II. MARKET REVIEW

a. Bond Market: 2015 - 16

The short maturity bond yields declined further in Financial Year 2016 as the Reserve Bank of India maintained its easing bias and reduced the Repo Rate further by additional 100 basis points through the financial year.

The first quarter of the financial year witnessed sluggish movement in government bond yields as market participants braced for a sub-par monsoon and its likely negative impact on food prices. However, the government's timely measures to address supply-side concerns as well as lower-than-expected increase in the minimum support prices (MSP) for paddy managed to contain food inflation.

The second quarter of the financial year witnessed a sharp fall in crude prices. Crude oil prices fell from around \$60 per barrel at the beginning of the quarter to a low of \$40 per barrel amid a significant supply-demand mismatch in the commodity complex and sharp reduction in consumption from China. This caused producer prices, which were already exhibiting a deflationary trend, to fall further. India's wholesale price index, a measure of producer prices, suggested that the index fell from around -2% year on year in June 2015 to around -5% year on year in August 2015.

The third quarter of the financial year witnessed a larger-than-expected cut of 50 basis points in the Repo Rate to 6.75% by the RBI. The RBI's decision to frontload a large rate cut contributed to some improvement in sentiment amid a sharp increase of balance-sheet stress of commodity-related entities and PSU banks due to rising NPAs and resultant weakening of the credit profile for some of these players. This contributed to widening of credit spreads for some entities with long-term credit rating below AA.

The government bond yield curve steepened in the second-half of the financial year amid a sudden increase in the supply of State Development Loans (SDL) to finance the borrowings of their power distribution companies (Discom) under the government sponsored plan (UDAY).

Yields of government bonds with maturity above 20 years hardened as market participants found more value in State Development Loans. This is despite the RBI commencing the much anticipated government bond purchases from the secondary market. Thus, the RBI infused around ₹ 85,000 crore of liquidity in the banking system in the second-half of the Financial Year 2016 with the aim of improving banking system liquidity.

Long-term government bond yields declined sharply from February 29, 2016 onwards after the Finance Minister announced in the Budget that he would be maintaining the 3.5% fiscal deficit target for Financial Year 2017 in the Union Budget, as against market expectations of an upward revision in the fiscal deficit target in order to support counter-cyclical government spending amid indications of a decline in private sector spending. The benchmark 10Y government bond yield declined from a peak of around 7.87% ahead of the Union Budget to close the year at around 7.47% on March 31, 2016. The benchmark 30Y government bond yield declined by around 58 basis points to close the year at around 7.92% on March 31, 2016.

Liquid, Ultra-Short-Term, Short Term and Credit Opportunities Funds, which generally maintain their average maturities up to 5 years, benefited from the decline in the yields. These category of funds generated average returns ranging from around 8% to 8.7% on a one-year basis as on March 31, 2016. At the same time, income funds, dynamic funds and gilt funds underperformed these funds due to unanticipated steepening of the yield curve. These category of funds generated average returns between 5.6% to 6.1% on a one-year basis as on March 31, 2016.

b. Equity Market: 2015 - 16

In the financial year 2015-16, the S&P BSE SENSEX Index was down around -9.4% in INR terms and -14.62% in USD terms. After a stellar performance in 2014, Indian equities got off to a flying start in 2015 with the S&P BSE SENSEX and Nifty 50 indices soaring to new highs in March 2015. Positive global cues (expected QE in the Euro zone and accelerating growth in the US), surprise rate cuts by the Reserve Bank of India (RBI) and India's sovereign rating outlook upgrade (to positive from stable) in March enthused market participants. The government showed its commitment on economic reforms by taking the ordinance route to make tough decisions (mining and coal auctions) due to the lack of majority in the Upper House of the Parliament. The government's Budget (2015-16) was a well balanced document with a clear focus on reviving economic growth (through investments), simplifying the current tax regime, attracting capital, both domestic and foreign. The Finance Minister laid out a clear roadmap with a particular focus on infrastructure, fiscal consolidation, ease of doing business and empowerment of states. The positive momentum however reversed post the March peak with the unfolding of events, both domestically and globally. Weakness in the Chinese stock market, Yuan devaluation, nervousness around the Fed interest rate lift-off and risk of a global growth slow-down impacted equity markets across the globe, India was no exception. Below normal monsoons and weak quarterly earnings (June and September quarter earnings) weighed on market

sentiment. However, the government continues to be on the path of policy reforms, Steps taken by the government to contain inflation (limit minimum support prices (MSP) to 5%, direct cash transfers of subsidies, actively use buffer food grain stock) led to a sharp fall in food inflation over the last fifteen months, resulting in a better than expected outcome on CPI and WPI. This helped the RBI to cut interest rates further, with a cumulative decline of 125 bps for the period under review.

