Listing details:

The Scheme is open ended and the Units are not listed on any stock exchange. However, the Mutual Fund may, at its sole discretion, list the Units on one or more Stock Exchanges at a later date, and thereupon the Mutual Fund will make suitable public announcement to that effect.

II. NAV Disclosure

The NAVs of the Scheme/plans will be calculated by the Mutual Fund on each Business Day and will be made available by 10 a.m. of the immediately succeeding Business Day.

The information on NAVs of the Scheme/plans may be obtained by the Unit Holders, on any day, by calling the office of the AMC or any of the Investor Service Centres at various locations. The NAV of the Scheme will also be updated on the AMFI website www.amfiindia.com and on AMC's website www.dspim.com

Latest available NAVs shall be available to unitholders through SMS, upon receiving a specific request in this regard. NAV will be calculated and declared on every Business Day, except in special circumstances described under 'Restriction on Redemption of Units' in the SAI. The AMC will declare separate NAV under Regular Plan and Direct Plan of Scheme.

Refer relevant disclosures mentioned in the Statement of Additional Information ('SAI') available on the AMC's website. i.e. www.dspim.com

The NAV of the Units of a Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.

NAV of Units under each Scheme may be calculated by either of the following methods shown below:

$$\text{NAV Per Unit (Rs.)} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current Assets} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under the Scheme}}$$

The numerical illustration of the above method is provided below.

Market or Fair Value of Scheme's investments (Rs.) = 11,42,53,650.00

Current Assets (Rs.) = 10,00,000.00

Current Liabilities and Provisions (Rs.) = 5,00,000.00

No. of Units outstanding under the Scheme = 1,00,00,000

$$\text{NAV Per Unit (Rs.)} = \frac{11,42,53,650.00 + 10,00,000.00 - 5,00,000.00}{1,00,00,000} = 11.4754$$

N.B.: The aforesaid provisions pertaining to "Calculation of NAV" shall apply in respect of each individual Scheme and/or plan as the case may be. The NAV Per Unit above is rounded off to four decimals.

The NAV will be calculated as of the close of every Business Day.

NAVs will be rounded off to four decimal places. The valuation of the Schemes' assets and calculation of the Schemes' NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

Note: In respect of Schemes having Growth and IDCW Options, there will be more than one NAV, one for each Option, after the declaration of the first IDCW by that Scheme.

While determining the price of the units, the mutual fund shall ensure that the repurchase price shall not be lower than 97% of the NAV. For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. refer to SAI.

Ongoing price for subscription (Purchase Price) / switch-in from other schemes/ plans by investor
(This is the price you need to pay for purchase/switch-in)

The Purchase Price of the Units on an ongoing basis will be calculated as described below, which is based on the Applicable NAV

Purchase Price = Applicable NAV

Illustration:

Say, Applicable NAV = Rs. 12/-

Therefore, Purchase Price = Rs.12/-

Ongoing price for redemption (sale) /switch outs (to other Scheme/plans of the Mutual Fund)/intra-Plan switching by investors (Redemption Price)
(This is the price you will receive for redemptions/switch outs)

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In the case of Schemes which currently have no Exit Load, the Redemption Price will be the Applicable NAV. In the case of Schemes having an Exit Load or in which an Exit Load is introduced, the Redemption Price will be calculated as under:

Redemption Price = Applicable NAV x (1 - Exit Load)

Illustration:

Say, Applicable NAV = Rs. 12.0000 and the Exit Load is 0.50%,

Redemption Price = 12 x (1-0.005) = Rs. 11.9400.

Investors may note that the Trustee has the right to modify the existing Load Structure in any manner or introduce an Exit Load or a combination of Exit Load and/or any other Load subject to a maximum as prescribed under the SEBI (MF) Regulations. Should the Trustee on any date, impose or enhance any load, such imposition or enhancement shall be applicable on prospective investment only.

