MARKET REVIEW

Bond Market

The financial year 2011-12 can be characterized as a year of high headline inflation and RBI's rate hikes in response to such inflation, and in particular the sudden jump in core (non-food, non-manufacturing) inflation. After hiking both Repo Rate and Reverse Repo Rate by 25 basis points in the mid-March Policy, the RBI hiked rates further by 75 basis points in the first quarter as headline inflation continued to remain elevated. Strong PMI data also confirmed that India's economic momentum continued to remain strong. The benchmark 10Y government bond yield inched up from around 7.80% pa to around 8.40% in response to higher supply and prospects of further rate hikes. The second quarter of FY2012 witnessed another round of rate hikes by the RBI as the rising trend in core inflation raised fears of sticky inflation in the near-term despite a normal monsoon. However, the bond market reacted negatively when the borrowing program was seen to be much higher than expectation. The benchmark 10Y yield increased from around 8.30% pa to 8.95% pa as market participants turned cautious due to higher supply, worsening global financial landscape and depreciating rupee. Systemic liquidity also breached the RBI's comfort zone of $\pm 1\%$ of NDTL range due to declining growth in M3 amid lower government spending. Market participants heaved a sigh of relief when the RBI announced its Open Market Operation purchase program in November to infuse liquidity in the banking system. The benchmark 10Y yield dropped from its peak level of around 8.95% pa in mid-November to below 8.20% pa in mid-February. The RBI also toned down its hawkish stance against headline inflation after inflation eased due to the base effect and in response to previous rate hikes and switched its focus to GDP growth. At the same time, significant tightness in systemic liquidity sent short-term rates to levels not seen since November 2008. Despite two CRR cuts of 125 basis points, benchmark 3M bank CD yields touched a high of 11.50% pa in mid-March while 12M bank CD yields traded at 11% pa in response to advance-tax outflows and year-end considerations. The benchmark 10Y yield increased by more than 30 basis points to 8.60% pa after the government announced a larger-than-expected borrowing program for FY2013. The bond market will be keenly watching the Reserve Bank of India's actions in the first-half of FY 2013 to reduce interest rates and infuse liquidity.

Equity Market

Financial year 2011-2012 was a year of contrasts for Indian equities – while the market underperformed most of the regional indices (on a currency adjusted basis) in the first half of the fiscal year, the last few months saw it outperform other regional markets and recover most of the lost ground. Sensex, the BSE-30 index, closed down 10.5%. The year was characterized by significant volatility, with the index touching lows of -21% in Dec 2011.

Macro

India's GDP number was on a declining trend this year from 7.7% in 1QFY12 to 6.1% in 3QFY12. Slowing agricultural and industrial growth contributed the most to this decline. Another worrying trend was the contraction in fixed capital formation.

Headline inflation remained sticky at around 9.5% for almost the entire year, touching a high of 10% in September 2011. High interest rates coupled with base effect caused inflation to come down gradually to 6.9% by March 2012.

Flows

With muted risk appetite in equity markets for most of FY12, capital market activity was quite slow. There was a pick-up in the last few months, in line with the secondary market recovery. Compared to 143 deals in FY11 totaling USD 21 Billion, FY12 only saw 84 deals totaling USD 13 Billion.

FI and DI flows were volatile through the year. FIs invested an impressive USD 8.9 Billion in the last 3 months from being almost flat in the first 9 months, thus ending the fiscal year with net buying of USD 9 Billion. DIIs, on the other hand, ended the year with net selling of USD 1.4 Billion. Within DIIs, majority of the selling came from the Insurance sector – with the Mutual Funds' selling only being USD 370 Million.

Policy

On the policy front, the RBI hiked policy rates 5 times in FY12, by a total of 175bps, in the face of high inflation. We also saw a change in the Central Bank's policy stance towards the end of the year that has led a large section of the market to expect a rate cut in the April policy meet. The easing of the liquidity situation however has already kicked-in in the form of CRR cuts of 125bps in the early part of CY12.

Currency

The rupee was a major talking point in FY12 having depreciated around 20% to 53.70 at one point in time, despite trading near 44 levels at the start of the fiscal year. Some of these losses, however, were brought under check with a slew of measures by the RBI to check speculation in the currency as well as direct intervention in the FX markets.