III. INVESTMENT OBJECTIVES & PERFORMANCE OF THE SCHEMES

Investment Objectives, one year and since inception performance vis-à-vis its benchmarks, closing Assets under Management ('AuM') as on March 31, 2016 for all open ended schemes of the Fund and DSP BlackRock 3 Years Close Ended Equity Fund are given in Annexure IA to this Report. Investment Objectives, one year and since inception performance vis-à-vis its benchmarks, closing Assets under Management ('AuM') as on March 31, 2016 for all Fixed Maturity Plans, Fixed Term Plans and Dual Advantage Funds are given in Annexure IB to this Report.

IV. BRIEF COMMENTARY ON ONE YEAR AND SINCE INCEPTION SCHEME PERFORMANCE

A. EQUITY SCHEMES

- a. **DSP BLACKROCK EQUITY FUND:** The scheme underperformed its benchmark (Nifty 500 Index) over the last financial year. The underperformance was mainly due to sector selection. The sector positions which aided relative performance were overweight positions in materials, consumer discretionary, utilities along with underweight positions in financials and telecom. Underweight positions in consumer staples, healthcare and information technology detracted from relative performance. The scheme has outperformed its benchmark since inception.
- b. **DSP BLACKROCK TECHNOLOGY.COM FUND:** The scheme outperformed its benchmark (S&P BSE TEcK Index) over the last financial year. The outperformance can be attributed to the scheme's overweight position in information technology, along with an underweight position in the telecom sector. The scheme also outperformed its benchmark since inception.
- c. **DSP BLACKROCK OPPORTUNITIES FUND:** The scheme outperformed its benchmark (Nifty 500 Index) over the last financial year. Stock selection and sector allocation both aided the scheme's relative performance versus its benchmark. The sector positions which added to relative performance were overweight in materials, energy, healthcare and consumer discretionary. The scheme also outperformed its benchmark since inception.
- d. **DSP BLACKROCK TOP 100 EQUITY FUND:** The scheme marginally outperformed its benchmark (S&P BSE 100 Index) over the last financial year. The outperformance was mainly due to the scheme's stock selection, while sector allocation was a detractor. Overweight positions in financials, energy and consumer discretionary along with underweight positions in materials, telecom and utilities positively impacted performance. The scheme also outperformed its benchmark since inception.
- e. **DSP BLACKROCK INDIA T.I.G.E.R. FUND (The Infrastructure Growth and Economic Reforms Fund):** The scheme underperformed its benchmark (S&P BSE 100 Index) over the last financial year. The underperformance can largely be attributed to the scheme's underweight positions in information technology and consumer staples (which are outside the ambit of the scheme's investment objective). The scheme's overweight positions in energy and materials, and underweight positions in financials and telecom aided relative performance. The scheme has outperformed its benchmark since inception.
- f. **DSP BLACKROCK SMALL AND MID CAP FUND:** The scheme outperformed its benchmark (Nifty Free Float Midcap 100 Index) over the last financial year. The outperformance was mainly due to the scheme's stock selection. The sector positions which added to relative performance were overweight positions in consumer discretionary, industrials and financials, along with stock specific underweight positions in utilities and energy sectors. The scheme also outperformed its benchmark since inception.
- g. **DSP BLACKROCK TAX SAVER FUND:** The scheme significantly outperformed its benchmark (Nifty 500 Index) over the last financial year. The outperformance was predominantly driven by stock selection. The sector positions which added to relative performance were overweight positions in energy, consumer discretionary, materials and industrials while underweight positions in financials and telecom also aided relative performance. The scheme also outperformed its benchmark since inception.
- h. **DSP BLACKROCK MICRO CAP FUND:** The scheme significantly outperformed its benchmark (S&P BSE Small Cap) mainly driven by superior stock selection. Stocks within the materials, chemicals, industrials and information technology sectors positively impacted performance. The scheme has outperformed its benchmark since inception.
- i. **DSP BLACKROCK NATURAL RESOURCES AND NEW ENERGY FUND:** The scheme outperformed its benchmark (Composite Benchmark

comprising 35% S&P BSE Oil & Gas Index, 30% S&P BSE Metals Index, 35% MSCI World Energy Index 10/40 Net Total Return – Net & Expressed in INR; Normalised values) over the last financial year. Stock specific overweight positions in downstream energy and gas utility companies positively contributed to performance. The scheme also outperformed its benchmark since inception.

- j. **DSP BLACKROCK FOCUS 25 FUND:** The scheme outperformed its benchmark (S&P BSE 200 Index) over the last financial year. The outperformance was predominantly driven by stock selection. Stocks within the consumer discretionary (mainly commercial vehicles and two wheelers), consumer staples, and downstream energy companies positively contributed to performance. The scheme also outperformed its benchmark since inception.
- k. **DSP BLACKROCK 3 YEARS CLOSE ENDED EQUITY FUND:** The scheme outperformed its benchmark (Nifty 500 Index) over the last financial year. The outperformance was mainly due to stock selection within materials, consumer discretionary and financials sectors.
- l. **DSP BLACKROCK EQUITY SAVINGS SCHEME FUND:** The scheme was launched on March 8, 2016 and units were allotted on March 28, 2016. The portfolio was under construction till March 31, 2016.