III. Applicable timelines

Timeline for:

- **Dispatch of redemption proceeds-** As per SEBI (MF) Regulations, the Mutual Fund shall dispatch the redemption proceeds within 3 Working Days from the date of acceptance of redemption request.
Investor may note that in case of exceptional scenarios as prescribed by AMFI vide its communication no. AMFI/ 35P/ MEM-COR/ 74 / 2022-23 dated January 16, 2023 read with clause 14.1.3 of the SEBI Master Circular, the AMC may not be able to adhere with the timelines prescribed above.
- **Dispatch of Income Distribution cum Capital Withdrawal ('IDCW')-** IDCW warrants shall be dispatched to the Unit Holders within 7 Working days from the record date for declaration of the IDCW.

However, the AMC will not be liable to pay any interest or compensation or any amount otherwise, in case the AMC / Trustee is required to obtain from the investor / unit holders verification of identity or such other details relating to subscription for Units under any applicable law or as may be required by a regulatory body or any government authority, which results in delay in processing the application.

IV. Breakup of Annual Scheme Recurring expenses

These are the fees and expenses incurred for operating the Scheme. These expenses include and are not limited to Investment Management and Advisory Fee charged by the AMC, Registrar's fee, Marketing and selling costs etc., as given in the Table 2 which summarizes estimated annualized recurring expenses as a % of daily net assets of the Scheme.

The AMC has estimated that upto 1.00% of the daily net assets of the scheme will be charged to the scheme as expenses. For the actual current expenses being charged, the investor should refer to the website of the mutual fund.

Operating & recurring expenses under regulation 52 (6) & 52 (6A):

The Scheme may charge expenses within overall limits as specified in the Regulations except those expenses which are specifically prohibited. The annual total of all charges and expenses of the Scheme shall be subject to the following limits, defined under Regulation 52 of SEBI MF regulations:

Table 1: Limit as prescribed under regulation 52 of SEBI MF regulations for fund of fund scheme investing in exchange traded funds:

Particulars	As a % of daily net assets as per Regulation 52(6) (a) (i)
On total assets	1.00%

Provided that the total expense ratio to be charged over and above the weighted average of the total expense ratio of the underlying scheme shall not exceed two times the weighted average of the total expense ratio levied by the underlying scheme(s), subject to the overall ceilings as stated above.

Notes to Table 1:

In addition to expenses as permissible under Regulation 52(6)(a)(i), the AMC may also charge the following to the Scheme of the Fund under Regulation 52 (6A):

- a. Brokerage and transaction costs which are incurred for the purpose of execution of trade up to 0.12 per cent of trade value in case of cash market transactions and 0.05 per cent of trade value in case of derivatives transactions.

It is clarified that the brokerage and transaction cost incurred for the purpose of execution of trade over and above the said 0.12 percent for cash market transactions may be charged to the Scheme within the

maximum limit of Total Expense Ratio (TER) as prescribed under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

GST on investment and advisory fees:

- a) AMC may charge GST on investment and advisory fees of the Scheme in addition to the maximum limit of TER as per the Regulation 52(6) and (6A).
- b) GST on expenses other than investment and advisory fees: AMC may charge GST on expenses other than investment and advisory fees of the Scheme, if any within the maximum limit of TER as per the Regulation under 52(6) and (6A).
- c) GST on brokerage & transaction cost: GST on brokerage and transaction costs which are incurred for the purpose of execution of trade, will be within the limit of expenses as per the Regulation 52(6) and (6A).

Others:

All scheme related expenses including commission paid to distributors, by whatever name it may be called and in whatever manner it may be paid, shall necessarily be paid from the scheme only within the regulatory limits and not from the books of AMC, its associate, sponsor, trustees or any other entity through any route in terms of SEBI circulars, subject to the clarifications provided by SEBI to AMFI vide letter dated February 21, 2019 on implementation of clause 10.1.12 of Master Circular on Total Expense Ratio (TER) and performance disclosure for Mutual Fund.

Provided that the expenses that are very small in value but high in volume (as provided by AMFI in consultation with SEBI) may be paid out of AMC's books. Such expenses can be paid out of AMC's books at actuals or not exceeding 2 bps of the Scheme AUM, whichever is lower.

Further with regards to the cost of borrowings in terms of Regulation 44(2), the same shall be adjusted against the portfolio yield of the Scheme and borrowing costs in excess of portfolio yield, if any, shall be borne by the AMC.

