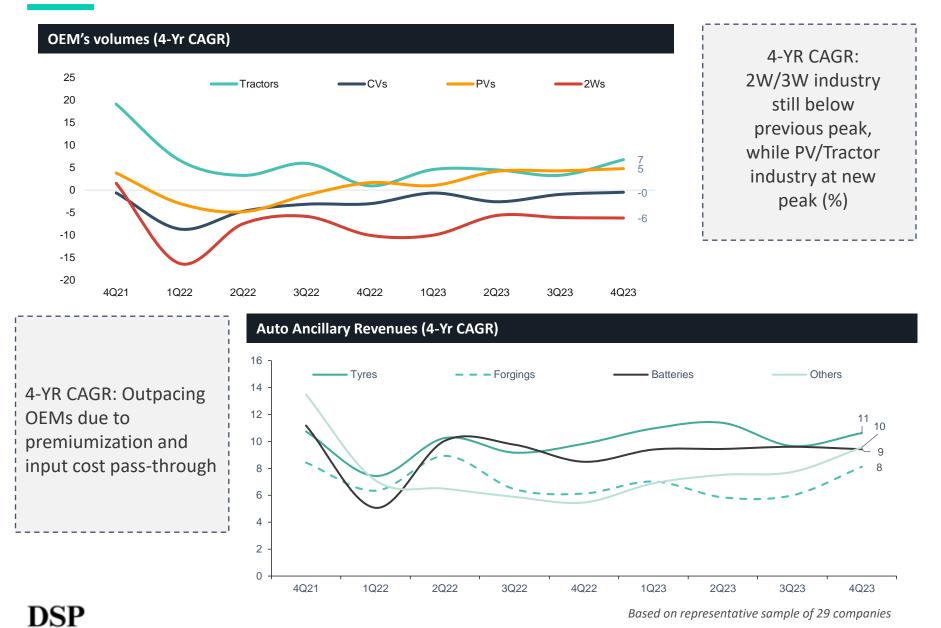

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 16 not have any future position in these sector(s)/stock(s)/issuer(s).

## Auto: Free cashflows and margins improve

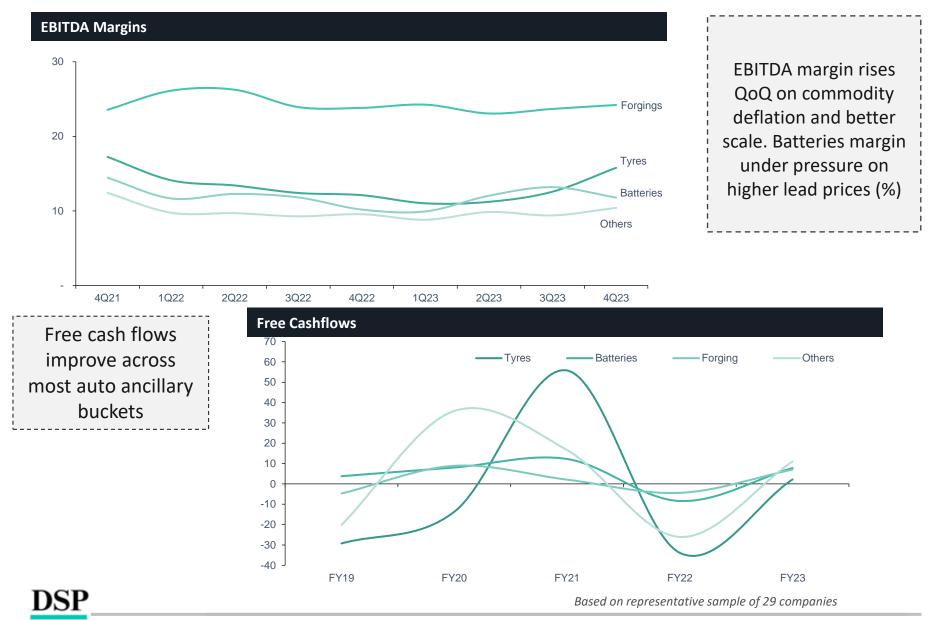

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 17 not have any future position in these sector(s)/stock(s)/issuer(s).

# ရှိခြင်္သ Auto Ancillary: Outpacing Original Equipment Manufacturers (OEMs)

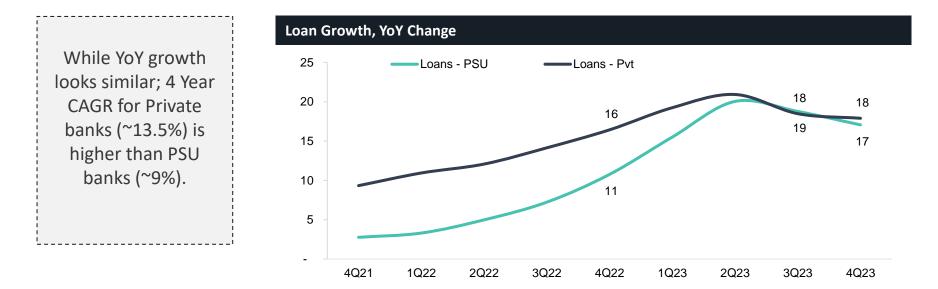

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 18 not have any future position in these sector(s)/stock(s)/issuer(s).

