UNITHOLDER INFORMATION REPORT DSP Mutual Fund (Erstwhile known as DSP BlackRock Mutual Fund) Mafatlal Center, 10th Floor, Nariman Point, Mumbai – 400 021

The Directors of DSP Trustee Pvt. Ltd. ('the Trustee Company' or 'Trustee') have the pleasure of presenting the 22nd Annual Report of DSP Mutual Fund for the financial year 2018-19 along with the audited financial statements of the schemes for the financial year ended on March 31, 2019.

I. BRIEF BACKGROUND OF THE TRUST, SPONSORS, TRUSTEE COMPANY AND ASSET MANAGEMENT COMPANY

a. DSP MUTUAL FUND

DSP Mutual Fund ('DSPMF' or 'the Fund') was set up as a Trust on December 16, 1996 in accordance with the provisions of the Indian Trusts Act, 1882, with DSP Trustee Pvt. Ltd., (Formerly known as DSP BlackRock Trustee Company Pvt. Ltd.) ('Trustee Company') as a Trustee and is duly registered under the Indian Registration Act, 1908. The Trustee has entered into an Investment Management Agreement dated December 16, 1996 with DSP Investment Managers Pvt. Ltd. (Formerly known as DSP BlackRock Investment Managers Pvt. Ltd.) Asset Management Company to the Fund, ('AMC') to function as the Investment Manager for all the schemes of the Fund. The Fund was registered with SEBI on January 30, 1997.

b. SPONSORS

The Fund is sponsored by DSP ADIKO Holdings Pvt. Ltd. ('DSP Adiko') & DSP HMK Holdings Pvt. Ltd. ('DSP HMK'). DSP Adiko & DSP HMK are the Settlors of the Mutual Fund trust. The Settlors have entrusted a sum of ₹ 1 lakh to the Trustee as the initial contribution towards the corpus of the Mutual Fund.

DSP Adiko and DSP HMK are companies incorporated in 1983 under the Companies Act, 1956 and are also registered with the Reserve Bank of India as non deposit taking Non-Banking Finance Companies. These companies have been functioning as investment companies, dealing in the acquisition and holding of various investment instruments in the securities market in India and elsewhere.

c. DSP TRUSTEE PVT. LTD.

II. MARKET REVIEW

a. Bond Market: 2018 - 19

First Quarter ending June 2018

In its June policy, RBI hiked the Repo rate by 25 bps to 6.25% but maintained stance unchanged at "neutral". The economy grew at 7.7% YoY in Q4-FY2018 – the strongest pace since Q3-FY2017 – driven by a pick-up in investment activity and government consumption expenditure.

India Government Bond (IGB) 10Y BB moved higher by 80bps from 7.10% to 7.90%, US Dollar-Indian Rupee (USD-INR) moved higher from INR 65.00 to INR 68.80. CPI moved higher from 4.58% to 4.92%.

Second Quarter ending September 2018

INR depreciation and Crude prices were the key market drivers. USD-INR moved higher from INR 68.80 to INR 73.00, to end the quarter at INR 72.50. IGB 10Y BB (10 Year G Sec Benchmark) moved higher by 40bps from 7.80% to 8.25%, before settling to close the quarter at 8.12%. CPI moved lower during the quarter to 3.70% from 4.92% in June 2018.

Third Quarter ending December 2018

10-year Gsec Benchmark yield eased further from a peak of 7.82% during the period to 7.45% centric levels currently. Almost 30% correction in Crude from peak coupled with OMO purchase by RBI helped in reviving the sentiment in Gsec market. Illiquid Gsec papers performed better than the benchmark due to demand in form of RBI OMOs. RBI left the benchmark policy repo rates unchanged at 6.50%. RBI decisively shifted its stance to 'Calibrated Tightening' despite lowering its H2 inflation projections, thereby indicating that RBI is cognizant of inflation risks emanating from weaker INR and elevated crude prices. IGB 10Y BB moved lower by 100bps from 8.18% to 7.18%, before settling to close the quarter at 7.37%. USD-INR moved from INR 71.00 to INR 69.72, saw a high level of INR 74.00.

Fourth quarter ending March 2019

New 10-year Gsec benchmark (issued on January 14, 2019), came at 7.26% and is currently trading at 7.37% (low of 7.22% and high of 7.41%). Yield curve witnessed sharp steepening as RBI delivered a surprise rate cut in February policy which resulted in short-end coming down. RBI continued with its liquidity fusion through OMO purchases of government securities (in FY2019, RBI has announced/conducted OMOs to the tune of INR 2.76 trillion)

Fiscal deficit for FY2019 saw a marginal slippage of 0.1% of GDP to 3.4% (versus target of 3.3%). Fiscal deficit for FY2020 has been projected to remain flat at 3.4% of GDP in FY2020 (versus target of 3.1%).

Repo rate was cut by 25bps to 6.25%. RBI shifted its stance to "neutral' from "calibrated tightening". Consequently, reverse repo rate was adjusted to 6.00% and MSF to 6.50%.

The credit market in India has been undergoing stress ever since it was jolted by the IL&FS Group default in September 2018. The liquidity crunch in the market and rising costs of borrowing further led to a string of defaults. There has been a contagion effect in the NBFC market with liquidity drying up for most NBFCs with wholesale exposure. The NBFCs which had continued access to liquidity were the ones with a strong promoter backing and demonstrated track record of good underwriting standards. However, even such NBFCs have largely shied away from wholesale exposures. Therefore, wholesale credit offtake from NBFCs have been curtailed meaningfully.

Although banks have seen increased credit offtake, such funding has largely been directed towards well performing and strong corporates and corporates with strong groups.

As a result, sectors and corporates dependent on NBFCs, or companies with highly levered balance sheets have faced stress.