C. Disclosure relating to changes in TER:

In accordance with Clause 10.1.8 of the SEBI Master Circular, the AMC shall prominently disclose TER on daily basis on the website www.dspim.com. Further, changes in the base TER (i.e. TER excluding additional expenses provided in Regulation 52(6A)(c) of SEBI (Mutual Funds) Regulations, 1996 and Goods and Services Tax on investment and advisory fees) in comparison to previous base TER charged to any scheme/plan shall be communicated to investors of the scheme/plan through notice via email or SMS at least three working days prior to effecting such change.

The notices of change in base TER shall be updated on the website at least three working days prior to effecting such change. Provided that any decrease in TER in a mutual fund scheme due to various regulatory requirements, would not require issuance of any prior notice to the investors.

The prior intimation/notice shall not be required for any increase or decrease in base TER due to change in AUM and any decrease in base TER due to various regulatory requirements.

A. Illustrative example for estimating expenses for a scheme with corpus of 100 crores:

The AMC in good faith has estimated and summarized in the below table for each Scheme, the expenses on a corpus size of Rs. 100 crores. The actual total expenses may be more or less than as specified in the table below. The below expenses are subject to inter-se change and may increase/decrease as per actuals, and/or any change in the Regulations.

VI. Risk factors

Scheme Specific Risk Factors:

DSPGEFOF intends to invest in units of Gold ETF. The Scheme may also invest a certain portion of its corpus in cash and cash equivalent. Hence scheme specific risk factors of DSP Gold ETF will be applicable. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying schemes.

The fund will subscribe according to the value equivalent to unit creation size as applicable for DSP Gold ETF. When subscriptions received are not adequate enough to invest in creation unit size, the subscriptions may be deployed as defined in the SID which will have a different return profile compared to gold returns profile. Alternatively, the ETF units may be acquired from the stock exchanges where the price quoted may be at variance with the underlying NAV, and which may result in higher acquisition cost.

The fund assets will predominantly be invested in DSP Gold ETF and valued at the market price of the said units on the principal exchange. The same may be at a variance to the underlying NAV of the fund, due to market expectations, demand supply of the units, etc. To that extent the performance of scheme shall be at variance with that of the underlying scheme.

Risk associated with Fund of Fund:

- The Scheme’s performance will predominantly depend upon the performance of the Underlying ETF
- Any change in the investment policy or the fundamental attributes of the Underlying ETF in which the Scheme invests may affect the performance of the Scheme.
- Dependence on the Investment Manager of the underlying ETF: The success of the underlying ETF depends on the ability of the respective Investment Manager to implement investment strategies that achieve their investment objective
- **In addition to the recurring expenses of the Scheme, the Unit Holders shall also bear the applicable expenses of the underlying ETF.** Therefore, the returns that the Unit Holder of the Scheme may receive may be impacted or may, at times, be lower than the returns that a Unit Holder, who is directly investing in the same underlying ETF, could obtain.

Risks associated with investment in Sectoral / thematic fund:

Any sectoral or thematic fund will seek to invest in underlying investments belonging to a defined sector or the theme. Investor needs to understand that a specific sector/theme may not achieve desired result / growth and may also experience unexpected changes adversely affecting the performance, thus investing in a sectoral /thematic fund could involve potentially higher volatility and risk. Further the fund would be restricted to invest in underlying investments from the defined sectors/themes and thus the concentration risk is also expected to be high.

Risk associated with underlying scheme (Gold ETFs):

As the Scheme will predominantly invest in DSP Gold ETF (the underlying scheme), the Scheme will be subject to following risk factors associated with investment in the underlying scheme:

- **Market Risk:** The value of the Units relates directly to the value of the gold held by the underlying ETF and fluctuations in the price of gold could adversely affect investment value of the Units. The factors that may affect the price of gold, inter alia, include demand & supply, economic and political developments, changes in interest rates and perceived trends in bullion prices, exchange rates, inflation trends, market movements, movement/trade of gold that may be imposed by RBI, trade and restrictions on import/export

of gold or gold jewellery etc. Hence the investor may also lose money due to fluctuation in the prices of the gold. The returns from physical gold may underperform returns from any other asset class.