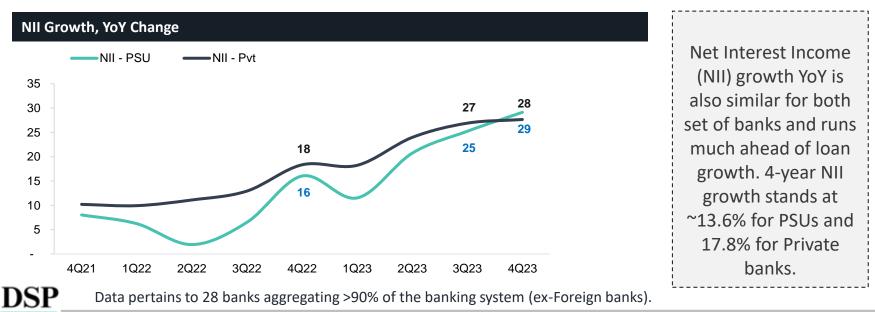

# Auto Ancillary: Broad-based margin improvement

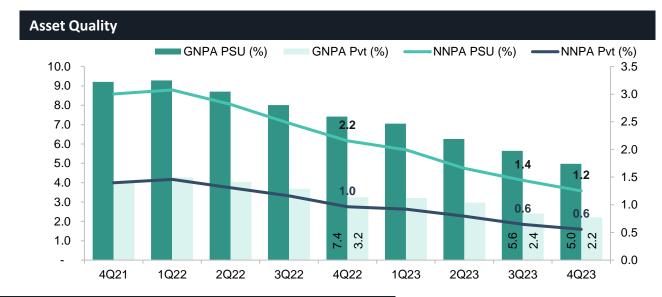

# Banks: Healthy double-digit Loan and NII growth

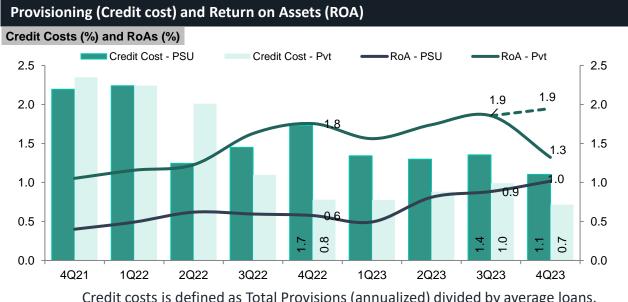

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 20 not have any future position in these sector(s)/stock(s)/issuer(s).

# Banks: Asset quality remains benign, ROA above pre-covid levels

Asset quality remains benign for both PSU and Private banks with continued improvement in Gross and Net NPAs for both set of banks.

DSP

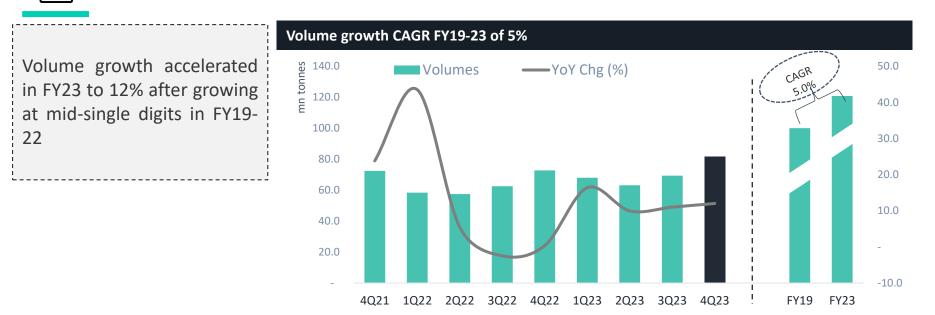

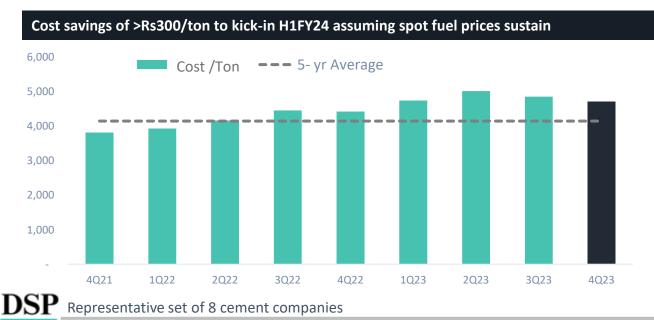

ROA for PSU banks are multi-years high on NIMs expansion and benign credit costs. Adjusted for exceptional loss on Citi acquisition, Pvt banks RoAs were up marginally QoQ at 1.9%

Credit costs is defined as Total Provisions (annualized) divided by average loans. Data pertains to 28 banks aggregating >90% of the banking system (ex Foreign banks).

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 21 not have any future position in these sector(s)/stock(s)/issuer(s).