Some of the mutual fund schemes, including certain DSP schemes, had exposure to some of these stressed groups which after being marked down diluted the return profile.

b. Equity Market: 2018 - 19

The performance of the benchmark indices over the last fiscal year could be summarized by the word 'polarization'. The skew has been towards large-caps with only a handful of stocks driving Nifty returns. Growth drag in consumption and liquidity stress in the financial system has led to a steep underperformance from the mid-and small-cap indices. Foreign Institutional Investor (FII) inflows through the fiscal have been largely flat while Domestic Institutional Investors (DII) has invested a net of USD 10bn. However, a majority of the FII inflows has been towards the later half of the last twelve months indicating growing optimism over a positive election outcome, i.e. a stable government in place.

Between FY15-18, the macro environment was stable on the back of lower oil prices and falling inflation. However, in FY19, volatile crude prices and slowing global growth resulted in lower exports and a higher current account deficit. Fed tightening acted as a key headwind and the INR depreciated by 10% from its YTD lows, almost breaching the 75/USD level. Active intervention by the RBI and cooling off of oil prices resulted in subsequently appreciation of the rupee closer to levels of ~70/USD. However continuous low food inflation exerted downward pressure on prices in general while mid-cycle growth slowdown led the RBI to change its stance slightly as it cut rates twice in 2019

A key drag on growth over the last year has been the NBFC crisis which has impacted liquidity in the financial system. Despite the RBI injecting ~INR 2.98 lakh crore into the system, the NBFC sector continues to face challenges. The economy also faces twin challenge of slowing growth amidst rising fiscal uncertainties. Consumption slowdown in sectors such as autos and FMCG was a drag on sentiments and management commentaries suggest that growth is likely to be volatile over the next quarter or so, owing to muted sentiments in rural India and high base effect.

Political uncertainty also remained high as anti-incumbency led to BJP losing power in key states of Rajasthan and MP. What they portend in the scheme of general elections will be known in due course but the ensuing loss of BJP in these key states probably led to a slight policy skew towards populism. The central government in its interim budget announced the PM-KISAN program, a INR 6,000/year income-support scheme.

Markets are trading at 18.0x 1-yr forward earnings which are higher than its long term average of 15-16x. Valuations have remained steep and in a tight band (17-19x) over last four years, building in a high 20%+ earnings growth which has been elusive with successive downgrades. Despite the underlying challenges, FY19 has been a recovery of sorts for earnings growth (although earnings were downgraded in FY19 as well), largely on the back of a low base although underlying commentary was weak. However, the focus will be on FY20, wherein the consensus is building in a steep 20% YoY growth. There is an element of concentration risk as financials are expected to contribute over 60% of the incremental growth. Among other things, avoiding a spillover of liquidity issues from NBFCs to the larger banking system would be critical.

III. INVESTMENT OBJECTIVES & PERFORMANCE OF THE SCHEMES

Investment Objectives, one year and since inception performance vis-à-vis its benchmarks, closing Assets under Management ('AuM') as on March 31, 2019 for all open ended schemes of the Fund, DSP 3 Years Close Ended Equity Fund (Maturity Date January 4, 2021) and DSP A.C.E. Fund (Analyst's Conviction Equalized) are given in Annexure IA to this Report. Investment Objectives, one

year and since inception performance vis-à-vis its benchmarks, closing Assets under Management ('AuM') as on March 31, 2019 for all Fixed Maturity Plans, fixed Term Plans and Dual Advantage Funds are given in Annexure IB to this Report.

IV. BRIEF COMMENTARY ON ONE YEAR AND SINCE INCEPTION SCHEMES PERFORMANCE

A. EQUITY SCHEMES

- a. DSP EQUITY FUND: The scheme underperformed its benchmark (Nifty 500 TRI Index) over the last financial year. The sector positions which aided relative performance were overweight positions in financials and materials along with underweight positions in telecom and staples. Underweight positions in energy and IT and overweight in industrials detracted from relative performance. The fund has outperformed its benchmark since inception.
- b. DSP EQUITY OPPORTUNITIES FUND: The scheme underperformed its benchmark (Nifty 500 TRI Index) over the last financial year. The sector positions which added to relative performance were overweight in financials and underweight in discretionary, telecom and real estate. Relative underperformance was driven by overweights in industrials and underweights in IT, staples and energy. The scheme has outperformed its benchmark since inception.
- c. DSP TOP 100 EQUITY FUND: The scheme underperformed its benchmark (S&P BSE 100 TRI Index) over the last financial year. Overweight positions in energy and financials and underweight in telecom, healthcare and utilities positively impacted performance. Underweight in IT and overweight in industrials, discretionary and materials detracted from performance. The scheme has outperformed its benchmark since inception.
- d. DSP INDIA T.I.G.E.R. FUND (The Infrastructure Growth and Economic Reforms Fund): The scheme underperformed its benchmark (S&P BSE 100 TRI Index) over the last financial year. The scheme's underweight positions in discretionary, financials, telecom and real estate aided relative performance. Overweight positions in industrials and materials, and underweights in IT, staples and energy were performance detractors. The fund has underperformed its benchmark since inception (16.19% vs 16.33%).
- e. DSP MID CAP FUND: The scheme outperformed its benchmark (Nifty Midcap 100 TRI Index) over the last financial year. The sector positions which added to relative performance were underweight positions in financials, healthcare, IT and real estate along with overweight positions in materials sectors. Underweight in discretionary, staples and energy led to negative performance. The scheme has outperformed its benchmark since inception.
- f. DSP TAX SAVER FUND: The scheme underperformed its benchmark (Nifty 500 TRI Index) over the last financial year. The sector positions which added to relative performance were overweight positions in financials and utilities and underweight positions in discretionary and telecom. Overweight in materials and underweight on IT, energy and staples detracted from performance. The scheme has outperformed its benchmark since inception.
- g. DSP SMALL CAP FUND: The scheme marginally outperformed its benchmark (S&P BSE Small Cap TRI) over the last financial year. Active overweights on the materials, consumer discretionary and healthcare sectors, as well as underweight positions in realty, financials and telecom sectors contributed to performance. Underweights in IT, staples, industrials and utilities detracted from performance. The scheme has outperformed its benchmark since inception.
- h. DSP NATURAL RESOURCES AND NEW ENERGY FUND: The scheme underperformed its benchmark (Composite Benchmark comprising 35% S&P BSE Oil & Gas Index, 30% S&P BSE Metals Index, 35% MSCI World Energy Index 10/40 Net Total Return Net & Expressed in INR; Nomalised values) over the last financial year. Stock specific overweight positions in energy and utilities positively contributed to performance, while overweight in materials detracted from performance. The scheme has outperformed its benchmark since inception.
- i. DSP FOCUS FUND: The scheme underperformed its benchmark (S&P BSE 200 TRI Index) over the last financial year. Overweights in the financial sector and underweights on telecom, healthcare, energy utilities, realty positively contributed to performance. Underweights on IT, staples and overweights on industrials, discretionary and materials