- **Asset Class Risk:** The returns from the types of Securities in which the underlying ETF invests may underperform returns of general Securities markets or different asset classes. Different types of Securities tend to go through cycles of out-performance and under-performance in comparison of Securities markets.
- **Liquidity Risk:** Trading in units of the scheme on the Exchange may be halted because of market conditions or for reasons that in view of the Exchange authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units is subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange(s) and SEBI "circuit filter" rules as applicable from time to time. There can be no assurance that the requirements of the exchange/s necessary to maintain the listing of units of the scheme will continue to be met or will remain unchanged.

The Mutual Fund scheme has to sell gold only to bullion bankers/ traders who are authorized to buy gold. Though, there are adequate number of players (commercial or bullion bankers) to whom the Fund can sell gold. However, the Fund may have to resort to distress sale of gold if there is no or low demand for gold to meet its cash needs of redemption or expenses. The Scheme may retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements. The Trustee, in general interest of the Unit holders of the Scheme offered under this Scheme Information Document and keeping in view of the unforeseen circumstances / unusual market conditions, may limit the total number of Units, which can be redeemed on any Business Day

- **The Lack of an Active Trading Market**

Although the units of underlying scheme are listed and traded on the exchange, there can be no guarantee that an active trading market for the units will be maintained. If you need to sell your units at a time when no active market for them exists, the price you receive, assuming that you are able to sell them, likely will be lower than the price you would receive if an active market did exist.

- **Withdrawal from Participation by Market Makers may affect the Liquidity of Units**

If one or more Authorized Participants withdraws from participation, it may become more difficult to create or redeem Creation Units, which may reduce the liquidity of the Units. Such circumstances may be more pronounced in market conditions of increased volatility. If it becomes more difficult to create or redeem Creation Units, the correlation between the price of the Units and the NAV may be affected, which may affect the trading market for the Units.

- **Regulatory Risk:** Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Market Makers/ Large Investor to arbitrage resulting into wider premium/ discount to NAV. Any changes in any other regulation relating to import and export of gold or gold jewellery (including customs duty, sales tax and any such other statutory levies) may affect the ability of the scheme to buy/sell gold against the purchase and redemption requests received.
- **Passive Management of Investments:** Scheme shall follow a passive investment strategy. The scheme's performance may be affected by the general price decline in the gold prices. The scheme shall invest in Gold regardless of their investment merit. The scheme does not aim to take any defensive position in case of falling markets.
- **Risks associated with handling, storing and safekeeping of physical gold:** There is a risk that part or all of the Scheme's gold could be lost, damaged or stolen. Access to the Scheme's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.
- **Tracking Error and tracking difference:** The Fund Manager may not be able to invest the entire corpus in the same proportion as in the underlying benchmark due to various factors such as fees, expenses of the scheme, corporate action, cash balance, changes in underlying benchmark and regulatory policies which may affect the AMCs/schemes ability to achieve close correlation with the underlying benchmark. Tracking error may be accounted by the various reasons which includes expenses, cash balance to meet redemptions, time

to reallocate the portfolio subsequent to changes in the underlying benchmark etc. The Fund Manager will endeavour to keep the tracking error as low as possible.

“Tracking Error” i.e. the annualised standard deviation of the difference in daily returns between physical gold and the NAV of Gold ETF based on past one year rolling over data (For ETFs in existence for a period of less than one year, annualized standard deviation shall be calculated based on available data) shall not exceed 2%. The disclosure regarding the same shall be made on monthly basis on the website of the AMC.

“Tracking Difference” is the annualized difference of daily returns between the Index and the NAV of the scheme (difference between fund return and the index return).

Tracking Error and Tracking Difference may arise including but not limited to the following reasons: -

- a) Expenditure incurred by the fund.
- b) Available funds may not be invested at all times as the Scheme may keep a portion of the funds in cash to meet Redemptions, for corporate actions or otherwise.
- c) Securities trading may halt temporarily due to circuit filters.
- d) Disinvestments to meet redemptions, recurring expenses, etc.
- e) Execution of large buy / sell orders
- f) Transaction cost (including taxes and insurance premium) and recurring expenses
- g) Realisation of Unit holders' funds
- h) Accounting for indirect taxes including tax reclaims
- i) SEBI Regulations (if any) may impose restrictions on the investment and/or disinvestment activities of the Scheme. Such restrictions are typically outside the control of the AMC and may cause or exacerbate the Tracking Error

It will be the endeavor of the fund manager to keep the tracking error as low as possible.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the benchmark.