# Cement: Volume growth recovers; cost deflation to support margins

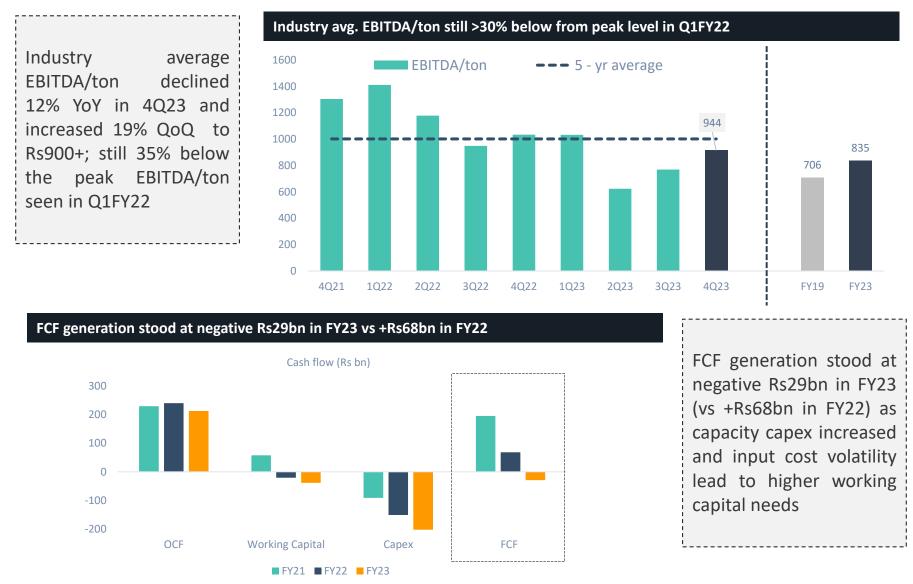

Spot petcoke prices declined >50% YoY to US\$120/ton; assuming spot prices sustain; cost savings of >Rs300/ton to kick-in H1FY24

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 22 not have any future position in these sector(s)/stock(s)/issuer(s).

# Cement: Profitability below FY22 peak, capex intensity picks-up

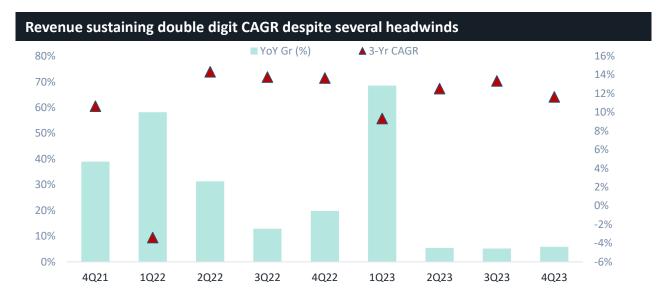

DSP

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 23 not have any future position in these sector(s)/stock(s)/issuer(s).

# Consumer Durable (CD): Weak summer season

CD revenue 4-year CAGR was at 12% in 4Q23, similar trend witnessed in the previous quarters. Reported YoY growth has seen deceleration due to mean reversion.

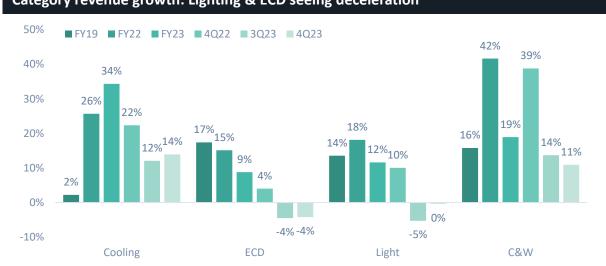

Steep inflation in copper and rising competition had a toll on operating profit across categories. Besides, companies are reinvesting on R&D and marketing.

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 24 not have any future position in these sector(s)/stock(s)/issuer(s).

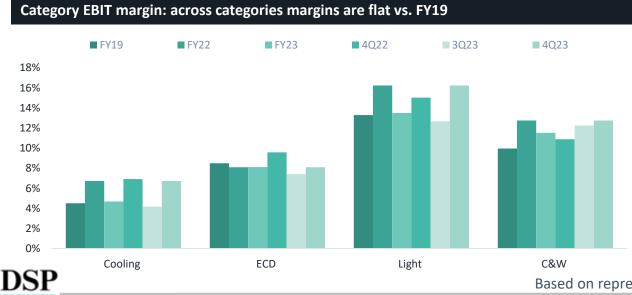

# Consumer Durable: Cable & Wires segment was an outlier

Rating change in fan, weak summer season and rising competition in white goods impacting ECD & Cooling categories. Lighting CAGR remained soft. Cable & Wire (C&W) remained strong due to high demand from both B-B and B-C

Category revenue growth: Lighting & ECD seeing deceleration

Note: Data labels are 3 Yr CAGR (FY23 and Q4FY23 is 4 Yr CAGR)