- detracted from performance. The scheme has underperformed its benchmark since inception.
- j. DSP EQUITY SAVINGS FUND: The scheme underperformed its benchmark (30% Nifty 500 TRI + 70% CRISIL Liquid Fund Index) over the last financial year. For the equity portion of the portfolio, overweights on financials and utilities and underweights in telecom and realty led to relative outperformance, while overweights on energy, industrials, discretionary and underweights on staples and IT were performance detractors. The fixed income component of the scheme mirrors the strategy on short term debt funds. The scheme typically invests in money market instruments, corporate debt securities and government securities such that Macaulay duration of the portfolio is between 1 year and 2 years. The fixed income component has delivered a return of 6.7% vs. Crisil Short Term Bond Fund Index return of 7.55% in last one year. The scheme has underperformed its benchmark since inception
- k. DSP ARBITRAGE FUND: The scheme underperformed its benchmark (CRISIL Liquid Fund Index) over the last financial year. The scheme has outperformed its benchmark since inception.
- I. DSP EQUAL NIFTY 50 FUND: The Scheme has been aligned to its underlying benchmark NIFTY 50 Equal Weight Index at all points of time since inception. The Scheme has been able to generate returns that are commensurate (before fees and expenses) with the performance of the underlying Index, subject to tracking error.
- m. DSP DYNAMIC ASSET ALLOCATION FUND: The scheme underperformed its benchmark (CRISIL Hybrid 35+65 Aggressive Index) during the last financial year. The underperformance was on account of under allocation to equities on account of higher valuations. The scheme uses the yield gap model to allocate assets between equity and debt. Based on this model, the recommended asset allocation of the scheme (as of March 31, 2019) is as follows: Equity 10%, Arbitrage 55%, Debt & Cash 35%. The fund has underperformed its benchmark since inception (8.28% vs 14.03%).
- n. DSP 3 YEARS CLOSE ENDED EQUITY FUND (Maturity Date January 4, 2021): The scheme reached maturity on November 27 2017. In accordance with the SEBI regulations, it was decided to roll over and extend the maturity of the scheme for a further period of approximately 37 months. The type of scheme was modified from 'A close ended Equity scheme' to 'Multi Cap Fund- A close ended equity scheme investing across large cap, mid cap, small cap stocks'. The benchmark was modified from 'CNX 500 Index' to 'Nifty 500 Index'. The fund manager for the equity portion of the portfolio was changed from 'Vinit Sambre' to 'M. Suryanarayanan'.
- o. DSP A.C.E (ANALYST'S CONVICTION EQUALIZED) FUND (Series 1): The portfolio is constructed by equal weighting analyst's highest conviction stocks picked from across the coverage pool. There is no sector-bias as the sector weights are maintained the same as that of the Nifty 500. The fund has underperformed the benchmark since inception.
- p. DSP A.C.E (ANALYST'S CONVICTION EQUALIZED) FUND (Series 2): The portfolio is constructed by equal weighting analyst's highest conviction stocks picked from across the coverage pool. There is no sector-bias as the sector weights are maintained the same as that of the Nifty 500. The added feature of A.C.E Fund Series 2 (compared to Series 1) was that the put options could be exercised during interim market corrections in order to book profits. The fund has underformed the benchmark since inception.
- q. DSP HEALTHCARE FUND: The scheme was launched on November 30, 2018. Since the scheme has not completed 1 year, performance data of the scheme is not provided.
- r. DSP NIFTY 50 INDEX FUND: The scheme has been aligned to its underlying benchmark NIFTY 50 Index at all points of time since inception. The scheme has been able to generate returns that are commensurate (before fees and expenses) with the performance of the underlying Index, subject to tracking error. The scheme was launched on February 21, 2019. Since the scheme has not completed 1 year, performance data of the scheme is not provided.
- s. DSP NIFTY NEXT 50 INDEX FUND: The scheme has been aligned to its underlying benchmark NIFTY Next 50 Index at all points of time since inception. The scheme has been able to generate returns that are commensurate (before fees and expenses) with the performance

of the underlying Index, subject to tracking error. The scheme was launched on February 21, 2019. Since the scheme has not completed 1 year, performance data of the scheme is not provided.