In case of unavoidable circumstances in the nature of force majeure which are beyond the control of the AMCs, the tracking error may exceed 2%, and the same shall be brought to the notice of the Board of DSP Trustee Private Limited ('Trustees') with the corrective actions taken by the AMC, if any.

- **Redemption Risk:** Investors may note that even though this is an open ended scheme, the Scheme would repurchase units in creation unit size only. Thus, if the unit holding is less than the creation unit size then it can be sold only through the secondary market on the exchange where the units are listed, subject to rules and regulations of the Stock Exchange. The AMC will appoint Market Makers (MMs) to provide liquidity for the units of Gold ETFs in secondary market on an ongoing basis. The Market Maker(s) would offer daily two-way quote (buy and sell quotes) in the market. Further, the price received upon redemption of units may be less than the value of the gold represented by them.

The market price of the ETF unit like any other listed security is largely dependent on two factors viz. the intrinsic value of the unit (or NAV) and demand and supply of the units in the market. Sizeable demand or supply of the units in exchange may lead to market price of the units to quote at premium or discount to NAV. Hence, the units of the scheme may trade above or below the NAV. However, given that the investors can transact with AMC directly beyond the creation unit size of the scheme there should not be a significant variation (large premium or discount) and it may not sustain due to the arbitrage opportunity available.

The gold price reflects the prices of gold at a point in time, which is the price at close of business day. The scheme, however, may trade these securities at different points in time during the trading session and therefore the prices at which the scheme trades may not be identical to the closing price of gold.

Investments by the underlying Scheme are subject to availability of gold. If favorable investment opportunities do not exist or opportunities have notably diminished, the scheme may suspend accepting fresh subscriptions.

Conversion of underlying physical gold into the Units of the Scheme may attract capital gain tax depending on acquisition cost and holding period.

- **Currency Risk:** The formula for deriving the NAV of the units of the scheme is based on the imported (landed) value of the gold, which is computed by multiplying international market price by US Dollar value. Hence the value of NAV or gold will depend upon the conversion value and attracts all the risk associated with such conversion.
- **Physical gold:** There is a risk that part or all of the Scheme's gold could be lost, damaged or stolen. Access to the Scheme's gold could also be restricted by natural events or human actions. Any of these actions may have adverse impact on the operations of the scheme and consequently on investment in units.
- **Indirect taxation:** For the valuation of gold by the Scheme, indirect taxes like customs duty, VAT, etc. would also be considered. Hence, any change in the rates of indirect taxation / applicable taxes would affect the valuation of the Scheme.

During the process of creation or redemption of the Scheme in creation unit size, the AMC will source or sell the physical gold from a counterparty. The price at which the gold is bought or sold at will include a spread also, apart from cost price of the gold, taxes and other transaction cost. Thus cost may vary depending on the source from which gold is bought or sold, due to different cost being charged by the counterparty. This varying buying or selling cost will impact the cost at which units are created for the investor or redeemed for the investor. AMC will most likely be passing on all the cost associated with buying and selling of the physical gold, including spread, transaction cost, taxes etc. on to the investor/investors. This will impact the per unit cost realized by the investor in case of creation or redemption directly with the AMC.

- **Counter party Risk:** There is no Exchange for physical gold in India. The Mutual Fund may have to buy or sell gold from the open market, which may lead to counter party risks for the Mutual Fund for trading and settlement.
- **Risks Related to the Custody of Gold**

The Custodian is responsible for the safekeeping of the gold bullion and also facilitates the transfer of gold bullion into and out of the vault. Although the Custodian is a market maker, clearer and approved weigher under the rules of the LBMA (which sets out good practices for participants in the bullion market), the LBMA is not an official or governmental regulatory body. Accordingly, the ETF is dependent on the Custodian to comply with the best practices of the LBMA and to implement satisfactory internal controls for its gold bullion custody operations in order to keep the gold bullion secure. The Custodian is responsible for loss or damage to the gold only under limited circumstances. The AMC does not insure its gold (Underlying gold of the scheme). The Custodian maintains insurance on such terms and conditions as it considers appropriate in connection with its custodial obligations under the Custodian Agreement and is responsible for all costs, fees and expenses arising from the insurance policy or policies. The AMC is not a beneficiary of any such insurance and does not have the ability to dictate the existence, nature or amount of coverage. Therefore, Shareholders cannot be assured that the Custodian maintains adequate insurance or any insurance with respect to the gold held by the Custodian on behalf of the Trust.