B. FUND OF FUNDS SCHEMES

- a. **DSP BLACKROCK WORLD GOLD FUND:** The scheme underperformed its benchmark (FTSE Gold Mines Index) over the last financial year and has outperformed its benchmark since its inception. The performance over this period was dominated by the final three months during which, the underlying scheme underweight to some of the more gold price sensitive, higher beta companies, detracted significantly from relative performance. Among those was its underweight position in Barrick Gold, one of the major gold miners. The company showed considerable sensitivity to the change in the gold price (rallying +153% over the 6 months), likely due to the company's significant financial leverage. During the period the company recorded solid operating results; cost guidance for 2016 was adjusted lower, given the favourable foreign exchange and fuel price movements while production guidance was maintained.
- b. **DSP BLACKROCK WORLD ENERGY FUND:** The scheme underperformed its benchmark (Composite Benchmark = 70.00% MSCI World Energy 10/40 Net Total Return & 30.00% MSCI World (Net) - Net & Expressed in INR; Normalised Values) over the last financial year. The scheme also underperformed its benchmark since inception. Underperformance in the underlying scheme was primarily driven by a negative effect from sub-sector allocation. Early in the period, it was our view that the oil market was starting to react meaningfully to lower prices and the rebalancing process was underway, with US production showing signs of wavering. On the back of this view, we increased the portfolio's oil price sensitivity, adding to our overweight to E&Ps and increasing our underweight to integrated. As the period progressed the recovery proved slower than expected, largely due to higher-than-expected supply from within OPEC, and the oil price sensitivity we added to the portfolio early in the period detracted from relative performance. Overweight positions in E&Ps Devon Energy, Marathon Oil and Encana were all among the worst performers.
- c. **DSP BLACKROCK WORLD MINING FUND:** The scheme underperformed its benchmark (Euromoney Global Mining Constrained Weights Net Total Return Index) over the last financial year. The scheme also underperformed its benchmark since inception. Performance of the underlying scheme was primarily driven by positive sub-sector allocation during the period; for example, the fund's underweight to both the coal sub-sector and the diversified mining companies contributed to positive relative returns. However, stock selection had a negative impact leading to overall underperformance.
- d. **DSP BLACKROCK WORLD AGRICULTURE FUND:** The scheme outperformed its benchmark (DAX Global Agribusiness Index) over the last financial year. The scheme has outperformed its benchmark since inception as well. The underlying fund's performance was driven by sub-sector allocation as stock selection had a negative impact. The fund's downstream bias was the key positive contributor as crop prices remained under pressure. Downstream agricultural companies such as grain handlers and protein producers are able to benefit from higher crop volumes and lower prices. Overweights to the protein producers, supply chain and health & wellness sub-sectors notably benefitted relative performance.
- e. **DSP BLACKROCK US FLEXIBLE EQUITY FUND:** The scheme underperformed its benchmark (Russell 1000 Index) over the last financial year. The scheme has outperformed its benchmark since inception as well. The underlying scheme's exposure to financials was the prime detractor from performance due to weakness among bank holdings. The scheme underweights to telecommunication services and utilities weighed on relative returns as the defensive sectors were key beneficiaries during the recent market tumult. Information technology (IT) selection was an additional drag for the fund. On the positive side, a consumer staple was the main contributor to relative performance.

- f. **DSP BLACKROCK DYNAMIC ASSET ALLOCATION FUND:** The scheme outperformed its benchmark (CRISIL Balanced Fund – Aggressive Index) during the last financial year, but is underperforming the benchmark since its inception. The scheme uses the yield gap model to allocate assets between equity and debt. Based on this model, the recommended asset allocation of the scheme (as of March 31, 2016) is as follows: Equity 40%, Debt: 60%. The equity allocation of the scheme been invested in DSP BlackRock Equity Fund and DSP BlackRock Top 100 Equity Fund and the debt allocation of the scheme has been invested in DSP BlackRock Short Term Fund, DSP BlackRock Strategic Bond Fund and DSP BlackRock Money Manager Fund. The equity allocation, which was maintained at 10% till August, 2015 increased to 40% by September, 2015. The primary reason for the scheme's outperformance versus the benchmark has been the relatively lower equity allocation maintained by the scheme in a declining equity market during the early part of the financial year.
- g. **DSP BLACKROCK GLOBAL ALLOCATION FUND:** The scheme underperformed its benchmark (Composite Benchmark = (36% S&P 500 Composite; 24% FTSE World (ex-US); 24% ML US Treasury Current 5 Year; 16% Citigroup Non-USD World Government Bond Index) ; Normalised Values) during the last financial year. The scheme also underperformed its benchmark since inception. The underlying scheme underweight to fixed income has been one of the primary detractors. Currency management, notably an overweight to the US dollar, also detracted from performance. Within equities, an overweight to Japan and an underweight to the United States also detracted from performance. From a sector perspective, stock selection in information technology (IT), industrials, financials, consumer discretionary and telecommunications services, as well as an underweight to consumer staples, negatively impacted performance. Within equities, an overweight to precious metals, notably gold mining companies, positively contributed to performance.