B. FUND OF FUNDS SCHEMES

- a. DSP WORLD GOLD FUND: The scheme underperformed its benchmark (FTSE Gold Mines Index) over the last financial year. It should be noted that M&A activity has significantly increased the concentration of the FTSE Gold mines Index and made it less relevant for fund performance comparison purposes. The Barrick Gold/Randgold deal completed in January and Newmont and Goldcorp completed their merger in April 2019. For reference, Newmont Goldcorp is now a 20.8% weighting in the index, whilst Barrick Gold is 18.1%. Within the portfolio, our largest detractor from relative performance was not holding Kirkland lake, which outperformed on exploration success. The company doesn't meet our quality criteria in our view and is now trading on an expensive valuation. On the positive side, our offbenchmark position in Royalty Company, Wheaton Precious Metals, appeared amongst the largest contributors to relative performance. In addition to royalty companies being more defensive in a rangebound gold price environment in Q1 2019, Wheaton Precious Metals also provided further clarity on the impact of the Canadian tax case which was resolved towards the end of 2018.
- DSP WORLD ENERGY FUND: The scheme underperformed its benchmark (Composite Benchmark = 70.00% MSCI World Energy 10/40 Net Total Return & 30.00% MSCI World (Net) - Net & Expressed in INR; Normalised Values) over the last financial year. Throughout the year, we remained broadly correct on the direction of the oil price. That said, we were surprised by some of the share price reactions to the oil price moves, with US E&P companies in particular underperforming both a rising and falling oil price in 2018 despite corporate improvements. Energy equities also continued to decouple from commodity fundamentals throughout the year, despite the positive transformation we have seen at a company level in terms of improved capital discipline and a focus on cash flows. At a stock level, our overweight position in Encana was the largest detractor from relative performance in 2018, as the market penalised the company for the acquisition of Newfield Exploration. On the positive side, US refiners continued to benefit from wide differentials (lower cost feedstock). This translated into a positive contribution from positions such as Andeavor. The BGF New Energy Fund changed its name to BGF Sustainable Energy Fund in March 2019. There is no change in the investment philosophy or process. Despite some of the headwinds experienced during the year, such as weakness in auto-related stocks, being active allowed us to avoid the sharp falls seen in many companies. The performance of our transportation related holdings, such as Valeo, Continental and Infineon, was disappointing due to a slowdown in global car sales, tariff concerns and the production disruption from the EU's move to real world emission tests. However, we have seen further evidence that the pace of EV adoption is likely to be much faster than is currently priced in. On the positive side, the fund's solar holdings performed very strongly over hopes around Chinese stimulus and the expected level of Chinese solar installations for 2019. Jinkosolar and Canadian Solar were both notable positive contributors to performance.
- c. DSP WORLD MINING FUND: The scheme underperformed its benchmark (Euromoney Global Mining Constrained Weights Net Total Return Index) over the last financial year. The Fund's holding in copper-cobalt producer Katanga, was the largest detractor during the year on the back of rising political and fiscal risk in the Democratic Republic of Congo (DRC). The DRC announced a more stringent mining code in Q1 2018, increasing royalties and taxes, and brought this into effect in late June 2018. In addition, not holding Fortescue Metals was a detractor as the stock benefitted from its high beta to the rising iron ore price. On the positive side, stock selection within copper was positive, with overweight position in Ero Copper among the top contributors.
- d. DSP WORLD AGRICULTURE FUND: The scheme outperformed its benchmark (MSCI All Contry World Index Net Total Returns) over the last financial year. Please note, the the underlying fund was repositioned in March 2019 from BGF World Agriculture Fund to BGF Nutrition Fund. The fund now invests in the beneficiaries of changing consumer preferences towards what we eat, how we eat and how we grow food. Within the portfolio, our position in Charlotte's Web was

- one of the largest contributors to performance. The stock continued to perform strongly following its listing, as the market contemplated the potential use and size of CBD based wellness products. It was reported during the period that Coca Cola is studying the growth of CBD as an ingredient in the functional wellness beverage market. On the negative side, our position in Total Produce appeared amongst the largest detractors from performance. The company provided a trading update at the end of November that downgraded their 2019 growth guidance down 5% to high single digit EPS growth. The downgrade was due to a number of one-off events that are unlikely to be repeated, including unusual weather around the world impacting fresh produce availability and a drop in demand for romaine lettuce in the United States due to an E coli outbreak. Whilst this is a minor set-back for Total Produce, we still see the potential for the company to deliver double digit EPS growth over the next 3 years.
- e. DSP US FLEXIBLE^ EQUITY FUND: The scheme underperformed its benchmark (Russell 1000 Index) over the last financial year. The top detractor from relative performance over the period was security selection within the health care sector, particularly among biotechnology and health care providers & services. Negative stock selection within materials and utilities also weighed on returns. Conversely, notable contributors to relative performance were additive security selection within the information technology, industrials and communication services sectors.
 - ^ The term "Flexible" in the name of the Scheme signifies that the Investment Manager of the Underlying Fund can invest either in growth or value investment characteristic securities placing an emphasis as the market outlook warrants.
- DSP GLOBAL ALLOCATION FUND: The scheme underformed its benchmark (Composite Benchmark = (36% S&P 500 Composite; 24% FTSE World (ex-US); 24% ML US Treasury Current 5 Year; 16% Citigroup Non-USD World Government Bond Index); Normalised Values) during the last financial year. Within equities, an overweight to Japan and an underweight to the U.S. weighed on performance. Stock selection within healthcare, information technology, consumer discretionary, and materials, as well as an overweight to energy detracted from returns. This was partially offset by positive stock selection within communication services, consumer staples, and industrials. An underweight to financials and an overweight to healthcare was additive. An underweight to fixed income positively contributed returns. Within fixed income, an overweight to emerging market government debt detracted from performance, while an overweight to credit contributed to returns. Exposure to commodityrelated securities (specifically gold) and to cash and cash equivalents weighed on returns. Currency management, notably an underweight to the euro and an overweight to the U.S. dollar positively impacted returns.