- **Operational Risks:** Gold Exchange Traded Funds are relatively new products and their value could decrease if unanticipated operational or trading problems arise. Gold Exchange Traded Fund, an open ended Exchange Traded Fund, is therefore subject to operational risks. The scheme may not be able to acquire or sell the desired number of units of gold due to conditions prevailing in the market, such as, but not restricted to circuit filters on the gold ETF (if any), liquidity and volatility in gold prices. The units of the scheme will be compulsorily issued in dematerialised form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository (ies) on which the Mutual Fund has no control. Further, Investors may note that buying and selling units on stock exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the stock exchange/ broker, payment of brokerage, securities transactions tax and such other costs.

The NAV of the units of Gold ETF are determined based on the formula as prescribed by the SEBI, whereas the actual price in the market may be different from the value of gold at based on the prescribed

formula. This may lead to a condition where the NAV is too different from the domestic market price of gold. In such cases the trustees reserve the right to delay or suspend the buy/sell transactions.

A day on which valuation on London Bullion Market Association (LBMA) is not available shall not be a Business day and hence NAV for the said day shall not be available to the Investors.

Actual or perceived disruptions in the processes used to determine the LBMA Gold Price, or lack of confidence in that benchmark, may adversely affect the return on your investment in the scheme (if any).

The Trustee, in general interest of the Unit holders of the Scheme offered under this Scheme Information Document and keeping in view of the unforeseen circumstances/ unusual market conditions, may limit the total number of Units, which can be redeemed on any Business Day.

Governments, central banks and related institutions, own a significant portion of the aggregate world gold holdings. If one or more of these institutions decides to sell in amounts large enough to cause a decline in world gold prices, the price of Units of the Scheme will be adversely affected.

If the process of creation and redemption of Baskets encounters any unanticipated difficulties or is materially restricted due to any illiquidity in the market for physical gold, the possibility for arbitrage transactions by Market Makers, intended to keep the price of the ETF units closely linked to the price of gold may not exist and, as a result, the price of the ETF units may fall or otherwise diverge from NAV

Conversion of underlying physical gold into the Units of the Scheme may attract capital gain tax depending on acquisition cost and holding period.

- **Risk associated with Lending of physical Gold:** The physical gold lending activity by the underlying Scheme will have the inherent probability of collateral value drastically falling in time of strong downward market trends resulting in inadequate value of collateral. It is also possible that the borrowing party and / or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Also the risk could be in the form of non-availability of ready physical gold for sale, during the period physical gold is lent. Physical gold would be lent if permitted by the concerned regulatory authorities in India.

Risk Factors associated with investments in Cash and Cash Equivalents:

- **Price-Risk or Interest-Rate Risk:** Cash and cash equivalents run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. However, Cash and cash equivalents in this scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.
- **Reinvestment Risk:** Investments in cash and cash equivalents may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain cash and cash equivalents give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- **Risk factors associated with investment in Tri-Party Repo:** The mutual fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual

fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

B. RISK MITIGATION STRATEGIES

Portfolio Turnover Policy

Portfolio turnover is defined as the lower of aggregate value of purchases or sales as a percentage of the corpus of a scheme during a specified period of time. The Scheme is open ended, with subscriptions and redemptions expected on a daily basis, resulting in net inflow/outflow of funds, and on account of the various factors that affect portfolio turnover, it is difficult to give an estimate, with any reasonable amount of accuracy. Therefore, the Scheme has no specific target relating to portfolio turnover.

Units of mutual funds represent an investor's share in a mutual fund scheme. When investors buy mutual fund units, they pool their money with other investors to collectively invest in a diversified portfolio of assets such as stocks, bonds, or other securities. Each unit reflects the proportionate ownership of the fund's assets. The value of these units, known as the Net Asset Value (NAV), fluctuates based on the performance of the underlying assets. DSP Gold ETF is an open ended exchange traded fund replicating/tracking domestic prices of Physical Gold (based on London Bullion Market Association (LBMA) gold daily spot fixing price).