C. HYBRID SCHEMES

- a. **DSP BLACKROCK BALANCED FUND:** The scheme outperformed its benchmark (CRISIL Balanced Fund Index - Aggressive Index) over the last financial year. Since inception performance comparison with the benchmark is not available as the Crisil Balanced Fund Index was not available at the time of inception of the fund. The current benchmark for the fund (CRISIL Balanced Index) was not in existence and therefore Stock specific overweight position in discretionary, financials, healthcare along with an underweight in staples positively contributed to performance.
- b. **DSP BLACKROCK MIP FUND** (Monthly income is not assured and is subject to availability of distributable surplus): The scheme underperformed its benchmark (CRISIL MIP Blended Index) during the financial year. The underperformance was mainly driven by stock specific overweight position in industrials, materials and financials. Since inception, the scheme has outperformed its benchmark.

D. INCOME SCHEMES

- a. **DSP BLACKROCK BOND FUND:** The scheme underperformed its benchmark (CRISIL Composite Bond Fund Index) in the last financial year. The schemes underperformance can be attributed to maintaining a very high credit quality portfolio and to an unexpected steepening of yield curve at the longer end. The first NAV of the scheme was released on April 29, 1997 whereas the scheme's benchmark, CRISIL Composite Bond Fund Index was launched on March 31, 2002. Hence it is not possible to compute benchmark relative performance since the inception of the scheme. However amongst the peer group, this scheme has good relative performance.
- b. **DSP BLACKROCK LIQUIDITY FUND:** The scheme outperformed its benchmark (CRISIL Liquid Fund Index) in the last financial year. The scheme had invested in liquid money market instruments such as bank Certificate of Deposit, Commercial Papers and Treasury Bills with residual maturity within 91 days. The scheme outperformed its benchmark since inception.
- c. **DSP BLACKROCK GOVERNMENT SECURITIES FUND:** The scheme underperformed its benchmark (CRISIL Long Term Gilt Index) in the last financial year. The scheme's underperformance can be attributed to unexpected steepening of yield curve at the long end.
- d. **DSP BLACKROCK TREASURY BILL FUND:** The scheme marginally underperformed its benchmark (CRISIL Composite T-Bill Index) in the last financial year. The scheme's underperformance was mainly due to its relatively lower average maturity during the financial year. This scheme cannot buy securities beyond 364 days whereas most of the competing schemes have portfolio holdings in the 2 to 5 year segment of dated government securities. However the scheme outperformed its benchmark since inception.
- e. **DSP BLACKROCK SHORT TERM FUND:** The scheme outperformed its benchmark (CRISIL Short Term Bond Fund Index) in the last financial year. Its outperformance can be attributed to a mix of high quality and higher yielding corporate bonds, money market instruments and government bonds. In April 2014 the fundamental attribute of the scheme was changed pursuant to which the scheme seeks to maintain weighted average maturity in band of 1 year to 3 years. The scheme outperformed its benchmark since inception.