C. HYBRID SCHEMES

- a. DSP EQUITY & BOND FUND ("Aggressive Hybrid Fund"): The scheme underperformed its benchmark (CRISIL Hybrid 35+65 -Aggressive Index) over the last financial year. On the equity component of the portfolio, the sector positions which aided relative performance were overweight positions in financials and materials along with underweight positions in telecom and staples. Underweight positions in energy and IT and overweight in industrials detracted from relative performance. The fixed income component of the scheme mirrors the strategy on short term debt funds. The scheme typically invests in money market instruments, corporate debt securities and government securities such that Macaulay duration of the portfolio is between 1 year and 3 years. The fixed income component has delivered a return of 3.40% vs. Crisil Short Term Bond Fund Index return of 7.55%. The fixed income component has been impacted from the credit events during the year. Since-inception performance comparison with the benchmark is not available as the CRISIL Hybrid 35+65 - Aggressive Index was not available at the time of inception of the fund.
- b. DSP REGULAR SAVINGS FUND ("Conservative Hybrid Fund"):The scheme underperformed its benchmark (CRISIL Hybrid 85+15 Conservative Index) during the financial year. For the equity component of the portfolio, underweight on financials and telecom contributed to performance. Overweight on industrials, healthcare discretionary and utilities, coupled with an underweight on energy, IT, materials, staples contributed to underperformance. The fixed income

component of the scheme mirrors the strategy on short term debt funds. The scheme typically invests in money market instruments, corporate debt securities and government securities such that Macaulay duration of the portfolio is between 1 year and 3 years. Since inception, the scheme has outperformed its benchmark.

D. INCOME SCHEMES

- a. DSP GOVERNMENT SECURITIES FUND ("Gilt Fund"): The scheme outperformed its benchmark (ICICI Securities Li-Bex) in the last financial year. The outperformance of the scheme can be attributed to better positioning during third quarter of last financial year. We were able to capture Government security rally started from 8.18% till 7.18% during Oct18-Dec18. Almost 30% correction in Crude from peak coupled with OMO purchase by RBI helped in reviving the sentiment in Government security market. Illiquid Government security papers performed better than the benchmark due to demand in form of RBI OMOs. Since-inception performance comparison with the benchmark is not available as the ICICI Securities Li- Bex was not available at the time of inception of the fund.
- DSP CREDIT RISK FUND ("Credit Risk Fund"): The scheme underperformed its benchmark (50% CRISIL Short Term Bond Fund Index + 50% CRISIL Composite Bond Fund Index) in the last financial year. Its underperformance can be attributed to higher number downgrades and defaults in the portfolio. Earlier, as per the investment pattern in the scheme information document, the scheme had to maintain weighted average maturity between 3 years and 5 years. Since the implementation of new guidelines on scheme categorization, there is no restriction on average maturity or Macaulay duration. However, the scheme has to invest minimum 65% in AA and below rated securities. Our exposure to IL&FS Group has defaulted and assets like Dewan Housing Finance, Sintex BAPL Limited, Janalakshmi Financial Services Limited, KKR India Financial Services Limited has underperformed as their yields continue to move northwards during Second half of the Financial Year. The scheme has outperformed its benchmark since inception.
- c. DSP SAVINGS FUND ("Savings Fund"): The scheme underperformed its benchmark (CRISIL Liquid Fund Index) in the last financial year as it was running a passive run-down strategy. The scheme intended to participate in the elevated spread of the 1 year asset over repo rate in the month of March and continue to hold on to this specific maturity through the year, instead of actively changing its interest rate risk. The scheme invests in only money market instruments, primarily Certificates of Deposit and Commercial Papers. The scheme has delivered return of 7.87% since inception against benchmark return of 8.02%.
- d. DSP LOW DURATION FUND ("Low Duration Fund"): The scheme outperformed its benchmark (CRISIL Liquid Fund Index) in the last financial year as it actively managed its duration profile. In a rising rate environment, the duration of the fund was actively managed to minimise impact of volatility while capturing the steepness in the front end of the curve. The scheme typically invests in money market instruments and corporate debt securities such that Macaulay duration of the portfolio is between six months and twelve months. The scheme has outperformed its benchmark since inception.
- e. DSP BANKING & PSU DEBT FUND ("Banking and PSU Fund"): The scheme maintains a very high credit quality portfolio by predominantly investing in securities issued by Public Sector Undertakings (PSUs) and Banks. The scheme has outperformed its benchmark (CRISIL Short Term Bond Fund Index) in the last financial year. The scheme has underperform its peers during the same period, which can be attributed to lower duration portfolio compare to competition as most of them running aggressive positioning. The scheme has outperformed its benchmark since inception.
- f. DSP BOND FUND ("Bond Fund"): The fund is primarily invested in debt and money market papers. The allocation of the fund is a mix of AA rated and above corporate bonds with expected duration in the range of 2.5-3.5 years (may be lower). Investors would stand to benefit by optimizing accruals without diluting credit risk profile. The scheme underperformed its benchmark (50% Crisil Short term Bond Fund Index + 50% Crisil Composite Bond Fund Index) in the last financial year. Our exposure to IL&FS group has defaulted and assets like Dewan Housing Financial Services has underperformed as their yields have moved upwards, leading to negative impact on NAV of the fund. The fund performance since inception is around 8.30% CAGR,

but the performance cannot be compared with the benchmark as the 50% CRISIL Short Term Bond Fund Index + 50% of CRISIL Composite Bond Fund Index were not available at the time of inception of the fund.