- Treasury Bills- Treasury bills (T-bills) are short-term government securities issued at a discount to their face value and mature within one year. They do not pay periodic interest but provide returns by maturing at their full face value, with the difference between the purchase price and the maturity value representing the investor's earnings. T-bills are considered low-risk investments due to government backing.

3. Short Term Deposits-

F. Listing and transfer of units

Listing of units:

The Scheme is open ended and the Units are not proposed to be listed on any stock exchange. However, the Mutual Fund may, at its sole discretion, list the Units on one or more Stock Exchanges at a later date, and thereupon the Mutual Fund will make suitable public announcement to that effect.

The Mutual Fund will offer and redeem the Units on a continuous basis during the Continuous Offer Period.

The Unit holders are given an option to hold the Units by way of an Account Statement (physical form) or in Dematerialized (demat form). Transfer of Units is possible in Demat and as well as in non-demat.

Units held in Demat form are transferable (subject to lock-in period, if any and subject to lien, if any marked on the units) in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 2018, as may be amended from time to time. Transfer can be made only in favor of transferees who are capable of holding Units and having a Demat Account. The delivery instructions for transfer of Units will have to be lodged with the DP in requisite form as may be required from time to time and transfer will be effected in accordance with such rules / regulations as may be in force governing transfer of securities in dematerialized mode. Further, for the procedure of release of lien, the investors shall contact their respective DP.

However, if a person becomes a holder of the Units consequent to operation of law or upon enforcement of a pledge, the Mutual Fund will, subject to production of satisfactory evidence, effect the transfer, if the transferee is otherwise eligible to hold the Units. Similarly, in cases of transfers taking place consequent to death, insolvency etc., the transferee's name will be recorded by the Mutual Fund subject to production of satisfactory evidence.

Transfer of units held in Non-Demat [Statement of Account ('SOA')] mode:

As per the AMFI Best Practices Guidelines Circular No.116 /2024-25 dated August 14, 2024 on 'Standard Process for Transfer of Units held in Non-Demat (SoA) mode', units held by individual unitholders in Non-Demat ('SoA') mode can be transferred only in following cases-

- (i) Surviving joint unitholder, who wants to add new joint holder(s) in the folio upon demise of one or more joint unitholder(s).
- (ii) A nominee of a deceased unitholder, who wants to transfer the units to the legal heirs of the deceased unitholder, post the transmission of units in the name of the nominee.
- (iii) A minor unitholder who has turned a major and has changed his/her status from minor to major, wants to add the name of the parent / guardian, sibling, spouse etc. in the folio as joint holder(s).

Partial transfer of units held in a folio shall be allowed. If the request for transfer of units is lodged on the record date, the IDCW payout/ reinvestment shall be made to the transferor.

Redemption of the transferred units shall not be allowed for 10 days from the date of transfer. This will enable the investor to revert in case the transfer is initiated fraudulently.

Mode of submitting the Transfer Request Non-Demat (SOA) mode

The facility for transfer of units held in SoA mode shall be available only through online mode via the transaction portals of the RTAs and the MF Central, i.e., the transfer of units held in SoA mode shall not be allowed through physical/ paper-based mode or via the stock exchange platforms, MFU, channel partners and EOPs etc.

For details on pre-requisites, payment of stamp duty on transfer of units, please refer SAI.

G. Dematerialization of units

The Unit holders would have an option to hold the Units in demat form or account statement (non-demat) form. Units held in Demat Form are freely transferable. The Applicant intending to hold Units in demat form will be required to have a Demat account with a Depository Participant (DP) of the NSDL/ CDSL and will be required to mention in the application form DP's Name, DP ID No. and Beneficiary Account No. with the DP at the time of purchasing Units.

For further details, please refer SAI.

H. Minimum Target amount

(This is the minimum amount required to operate the scheme and if this is not collected during the NFO period, then all the investors would be refunded the amount invested without any return.)

Not Applicable.