- f. DSP BLACKROCK INCOME OPPORTUNITIES FUND:** The scheme outperformed its benchmark (50% CRISIL Short Term Bond Fund Index + 50% CRISIL Composite Bond Fund Index) in the last financial year. Its outperformance can be attributed to a mix of high yielding corporate debt and liquid corporate debt and money market instruments. In April 2014 the fundamental attribute of the scheme was changed pursuant to which the scheme seeks to maintain weighted average maturity in band of 3 years to 5 years. The scheme also outperformed its benchmark since inception.
- g. DSP BLACKROCK MONEY MANAGER FUND:** The scheme outperformed its benchmark (CRISIL Liquid Fund Index) in the last financial year. Its outperformance can be attributed to its positioning on the money market yield curve. The scheme's conservative rating profile and relatively lower average maturity also contributed to its out performance. The scheme also outperformed its benchmark since inception. In April 2014 the fundamental attribute of the scheme was changed pursuant to which the scheme seeks to maintain weighted average maturity of less than or equal to 6 months.
- h. DSP BLACKROCK STRATEGIC BOND FUND:** The scheme underperformed its benchmark (CRISIL Composite Bond Fund Index) in the last financial year. The scheme's underperformance can be attributed to unexpected steepening of the yield curve at the long end. The scheme invested in liquid long-term government and corporate bonds. The scheme marginally underperformed its benchmark since inception.
- i. DSP BLACKROCK BANKING & PSU DEBT FUND:** The scheme has marginally underperformed its benchmark (CRISIL Short Term Bond Fund Index) in the last financial year. The scheme's underperformance can be attributed to investments being made in PSU bonds and no exposure in the NBFC segment which is a part of the benchmark. The scheme invests predominantly in money market instruments and bonds issued by Public Sector Undertaking (PSU), bank CDs and bank bonds, which have higher credit quality but have lower credit spreads over securities, which are part of CRISIL Short Term Bond Fund Index. Please note that the benchmark has no asset class constraints. There is no comparable benchmark for this scheme, which invests only in Banking and PSU debt securities. This asset allocation constraint is also responsible for scheme's marginal underperformance over its benchmark since inception.
- j. DSP BLACKROCK CONSTANT MATURITY 10Y G-SEC FUND:** The scheme was launched in September 2014. The performance of the scheme is benchmarked against the CRISIL Long Term Gilt Index. The scheme invests in government bonds with residual maturity between 8 years and 12 years. The normal range of weighted average maturity of the scheme shall be maintained in range of 9 years to 11 years. The scheme provides a low cost and passive investment management solution to investors seeking exposure to 10-year part of Indian government bonds. A passive product is expected to underperform its benchmark after expenses as the benchmark's performance is computed on a gross basis i.e. there are no expenses in benchmark return computation. The scheme marginal underperformed its benchmark in the current financial year and since inception.
- k. DSP BLACKROCK ULTRA SHORT TERM FUND:** The scheme was launched in March 2015. The performance of the scheme is benchmarked against 50% of CRISIL Composite CP Index + 50% of CRISIL Composite CD Index. The scheme typically invests in money market instruments and corporate debt securities. The scheme seeks to maintain weighted average maturity of its portfolio in a band of six months to 1 year. The scheme outperformed its benchmark in the current financial year and since inception.

E. FIXED MATURITY PLANS/ FIXED TERM PLANS/DUAL ADVANTAGE FUNDS (CLOSE-ENDED SCHEMES):

DSP BlackRock Mutual Fund successfully launched Fixed Maturity Plans (FMPs), Fixed Term Plans (FTPs) and Dual Advantage Funds (DAFs), during the Financial Year 2015-2016. Details of these Schemes are given in Annexure II. FMPs, FTPs and DAFs performed satisfactorily and in accordance with expectations at the time of their launches. However, their performance comparison with their respective benchmarks may vary depending on their tenor, portfolio construction, rating profile as well as sector allocation. Some of the maturing FMPs & DAFs were extended for an additional two year period with the consent of the unitholders.

V. FUTURE OUTLOOK

a. Bond Market

We expect government bond yields to trend lower, albeit in a gradual manner. We expect the Reserve Bank of India to reduce the Repo Rate by additional 25 basis points to 6.25% by Q3 of FY17, in order to increase the growth momentum in the economy.

We expect the RBI to play an important role in managing supply-demand outlook for government & SDL bonds. We also expect the RBI to focus more on strengthening of banking system balance sheets and transmission of previous rate cuts. Market participants also expect a normal monsoon in FY17 after two consecutive below-normal monsoons.

A normal monsoon is expected to accelerate economic growth and support

the consumption cycle while having a positive impact on the rural economy. This can have a multiplier impact on the economy.

On the global economic landscape, we continue to expect uneven an economic recovery. While the US economic recovery is likely to continue, major economies in Europe and Asia are still facing deflationary pressures. We expect the Fed to raise rate twice in 2016. We also expect a gradual improvement in the overall economic outlook for the European and Asian economies later this year.

On inflation, we expect headline consumer inflation to remain range-bound and average around 5%-6% in FY17 assuming that crude oil prices average around \$50 for the year. This is within the +/- 2% band of 4%, which RBI is comfortable with. Also the RBI focus will shift to monetary transmission after the rate cuts in FY16. RBI is looking to bring INR liquidity to the neutral zone after being in deficit of -1% NDTL in the previous year.

RBI has already shown its commitment by conducting OMO purchase of government bonds in Q1 FY 17. Special NRI deposits of ~US\$25bn issued during the "taper tantrum" start maturing from September 2016. We expect the RBI will be able to minimize any resultant FX and rates volatility. The RBI has built up net dollar purchases in the forward market to cover any possible shortage in dollars.