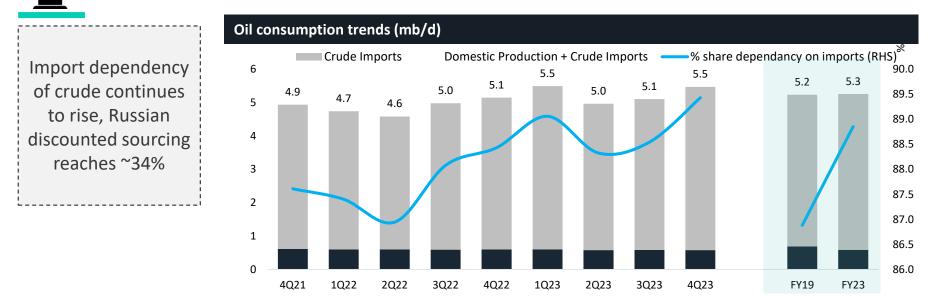

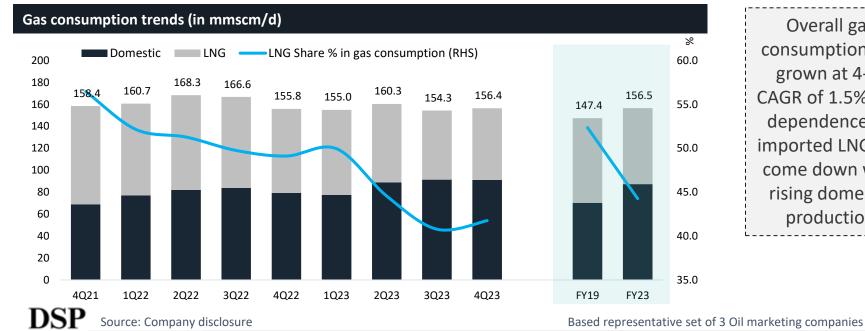

Commodity inflation, insufficient price hike, competitive intensity and growth deceleration had an adverse impact on margin. FY21 and FY22 margin expansion has reversed in FY23.

Based on representative set of 24 companies

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 25 not have any future position in these sector(s)/stock(s)/issuer(s).

# Energy: Oil dependency rises whereas it falls for gas

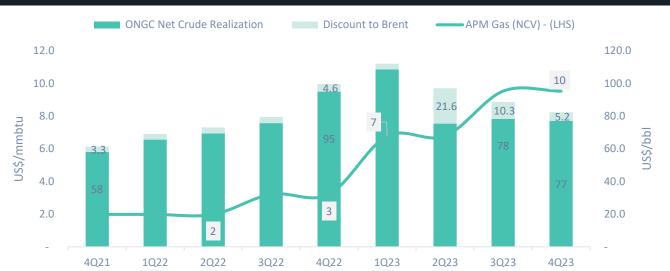

Overall gas consumption has grown at 4-yr CAGR of 1.5%, the dependence on imported LNG has come down with rising domestic production

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 26 not have any future position in these sector(s)/stock(s)/issuer(s).

# Energy: Domestic gas realisations peak, marketing margins improve

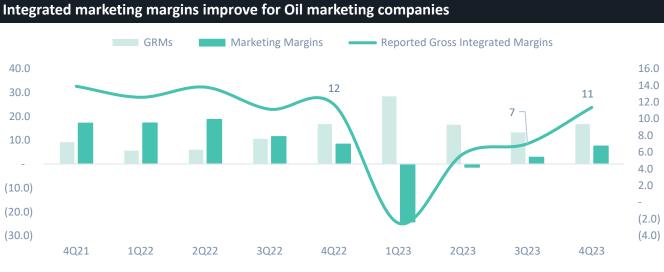

#### Oil and Gas realization trends

Brent and APM Gas prices peaked in 4Q, Kirit Parikh recommendations approval will lead to fall of APM prices providing stability wef. Apr-23

Integrated Margins (Refining + marketing -US\$/bbl), refining cracks coming off with marketing margins improving

DSP

Source: Company disclosure

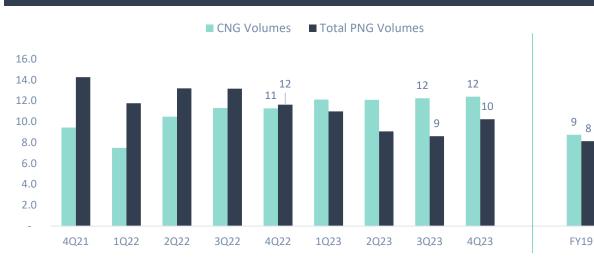

Based representative set of 3 Oil marketing companies

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 27 not have any future position in these sector(s)/stock(s)/issuer(s).