- g. DSP 10Y G-SEC FUND ("Gilt Fund with 10 year constant maturity"): Fund invests ONLY in Benchmark IGB 10Y. Fund does not invest in SDL's and off Benchmark Bond IGBs. Performance of the fund should be compared with the Benchmark IGB 10Y of the mentioned periods (CRISIL Long Term Gilt Index is not the right benchmark), and each year new Benchmark Bond is issued. The scheme provides a low cost and passive investment management solution to investors seeking exposure to 10-year government bonds. The right Index is CRISIL 10Y Gilt Index.
- h. DSP SHORT TERM FUND ("Short Duration Fund"): The scheme has marginally underperformed its benchmark (CRISIL Short Term Bond Fund Index) in the last Financial Year. The scheme typically invests in money market instruments, corporate debt securities and government securities such that Macaulay duration of the portfolio is between 1 year and 3 years. The scheme was positioned at the upper side of the maturity band during early part of the year, which adversely affected its performance. Steady positioning of the portfolio at around 2Y along with improvement in quality portfolio (Component of AAA securities 97% of the total AUM) has helped the scheme to improve performance in last 2 Quarter of the Financial Year. The scheme has outperformed its benchmark since inception.
- i. DSP STRATEGIC BOND FUND ("Dynamic Bond"): The scheme outperformed its benchmark (CRISIL Composite Bond Index) in the last financial year. The outperformance of the scheme can be attributed to better positioning during the third quarter of FY18-19. Corporate Bond component of the portfolio has helped to earn steady accrual. We were able to capture Government security rally started from 8.18% till 7.18% during Oct18- Dec18. Almost 30% correction in Crude from peak coupled with OMO purchase by RBI helped in reviving sentiment in Government security market. Illiquid Government security papers performed better than the benchmark due to demand in form of RBI OMOs. The scheme has underperformed its benchmark since inception (scheme returns 7.80% CAGR vs benchmark returns 8.05% CAGR).
- j. DSP LIQUIDITY FUND ("Liquid Fund"): The scheme underperformed its benchmark (CRISIL Liquid Fund Index) in the last financial year. The scheme had invested in liquid money market instruments such as bank Certificate of Deposit, Commercial Papers, Treasury Bills and Cash Management Bills with residual maturity within 91 days. The underperformance in this segment vis-à-vis the benchmark can be attributed to scheme expenses as the benchmark does not have any expenses. Since this category is predominantly used for cash management, the underlying portfolio securities are of very high credit quality. High credit quality with virtually no interest rate risk makes it difficult to generate returns beyond the portfolio YTM, which after expenses has much lower returns as compared to the benchmark. The scheme has outperformed its benchmark since inception.
- k. DSP ULTRA SHORT FUND (Erstwhile known as DSP Money Manager Fund) ("Ultra Short Duration Fund"): The scheme underperformed its benchmark (CRISIL Liquid Fund Index) in the last financial year significantly as it took a 100% provision on its exposure to security of IL&FS Transportation Network Ltd. Also, the fund has to maintain average maturity closer to 6 months while the benchmark invests in securities which are less than 91 days. In a rising rate environment, the higher interest rate risk in the scheme led to underperformance vis-à-vis the benchmark. The scheme typically invests in money market instruments and corporate debt securities such that Macaulay duration of the portfolio is between three months and six months. The scheme has underperformed its benchmark since inception.
- I. DSP CORPORATE BOND FUND This is a AAA Roll down product which invests in Bonds maturing in Jan –June 2022. The passive strategy provides investors with visibility in the form of Credits and end maturity. The scheme was launched on September 10, 2018. Since the scheme has not completed 1 year, performance data of the scheme is not provided.
- m. DSP LIQUID ETF: The scheme has been providing current income, commensurate with relatively low risk while providing a high level of liquidity, primarily through a portfolio of Tri-party Repo, Repo in

Government Securities, Reverse Repos and similar other overnight instruments

n. DSP OVERNIGHT FUND: The scheme was launched on January 9, 2019. Since the scheme has not completed 1 year, performance data of the same is not provided.

E. FIXED MATURITY PLANS/ FIXED TERM PLANS/ DUAL ADVANTAGE FUNDS (CLOSED-ENDED SCHEMES):

Details of these schemes are given in Annexure II. FMP's, FTP's and DAF's performed satisfactorily and in accordance with expectations at the time of their launches. However, their performance comparison with their respective benchmarks may vary depending on their tenor, portfolio construction, rating profile as well as sector allocation.

V. FUTURE OUTLOOK

a. Debt Markets

Thankfully with a stronger political mandate, NDA 2 has seeded macro stability paving the path not only for growth revival but more importantly sustainability of growth. In context to the Budget 2019-20, the intent (direction) of the government has certainly been for macro stability.

The budget aims to provide credit oriented growth via conventional channels i.e., banks and NBFC. In order to achieve the same, the cost of money needs to be crashed allowing riskier capital to replace public investment. Lower fiscal deficit denoting lower government borrowing will aid to bring down sovereign yields thereby aiding other layers of yields. More importantly, budget also announced the provision to borrow / fund the fiscal deficit from overseas borrowing thereby reducing the domestic borrowing. This will indeed help to soften the yields on government securities.

After witnessing 3 consecutive quarters of acute tightness in liquidity, July – September quarter would witness considerable surplus owing to slower growth in currency in circulation, RBI dividend due in August and increased government spending. Softening sovereign yields in times of easing liquidity conditions will aid to compress the spreads between government securities and corporate bonds.

Slowing growth prospects, benign inflation, developed market central banks turning more dovish and close to one 50% of the global sovereign yields trading below 1% bodes well for domestic yields to head further lower.

Whilst the noise on feasibility of budget numbers and risks on sovereign borrowing would persist in the near term; the budget outcome has certainly eased the job for RBI to ease further on rates and more importantly aid monetary transmission. This in other words implies compression of spreads.

In a nutshell, slower growth, benign inflation, stable currency, easy liquidity, lower government borrowing and softening yields in developed markets aids bond yields to stay lower.

b. Equity Market

FY19 has been a volatile year for equity markets around the world, and it was no different for India. We believe this has created good stock-specific opportunities for long-term wealth creation.