A stable inflationary outlook along with the RBI's OMO bond purchases will likely bode well for the bond market, in our opinion. We expect fixed income funds with residual maturities up to 5 years to do well in FY17, amid a gradual decline in bond yields and prospects of a steeper yield curve.

b. Equity Market

We expect India's GDP growth to remain on an uptrend driven by a pick-up in public capex (predominantly roads, power and railways), consumption (rural and urban) and a lower drag from exports (linked to global growth). After two consecutive years of below par monsoons, the Indian MET department and a private weather forecaster have predicted above normal monsoons (109% of long period average) which should bode well for inflation and create more room for easing by the RBI. This would also aid in the revival of rural demand, which has been subdued for some time now. We expect CPI inflation to remain around 4.5% by March 2017. On the policy front, the Parliament passed the much awaited Bankruptcy and Insolvency bill in the second phase of the budget session. Broadly, we are optimistic about the policy actions taken by the Government during the last 24 months and we believe these will start bearing fruit over the next few quarters. INR continues to remain one of the better performing currencies amongst emerging markets. The last three years have seen below average corporate earnings growth driven by metals, state owned banks and capital goods. The decline in wholesale price inflation has also impacted nominal growth, which feeds into earnings. However, we expect earnings growth to recover in FY17 & FY18 and average 17-18% per annum. At 16.4x FY2017 earnings, the Sensex is trading near its long term average. We strongly believe that the Indian economy is on the cusp of a strong growth uptrend that could herald 7-8% GDP growth p.a. over the next 5-10 years. Pick up in corporate earnings growth, decline in interest rates and expanding return on equity (ROE) for corporate India should be the key drivers for equity market returns in the medium to long term.

VII. BUSINESS OPERATIONS

Average Assets under Management of the Fund for the quarter ended March 31, 2016 stood at ₹ 37,710.75 crore. The Fund managed 31 open ended schemes and 51 close ended schemes as on March 31, 2016.

During the financial year 2015-2016, following Equity, FMPs & DAFs scheme were launched by the Fund:

| Sr. No. | Name of the Scheme | NFO launch date | Subscriptions received in NFO (₹ in crs) |

| 3 | DSP BlackRock FMP – Series 195 – 36M | 11-Feb-16 | 45.90 |
| 4 | DSP BlackRock Dual Advantage Fund – Series 44 – 39M | 30-Mar-16 | 46.93 |
| 5 | DSP BlackRock Equity Savings Fund | 08-Mar-16 | 153.77 |

VII. INVESTOR SERVICES

The Fund services a client base of more than 3 million accounts across India through its 39 offices and 200 Investor Service Centres (ISCs) of its Registrar and Transfer Agent, Computer Age Management Services Pvt. Ltd. (CAMS). Additionally four dedicated Call Centres at Chennai, New Delhi, Ahmedabad and Mumbai offer continuous and uninterrupted services to investors and distributors.

The Fund is constantly striving to provide convenient product & features to investors for smooth execution of transactions and to provide information in a systematic and efficient manner.

For the convenience of investors, the AMC initiated various new service facilities during the year. A few are enumerated below:

- SIP Registration process was simplified with the introduction of NACH mandates as per the circular issued by National Payment Corporation of India. A onetime registration of NACH mandate allows investors to register future SIPs within a period of 10 to 15 days as against 30 days earlier. Investors

may recall that the fund was the first to introduce One Time Mandate (OTM) facility in 2013 which helps investors to invest or start a SIP through a call or SMS or an application without the need of a cheque.

- The fund introduced three new dates in SIP/STP facility to offer more convenience and choice to investors. These new dates are 10th, 15th and 25th of the month taking the available SIP/STP dates to 8 dates in a month.
- The fund also introduced SIP Top Up facility to provide flexibility to investors to increase the SIP instalments amount over the tenure of the SIP. This would help investors to contribute higher amounts in future as their income level rises, without the need of registering new SIPs every year.
- To cater to specific needs of investors and provide more options apart from fixed monthly instalments, the fund introduced new STP variants viz. Flex STP and Value STP. These facilities enable the investors to transfer varying instalment amounts based on their needs.
- Similarly, daily STP has been introduced for investors who wish to transfer their investments to a fund of their choice during a period of volatility in the stock market.
- Account statement of the fund now displays SIP registrations. This will enable investors to keep a track of all systematic investments, keep an eye on the end date and act timely for renewals.
- To help investors and mutual fund distributors effectively use the strong network and reach of stock exchange platforms and also keep transaction handling simpler, the fund enabled transactions in physical and dematerialisation mode from mutual fund distributors using this platform.
- Introduction of a new online platform 'iFAXpress', which is a convenient way to manage and transact in mutual funds by financial advisors on behalf of investors. Proposed transactions initiated on behalf of investors are emailed to them, which can be approved in just three clicks. This has resulted in paperless transactions with no more signature mismatches.
- Introduction of a Virtual Mobile Number 9266277288 to enable investors to send SMS transactions which are charged at normal rates instead of premium rates. Further, this number can even be used by investors residing outside India to transact through SMS.
- Communications are sent to investors & distributors informing them on the forthcoming maturities in closed ended schemes which helps and enables investors to do a timely switch of their investments into other schemes and manage their inflows and investment portfolio.
- Informing investors through our dedicated contact centre on SIP maturities, enabling them to renew their SIPs by simply confirming their details to the contact centre. Also informing investors on signature mismatch for redemptions which helps them approve transactions over phone or providing necessary documentation for remediation.
- To keep investors informed about the latest services and product related features, a regular calling activity has been initiated through our dedicated contact centre.
- Pursuant to Foreign Account Tax Compliance Act, Common Reporting Standard, Ultimate Beneficial Owner becoming mandatory for investors, communications was sent to all the investors through emails and letters informing them about the new regulations, rules, requirements, and seeking additional information required to be provided by different categories of investors to ensure compliance.