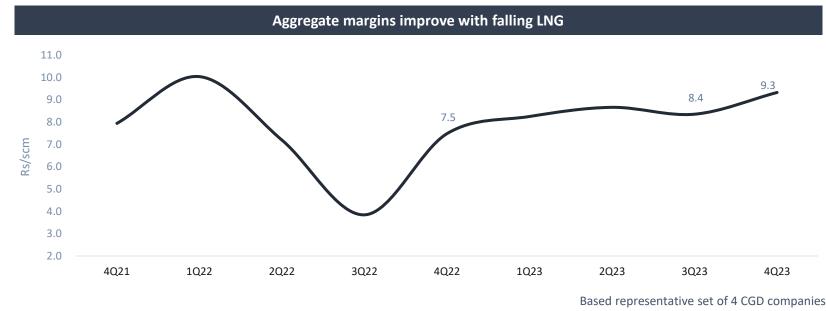

# Gas Utility: Volumes and margins recover

Volumes: CNG volumes peak; despite lower differentials vs alternate fuels

DSP

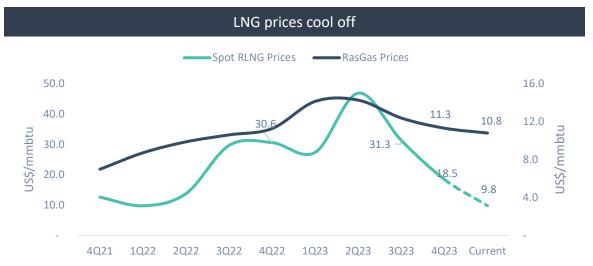

Despite lower discounts compared to alternative fuels, the market for CNGfueled vehicles continues to grow rapidly while the industrial volumes have started to pickup on falling gas prices

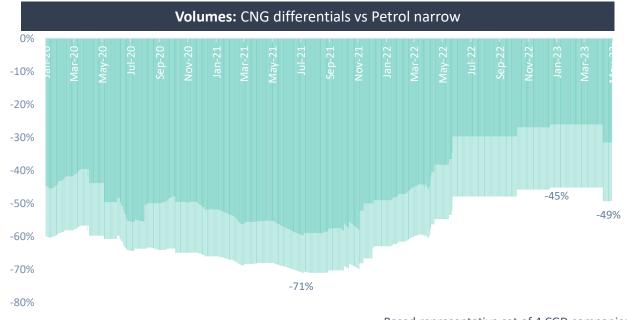

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 28 not have any future position in these sector(s)/stock(s)/issuer(s).

The spot LNG prices have been falling given an oversupply in the market, curtailed Chinese demand, and lower EU regasification capacity

Differential of CNG prices vs petrol and diesel reduce in 4Q. Kirit Parikh recommendation induced price cuts should result in differentials increasing vs petrol

DSP

Based representative set of 4 CGD companies

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 29 not have any future position in these sector(s)/stock(s)/issuer(s).

## Industrials: Sales growth robust but margins remain under pressure

Revenue for the quarter grew by 12% YoY to ~Rs 1 trn on back of healthy growth in product companies

#### **EBITDA** margins

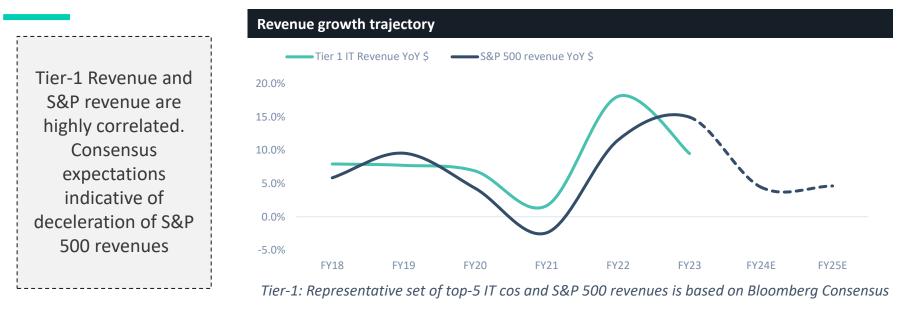

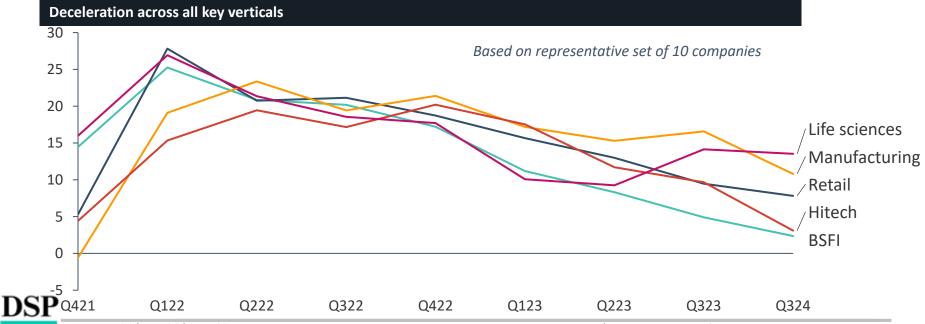

Although the EBITDA margin remained above its 5-year average level, it experienced a decline both year-onyear and sequentially. This decline can be attributed to various factors such as heightened competition, challenges in execution, rising costs, and a resurgence of imports from China.

**DSP** Sales and EBITDA margins is based on 22 companies

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 31 not have any future position in these sector(s)/stock(s)/issuer(s).