Below are four key themes that we believe could drive growth in FY20 and beyond:

- a. Increase in per-capita GDP boosting the India consumption story and a consequent shift from unorganized to organized sectors.
- Penetration of financial services (retail and corporate credit, insurance, asset managers).
- The next investment cycle led by govt. capex on Oil & Gas, Defense, Roads, Railways, Urban Infra.
- d. Export opportunities in segments vacated by China, such as textiles and specialty chemicals.

Consequently, we are attempting to reflect these themes within our portfolios. Our investors may note that these themes may not have played out in FY19 in entirety. However, these themes are not one year stories. Despite the recent market environment, liquidity challenges, politics etc. we are very optimistic about these themes playing out in the coming years.

As all fundamental investors do, we track earnings growth very closely. Unfortunately, earnings growth has remained subdued, growing at just 0.8% CAGR (FY2014 to FY2018 for the Sensex) but that does not mean earnings will never come back. Several one-offs such as the Reserve Bank of India's Asset Quality Review (mandatory provisioning and clean-up of bad

loans in banks' books), Demonetization, introduction of Goods and Services Tax etc. may have been responsible for the earnings misses, but from India's reforms point of view, these were absolutely critical. The overall profit pool of the top 500 companies by market-cap is ~US\$ 57 bn contributed largely by sectors such as downstream oil & gas, IT, metals and NBFCs. This could have been ~US\$ 71 bn, if it wasn't for a ~US\$ 14 bn drag from telecom and PSU banks. We believe earnings will come, but the timing is hard to predict.

However, we are not worried. Indexed to a base of 100, free cash flow generation for the top 50 companies has improved from FY14 to FY18 to 140. Coupled with higher capacity utilization, we are seeing improvement in balance sheet quality of corporates, measured by falling debt levels of the top 500 companies by marketcap from 3.3x to 2.6x in the same period. We are in this investment journey for the long term and it would be hard to find a better growth story than India, across sectors

For example:

- Car ownership in India is a meagre 45 per 1000 people compared to USA's 900, China's 160 and the global average of 165. Despite a slightly higher ~35% 2Wheeler penetration, we may continue to witness high single digit growth by 2W companies over the next few years.
- 2. AC penetration in India is < 5%. China went from a similar number, to ~60% penetration in just 10 years (1995 2005).
- India has ~1,500 large-format stores (~8000 sq ft area) across players for a population of 1,300 million, while there are ~5,000 Walmart stores alone (~1 lakh sq ft area!) in the US for a population of just 325 million.
- 4. Penetration of general insurance in India is <1% of GDP which is less than half of the global average. Even government insurers which otherwise have decent penetration levels have significant room for growth. Categories like crop insurance are only just seeing adoption. When asset penetration itself is low, surely insurance has a long way to go.</p>
- 5. The government is building ~30mn homes under its affordable housing scheme. This would be a boost to many related categories including paints, cement, electricals etc. even as the shift from unorganized to organized within these segments create opportunities for premiumization.
- Growth in infrastructure and capital goods where execution is improving and the re-rating is yet to take place.
- 7. The size of India's chemicals sector is ~USD 140bn (~6% of GDP), but still contributes just ~3% to global trade compared to China's ~30%. With stricter pollution controls and increasing manufacturing cost in China, a structural shift towards India is underway as customers look to de-risk their supply.
- 8. Almost a billion people in the country have never flown by air. The government is focused on creating newer infrastructure in smaller towns and cities especially with regards to boosting underserved and underdeveloped airports across the country (UDAN scheme Ude Desh ke Aam Nagrik which means "Let the common citizen of India fly").

This is just a glimpse. The aspiration levels and the opportunity size are vast. Our endeavor is to identify the key listed beneficiaries of the most promising themes and invest in them for the long run. In a very dynamic world where business cycles are getting shorter we would like to focus on capital efficiency in terms of capital allocation and long term ROCEs of our investee companies which we believe are the key positive contributors over the long term. With investor patience and discipline, there is significant scope for wealth creation.

While the broad outlook for India may remain positive, we believe there are certain risks which investors must consider, which could infuse volatility in their returns profile. These include a shortfall in the yearly GST collection which could negatively impact the fiscal deficit, rising oil prices which could lead to higher current account deficit, rising inflation (higher oil and food price base effect) and geo-politics (China's growing influence and strength in the region, trade wars etc.)

VI. BUSINESS OPERATIONS

Average Assets under Management of the Fund for the quarter ended March 31, 2019 stood at ₹ 78362.72 crore. The Fund managed 38 open ended schemes and 35 closed ended schemes as on March 31, 2019.

^Past performance may or may not be sustained in the future.

Above returns are compounded annualized (CAGR).

Returns are calculated on ₹ 10/- / ₹ 1000/- (as applicable) (allotment price per Unit) invested at inception viz. date of allotment. In case of Direct Plan, on the NAV of corresponding option(s) under Regular Plan (under which the subscription/switch in/SIP/STP ins is available) at which first allotment was processed. The launch date is deemed to be the date of allotment /first day on which plan has received subscription.

* Returns are for Regular Plan - Growth Option for all schemes except for DSP Equity Fund where returns are for Regular Plan - Reinvestment Dividend Option.

##Total Return (TR) Index: Total return includes interest, capital gains, dividends and distributions realized over a given period of time.

Performance has not been compared for periods where historical data for the adopted benchmark is not available.

Annexure V PROXY VOTING POLICY

I. INTRODUCTION

The Corporate Governance Committee (the Committee) of DSP Investment Manager Pvt. Ltd. (DSPIM), Asset Management Company to DSP Mutual Fund (Fund), interalia addresses proxy voting issues on behalf of all the Schemes of the Fund. The Committee comprises of the President, Chief Investment Officers -Equity and Fixed Income, Senior Fund Managers from the Investment team, Head of Risk, Chief Operating Officer and the Compliance Officer. In keeping with its fiduciary responsibilities, the Committee reviews all proposals put up for voting even though they may be considered to be routine matters and exercises the votes in the best interest of its unitholders. Each proposal is considered based on the relevant facts and circumstances. From time to time, the Committee can avail/ engage professional Proxy Voting advisory firms to obtain research and voting recommendations on resolutions proposed by investee companies. The Committee shall not be bound by the recommendations and shall act at its discretion keeping unit holders interest paramount. The Committee may deviate from the general policies and procedures when it determines the particular facts and circumstances warrant such deviation to protect the interest of the unit holders. This Policy takes into account the relevant regulatory guidelines issued by Securities and Exchange Board of India (SEBI) from time to time.