VIII. INVESTOR COMPLAINTS

The Trustees were pleased to note that the grievances, complaints and queries of investors and distributors were resolved promptly by the Client Response Team of the AMC. There were 101 complaints received during the financial year 2015-16 which were all redressed within reasonable time. The statement giving details of redressal of complaints received during the financial year is given in Annexure III attached to this Report.

The Trustees strongly advise investors to regularly check their account statements issued by the Fund and inform the AMC should there be any difference in the investors' details or the transaction details as reflected in the account statement. Investors are requested to reconcile their bank account statements with the account statement sent by the Fund and contact the AMC in case of any non receipt of dividend / redemption proceeds. Investors can approach any of the AMC offices or contact the Call Centre for claiming the same.

We also advise investors to register their email address and mobile numbers to get alerts on their financial and non financial transactions. We take this opportunity to encourage investors to provide their valuable feedback by email at service@dspblackrock.com or call us on 1800 200 4499.

IX. SIGNIFICANT ACCOUNTING POLICIES

^Past performance may or may not be sustained in the future.

Above returns are compounded annualized (CAGR).

Returns are calculated on ₹ 10/- / ₹ 1000/- (as applicable) (allotment price per Unit) invested at inception viz. date of allotment. In case of Direct Plan, on the NAV of corresponding option(s) under Regular/Institutional Plan (under which the subscription/switch in/SIP/STP ins is available) at which first allotment was processed. The launch date is deemed to be the date of allotment /first day on which plan has received subscription.

* Returns are for Regular Plan - Growth Option for all schemes except for DSP BlackRock Equity Fund where returns are for Regular Plan - Reinvestment Dividend Option, DSP BlackRock Liquidity Fund and DSP BlackRock Strategic Bond Fund where returns are for Institutional Plan - Growth Option.

[§]The Institutional Plan under DSP BlackRock Strategic Bond Fund was launched on May 9, 2007, however inception returns have been calculated from November 12, 2008 as there were no investors in the Institutional Plan for a significant period before this date.

[#] For the schemes that has not completed one year, since inception returns are computed in absolute terms from the date of launch.

Performance has not been compared for periods where historical data for the adopted benchmark is not available.

^Past performance may or may not be sustained in the future.

Above returns are compounded annualized (CAGR).

Returns are calculated on Rs. 10/- (allotment price per Unit) invested at inception viz. date of allotment. The launch date is deemed to be the date of allotment /first day on which plan has received subscription.

* Returns are for Growth Option/ Regular Plan - Growth Option/Direct Plan - Growth Option.

** For the schemes that has not completed one year, since inception returns are computed in absolute terms from the date of launch.

##For schemes matured during the financial year, the one year returns are returns calculated for the one year period ending on the date of maturity and since inception returns are calculated from date of allotment till maturity date.

ANNEXURE V: PROXY VOTING POLICY

I. INTRODUCTION

The Corporate Governance Committee ('the Committee') of DSP BlackRock Investment Managers Pvt. Ltd. ('DSPBRIM'), Asset Management Company to DSP BlackRock Mutual Fund ('Fund'), inter alia addresses proxy voting issues on behalf of all the Schemes of the Fund. The Committee comprises of the President & Chief Investment Officer, Senior Fund Managers from the Investment team, Head of Risk, Chief Administrative Officer and the Compliance Officer. In keeping with its fiduciary responsibilities, the Committee reviews all proposals put up for voting even though they may be considered to be routine matters and exercises the votes in the best interest of its unitholders. Each proposal is considered based on the relevant facts and circumstances. From time to time, the Committee can avail/engage professional Proxy Voting advisory firms to obtain research and voting recommendations on resolutions proposed by investee companies. The Committee shall not be bound by the recommendations and shall act at its discretion keeping unitholders interest paramount. The Committee may deviate from the general policies and procedures when it determines the particular facts and circumstances that warrant such deviation to protect the interest of the unitholders.