I. Maximum Amount to be raised (if any)

This point does not apply, as the ongoing offer of the Scheme has commenced after the NFO, and the Units are available for continuous subscription and redemption.

J. Dividend Policy (IDCW)

(i) Growth Option

The Mutual Fund will not declare any IDCWs under this option. The income earned under this Option will remain invested in the option and will be reflected in the NAV. This option is suitable for investors who are not looking for current income but who have invested with the intention of capital appreciation. Moreover, if Units under this option are held as capital asset for a period of greater than twelve months from the date of acquisition, Unit Holders will get the benefit of long term capital gains tax.

(ii) Income Distribution cum Capital Withdrawal option (IDCW)

The above Option is suited for investors seeking income through IDCWs declared by the Scheme. Only Unit Holders opting for the IDCW Option (Option B) will receive IDCWs. The Trustee, in its sole discretion, may also declare interim IDCWs.

This Option in turn offers two sub-options i.e. "Payout IDCW" and "Reinvest IDCW", as under:

• Payout IDCW

As per the SEBI (MF) Regulations, the Mutual Fund shall dispatch IDCW proceeds to the Unit Holders within 7 Working Days of the record date of the IDCW. IDCWs will be paid by cheque, net of taxes, as may be applicable. Unit Holders will also have the option of direct payment of IDCW to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the registered address of the sole/first holder as indicated in the original application form.

To safeguard the interest of Unit Holders from loss or theft of IDCW cheques, investors should provide the name of their bank, branch and account number in the application form. IDCW cheques will be sent to the Unit Holder after incorporating such information.

• Reinvest IDCW

Under this sub-option, IDCWs are reinvested by way of allotment of additional Units of the Scheme, instead of receiving IDCW payout. Such additional Units by way of reinvestment of IDCWs will be at the Applicable NAV on the next Business day after the Record Date. The additional Units issued under this sub-option and held as long term capital asset will get the benefit of long-term capital gains tax if sold after being held for greater than twelve months. For this purpose, twelve months will be computed from the date when such additional units are allotted.

Effect of IDCW: On declaration of IDCW, the NAV of the IDCW option will further stand reduced by the applicable statutory levy/surcharge/cess/ any other levy payable by the scheme in respect of separate category of investors if any. Notwithstanding varying rates of statutory levies, the ex- IDCW NAV will remain the same for all categories of investors in a particular option, though the amount of IDCW received by Unit Holders may vary depending on the category of each Unit Holder. For details on taxation of IDCW please refer the SAI.

For details on taxation of IDCW please refer the SAI.

Notes:

The Trustee may decide to declare distributions under the IDCW Option of the Scheme subject to availability of distributable surplus. There is no assurance or guarantee to the Unit Holders as to the rate of IDCW will be regularly paid, though it is the intention of the Scheme to make IDCW distribution under the respective plan/options of the Scheme.

For IDCW Options having a defined frequency, the Trustee at its sole discretion may also declare interim distributions between two successive record dates. The declaration/actual payment of IDCW and the frequency thereof will depend on the availability of distributable surplus computed in accordance with SEBI (MF) Regulations. The decision of the Trustee in this regard shall be final.

An investor on record of the CAMS / Statement of Beneficiary Owners maintained by the Depositories for the purpose of IDCW distribution is an investor who is a Unit Holder/ Beneficial Owners as on the Record Date. In order to be a Unit Holder, an investor has to be allocated Units representing receipt of clear funds by the Scheme.

IDCW, if declared, will be paid (subject to deduction of tax at source, if any) to those Unit holders whose names appear in the Register of Unit holders on the record date. In case of units held in dematerialized mode, the Depositories (NSDL/CDSL) will provide the list of eligible demat account holders and the number of units held by them in electronic form on the Record date to the Registrars and Transfer Agent of the Mutual Fund.

On payment of IDCW, the NAV will stand reduced by the amount of IDCW and Dividend distribution tax/statutory levy (if applicable) paid. The Trustee/AMC reserves the right to change the record date from time to time.

IDCW Distribution Procedure

In accordance with clause 11.6.1 of Master Circular, the procedure for IDCW Distribution would be as under:

- a. Quantum of IDCW and the record date will be fixed by the Trustee. IDCW so decided shall be paid, subject to availability of distributable surplus.