FUTURE OUTLOOK

Bond Market

Bond market participants are cautiously optimistic in the new financial year as they are likely to focus on prospects of interest rate cuts by the Reserve Bank of India in order to revive economic growth in FY2012-13. The Reserve Bank of India had changed its bias from hawkish to neutral amid a declining trend in both headline inflation and core inflation. At the same time, higher government borrowing as well as prospects of headline inflation reversing its declining trend due to revision in the local fuel prices may weigh on the sentiment of market participants. We expect systemic liquidity to improve this year and deposit growth to inch up which should increase the appetite for government bonds from the banking system this year. Market participants also expect the Reserve Bank of India to extend its support in the form of either Open Market Bond Purchases or in the form of further CRR cut to infuse liquidity in the banking system. This should result in a gradual decline in the government bond yields at the short-end of the yield curve. We also expect the yield curve to steepen this year. At the same time, fragile global financial markets may have an over-arching impact on global fund flows.

Equity Market

At current levels, the BSE Sensex is trading at 14x FY13 expected earnings which is below its long term (15 year) median PE.

With important events like the Budget, election outcome for the five states (including Uttar Pradesh) and the RBI mid quarter monetary policy behind us, we believe markets will be range bound with an upward bias. We believe that RBI will start cutting key policy rates in the April policy review meeting, as we have witnessed a slowdown in GDP (India's Q3 GDP at 6.1% touched a multi-quarter low) and core inflation has started moderating. However, the Government's commitment to achieve fiscal discipline and managing overall inflation expectation in the economy will be key influencers for RBI's future policy action.

The INR has appreciated YTD in 2012, but could be volatile going forward due to rising crude oil prices and tax-related (GAAR) uncertainties. FII Inflows (USD ~9 Billion YTD) may be under pressure due to lack of clarity on taxation of Participatory Notes (P-Notes).

Investors are requested to reconcile their bank account statements with the account statements sent by DSPBRMF and contact the AMC in case of any non receipt of dividend/redemption proceeds.

India's expected earnings growth 13-15% and expected GDP growth of ~7% in FY13, principally driven by domestic consumption, against the backdrop of relatively lower global growth, makes Indian equities relatively attractive.

PROXY VOTING POLICY**I. INTRODUCTION**

The Corporate Governance Committee ("the Committee") of DSP BlackRock Investment Manager Pvt. Ltd. (DSPBRIM), *inter alia* addresses proxy voting issues on behalf of all the Schemes of DSP BlackRock Mutual Fund. The Committee comprises of the President & Chief Investment Officer, Head of Equities and Senior Fund Managers from the Investment team, Head of Risk, Chief Administrative Officer and the Compliance Officer. In keeping with its fiduciary responsibilities, the Committee reviews all proposals put up for voting even though they may be considered to be routine matters and exercises the votes in the best interest of its unitholders. Each proposal is considered based on the relevant facts and circumstances. The Committee may deviate from the general policies and procedures when it determines the particular facts and circumstances warrant such deviation to protect the interest of the unit holders.

II. PROXY VOTING POLICY

A. Corporate Governance matters (including changes in the state of incorporation, merger and other corporate restructuring and anti takeover provisions) Mergers and acquisitions will be subject to careful review by the research analyst to determine whether they would be beneficial to shareholders. DSPBRIM will analyze various economic and strategic factors in making the final decision on a merger or acquisition resolution. Corporate restructuring proposals are also subject to a thorough examination on a case-by-case basis.

B. Capital Structure

These proposals relate to various requests, principally from management, for approval of amendments that would alter the capital structure of the Company, such as an increase in authorized shares. As a general matter, DSPBRIM will support requests that it believes enhance the rights of common shareholders and oppose requests that appear to be unreasonably dilutive.

C. Compensation and Benefits

We generally support proposals for employee equity compensation plans and other employee ownership plans provided our research does not indicate that approval of the plan would be against shareholder interest. These proposals concern those issues submitted to shareholders related to management compensation and employee benefits. As a general matter, we favor disclosure of a Company's compensation and benefit policies and oppose excessive compensation, but believe that compensation matters are normally best determined by a corporation's Board of Directors, rather than shareholders. Proposals to "micro-manage" a Company's compensation practices or to set arbitrary restrictions on compensation or benefits would therefore generally not be supported.

D. Social and Corporate Social Responsibilities

These are shareholder proposals addressing either corporate social and environmental policies or requesting specific reporting on these issues. We generally do not support proposals on social issues that lack a demonstrable economic benefit to the issuer and the Fund investing in such issuer. DSPBRIM seeks to make proxy voting decisions in the manner most likely to protect and promote the long term economic value of the securities held in the scheme's accounts. We intend to support economically advantageous corporate practices while leaving direct oversight of the Company management and strategy to the Board of Directors. We seek to avoid micromanagement of Companies, as we believe that the Company's Board of Directors is best positioned to represent shareholders and oversee management on shareholders behalf. Issues of corporate social and environmental responsibility are evaluated on a case –by –case basis within the framework.