II. PROXY VOTING POLICY

- A. Corporate Governance Matters (including changes in the state of incorporation, merger, acquisitions and other corporate restructuring and anti-takeover provisions) will be subject to careful review by the research analyst to determine whether they would be beneficial to shareholders. DSPBRIM will analyze various economic and strategic factors in making the final decision on a merger or acquisition resolution. Corporate restructuring proposals are also subject to a thorough examination on a case-by-case basis.
- B. Capital Structure: These proposals relate to various requests, principally from management, for approval of amendments that would alter the capital structure of the Company, such as an increase in authorized shares. As a general matter, DSPBRIM will support requests that it believes enhances the rights of common shareholders and oppose requests that appear to be unreasonably dilutive.
- C. Compensation and Benefits: We generally support proposals for employee equity compensation plans and other employee ownership plans provided our research does not indicate that approval of the plan would be against shareholder interest. These proposals concern those issues submitted to shareholders related to management compensation and employee benefits. As a general matter, we favor disclosure of a Company's compensation and benefit policies and oppose excessive compensation, but believe that compensation matters are normally best determined by a corporation's Board of Directors, rather than shareholders. Proposals to "micro-manage" a Company's compensation practices or to set arbitrary restrictions on compensation or benefits would therefore generally not be supported.
- D. Social and Corporate Social Responsibilities: These are shareholder proposals addressing either corporate social and environmental policies or requesting specific reporting on these issues. We generally do not support proposals on social issues that lack a demonstrable economic benefit to the issuer and the Fund investing in such issuer. DSPBRIM seeks to make proxy voting decisions in the manner most likely to protect and promote the long term economic value of the securities held in the scheme. We intend to support economically advantageous corporate practices while leaving direct oversight of the Company management and strategy to the Board of Directors. We seek to avoid micromanagement of Companies, as we believe that the Company's Board of Directors is best positioned to represent shareholders and oversee management on shareholders behalf. Issues of corporate social and environmental responsibility are evaluated on a case-by case basis within the framework.
- E. Board of Directors: DSPBRIM generally supports the Board's nominees in the election of Directors and generally supports proposals that strengthen the independence of the Board of Directors. As a general matter, we believe that a Company's Board of Directors (rather than shareholders) is most likely to have access to important, non-public information regarding a Company's business and prospects, and is therefore best-positioned to set corporate policy and oversee management. We therefore believe that the foundation of good corporate governance is the selection of responsible, qualified, independent corporate Directors who are likely to diligently represent the interest of the shareholders and oversee management of the corporation in the manner that will seek to maximize shareholder value over time. In individual cases, consideration

may be given to a Director nominee's history of representing shareholder interests as a Director of the company issuing the proxy or other companies, or other factors to the extent deemed relevant by the Committee.

F. Other issues

- (a) **Auditors:** These proposals concern those issues submitted to shareholders related to the selection of the auditors. As a general matter, we believe that corporate auditors have a responsibility to represent the interest of shareholders and provide an independent view on the propriety of financial reporting decisions of corporate management. While we will generally defer to a corporation's choice of auditor, in individual cases, consideration may be given to an auditors' history of representing shareholder interests as auditor of the Company issuing the proxy or other Companies, to the extent deemed relevant.
- (b) **Corporate Charter and By-Laws:** These proposals relate to various requests for approval of amendments to a corporation's charter or by-laws. We generally vote against anti-takeover proposals and proposals that would create additional barriers and costs to corporate transactions that are likely to deliver premiums to shareholders.
- (c) **Conflict of Interest and governance measures for investment in group companies of AMC and investment in companies that have subscribed to the units of any scheme of DSP BlackRock Mutual Fund (Fund):** DSPBRIM is an affiliate of a large, diverse financial services firm with many affiliates and makes its best efforts to avoid conflicts of interest. However, conflict of interest can arise in certain situations. Few examples of such situations are:
- Investee Company is a client of DSPBRIM or its affiliates
 - Investee Company is an entity participating to a material extent in the distribution of products managed or advised by DSPBRIM
 - Investee Company has subscribed to the units of any of the schemes of Fund. None of the schemes of the Fund shall invest in group companies of DSPBRIM. Further, DSPBRIM shall endeavour to resolve conflicts of interest in the interest of the unitholders. Nonetheless, even though a potential conflict of interest exists, DSPBRIM may vote in opposition to the recommendations of an investee company's management.
- (d) **Internal Control Mechanism:** Internal controls and checks are in place at various key steps in the process of exercise of votes as considered relevant/material by DSPBRIM. The Committee, periodically reviews the implementation of the policy and disclosure requirements.

III. REPORTS TO THE BOARD

DSPBRIM will report to the Trustee Company on proxy votes it has made on behalf of the Fund, at least annually.
