**2. Significant accounting policies****2.1 Basis of accounting**

The financial statements are prepared on the accrual basis of accounting, under the historical cost convention, as modified for investments, which are 'marked to market'. The financial statements have been prepared in accordance with the Regulations as amended from time to time. The accounting policies have been consistently applied by the fund.

- As per the Securities & Exchange Board of India (SEBI) (Mutual Funds) (Amendment) Regulations, 2012, issued on February 21, 2012, the Eighth schedule to the regulations was amended to include "Principles of Fair Valuation" which required the mutual funds to value their investments in accordance with the specified overarching principles so as to ensure fair treatment to all investors including existing investors as well as investors seeking to purchase or redeem units of mutual funds in all schemes at all points of time.

In compliance with the said amendments and based upon the valuation methodology suggested by AMFI Committee on Valuation (as a guiding principle) for valuing Debt and Money Market instruments, the Fund has changed the basis of determination of market price for valuation of debt and money market securities, effective April 26, 2012, (refer Note 2.5 Valuation of Investments)

**2.3 Determination of Net Asset Value ('NAV')**

- The net asset value of the units of the scheme is determined separately for the units issued under the plans.
- For reporting multiple net asset values within the portfolio, the scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses incurred, are allocated to the related plans in proportion to their respective net assets (net assets of previous day plus subscription less redemption for the day) of the plan.

**SCHEDULES FORMING PART OF THE BALANCE SHEET AS AT MARCH 31, 2015 AND THE REVENUE ACCOUNT FOR THE YEAR/PERIOD APRIL 01, 2014 / LAUNCH DATE OF THE SCHEME TO MARCH 31, 2015**

**2.4 Unit capital, unit premium reserve (UPR) and income equalisation reserve (IER)**

Unit capital represents the net outstanding units as at the Balance Sheet date.

Upon issue and redemption of units, the net premium is apportioned between UPR and IER in accordance with regulations and guidelines prescribed by the SEBI. When units are issued or redeemed, the distributable surplus is appropriated to / from the income equalisation reserve. Upon issue and redemption of units below par, the net discount is appropriated to income equalisation reserve in accordance with regulations and guidelines prescribed by the SEBI.

The purpose is to ensure that the per unit amount of the continuing unit holders' share of the undistributed income / loss remains unaffected by the movement in unit capital. At the year end, the balance in the income equalisation account is transferred to the Revenue Account.

**2.5 Investments**

**a) Accounting for investment transactions**

Purchase and sale of Investments are accounted on the date of the transaction at cost and sale price respectively after including all transaction costs as applicable like brokerage, commission, charges paid to Clearing Corporation of India Limited and fees payable or receivable, if any but excluding custodian transaction charges. The front end fee receivable, if any, is reduced from the cost of such investment w.e.f October 01, 2012 capitalisation of such brokerage and transaction costs incurred for the purpose of execution of trades is restricted to 12 bps in case of cash market transactions and 5 bps in case of derivative transactions. Any cost in excess of the specified limits is charged to the revenue account of the scheme as part of the total expense ratio.

Bonus entitlements are recognised as investments on the 'ex-bonus date'.

Rights entitlements are recognised as investments on the 'ex-rights date'.

Investments in foreign securities are accounted at the exchange rate prevailing on the date of accounting the trade. Differences in exchange rate till settlement are recognised as income or expense.

**b) Valuation of investments**

During the year / period the fund has fairly valued its investments in accordance with the Regulations, as amended from time to time, by using the below mentioned methodology / principles. All investments are marked to market and are stated in the Balance Sheet at their fair value. In valuing the scheme's investments:

Based on the latest available audited balance sheet, net worth shall be calculated as lower of (i) and (ii) below:<br>i. Net worth per share = [share capital plus free reserves (excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by Number of Paid up Shares.<br>ii. After taking into account the outstanding warrants and options, Net worth per share shall again be calculated and shall be = [share capital plus consideration on exercise of Option/Warrants received/ receivable by the Company plus free reserves (excluding revaluation reserves) minus Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses] divided by [Number of Paid up Shares plus Number of Shares that would be obtained on conversion/exercise of Outstanding Warrants and Options]<br>The lower of (i) and (ii) above shall be used for calculation of net worth per share and for further calculation in (c) below.<br>b. Average capitalisation rate (P/E ratio) for the industry based upon either BSE or NSE data (which should be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75% i.e. only 25% of the Industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share of the latest audited annual accounts will be considered for this purpose.<br>c. The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 15% for illiquidity so as to arrive at the fair value per share.<br>The above methodology for valuation shall be subject to the following conditions:<br>i. All calculations as aforesaid shall be based on audited accounts.<br>ii. In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.<br>iii. If the net worth of the company is negative, the share would be marked down to zero.<br>iv. In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalised earning.<br>v. In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security. To determine if a security accounts for more than 5% of the total assets of the scheme, it should be valued in accordance with the procedure as mentioned above on the date of valuation.<br>At the discretion of the AMC and with the approval of the trustees, an unlisted equity share may be valued at a price lower than the value derived using the aforesaid methodology. |

| Valuation of Convertible Debentures / Bonds                                                        | In respect of convertible debentures and bonds, the non-convertible and convertible components shall be valued separately. The non-convertible component (Debt) should be valued on the same basis as would be applicable to a debt instrument. The convertible component (Equity) should be valued on the same basis as would be applicable to an equity instrument/equity derivative. If, after conversion the resultant equity instrument would be traded pari passu with an existing equity instrument which is traded, the value of the latter instrument can be arrived at after an appropriate discount for non-tradability, time value, volatility etc. of the equity instrument during the period preceding the conversion. While valuing such instruments, the fact whether the conversion is optional should also be factored in. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