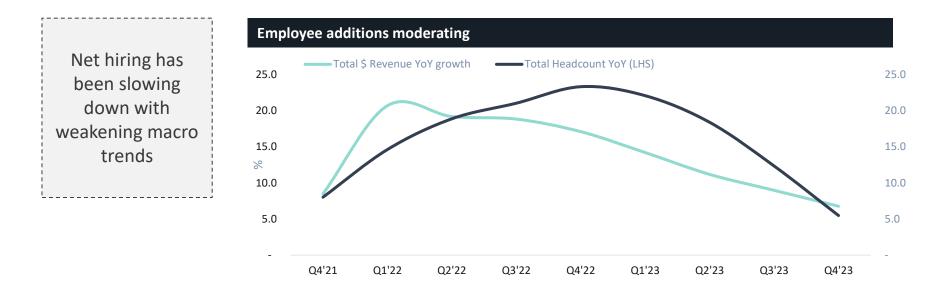

# IT Services: Moderation is visible across all key parameters

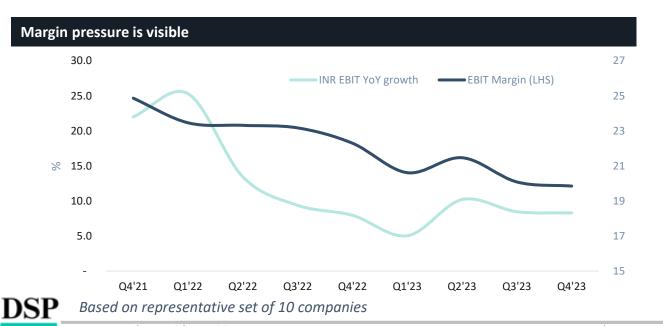

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may <sub>32</sub> not have any future position in these sector(s)/stock(s)/issuer(s).

# **IT Services: Margin pressure is visible**

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may <sub>33</sub> not have any future position in these sector(s)/stock(s)/issuer(s).

# Life Insurance: Non-par segments drives Value of new business(VNB)

Strong quarter driven by taxation-changeled higher-ticket nonpar product sales, however, creates high base for FY24 (excl. SBI Life)

DSP

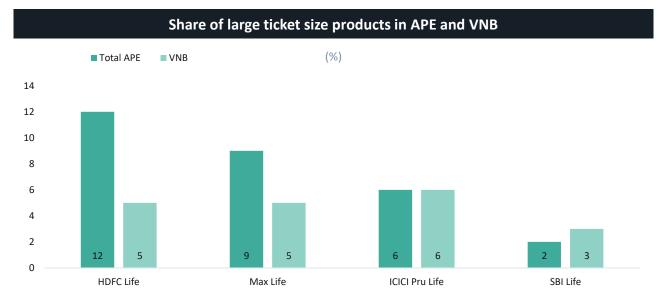

| Key parameters – 4 yr CAGRs |              |       |
|-----------------------------|--------------|-------|
| Parameters                  | FY23         |       |
|                             | FY19-23 CAGR | YoY   |
| APE                         | 12.7         | 20.7  |
| VNB                         | 29.0         | 30.6  |
| Embedded Value              | 17.6         | 15.9  |
| <b>Retail Protection</b>    | 12.7         | 4.9   |
| Non par (Individual)        | 87.6         | 107.5 |
| ULIP                        | (2.0)        | (6.3) |

Focus on high margin non par segments results in VNB growth outpacing Annualised premium equivalent (APE) growth

### Based on IPRU Life, SBI Life, Max and HDFC Life.

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 34 not have any future position in these sector(s)/stock(s)/issuer(s).

# Life Insurance: Implied APE growth expectations are low

Average impact of large ticket product on APE and VNB is <8% and <5% respectively

Based on IPRU Life, SBI Life, Max and HDFC Life. For Max Life and SBI Life, impact on VNB are estimates.

DSP

\* Terminal growth expected based on price May 31,2023 assuming current VNB margin

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 35 not have any future position in these sector(s)/stock(s)/issuer(s).

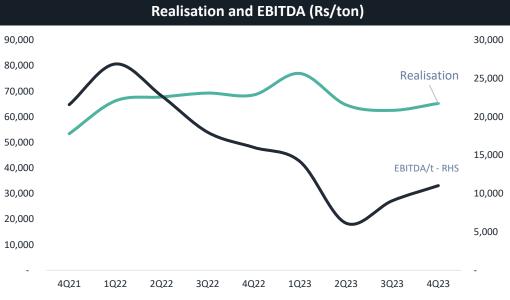

Average volumes grew by 12% qoq and 18% yoy. 4Q is traditionally a strong quarter

4Q23 blended realisations improved 4% largely driven by improvement in flats. Further aided by operating leverage overall EBITDA/t jumped 22% sequentially.