II. PROXY VOTING POLICY

A. Corporate Governance matters (including changes in the state of incorporation, merger and other corporate restructuring and anti takeover provisions) Mergers and acquisitions will be subject to careful review by the research analyst to determine whether they would be beneficial to shareholders. DSPIM will analyze various economic and strategic factors in making the final decision on a merger or acquisition resolution. Corporate restructuring proposals are also subject to a thorough examination on a case-by-case basis.

B. Capital Structure

These proposals relate to various requests, principally from management, for approval of amendments that would alter the capital structure of the Company, such as an increase in authorized shares. As a general matter, DSPIM will support requests that it believes enhance the rights of common shareholders and oppose requests that appear to the unreasonably dilutive.

C. Compensation and Benefits

We generally support proposals for employee equity compensation plans and other employee ownership plans provided our research does not indicate that approval of the plan would be against shareholder interest. These proposals concern those issues submitted to shareholders related to management compensation and employee benefits. As a general matter, we favor disclosure of a Company's compensation and benefit policies and oppose excessive compensation, but believe that compensation matters are normally best determined by a corporation's Board of Directors, rather than shareholders. Proposals to "micro-manage" a Company's compensation practices or to set arbitrary restrictions on compensation or benefits should therefore generally not be supported.

D. Social and Corporate Social Responsibilities

These are shareholder proposals addressing either corporate social and environmental policies or requesting specific reporting on these issues. We generally do not support proposals on social issues that lack a demonstrable economic benefit to the issuer and the Fund investing in such issuer. DSPIM seeks to make proxy voting decisions in the manner most likely to protect and promote the long term economic value of the securities held in the scheme's accounts. We intend to support economically advantageous corporate practices while leaving direct oversight of the Company management and strategy to the Board of Directors. We seek to avoid micromanagement of Companies, as we believe that the Company's Board of Directors is best positioned to represent shareholders and oversee management on shareholders behalf. Issues of corporate social and environmental responsibility are evaluated on a case –by –case basis within the framework.

E. Board of Directors

DSPIM generally supports the Board's nominees in the election of Directors and generally supports proposals that strengthen the independence of the Board of Directors. As a general matter, we believe that a Company's Board of Directors (rather than shareholders) is most likely to have access to important,

nonpublic information regarding a Company's business and prospectus, and is therefore best-positioned to set corporate policy and oversee management. We therefore believe that the foundation of good corporate governance is the selection of responsible, qualified, independent corporate Directors who are likely to diligently represent the interest of the shareholders and oversee management of the corporation in the manner that will seek to maximize shareholder value over time. In individual cases, consideration may be given to a Director nominee's history of representing shareholder interests as a Director of the company issuing the proxy or other companies, or other factors to the extent deemed relevant by the Committee.

F. Other issues

Auditors

These proposals concern those issues submitted to shareholders related to the selection of the auditors. As a general matter, we believe that corporate auditors have a responsibility to represent the interest of shareholders and provide an independent view on the propriety of financial reporting decisions of corporate management. While we will generally agree to a corporation's choice of auditor, in individual cases, consideration may be given to an auditors' history of representing shareholder interests as auditor of the Company issuing the proxy or other Companies, to the extent deemed relevant by the Committee.

ii. Corporate Charter and By-Laws

These proposals relate to various requests for approval of amendments to a corporation's charter or by-laws. We generally vote against antitakeover proposals and proposals that would create additional barriers and costs to corporate transactions that are likely to deliver premiums to shareholders.

 Conflict of Interest and governance measures for investment in group companies of DSPIM (AMC) and investment in companies that have subscribed to the units of any scheme of the Fund:

DSPIM is an affiliate of a large, diverse financial services firm with many affiliates and makes its best efforts to avoid conflicts of interest. However, conflict of interest can arise in certain situations. Few examples of such situations are:

- Investee Company is a client of DSPIM or its affiliates
- Investee Company is an entity participating to a material extent in the distribution of products managed or advised by DSPIM
- Investee Company has subscribed to the units of any of the schemes of Fund

None of the schemes of the Fund shall invest in group companies of DSPIM. Further, DSPIM shall endeavor to resolve conflicts of interest in the interest of the unitholders. Nonetheless, even though a potential conflict of interest exists, DSPIM may vote in opposition to the recommendations of an investee company's management.

iv. Internal Control Mechanism:

Internal controls and checks are in places at various key steps in the process of exercise of votes as considered relevant/material by DSPIM. The Committee periodically reviews the implementation of the policy and disclosure requirements.

III. REPORTS TO THE BOARD

DSPIM will report to the DSP Trustee Pvt. Ltd. on proxy votes it has made on behalf of the Fund at least annually.

IV. DISCLOSURES

This Policy shall be put up on the Mutual Fund's website: www.dspim.com

The following periodical disclosures shall be made available on the aforesaid website:

Voting exercised and abstained along with the rationale on the quarterly basis within 10 (ten) working days from the end quarter in the format prescribed by SEBI, as amended from time to time. Additionally, a summary of the voting exercised across all the investee companies and its break-up in terms of number of votes cast in favour, against or abstained from shall be updated.

Voting exercised and abstained along with the rationale on an annual basis in the format prescribed by SEBI, as amended from time to time.

Certification from Scrutinizer on the AMC's voting reports.