E. Board of Directors

DSPBRIM generally supports the Board's nominees in the election of Directors and generally supports proposals that strengthen the independence of the Board of Directors. As a general matter, we believe that a Company's Board of Directors (rather than shareholders) is most likely to have access to important, nonpublic information regarding a Company's business and prospects, and is therefore best-positioned to set corporate policy and oversee management. We therefore believe that the foundation of good corporate governance is the selection of responsible, qualified, independent corporate Directors who are likely to diligently represent the interest of the shareholders and oversee management of the corporation in the manner that will seek to maximize shareholder value over time. In individual cases, consideration may be given to a Director nominee's history of representing shareholder interests as a Director of the company issuing the proxy or other companies, or other factors to the extent deemed relevant by the Committee.

F. Other issues

(a) Auditors

These proposals concern those issues submitted to shareholders related to the selection of the auditors. As a general matter, we believe that corporate auditors have a responsibility to represent the interest of shareholders and provide an independent view on the propriety of financial reporting decisions of corporate management. While we will generally defer to a corporation's choice of auditor, in individual cases, consideration may be given to an auditors' history of representing shareholder interests as auditor of the Company issuing the proxy or other Companies, to the extent deemed relevant.

(b) Corporate Charter and By-Laws

These proposals relate to various requests for approval of amendments to a corporation's charter or by-laws. We generally vote against antitakeover proposals and proposals that would create additional barriers and costs to corporate transactions that are likely to deliver premiums to shareholders.

(c) Conflict of Interest and governance measures for investment in group companies of AMC and investment in companies that have subscribed to the units of any scheme of DSP BlackRock Mutual Fund (Fund):

DSPBRIM is an affiliate of a large, diverse financial services firm with many affiliates

and makes its best efforts to avoid conflicts of interest. However, conflict of interest can arise in certain situations. Few examples of such situations are:

- Investee Company is a client of DSPBRIM or its affiliates
- Investee Company is an entity participating to a material extent in the distribution of products managed or advised by DSPBRIM
- Investee Company has subscribed to the units of any of the schemes of Fund

None of the schemes of the Fund shall invest in group companies of DSPBRIM. Further, DSPBRIM shall endeavor to resolve conflicts of interest in the interest of the unitholders. Nonetheless, even though a potential conflict of interest exists, DSPBRIM may vote in opposition to the recommendations of an investee company's management.

(d) Internal Control Mechanism:

Internal controls and checks are in place at various key steps in the process of exercise of votes as considered relevant/material by DSPBRIM. The Committee, periodically reviews the implementation of the policy and disclosure requirements.

III. REPORTS TO THE BOARD

DSPBRIM will report to the Trustee Company on proxy votes it has made on behalf of the Fund at least annually.

Revenue Account for the period from Launch Date of the Scheme to March 31, 2012

2. Significant accounting policies

2.1 Basis of accounting

The financial statements are prepared on the accrual basis of accounting, under the historical cost convention, as modified for investments, which are 'marked to market'. The financial statements have been prepared in accordance with the Regulations as amended from time to time.

2.2 Determination of Net Asset Value ('NAV')

- a) The net asset value of the units of the Scheme is determined separately for the units issued under the Plans.
- b) For reporting the two net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses incurred, are allocated to the related plans in proportion to their respective capital (net assets of previous day plus subscription and redemption for the day) of the plan.

2.3 SEBI Circular No. 16/193388/2010 ('the SEBI circular') dated February 02, 2010 on "Valuation of Debt and Money Market Instruments", all debt and money market instruments with residual maturity of over 91 days not traded on a particular valuation day shall be valued at benchmark yield/matrix of spread over risk free benchmark yield obtained from agency(ies) entrusted for the said purpose by AMFI.

Pursuant to the SEBI Circular, debt instruments (with maturity greater than 91 days and less than 182 days) and money market instruments with residual maturity of over 91 days, not traded on the valuation date are valued using Crisil matrix & ICRA matrix / prices provided by such agencies as against the earlier practice of determining the valuation price based on straight-line amortization over the maturity period of the instrument.

In compliance with the above mentioned circular, with effect from August 1, 2010 (the cut-off date prescribed in circular), the Fund has changed basis of determination of market price for valuation of the above mentioned debt securities including money market instruments over 91 days maturity, not traded on valuation date

2.4 Unit Capital

Unit Capital represents the net outstanding units as at the Balance Sheet date.

Upon issue and redemption of units, the net premium or discount to the face value of units is credited or debited respectively to the Unit Premium Reserve account.

2.5 Investments

a) Accounting for investment transactions

Investments are accounted on the date of the transaction at cost including transaction costs as applicable but excluding custodian transaction charges. The front-end fee receivable, if any, is reduced from the cost of such investment.