Spot steel realisations fell 4% over 4Q average. However, iron ore/coking coal moderated 13%/40% implying EBITDA/t on spot basis is better than 4Q avg which will reflect with a lag

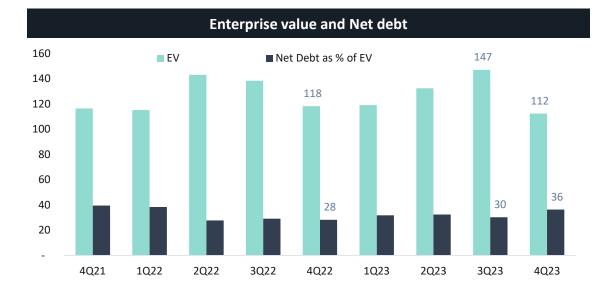

DSP

Based representative set of 4 steel companies

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may<sub>36</sub> not have any future position in these sector(s)/stock(s)/issuer(s).

# Metals (Steel): Leverage remains manageable

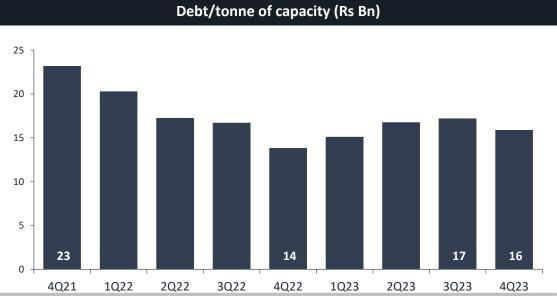

While the cumulative debt of top 4 Cos fell 8% sequentially; Fall in market cap was sharper due to demand concerns in China and deteriorating macro environment, leading to higher Net Debt to EV ratio

Industry average for Net Debt/tonne of capacity has declined sequentially (YoY most of steel mills suffered working capital increase) as well as on longer term; an indication that future expansion are largely sustained through internal cash flow

DSP

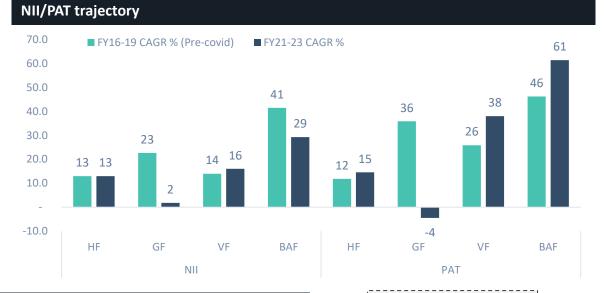

Based representative set of 4 steel companies

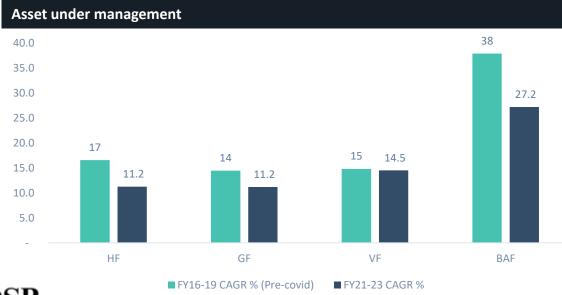

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 37 not have any future position in these sector(s)/stock(s)/issuer(s).

# NBFC: Steady operating performance

Benign credit cost in FY23 results in higher PAT CAGR vs Pre-Covid (except for Gold Fin where yields have come down)

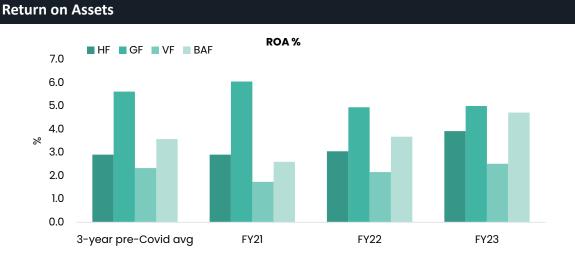

**DSP** Representative set of 15 NBFCs, HFs: Housing finance companies, VF Vehicle Finance, GF: Gold Finance and BAF Bajaj Finance Source Company Disclosures The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may and have resulting in these context(c) (stock(s)/issuer(s))

not have any future position in these sector(s)/stock(s)/issuer(s).

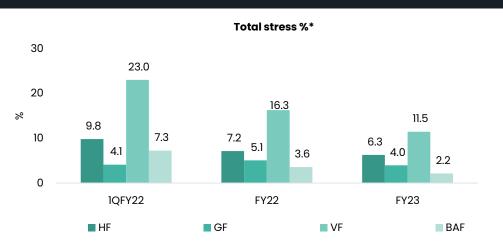

## **NBFC: Overall stress is moderating**

FY23 ROA above pre-covid (except for Gold), mainly on the back of below normalized credit cost

Total stress

DSP

Overall stress has depleted meaningfully from the peak and now at pre-covid levels in most segments

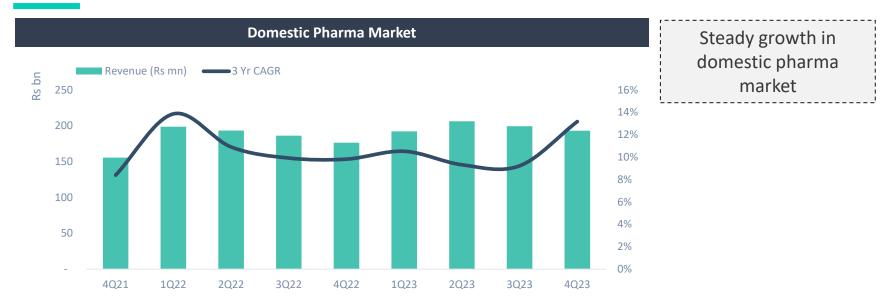

#### \* Total Stress = Stage 2 + Stage 3

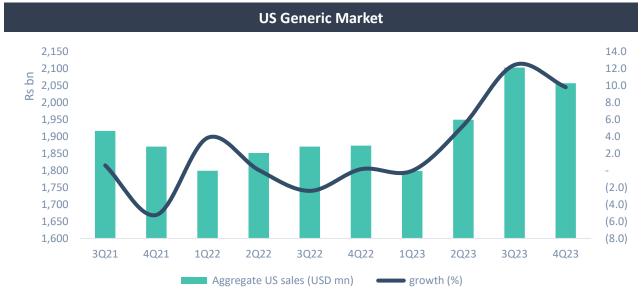

Representative set of 15 NBFCs, HFs: Housing finance companies, VF Vehicle Finance, GF: Gold Finance and BAF Bajaj Finance

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 39 not have any future position in these sector(s)/stock(s)/issuer(s).

## Pharma: India growth steady, exclusivities drive traction in US

Revlimid has driven growth across the US portfolio for last couple of quarters

\*Representative set of 18 Pharma companies

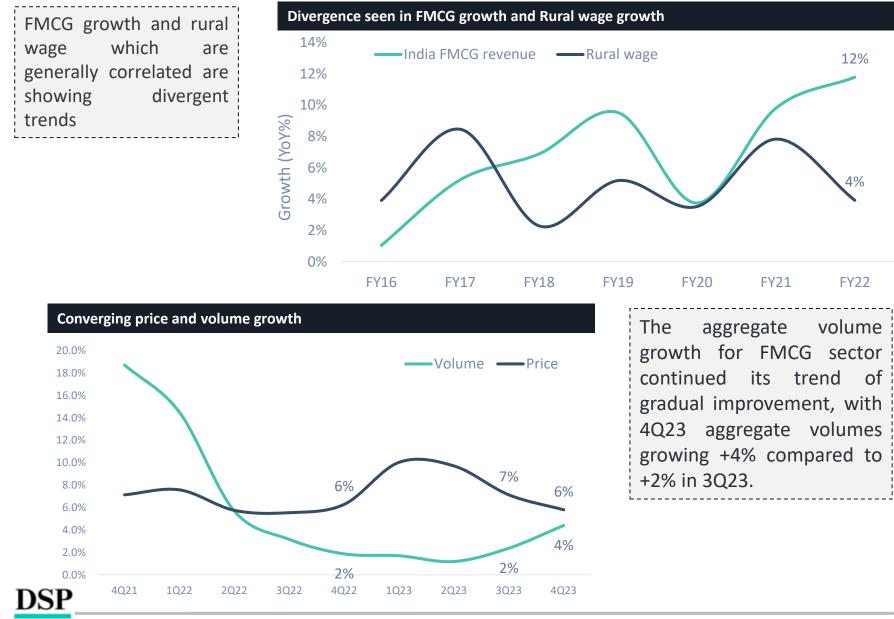

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 40 not have any future position in these sector(s)/stock(s)/issuer(s).

The sector(s)/stock(s)/issuer(s) mentioned in this presentation do not constitute any research report/recommendation of the same and may or may 41 not have any future position in these sector(s)/stock(s)/issuer(s).

# Staples: Volumes and pricing growth is converging

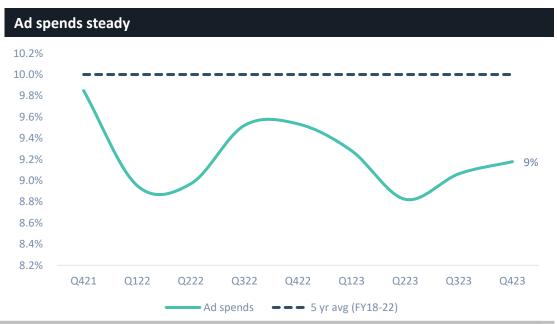

Based on a representative set of 11 FMCG companies

# Staples: Gross margins improving with easing commodity pricing

Advertisement spends are still steady however remain below the 5-year averages

DSP

### **SUMMING UP...**

### **KEY HIGHLIGHTS**

- ROE and operating margins are deteriorating at the margin. Ex commodity ROE remain healthy at +15%
- Balance sheet weakens marginally with rising debt
- Free cashflow generation has improved for most sectors.
- Working capital cycle remains under control
- Corporate capex revives
- Profit pools shifting away from commodities to Industrial and Consumer discretionary

### SECTORAL TRENDS

- Financials deliver robust earnings with an improving yield and benign credit costs.
- Capital goods witnessed record order inflows, but earnings growth expectation & valuation appear lofty.
- IT companies are witnessing deceleration in operating trends.
- The valuations overall appear extended, with only a few sectors like Insurance, NBFC, healthcare, and banks trading at or below pre-covid averages.
